*Suggestions to Military Riflemen Apr 03 2023 Suggestions To Military Riflemen comprises a complete and comprehensive guide detailing the correct use of a rifle. Written as a handbook for the military, this scarce classic is a must-have for rifle enthusiasts and provides a great source for historical research. Complete with the original artwork and diagrams, this wonderful text is a detailed How-to guide for the aspiring rifleman, covering such topics as: The selection of an accurate rifle, The care of the rifle, The firing positions, Holding and pulling the trigger, Position and aiming drills, The sights and their adjustment, etc. Full of timeless information that is still as useful today as at the time of its first publication, this book is a must-have for any collector of antiquated shooting literature. Originally published in 1909, this scarce text is republished now with an introductory biography of the author.*

*The Deer Hunter's Almanac Feb 18 2022 From the Introduction: "There is not a successful deer hunter in the world who has not come up with his own peculiar methods -- some of them secret, some not -- for beating the long odds of killing a deer. The Ojibwa Indians of the Great*

Lakes figured out they could attract deer by smoking wild aster in a pipe, the smell of which was like the scent of a deer's hooves. Other tribes -- such as the Choctaws and Cherokees in the Southeast -- would carry skinned-out deer heads on their belts, which they could wear over their heads whenever they needed to make a stalk (this is no longer an advisable, or legal, technique). They used decoys and calls, and they knew that banging a pair of antlers together could summon a buck during the rut. In this book we have tried to compile some of the best information and most interesting pieces written about deer in *Sports Afield* since the magazine was founded in 1887. There were not as many deer to hunt back then, but over the last quarter century deer populations have boomed in nearly every state but Alaska and Hawaii, and so have the articles written about them. Many of these pieces originally appeared in the *Sports Afield Almanac*, which was introduced by Editor Ted Kesting in 1972; others appeared as departments or short features. All told, more than 250 deer hunters contributed, making this, we hope, a very unique look at what is now America's favorite game animal. Some of the contributors-like Dwight Schuh and Peter Fiduccia, Tom McIntyre and Ted Kerasote-are what we would call pros. They have hunted, studied and written about deer all their lives. Others are just guys who wanted to share a couple of their best deer-hunting secrets. Do not be surprised if you turn up some contradictory views. There's more than one way to shoot, skin, and cook a deer; but it may be that the best way of

*Robot Manipulators Nov 05 2020 This book presents the most recent research advances in robot manipulators. It offers a complete survey to the kinematic and dynamic modelling, simulation, computer vision, software engineering, optimization and design of control algorithms applied for robotic systems. It is devoted for a large scale of applications, such as manufacturing, manipulation, medicine and automation. Several control methods are included such as optimal, adaptive, robust, force, fuzzy and neural network control strategies. The trajectory planning is discussed in details for point-to-point and path motions control. The results in obtained in this book are expected to be of great interest for researchers, engineers, scientists and students, in engineering studies and industrial sectors related to robot modelling, design, control, and application. The book also details theoretical, mathematical and practical requirements for mathematicians and control engineers. It surveys recent techniques in modelling, computer simulation and implementation of advanced and intelligent controllers.*

*Engineering Psychology and Cognitive Ergonomics: Cognition and Design May 12 2021* This book constitutes the proceedings of the 14th International Conference on Engineering Psychology and Cognitive Ergonomics, EPCE 2017, held in Vancouver, Canada, in July 2017. HCII 2017 received a total of 4340 submissions, of which 1228 papers were accepted for publication after a careful reviewing process. The papers thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The two volumes set of EPCE 2017 presents 58 papers which are organized in the following topical sections: cognition and design, cognition in aviation and space, cognition and driving, mental
