Intelligence-Groups. MAT Practice Questions are the simplest way to prepare for the MAT test. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. Taking lots of practice tests helps ensure that you are not surprised or

disappointed on your test day. Our MAT Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why

you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our MAT Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand. This updated manual prepares prospective MAT test takers with a diagnostic test and ten full-length practice exams. Self-scoring answer keys follow each test and answer sheets for test-takers' use are located at the back

of the book. Also presented are approximately 1300 additional practice exam questions with answers, plus advice on solving analogy problems. Helpful brush-up check lists cover graduate level vocabulary with brief definitions, selected foreign words and phrases used in English and their meanings, and names of important persons in history, science, technology, and the arts that test-takers should be able to recognize.
