Writing Anthropology Aug 19 2021 In *Writing Anthropology*, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at it—to keep writing as the most important way to not only improve one's writing but to also honor the stories and lessons learned through research.

Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities. Contributors. The Course Outline of Record Apr 02 2020 Curriculum is at the core of any educational endeavor, and the course outline of record plays a central role both internal and external to the California Community College System. This update to the original Academic Senate paper "Components of a Model Course Outline of Record" also incorporates material from the previously published Academic Senate papers "Stylistic Considerations in Writing Course Outlines of Record" and "Good Practices for Course Approvals". In spite of the fact that internal and external standards for courses regularly evolve, this paper offers the curriculum developer a clear framework for the writing of a course outline of record. The paper begins with a broad overview of the development process and then moves to an element by element explanation of the course outline of record itself. For each element, stylistic and practical considerations are provided along with the appropriate citations where such inclusion helps to clarify the regulatory intent to ensure quality. The paper also includes discussion of related topics such as discipline assignment and the potential effects of compressed calendars. The paper concludes with curricular considerations beyond the course outline of record, and a detailed glossary of terms. Chapters are individually referenced. Appended are: (1) Glossary; (2) Section 55002; (3) Course Outline of Record Additional Requirements; (4) Relevant Publication Sources; (5) Resource Links; (6) Course Outline Examples; and (7) Descriptive Terms. (Contains 2 footnotes.)

A Manual for Writers of Research Papers, Theses, and Dissertations, Eighth Edition May 28 2022 A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

Politics and the English Language Nov 09 2020 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times
