Soft Target Sep 24 2022 A provocative look at one of Canada's biggest tragedies On March 16, 2005, almost twenty years after one of the biggest mass murders in Canadian Aviation history, the Air-India Case concluded with a verdict that authors Zuhair Kashmeri and Brian McAndrew predicted sixteen years ago when *Soft Target* was first published: not guilty. In this second edition, the two offer a detailed foreword that brings readers up-to-date with some startling new information surrounding the twin bombings on June 23, 1985 in the air over the Atlantic, and on the ground in Japan, which left 331 people dead. They offer key details from the trial of Ripudaman Singh Malik and Ajaib Singh Bagri that took place in a specially-built Vancouver courtroom, leads that were not followed up, and more details of India's intelligence service's clandestine interference in Canada. They explain how their own prediction that justice would not be found because of a botched investigation came true, and that only a public inquiry will offer closure to the families of the victims.

Early Chauhan Dynasties Oct 26 2022 In the present volume, for the first time, a connected history of the Chauhans, from their beginnings in Bhrgukachchha in eight century A.D. to the time of Ala-ud-din Khalji and Hammira in the fourteenth century has been presented. The author has shown that the Agnikula myth goes back to the Ramayana and is, in fact, traditional to Aryan Hindus. He also establishes conclusively that contrary to the common belief that India fell an easy prey to Muslim invaders, and the resistance of the Hindu rulers broke down after the defeat of Prithviraj, the descendants of the Chauhan Emperor, even after they lost Ajmer, continued to fight with determination for two hundred years. Considerable new light is also thrown on the relations between the Chaulukya Empire and the Chauhans of Sakambhari, especially during the reigns of Siddharaja and Kumarapala. A valuable portion of the book is devoted to the social and economic condition of the Chauhan territory during the eleventh, twelfth and thirteenth centuries. The enumeration and identification of the towns and villages in the country collected from the literature of the time is especially important. The names of the coins in use, the weights and measures will also be found very useful.

Casting Kings Mar 19 2022 Based on three years of anthropological fieldwork in the Indian state of Rajasthan, *Casting Kings* explores the manner in which semi-nomadic performers known as Bhats understand, and also subvert, caste hierarchies. A number of scholars have recently contended that caste is invented and thus a fiction of a kind. But focus in these studies is typically placed on the way caste is imagined according to the agendas and desires of elite Westerners such as colonial officials. In this book, by contrast, the author argues that Bhats themselves understand the imaginative dimensions of caste relations. Indeed, such insights are shown to lie at the heart of the Bhats traditional profession of praise- and insult-singing. Likewise, the author demonstrates how the ability to cleverly rework and even sabotage lingering caste inequalities continues to form the basis for Bhat claims to status and dignity in contemporary India.

Invertonomics Mar 07 2021 For decades since Independence, India has been beset by some fundamental and chronic problems. There is poverty and inequity in society, the air in cities is hazardous, there's garbage on the roads, women feel unsafe in public places, the traffic is poorly managed, levels of basic education are low, the rural economy is decadent and there is an overall governance deficit. These problems have lasted so long that they often feel unsolvable in our lifetimes. But Goonmeet Singh Chauhan, an architect and futurist with a passion for transforming people's lives, argues that they can actually be solved decisively. For achieving this, he presents a new methodology that he calls *Invertonomics* -- inverting problems and looking at them instead as economic opportunities. He identifies eight persistent problem areas and proposes well-resolved, thought through, pragmatic and, in some cases, successfully implemented models for tackling them. These are solutions that will help us realize the dream of a great India.
