The Borghese Collections and the Display of Art in the Age of the Grand Tour Dec 16 2021 The redecoration of the exhibition spaces at the Borghese palace and villa, undertaken together with the reinstallation of the family's vast art collections, was one of the most important events in the cultural life of eighteenth-century Rome. In this comprehensive study, Carole Paul reconstructs the planning and execution of the project and explains its multifaceted significance: its place in the history of Italian art, architecture, and interior design at a complex moment of transition from baroque to neoclassical style, as well as its unrecognized but profound influence on the development of the modern art museum. The study shows how the installations and decorations worked together to evoke traditional themes in innovative ways. Addressed primarily to a new audience of tourists from abroad, the thematic content of the spaces celebrated the greatness of the Borghese family and of Roman tradition, while their stylistic diversity and sophistication made a case for the continued vitality - even modernity - of Roman art and culture. Designed for the exercise of a highly refined social performance, these sites helped to model the experience of art as a form of enlightened modern civility.

English Mythography in its European Context, 1500-1650 Apr 07 2021 Greco-Roman mythology and its reception are at the heart of the European Renaissance, and mythographies-texts that collected and explained ancient myths-were considered indispensable companions to any reader of literature. Despite the importance of this genre, English mythographies have not gained sustained critical attention, largely because they have been wrongly considered mere copies of their European counterparts. This volume focuses on the English mythographies written between 1577 and 1647 by Stephen Batman, Abraham Fraunce, Francis Bacon, Henry Reynolds, and Alexander Ross: it places their texts into a wider, European context to reveal their unique English take on the genre and also unfolds the significant role myth played in the broader culture of the period, influencing not only literary life, natural philosophy and poetics, but also religious conflicts and Civil War politics. In doing so it demonstrates, for the first time, the considerable explanatory value classical mythology holds for the study of the English Renaissance and its literary culture in particular, and how early modern England answered a question we still find fascinating today: what is myth?

Votive Body Parts in Greek and Roman Religion Feb 03 2021 This book examines a type of object that was widespread and very popular in classical antiquity - votive offerings in the shape of parts of the human body. It collects examples from four principal areas and time periods: Classical Greece, pre-Roman Italy, Roman Gaul and Roman Asia Minor. It uses a compare-and-contrast methodology to highlight differences between these sets of votives, exploring the implications for our understandings of how beliefs about the body changed across classical antiquity. The book also looks at how far these ancient beliefs overlap with, or differ from, modern ideas about the body and its physical and conceptual boundaries. Central themes of the book include illness and healing, bodily fragmentation, human-animal hybridity, transmission and reception of traditions, and the mechanics of personal transformation in religious rituals.

Kainua (Marzabotto) Mar 26 2020 This volume brings together leading scholars of Etruria to provide up-to-date findings from the key archaeological site of Kainua. Located in what is now the Italian town of Marzabotto, Kainua is the only Etruscan site whose complete urban layout has been preserved, making it possible to trace houses, roads, drainage systems, cemeteries, craft workshops, and an acropolis. Under excavation since the 1850s, Kainua offers a trove of insights into Etruscan culture and society. The volume's editor, Elisabetta Govi, and her fellow experts examine the material evidence underlying our understanding of the history, economy, religion, and social structures of Kainua, including trade routes that linked the city with the wider Mediterranean. Particularly exciting are recent discoveries of sanctuaries dedicated to Tinia and Uni, analogous to the Greek Zeus and Hera, which provide new information about Etruscan cults. Kainua (Marzabotto) also draws on the latest research to reconstruct the city's foundation rites, a sacred charter, and urban plan. Finally, the authors explore the site's archaeological history, discussing new knowledge made possible since the introduction of modern techniques of remote sensing and 3D modeling.
