A ringing indictment of homework as it is, and what can replace it. Death and taxes come later; what seems inevitable for children is the idea that after spending the day at school, they must then complete more academic assignments at home with predictable results: stress and conflict, frustration and exhaustion. Parents respond by reassuring themselves that at least the benefits outweigh the costs. But what if they don't? In The Homework Myth, nationally known educator and parenting expert Alfie Kohn systematically examines the defenses of homework--that it promotes higher achievement, "reinforces" learning, and teaches responsibility and skills and responsibility. None of these assumptions, he shows, actually passes the test of research, logic, or experience. So why do we continue to administer this modern cod liver oil -- or even a larger dose? Kohn's incisive analysis reveals how a mistrust of children, a set of misconceptions about learning, and a misguided focus on competitiveness have all left our kids with less free time, and our families with more conflict. Pointing to parents who have fought back -- and schools that have proved educational excellence is possible without homework -- Kohn shows how we can rethink what happens during and after school in order to rescue our families and our children's love of learning. 180 Days of Social Studies is a fun and effective daily practice workbook designed to help students build social studies content knowledge.
