Writing History in the Digital Age May 01 2020 Writing History in the Digital Age began as a "what-if" experiment by posing a question: How have Internet technologies influenced how historians think, teach, author, and publish? To illustrate their answer, the contributors agreed to share the stages of their book-in-progress as it was constructed on the public web. To facilitate this innovative volume, editors Jack Dougherty and Kristen Nawrotzki designed a born-digital, open-access, and open peer review process to capture commentary from appointed experts and general readers. A customized WordPress plug-in allowed audiences to add page- and paragraph-level comments to the manuscript, transforming it into a socially networked text. The initial six-week proposal phase generated over 250 comments, and the subsequent eight-week public review of full drafts drew 942 additional comments from readers across different parts of the globe. The finished product now presents 20 essays from a wide array of notable scholars, each examining (and then breaking apart and reexamining) if and how digital and emergent technologies have changed the historical profession.

Translingual Dispositions Dec 28 2019 Working within the framework of translanguaging, the contributors to this collection offer nuanced explorations of how translingual dispositions can be facilitated in English-medium postsecondary writing programs and classrooms. The authors and editors comprise a wide array of writing scholars from diverse teaching and learning contexts with a corresponding array of institutional, disciplinary, and pedagogical expectations and pressures. The work shared in this collection offers readers cases of translingual dispositions that consider the personal, pedagogical, and institutional challenges associated with the adoption of a translingual disposition and interrogate academic translingual practices in U.S. and international English-medium settings.

The Practical Real-Time Enterprise Nov 18 2021 The basic idea of the real-time enterprise is to become quicker. A business which wants to become a real-time enterprise has to acquire three main abilities: - Internal and external data is integrated quickly and in real time in a well-organized company data pool, - Analyses of information in the company data pool can be obtained in real time, across function boundaries and at the touch of a button, - The number of working steps performed in batch mode is shifting dramatically in favor of immediate completion in real time. The issue of communications - or real-time communications - plays a special role here. Studies have shown that processing times sometimes double when necessary communication events are handled in batch mode in the business process and not in real time. In other words, when an activity cannot be completed and lies around for days because an urgently needed partner cannot be contacted. The necessity of acquiring these three abilities has implications for the process-related, technical and organizational aspects of a business that are dealt with in detail in this book.

Using Trends and Scenarios as Tools for Strategy Development Jul 27 2022 Is my enterprise really prepared for future business? What can I do to become more competitive? Ulf Pillkahn's book is directed at all of those seeking answers to these questions: executives in strategic positions, business analysts, consultants, trend scouts, marketing and product managers and research engineers. The book presents the two most powerful tools for future planning: environmental analysis, based on the use of trends, as well as the development of visions of the future through the use of scenarios. While scenarios are generally regarded as a classical management tool, it is expected that the importance of trends will gain tremendously in the coming years. Pillkahn demonstrates how to build robust strategies by aligning the results of environmental and enterprise scenarios, thereby offering entirely new insights. "Using Trends and Scenarios as Tools for Strategy Development" convincingly illustrates why efficient observation of the environment of an enterprise is an absolutely essential factor for strategy development, and why strategy development only works if it is institutionalized as a permanent enterprise process. It also addresses the issue of what information is needed to keep both processes running. The book further describes how trends can be categorized, and offers advice on how to glean the essential information from the vast variety of trends. Information is provided on how scenarios are used as a holistic instrument for creating visions and pictures of the future, and how the results of trend research and scenario techniques find their way into entrepreneurial strategy development. An optimized strategy development process is also outlined. Practical examples and real-life pictures of the future round off Pillkahn's insightful discussion of future business planning.

The Rise of Victimhood Culture Aug 04 2020 *The Rise of Victimhood Culture* offers a framework for understanding recent moral conflicts at U.S. universities, which have bled into society at large. These are not the familiar clashes between liberals and conservatives or the religious and the secular: instead, they are clashes between a new moral culture—victimhood culture—and a more traditional culture of dignity. Even as students increasingly demand trigger warnings and “safe spaces,” many young people are quick to police the words and deeds of others, who in turn claim that political correctness has run amok. Interestingly, members of both camps often consider themselves victims of the other. In tracking the rise of victimhood culture, Bradley Campbell and Jason Manning help to decode an often dizzying cultural milieu, from campus riots over conservative speakers and debates around free speech to the election of Donald Trump.

The Apple Way Jul 15 2021 Most hardware and software companies experience cycles of success and failure, that pattern is certainly not a compelling publishing topic. When you add in the name of Apple Computer, the picture changes from ho-hum to humdinger though. Right now, Apple's shares have surged to a 4-year high, and along with the runaway success of Apple's iPod (10 million iPods sold as of Dec 2004, and 2 million+ units sold in the last 3 months alone), Apple stock seems poised to only increase in value. There's a “halo” effect beginning to take hold – simple put, consumers and business people alike are so impressed with iPod's technology and success that they're taking a second look at other Apple products and in particular Macintosh computers. If the current trends continue, Apple will have sparked yet another revolution in the personal computer arena, and will regain ground many thought was lost for good. *The Apple Way* shows how this company's steps and missteps have molded and shaped them, and what lessons the world at large can learn from Apple. Apple has emerged as a Wall Street phenomenon with its stock increasing in value some 250% in the past year Uses the proven pedagogy of the existing *Way* books to provide bite-sized business success maxims and Apple's underlying guiding principles Includes lessons learned the hard way by revealing the company's strengths and obstacles Cruikshank has played a role in developing the following M-H books: *Pink Cadillac*, *Leadership Secrets of Colin Powell*, *What It Takes to Be Number One*, *The Essential Vince Lombardi*, *Get Better or Get Beaten* (condensed edition), plus many others

The research presented is new and the perspectives original. This collection of essays casts significant new light on phenomena and practices which have long been central to anthropology, while at the same time introducing new substantive materials."—Don Brenneis, University of California, Santa Cruz

Temporary Palaces Jul 03 2020 The Great Houses of the prehistoric and early medieval periods were enormous structures whose forms were modelled on those of domestic dwellings. Most were built of wood rather than stone; they were used over comparatively short periods; they were frequently replaced in the same positions; and some were associated with exceptional groups of artefacts. Their construction made considerable demands on human labour and approached the limits of what was possible at the time. They seem to have played specialised roles in ancient society, but they have been difficult to interpret. Were they public buildings or the dwellings of important people? Were they temples or military bases, and why were they erected during times of crisis or change? How were their sites selected, and how were they related to the remains of a more ancient past? Although their currency extended from the time of the first farmers to the Viking Age, the similarities between the Great Houses are as striking as the differences. This study focuses on the monumental buildings of northern and northwestern Europe, but draws on structures over a wide area, extending from Anatolia as far as Brittany and Norway. It employs ethnography as a source of ideas and discusses the concept of the House Society and its usefulness in archaeology. The main examples are taken from the Neolithic and Iron Age periods, but this account also draws on the archaeology of the first millennium AD. The book emphasises the importance of comparing archaeological sequences with one another rather than identifying ideal social types. In doing so, it features a range of famous and less famous sites, from Stonehenge to the Hill of Tara, and from Old Uppsala to Yeavinger.

Participating in crime Oct 18 2021 This is the second of two Commission reports which examine options for reform of the law relating to criminal liability for encouraging or assisting another person to commit an offence (the previous report 'Inchoate liability for assisting and encouraging crime' was published in July 2006 as Cm. 6878 (Law Com. no. 300, ISBN 9780101687829). This report focuses on the law of secondary liability and examines the problems with the law as it currently stands; the differences between inchoate liability and secondary liability; recommendations to introduce statutory schemes of secondary liability and of innocent agency and a new offence of causing the commission of a no fault offence; defences and exemptions; and extra-territorial jurisdiction. It includes the text of two draft bills: Participating in Crime Bill and Participating in Crime (Jurisdiction, Procedure and Consequential Provisions) Bill. Taken together, the recommendations contained in both reports seek to establish a system whereby inchoate and secondary liability will support and supplement each other in a way that is rational and fair.

Originality, Imitation, and Plagiarism Nov 30 2022 "At long last, a discussion of plagiarism that doesn't stop at 'Don't do it or else,' but does full justice to the intellectual interest of the topic!" ---Gerald Graff, author of Clueless in Academe and 2008 President, Modern Language Association This collection is a timely intervention in national debates about what constitutes original or plagiarized writing in the digital age. Somewhat ironically, the Internet makes it both easier to copy and easier to detect copying. The essays in this volume explore the complex issues of originality, imitation, and plagiarism, particularly as they concern students, scholars, professional writers, and readers, while also addressing a range of related issues, including copyright conventions and the ownership of original work, the appropriate dissemination of innovative ideas, and the authority and role of the writer/author. Throughout these essays, the contributors grapple with their desire to encourage and maintain free access to copyrighted material for noncommercial purposes while also respecting the reasonable desires of authors to maintain control over their own work. Both novice and experienced teachers of writing will learn from the contributors' practical suggestions about how to fashion unique assignments, teach about proper attribution, and increase students' involvement in their own writing. This is an anthology for anyone interested in how scholars and students can navigate the sea of intellectual information that characterizes the digital/information age. "Eisner and Vicinus have put together an impressive cast of contributors who cut through the war on plagiarism to examine key specificities that often get blurred by the rhetoric of slogans. It will be required reading not only for those concerned with plagiarism, but for the many more who think about what it means to be an author, a student, a scientist, or anyone who negotiates and renegotiates the meaning of originality and imitation in collaborative and information-intensive settings." ---Mario Biagioli, Professor of the History of Science, Harvard University, and coeditor of Scientific Authorship: Credit and Intellectual Property in Science "This is an important collection that addresses issues of great significance to teachers, to students, and to scholars across several disciplines. . . . These essays tackle their topics head-on in ways that are both accessible and provocative." ---Andrea Lunsford, Louise Hewlett Nixon Professor of English, Claude and Louise Rosenberg Jr. Fellow, and Director of the Program in Writing and Rhetoric at Stanford University and coauthor of Singular Texts/Plural Authors: Perspectives on Collaborative Writing digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication.
