This volume is a result of the need to reflect upon Portugal's position from the viewpoint of the literary assets imported and exported through translation. It brings together a number of scholars working in the field of Translation Studies directly concerned with the Portuguese cultural system in order to analyse this question from various theoretical perspectives and from case studies of translation flows and movements in Portuguese culture. By Translating Portugal Back and Forth, the articles discuss issues such as: how can one draw the borderline between a peripheral and a semi-peripheral system? Is this borderline useful or necessary? How peripheral is the Portuguese cultural system as far as translation transfers are concerned? How stable or pacific has this positioning been? Does the economic and historical perception of Portugal as peripheral entail that, from the viewpoint of translation, it would behave similarly? By addressing some of these questions, and as shown by the (second) subtitle – Essays in Honour of João Ferreira Duarte –, the volume pays homage to one of the most prominent Translation Studies scholars in Portugal, who has extensively reflected on the binary discourse on translation, its metaphors and images. Sul cambiamento climatico abbondano le teorie, le opinioni, spesso le cosiddette fake news. Alle visioni più apocalittiche, che mettono in dubbio il futuro stesso del pianeta, rispondono altri che - magari non essendosi mai occupati di clima - si dichiarano scettici sulla reale portata di tali mutamenti e sulla possibilità da parte dell'uomo di governarli. Antonello Provenzale, uno degli scienziati che si occupano attivamente di questi argomenti in Italia, ci spiega come si comporta la macchina del clima planetario: un sistema complesso e dinamico in cui gli organismi viventi giocano un ruolo cruciale. Si parte dagli eventi catastrofici che hanno segnato la storia della Terra nell'arco di milioni di anni, tra mari di magma, glaciazioni, estinzioni di massa, e quelle ere inusuali in cui anche al Polo Nord abitavano i coccodrilli oppure altre in cui l'Equatore era ricoperto di ghiaccio. Da qui, si passa al funzionamento del clima planetario, determinato da fenomeni quali il ciclo dell'acqua, la composizione dell'atmosfera, l'effetto serra, le correnti oceaniche, i cicli degli elementi chimici, l'apporto energetico del Sole o la riflessione della luce da parte dei ghiacciai. Con chiarezza e verve divulgativa, Provenzale ci offre la più esauriente storia di quanto è avvenuto al clima della Terra, dalle più remote origini fino ai giorni nostri. Sugli effetti dei cambiamenti in corso, la conclusione di Provenzale è esplicita: «Non stiamo mettendo a repentaglio la "sopravvivenza del pianeta", che è stato in grado di resistere a cambiamenti ben più epocali, ma possiamo infliggere danni pesanti alla nostra stessa specie, alla nostra società e al giusto desiderio di un'equa distribuzione delle risorse. Il pianeta è sempre sopravvissuto, ma molte specie sono state spazzate via dal teatro della vita. E non vorremmo che la nostra facesse troppo presto la s Due cacciatori di lontre della Compagnia Russo-Americana, Sandoe e Mac-Doll, vengono imbarcati su un sottomarino contro la loro volontà. Si ritrovano così a far parte dell'equipaggio del Taimyr, un geniale e futuristico battello subacqueo dalle possibilità infinite, comandato dal misterioso ingegnere Nikirka, coadiuvato da un equipaggio di provata fedeltà. La missione del Taimyr è raggiungere il Polo Nord navigando esclusivamente sotto le acque. Pur con alcuni imprevisti e difficoltà, la meta viene raggiunta. Il ritorno, invece, riserva delle conseguenze impreviste. Dopo la perdita del Taimyr e dell'intero equipaggio, il solo Mac-Doll, che dovrà lasciar morire l'amico Sandoe, sarà miracolosamente salvato da una nave di passaggio. * Pioneer on K2 and namesake of the Abruzzi Ridge * Mountaineering classic now in Legends and Lore series * Complete biography of an important explorer Grandson of the first king of Italy, Luigi Amedeo di Savoia-Aosta, or the Duke of the Abruzzi, was one of the most celebrated explorers of the early twentieth century. This biography vividly recounts not only the details of his pioneering expeditions but also the intriguing story of his personal life—including a doomed love affair with an American heiress and his more successful friendship with Vittorio Sella. The Duke's lifelong passion for adventure began in the Italian Alps of his childhood. Having mastered the Zmutt Ridge of the Matterhorn at the age of 21, he vowed to devote himself to mountain exploration. Just three years later, in 1897, he completed the first successful ascent of Alaska's Mount St. Elias. His 1899 attempt to be the first to the North Pole fell short of its goal, but he succeeded in going farther north than any previous expedition. A naval career did not stop him from exploring the Ruwenzori range in Africa. The Duke's most noted achievement was undeniably his pioneering climb on K2 in 1909 on the route that bears his name: the Abruzzi Ridge. In part because of this achievement, we are thrilled to bring this classic, originally published in 1997, back into print as one of our Legends and Lore titles. This impressive compilation offers a nearly complete listing of sound recordings made by American minority artists prior to mid-1942. Organized by national group or language, the seven-volume set cites primary and secondary titles, composers, participating artists, instrumentation, date and place of recording, master and release numbers, and reissues in all formats. Because of its clear arrangements and indexes, it will be a unique and valuable tool for music and ethnic historians, folklorists, and others. Written in both English and French, The 9.5mm Vintage Film Encyclopaedia provides a single-volume, comprehensive catalogue of all known 9.5mm film releases, including: Films: Comprising 12,460 individual entries, this A-Z reference index provides the main listing for each film and its origin where known, along with additional information including cast and crew, and cross references to other relevant material. People: This index of all known actors and film crew, comprising over 12,000 names, provides a listing which is cross referenced to the main entry for each original film they worked on. Numbers: Pathé-Baby/Pathéscope and other distributors' catalogue numbers, film length, release dates (where known) and the series in which the films were organised, are set out in detail. With a foreword from eminent film historian and filmmaker, Keith Brownlow, this extensively researched text explains the importance of the 9.5mm film, from its beginnings in the early 1920s to becoming synonymous with Home Cinema throughout Europe. Readers will also find a brief technical explanation on how 9.5mm films were produced, along with relevant images.
