*Waste Management as Economic Industry Towards Circular Economy* Apr 10 2021  
This book highlights the latest advances in waste management, resource recovery and resource circulation in various countries, with a special emphasis on India. It leads the way towards a sustainable circular economy developing local economy and enhances the sustainability of the energy sector as a whole by holistically addressing waste management. Waste management is a major problem around the globe; effective waste disposal is one of the most plaguing issues faced by municipalities. Yet waste can also serve as a major

source of energy rather than a disposable material. The book discusses various upstream and downstream aspects of waste management systems, e.g. conversion processes and collection methods, that are needed in order to make waste management systems into an effective industry and move closer to a circular economy. It also provides information on management tools for analysis and decision support. All chapters included here are based on high-quality research papers presented at the conference IconSWM 2018. *Engineering Drawing & Workshop Calculation and Science MCQ* Jul 02 2020  
Engineering Drawing &

*Workshop Calculation and Science MCQ* is a simple Book for ITI Engineering Drawing & Workshop Calculation and Science Subject, Revised NSQ F Syllabus, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about geometrical figures using drawing instruments, freehand drawing of machine components in correct proportions, procedure to prepare a drawing sheet as per BIS standard, learning about projection methods, auxiliary views and section views.
