The History of Water Management in the Iberian Peninsula May 16 2021 This volume approaches the history of water in the Iberian Peninsula in a novel way, by linking it to the ongoing international debate on water crisis and solutions to overcome the lack of water in the Mediterranean. What water devices were found? What were the models for these devices? How were they distributed in the villas and monastic enclosures? What impact did hydraulic theoretical knowledge have on these water systems, and how could these systems impact on hydraulic technology? Guided by these questions, this book covers the history of water in the most significant cities, the role of water in landscape transformation, the irrigation systems and water devices in gardens and villas, and, lastly, the theoretical and educational background on water management and hydraulics in the Iberian Peninsula between the sixteenth and the nineteenth centuries. Historiography on water management in the territory that is today Spain has highlighted the region's role as a mediator between the Islamic masters of water and the Christian world. The history of water in Portugal is less known, and it has been taken for granted that is similar to its neighbour. This book compares two countries that have the same historical roots and, therefore, many similar stories, but at the same time, offers insights into particular aspects of each country.

It is recommended for scholars and researchers interested in any field of history of the early modern period and of the nineteenth century, as well as general readers interested in studies on the Iberian Peninsula, since it was the role model for many settlements in South America, Asia and Africa.

New Approaches to Naples c.1500-c.1800 Apr 14 2021 Early modern Naples has been characterized as a marginal, wild and exotic place on the fringes of the European world, and as such an appropriate target of attempts, by Catholic missionaries and others, to 'civilize' the city. Historiographically bypassed in favour of Venice, Florence and Rome, Naples is frequently seen as emblematic of the cultural and political decline in the Italian peninsula and as epitomizing the problems of southern Italy. Yet, as this volume makes plain, such views blind us to some of its most extraordinary qualities, and limit our understanding, not only of one of the world's great capital cities, but also of the wider social, cultural and political dynamics of early modern Europe. As the centre of Spanish colonial power within Europe during the vicerealty, and with a population second only to Paris in early modern Europe, Naples is a city that deserves serious study. Further, as a Habsburg dominion, it offers vital points of comparison with non-European sites which were subject to European colonialism. While European colonization outside Europe has received intense scholarly attention, its cultural impact and representation within Europe remain under-explored. Too much has been taken for granted. Too few questions have been posed. In the sphere of the visual arts, investigation reveals that Neapolitan urbanism, architecture, painting and sculpture were of the highest quality during this period, while differing significantly from those of other Italian cities. For long ignored or treated as the subaltern sister of Rome, this urban treasure house is only now receiving the attention from scholars that it has so long deserved. This volume addresses the central paradoxes operating in early modern Italian scholarship. It seeks to illuminate both the historiographical pressures that have marginalized Naples and to showcase important new developments in Neapolitan cultural history and art history. Those developments showcased here include

Bibliografía cronológica de la lingüística, la gramática y la lexicografía del español (BICRES V) Jan 04 2023 Since the publication of the still very valuable Biblioteca histórica de la filología by Cipriano Muñoz y Manzano, conde de la Viñaza (Madrid, 1893), our knowledge of the history of the study of the Spanish language has grown considerably, and most manuscript and secondary sources had never been tapped before Hans-Josef Niederehe of the University of Trier courageously undertook the task to bring together any available bibliographical information together with much more recent research findings, scattered in libraries, journals and other places. The resulting *Bibliografía cronológica de la lingüística, la gramática y la lexicografía del español: Desde los principios hasta el año 1600 (BICRES)* began appearing in 1994. BICRES I covered the period from the early beginnings to 1600), followed by BICRES II (1601-1700), BICRES III (1701-1800), and together with Miguel Ángel Esparza Torres of Madrid there followed BICRES IV (1801 to 1860). Now, the fifth volume, has become available, covering the years from 1861 to 1899. Access to the bibliographical information of altogether 5,272 titles is facilitated by several detailed indexes, such as a short title index, a listing of printers, publishers and places of production, and an author index. More than twenty years of research in the major libraries of Spain and other European countries have gone into this

unique work — relative sources of the Americas have also been covered — making it exhaustive source for any serious scholar of any possible aspect of the Spanish language.
