Wider World Coursemate for OCR A GCSE Geography provides summaries of key content and key ideas to support OCR's 2001 Geography A specification. Policing Child Sexual Abuse provides a historical overview of the evolution of policing child sexual abuse in Queensland, tracing a legacy of failure (even corruption) in the decades leading up to the foundation of Taskforce Argos, a branch of the Queensland Police Service created in part as a response to criticisms of police shortcomings in this area. The book uses a combination of archival and open-source material to trace the shifting approach to policing child sexual abuse (CSA) from the 1960s, when juvenile justice first became a central focus of policing in Queensland, to the 2010s, at which point Taskforce Argos made international headlines for its primary role in bringing major international CSA offenders like Shannon McCool, Benjamin "Warhead" Faulkner and Richard Huckle to justice. Examining archival material to pinpoint the reasons that CSA was not dealt with effectively in the past, the book shows that often these reasons were political, unrelated to the policing of CSA at all. It stands as a testament to the victims of CSA who have been failed by the system in the past. In addition, the book acts as a case study of how a police force with such a negative track record in policing this area was able to correct its path and reform its practices, to the point that it could emerge as a world-leader in policing CSA. Though nominally focused on policing in one Australian state, the implications are global, with Taskforce Argos's work naturally impacting on the CSA investigations of all of its partner agencies, both in Australia and internationally. Demonstrating how, even in contexts where

police responses to CSA have been met with significant criticism, an opportunity still exists to reject historical failures in favour of a renewed commitment to proactive policing of CSA, this book will be of great interest to scholars of policing, historical criminology and child sexual abuse. AN APPENDIX AND A KEY TO THE EXERCISES DESIGNED FOR THE USE OF SCHOOLS AND PRIVATE LEARNERS. BY SAMUEL KIRKHAM. The Suppliants, also known as The Suppliant Maidens, The Suppliant Women, or Supplices, is a play written by Aeschylus, considered as the "Father of Tragedy." E. D. A. Morshead has translated this narrative. The Danaids form a chorus and play the protagonist in this narrative. They were compelled to marry their Egyptian relatives. The Danaids implored King Pelasgus to protect them when they arrived in Argos from Egypt. He refused to wait for the Argives' choices, which favored the Danaids. The Danaus was overjoyed with the outcome, and the Danaids worshiped the Greek gods. The Danaids are compelled to go back to their relatives for marriage as soon as an Egyptian news anchor shows up. Pelasgus appears, threatens the herald, and pushes the Danaids to remain within Argos' gates. Along with his faithful dog Argos, eleven-year-old Hugh Coplestone decides to leave his Aunt and Uncle's house after one beating too many, and heads for Oxford to seek his fortune. When he meets a group of strolling players along the way, Hugh joins them, becoming part of their acting troupe. A new life meeting jugglers, puppet players, quack doctors and ballad singers starts for Hugh as the Players travel the country, and, as one of the Dusty-Foot, Hugh also experiences the freedom and

fellowship of life on the road. Full text e-book available as part of the Elsevier ScienceDirect Earth and Planetary Sciences subject collection. In the first book of its kind, art information expert Lois Swan Jones discusses how to locate visual and textual information on the Internet and how to evaluate and supplement that information with material from other formats--print sources, CD-ROMS, documentary videos, and microfiche sets--to produce excellent research results. The book is divided into three sections: Basic Information Formats; Types of Websites and How to Find Them; and How to Use Web Information. Jones discusses the strengths and limitations of Websites; scholarly and basic information resources are noted; and search strategies for finding pertinent Websites are included. Art Information and the Internet also discusses research methodology for studying art-historical styles, artists working in various media, individual works of art, and non-Western cultures--as well as art education, writing about art, problems of copyright, and issues concerning the buying and selling of art. Susan McWilliams argues that to understand politics in our 'new world,' we should revisit one of the oldest themes in political theory: travel. This title uncovers the rich travel-story tradition of political theorizing and shows how it helps to answer today's toughest political questions. Erina loved listening to her Uncle Bower's stories, even now when she was only eight hafmons from adulthood. She loved the excitement, the adventure, the magic and the heroes, where good always conquered evil and the damsel was always rescued by the dashing knight. She was also certain none of those things would ever happen to her, safely trapped as she was in her quiet village life. She had no idea that every five thousand turings one person was required to save the world from decent into an eon of cruelty and suffering at the hands of the Shadis. Nor that she could be forced to take on such a perilous journey to the Isle of Cloud, where good and evil are not so easily identified, and where legends and monsters leap from their fairytales to become sword-wieldingly larger than life. The trigger in those tales was always by the arrival of a mythical creature, like a white unicorn, which Erina saw this morning... Start an adventure that will change the world, and possibly yourself. Musaicum Books presents to you this unique collection, designed and formatted to the highest digital

Every year, all across the planet, people simply vanish, never to be seen again. Some areas of the world are well known for this phenomenon—like the area that would become known as the Bermuda Triangle after the famed Flight 19 incident off the Florida coast in 1945. Now, in the present day, an unexplainable event has occurred in the same area—an event that cannot be ignored by the military. The Navy ship Eclipse and its crew are sent to investigate, but after several days come up empty. Then, two days before the planned return to port, the event reoccurs, and the Eclipse is caught up in something it cannot escape. The ship and its crew suddenly find themselves completely isolated, all communication lost, surrounded by a terribly hostile environment where each day is a struggle to survive—in this intense, fast-paced novel of self-reliance, mystery, and discovery. Aeschylus starts his tetralogy boldly, making the Danaids themselves prologue, chorus and protagonist. Guided by their father Danaus, these girls have fled from Egypt, where their cousins want to marry them, to seek asylum in Argos: they claim descent from Io, who was driven to Egypt five generations earlier when Zeus' love for her was detected by jealous Hera. In the long first movement of the play the Danaids argue their claim, pressing it with song and dance of pathos and power, upon the reluctant Argive king. He, forced eventually by their threat of suicide, puts the case to his people, who vote to accept the girls, but while they sing blessings on Argos, Danaus spies their cousins' ships arriving. Left on their own when he goes for help, they sing more seriously of suicide,

and seek sanctuary upstage when the Egyptians enter. A remarkable tussle of two choruses ensues; in the nick of time the king arrives, sees off the Egyptians (but they promise a return) and offers his hospitality. The girls want their father, however, and go when guided by him and his escort of Argive soldiers. Their final song has elements of wedding song in it; they share it, provocatively, with the Argives. The rest of the tetralogy is lost, but enough is known to indicate that marriage is the theme. Aeschylus probably surprised his first audience in his use of the myth; his command of theatre and poetry is fully mature.

Strategic Renewal is an original research anthology offering insight into a subject area which, although critical for the sustained success of organizations, has received relatively little attention as distinct from the more general phenomenon of strategic change. Firstly, by providing a summary of the literature, this research anthology helps graduate students and new researchers grasp the current state of affairs in the field. Secondly, this research anthology will help update the knowledge base of the existing researchers in the field. By bringing together various studies, the research anthology determines the core concepts of the field and elucidates the key gaps and future research areas. Through contributions building on the knowledge bases of other disciplines, this research anthology develops an interdisciplinary research agenda, giving the reader an in-depth understanding of the mediating, moderating, and antecedent variables concerning strategic renewal. Strategic Renewal aims to provide a state-of-

understanding to the subject, as well as a clear picture of the cross-disciplinary landscape that informs the subject. Thus, this research anthology is essential reading for managers, consultants, and other practitioners, as well as students and scholars of business. Fiction. Latinx Studies. Translated by Noel Black. DOWN WITH GARGAMEL! is a futurist tale set in Puerto Rico, New York, and Colorado Springs that unfolds during the transition from peak oil production to a future that's formless, dangerous, and full of possibility. As global capitalism collapses under the weight of a worsening environmental crisis, we encounter the stories of six friends as they move through different forms of consciousness and across galaxies. Stories are presented as a narrative fractal in which the same occurrence is retold at different scales. Conversations abound: on black holes during a Puerto Rican blackout; inside the head of a schizophrenic professor; in an apartment in Brooklyn the very morning the world learns aliens have sent us a message; at a "happy death home" where three comrades and a cat care for twelve voluntarily dying bodies; and finally between intergalactic Smurfs and a nostalgic angel. Rosa's vision is at once absurd and terrifying, specific and idealistic, rooted in the paranoid tradition of J.L. Borges and Phillip K. Dick and inspired by a wide range of radical political movements. This book is unique in that it offers an unprecedented opportunity to develop comprehensive practical skills in building models which will enhance the understanding of the many problems we encounter in our complex world. In particular why projects do not go to plan and what we can do about it.
