It also meets the requirement of the students of CA, ICWA and CS. The eBooks is authored by proficient Teachers and Professors. The Text of the eBooks is simple and lucid. The contents of the book have been organised carefully and to the point. Excerpt from Principles of Cost Accounting The motive which prompted the author to prepare and publish Cost Accounting, was the desire to supply a demand for a text book on the part of the students in New York University School of Commerce, Accounts and Finance. In presenting it for public consideration it is desired to have clearly understood the fact that it is intended as a text book especially adapted to the needs of students, and is not intended as a general reference work. The supply of literature on the subject of cost accounting is increasing rapidly. The quality of such literature is of a high order. The fault to be found with it from the point of View of a teacher is that it is

too highly specialized. The tendency on the part of authors on this subject is to select some particular industry or line of production and describe a particular system, attempting to make such typical of the entire subject. Most systems are accompanied by elaborate forms. In fact it may be said that many systems are nothing more than a collection of forms. This practice has been carried to such an extent that it would not be extravagant to state that the average student looks upon the study of cost accounting as a matter of becoming familiar with certain specific forms comprising a particular system. In this maze of forms the student becomes lost and the principles underlying the forms are entirely overlooked.
