Sustaining Social Inclusion is the third book in a series on social exclusion and social inclusion. It explores what different understandings of sustainability mean in respect of social inclusion in the variety of fields that deal with human health and well-being. The book is global in its scope, with chapters relating to socially inclusive health and social welfare practice internationally. This book is divided into seven parts: Introduction; Sustainable policies for promoting social inclusion; Sustaining programmes which support social inclusion; Sustaining organisations which promote social inclusion; Sustainable social inclusion outcomes; Sustainable social development; and Conclusions. It examines how social inclusion can be sustained in the long-term when funding tends to be time-limited. This research-based book is relevant to a wide range of different readerships globally. It addresses issues of concern for those engaged in debates about the provision of health, social welfare, and other public services. Sustaining Social Inclusion will be of interest to academics, policy makers, and practitioners in a wide range of fields, including public health, health promotion, health sciences, history, medicine, philosophy, disability studies, social work, social policy, sociology, and urban planning. The 2015 International Congress on Economics, Social Sciences and Information Management (ICESSIM 2015), held 28-29 March 2015 in Bali, Indonesia, aimed to provide a platform for the sharing of valuable knowledge and experience in the context of changing economics and social settings. Asking yourself how that's different from writing an essay (or a wiki page)? Unsure if Twitter really can be used to build your online profile as a researcher? If you want - or need - to integrate social media tools into your studies and research, this practical book is your one-stop shop. Megan Poore shares the secrets of how to harness the power of social media tools to improve your academic productivity. Inside, you'll find out how to: ... write a good blog post ... contribute to a wiki ... maximise your grades when creating an audio-visual presentation ... find and share the latest research via Twitter ... keep safe online. Featuring handy illustrations and exercises, as well as guidance on broader issues such as copyright, avoiding plagiarism, and cyberbullying, you'll find out all you need to successfully use social media to support your study and research. Megan Poore is Assistant Professor in Teacher Education at the University of Canberra. What does it mean to be Muslim in Britain today? If the media is anything to go by, it has something to do with mosques, community leaders, whether you wear a veil, and what your views on religious extremists are. But as all our lives become increasingly entwined with our online presence, British Muslims are taking to social media to carve their own narratives and tell their own stories, challenging stereotypes along the way. Follow Me, Akhi explores how young Muslims in Britain are using the internet to determine their own religious identity, both within their communities

and as part of the country they live in. Entering a world of Muslim dating apps, social media influencers, online preachers, and LGBTQ and ex-Muslim groups, journalist Hussein Kesvani explores how British Islam has evolved into a multi-dimensional cultural identity that goes well beyond the confines of the mosque. He shows how a new generation of Muslims who have grown up in the internet age use blogs, vlogging, and tweets to define their religion on their terms -- something that could change the course of 'British Islam' forever. Bioinformatics for Everyone provides a brief overview on currently used technologies in the field of bioinformatics—interpreted as the application of information science to biology—including various online and offline bioinformatics tools and softwares. The book presents valuable knowledge in a simplified way to help students and researchers easily apply bioinformatics tools and approaches to their research and lab routines. Several protocols and case studies that can be reproduced by readers to suit their needs are also included. Explains the most relevant bioinformatics tools available in a didactic manner so that readers can easily apply them to their research Includes several protocols that can be used in different types of research work or in lab routines Discusses upcoming technologies and their impact on biological/biomedical sciences Effective administration of government and governmental organizations is a crucial part of achieving success in those organizations. To develop and implement best practices, policymakers and leaders must first understand the fundamental tenants and recent advances in public administration. Public Affairs and Administration: Concepts, Methodologies, Tools, and Applications explores the concept of governmental management, public policy, and politics at all levels of organizational governance. With chapters on topics ranging from privacy and surveillance to the impact of new media on political participation, this multi-volume reference work is an important resource for policymakers, government officials, and academicians and students of political science. A main staple of today's world that has played a key role in the development of society is education and institutions of higher learning. An ongoing concern, however, has been the lack of access and resources to superior teaching in developing areas of the world. Student engagement and learning environments are just a few elements that play into the success of colleges in areas like the Coast Region of Kenya. Research must be done in understanding the correlation between the tools that these institutions are equipped with and the educational results of their students. Effects of Engagement and Resources on Learning Outcomes in Vocational Colleges: Emerging Research and Opportunities is an essential reference source that discusses the relationship between college resources and students' learning outcomes as well as contributing factors in promoting quality education and training. Featuring research on topics such as research philosophies, teaching workloads, and student engagement, this book is ideally designed for teachers, deans, researchers, education professionals, administrators, policymakers, government officials, and academicians seeking coverage on the methods of acquiring and maintaining quality education in developing countries. Education at all levels will continue to be dominated by technology for the foreseeable future. The rush to respond to the health concerns of the pandemic led to a mass adoption of online learning tools without careful consideration and placement within a conceptual framework that would have occurred prior to adoption in best practice scenarios. Cases on Innovative and Successful Uses of Digital Resources for Online Learning evaluates and describes successful initiatives in remote and hybrid learning during the pandemic disruption to traditional schooling for early childhood through college and job training levels. During the pandemic disruption, remote and hybrid tools were adopted rapidly without the benefit of careful utilization. This text conducts that careful consideration in the past tense. Covering topics such as artificial intelligence, connected learning, and educational simulation games, this book is an excellent reference for educators of K-12 and higher education, school faculty and administrators, researchers, pre-service teachers, policymakers, and academicians. Computers have changed forever how we work, learn, shop and seek information. They have also, since the 1960s, been programmed to monitor and analyze in various ways the interaction between humans and themselves. The rapid development of the World Wide Web in the 1990s has given new life, direction and urgency to this enterprise. This work describes the myriad ways, benign or malign, in which computers are used to monitor people's use of computers. Four distinct contexts for monitoring are examined: formal learning environments (e.g., educational software); information seeking environments (e.g., online library catalogs); the workplace; and the Internet (e.g., online shopping). Computerized monitoring often is called an invasion of privacy, and the conceptual and ethical dimensions of confidentiality and privacy in virtual environments are explored at length. In addition to providing information about the various computerized monitoring tools and techniques, this work focuses on the broader social, conceptual, ethical and legal implications. This book explores project management (PM) from a musical perspective. Music is a significant example of a nontraditional arena where PM is vital, yet it is only beginning to be seen as a vital tool. Therefore, this book will give an in depth and preeminent look at the PM processes and knowledge areas that are of utmost importance in many fields that PM is not used for currently. Seeking to understand projects in musical ways, synergies between music and the wider project management profession are many and varied. Written and developed by international experts in the project management and music professions, this book represents a unique and insightful approach to the study of the subject. The authors take a fresh look at practical models of musical thinking capable of application at every scale of project management, and in every possible project management environment. If you want to make your projects more musical, or simply have an interest exploring project management in music, this is the book for you! The use of Electronic Health Records (EHR)/Electronic Medical Records (EMR) data is becoming more prevalent for research. However, analysis of this type of data has many unique complications due to how they are collected, processed and types of questions that can be answered. This book covers many important topics related to using EHR/EMR data for research including data extraction, cleaning, processing, analysis, inference, and predictions based on many years of practical experience of the authors. The book carefully evaluates and compares the standard statistical models and approaches with those of machine learning and deep learning methods and reports the unbiased comparison results for these methods in predicting clinical outcomes based on the EHR data. Key Features: Written based on hands-on experience of contributors from multidisciplinary EHR research projects, which include methods and approaches from statistics, computing, informatics, data science and clinical/epidemiological domains. Documents the detailed experience on EHR data extraction, cleaning and preparation Provides a broad view of statistical approaches and machine learning prediction models to deal with the challenges and limitations of EHR data. Considers the complete cycle of EHR data analysis. The use of EHR/EMR analysis requires close collaborations between statisticians, informaticians, data scientists and clinical/epidemiological investigators. This book reflects that multidisciplinary perspective. The main topic of this proceeding was "Decrypt Your Visual Creativity" which consisted of 65 articles about design thinking, interior design, art and design management, industrial design, education in design creativity and innovation, sustainable art and design, visual communication, new media, graphic and digital media, visual culture, design practice, art history, art and creative community, and methodology in design creativity. We are truly thanking you to our four keynote speakers Emeritus Prof. Dr. T.W. Allan Whitfield, Prof. Dr. Khairul Aidil Azlin Abdul Rahman, Dr. Nurul 'Ayn Ahmad Sayuti and Mr. Firdaus Khalid for their constant support and guidance. Finally, we would like to express our heartfelt gratitude to all colleagues in the steering and organising committee for their cooperation in administering and organising the conference, as well as reviewers for their intellectual effort and dedication to reviewing papers. Yasin T. al-Jibouri, Translator of this book, has so far written, edited and translated 57 books and other publications, not counting this one. Details and some front cover images of these publications are included on pages 43 - 89 of his other book titled Mary and Jesus in Islam which AuthorHouse has already published (ISBN 9781468523201 or 9781468523218). He earned his graduate degree in English from an American university, taught English in Iraq, Saudi Arabia and the United States and is presently preparing Volume Two of his book titled Allah: The Concept of God in Islam, the first volume of which has already been published by Authorhouse (ISBN 9781468532722, 9781468532739 or 9781468532746). He is also working on Volume One of his other major work titled Dictionary of Islamic Terms. This book is not an ordinary one at all. Actually, millions of intellectuals worldwide regard its eloquence, language and contents as being next in importance only to the Holy Qur'an, and you will find out why when you read it. It is the compilation of the sermons, letters and axioms of Ali ibn Abu Talib, cousin and son-in-law of the Prophet of Islam, who lived from 600 - 660 A.D. and played a major role in shaping the society and politics not only of his time but of all time to come. There are many editions of this great book in at least two dozen languages, and Yasin T. al-Jibouri has for some time been editing one of them. This book is for people who wish to "live" the first Islamic century in all its upheavals, controversies, civil wars and religious fervor. It may serve as a guide for those who wish to discover the complexity, beauty and richness of the Arabic language. Or it may be sought by people who wish to lead a life of happiness and fulfillment, since it provides all of this and more, and you are free to judge for yourself. Workplace diversity has become increasingly relevant to academics and practitioners alike. Often, this issue is tackled merely from a

business-oriented/managerial point of view. Yet such a single-level perspective fails to acknowledge both the macro-societal context wherein companies and organizations act and the micro-individual dynamics by which individuals construct and affirm their identities in relation to others. Muslim minorities are part of current workplace diversity in many parts of the world. This book focuses on Muslim identities and their interrelations with societal frameworks and organizational strategy and practice. Contributors from various disciplines and societal contexts ensure a multiplicity of perspectives. The authors shed light on this diversity and draw implications for human resource management (HRM) theory and practice. Chapters uncover the wider discourses on Muslim minorities that impact organizational HRM. The book explores how HRM academics and practitioners might become aware of and counteract these discourses in order to achieve a truly inclusive HRM regarding Muslim minorities. Throughout *Muslim Minorities, Workplace Diversity and Reflexive HRM*, readers are guided from large theoretical concepts to specific contexts, whilst being encouraged to question their assumptions. This book lays the foundations for managing Muslim employees beyond stereotypes, enabling the reader to develop the reflexive mindset needed for truly inclusive HRM with regard to Muslim employees. This book is about turning data into smart decisions, knowledge into wisdom and business into business intelligence and insight. It explores diverse paradigms, methodologies, models, tools and techniques of the emerging knowledge domain of digitalized business analytics applications. The book covers almost every crucial aspect of applied artificial intelligence in business, smart mobile and digital services in business administration, marketing, accounting, logistics, finance and IT management. This book aids researchers, practitioners and decisions makers to gain enough knowledge and insight on how to effectively leverage data into competitive intelligence. This collection bundles all 3 titles from Mel Odom's Military NCIS series into one e-book for a great value! #1 *Paid in Blood* The death of a fellow NCIS agent in North Carolina leads Will Coburn and his special team of naval crime-scene investigators to discover a drug-and-arms smuggling ring. The investigation leads them to a U.S. military base in South Korea. When a body is stolen from a crime scene, the team discovers that their suspect is not who he seems. Nuclear weapons have gone missing, and it's a race against time as the NCIS team uncovers the true face of evil. #2 *Blood Evidence* While investigating the abduction/kidnapping of a marine captain's teenage daughter, Will Coburn and his team of NCIS agents discover a link to a high-profile murder that took place more than seventeen years ago. As the team investigates, they discover a trail of lies, betrayal, and a political cover-up. Forensics specialist Nita Tomlinson will need a faith deeper than she can imagine as she struggles with the past and a family that she can no longer ignore. #3 *Blood Lines* Commander Will Coburn's NCIS team is investigating the carjacking and assault of a young Marine and his wife. All evidence points to Bobby Lee Gant, son of the notorious criminal and suspected international drug smuggler Victor Gant. When NCIS agent Shel McHenry is wounded during a botched arrest, the team rallies around him even as Victor threatens retribution. Meanwhile, in west Texas, Shel's father, Tyrel McHenry, struggles with his own demons as buried secrets from a war long since fought come to light. The path he chooses will change his—and Shel's—life forever. Challenge and inspire your teenage learners to think beyond language. Think is a fresh, vibrant course designed to engage teenage learners and make them think. As well as building students' language skills, it offers a holistic approach to learning: developing their thinking skills, encouraging them to reflect on values and building their self-confidence. Topics are chosen to appeal to and challenge teenagers, firing their imagination and ensuring effective learning. Exam-style exercises and tips help students prepare for Cambridge English Key, Preliminary and First. Informed by the Cambridge English Corpus, the course reflects real language usage and 'Get it right' sections help students avoid common mistakes. If the Qur'an is the first written formulation of Islam in general, Malik's *Muwatta'* is arguably the first written formulation of the Islam-in-practice that becomes Islamic law. This book considers the methods used by Malik in the *Muwatta'* to derive the judgements of the law from the Qur'an and is thus concerned on one level with the finer details of Qur'anic interpretation. However, since any discussion of the Qur'an in this context must also include considerations of the other main source of Islamic law, namely the sunna, or normative practice, of the Prophet, this latter concept, especially its relationship to the terms of hadith and amal (traditions and living tradition), also receives considerable attention, and in many respects, this book is more about the history and development of Islamic law than it is about the science of Qur'anic interpretation. This is the first book to question the hitherto accepted frameworks of both the classical Muslim view and the current revisionist western view on the development of Islamic law. It is also the first study in a European language to deal specifically with the early development of the Madinan, later Malik, school of jurisprudence, as it is also the first to demonstrate in detail the various methods used, both linguistic and otherwise, in interpreting the legal verses of the Qur'an. It will be of interest to all those interested in the underlying bases of Islamic law and culture, and of particular interest to those involved in studying and teaching Islamic studies, both at undergraduate and research level. It will also be of interest to those studying the relationship between orality and literacy in ancient societies and the writing

down of ancient law. This contemporary book offers valuable insights on digital technology and entrepreneurship education, highlighting the importance of adopting creative digital approaches to learning and teaching. It raises the questions as to whether the current approaches utilised to convey entrepreneurial knowledge are adequate enough when preparing graduates for prospective careers. The book directly addresses the need for effective practices in teaching and reinforces the rising interest and resilience in entrepreneurship. Comprising a number of distinct chapters that illuminate digitally assisted teaching methods that are used in practice to champion student engagement when learning enterprise and entrepreneurship. The contemporary practices allude to the notion that the adoption of simulations and game-based learning increases student' comprehension, helps in retention of knowledge, and is an excellent way to introduce new content. With the substantial challenges caused by the global pandemic this book is a vital resource at a time when blended learning is the new norm and mode of instruction in Higher Education. It is ideal for researchers, instructors and students with a keen interest in game-based approaches, as it encourages application and outlook towards entrepreneurship education. This is the first book to focus exclusively on an examination of early 21st-century adult reading aloud. The dominant contemporary image of reading in much of the world is that of a silent, solitary activity. This book challenges this dominant discourse, acknowledging the diversity of reading practices that adults perform or experience in different communities, languages, contexts and phases of our lives, outlining potential educational implications and next steps for literacy teaching and research. By documenting and analysing the diversity of oral reading practices that adults take part in (on- and offline), this book explores contemporary reading aloud as hugely varied, often invisible and yet quietly ubiquitous. Duncan discusses questions such as: What, where, how and why do adults read aloud, or listen to others reading? How do couples, families and groups use oral reading as a way of being together? When and why do adults read aloud at work? And why do some people read aloud in languages they may not speak or understand? This book is key reading for advanced students, researchers and scholars of literacy practices and literacy education within education, applied linguistics and related areas.
