Investment Arbitration in Central and Eastern Europe May 25 2022 Central and Eastern Europe (CEE) is the testing ground for investment arbitration in Europe: the majority of the cases against EU Member States are proceedings launched against countries from the region. Despite their relevance, CEE experiences have not been analysed in a comprehensive manner. This book is the first of its kind to present an extensive collection of case law on investment arbitration within Europe. Contributors provide contextual analysis, taking political, economic and regulatory factors into account, to create an accessible text for practitioners and scholars alike.

Enlargement Issues at NATO's Bucharest Summit Nov 18 2021 NATO will hold a summit in Bucharest on April 2-4, 2008, and a principal issue will be the consideration of the candidacies for membership of Albania, Croatia, and the Former Yugoslav Republic of Macedonia (FYROM, or the Republic of Macedonia). These candidate states are small, with correspondingly small militaries, and their inclusion in the alliance cannot be considered strategic in a military sense. However, it is possible that they could play an important role in the stabilization of southeastern Europe. At Bucharest NATO will also consider whether to offer a Membership Action Plan (MAP) to Georgia and Ukraine. The MAP is viewed as a way station to membership. However, Russia's strong objection to the two countries' eventual membership, as well as internal separatist conflicts in Georgia and public opposition to allied membership in Ukraine are among several factors that may slow the two countries' path to closer association with NATO. Energy security for candidate states in a future round of enlargement may also prove to be an important issue. Most observers believe that Macedonia and Albania have made strides in modernizing their militaries. However, some questions about other qualifications persist for example,

concerning internal political conflict, and measures to tackle corruption and organized crime. An enduring dispute with Greece over Macedonia's formal name could also delay Macedonia's entry. The allies appear to believe that Croatia has moved well along the road to membership; modest Croatian public support for NATO membership has been a concern to allies. Process is important in the three countries' efforts to join the alliance. Each of the current 26 allies must agree at Bucharest to extend invitations. The candidate states will be considered individually, and a lack of consensus on a candidate can block its invitation to join.

HIV/AIDS and the World of Work Jun 25 2022 Based on replies received from constituents representing 136 member States. Includes the proposed Conclusions which have been prepared on the basis of the replies.

OECD Investment Policy Reviews: Croatia 2019 May 05 2023

This review was prepared in response to Croatia's 2015 request to adhere to the Declaration on International Investment and Multinational Enterprises. It assesses the climate for domestic and foreign investment in Croatia, its ability to comply with the principles of openness, transparency and non-discrimination and its policy convergence with the OECD Declaration, including responsible business conduct practices, and discusses the challenges and opportunities faced by the government of Croatia in its reform efforts.

Point-Contact Spectroscopy Aug 28 2022 Various experimental techniques for point contact production are described. Examples of point-contact spectra are presented for pure metals, alloys and compounds, as well as for semimetals and semiconductors, heavy fermion systems, Kondo-lattices, mixed valence compounds

and more. Superconducting point contacts are considered in respect to Andreev reflection and Josephson effects. Special attention is paid to contact conductance fluctuation, and new trends of research are outlined.

Wise Words of the Yup'ik People Jan 09 2021 The Yup'ik people of southwestern Alaska were some of the last Arctic peoples to come into contact with non-Natives, and as a result, Yup'ik language and many traditions remain vital into the twenty-first century. Wise Words of the Yup'ik People documents their qanruyutet (adages, words of wisdom, and oral instructions) regarding the proper living of life. Throughout history, these distinctive wise words have guided the relations between men and women, parents and children, siblings and cousins, fellow villagers, visitors, strangers, and even with non-Natives. Yup'ik elders have chosen to share these wise words during Calista Elders Council gatherings and conventions since 1998 for instrumental reasons--because of their continued relevance and power to change lives. The Calista Elders Council, which represents some thirteen hundred Yup'ik elders, recently spearheaded efforts at cultural revitalization through gatherings with younger community members. In describing the content of traditional instruction as well as its central motivation--"We talk to you because we love you"--elders not only educate Yup'ik young people but also open a window into their view of the world for all of us. Wise Words of the Yup'ik People will serve as a valuable resource for the Yup'ik people and those who wish to learn more about their lives and values.

Decent Work for Domestic Workers Jul 27 2022

History of Economic Thought Jan 21 2022 Revolutionary advances in biomedical research and information systems technology pose new and difficult issues for American health care policy, especially in the context of managed care. Health

Care Policy in an Age of New Technologies takes on this challenging array of issues, where the dignity of individual life meets the imperatives of the national-level health care system: the right to die, rationing of care, organ transplants, experiments with human embryos, genetic research, confidentiality of medical records, and other ethical dilemmas. Chapters on a patient's bill of rights, and on medical education and physician training, link the book to policy issues of direct concern to the public and practitioners. Throughout the book, the authors place critical questions in their political, legal, social, economic, and ethical context. Each chapter ends with discussion points, and a multimedia bibliography directs readers to relevant films, documentaries, and case studies.

Meyler's Side Effects of Drugs 15E May 13 2021 Building on the success of the 14 previous editions, this remarkable reference has been extensively reorganized and expanded and now comprises almost 1,500 individual drug articles providing the most complete coverage of adverse reactions and interactions found anywhere. Each article contains detailed and authoritative information about the adverse effects of each drug, with comprehensive references to the primary literature making this a must have for any academic or medical library, pharmacologist, regulatory organization, hospital dispensary or pharmaceutical company. Now available online for all academic, corporate or government institution as well as individuals via Science Direct! The online version provides an unparalleled depth of coverage and functionality by offering convenient desktop access and enhanced features such as increased searchability, extensive internal cross-linking and fully downloadable and printable full-text, HTML or PDF articles. Enhanced encyclopedic format with drug monographs now organised alphabetically Completely expanded coverage of each drug - thalidomide warranted three

sentences in Meyler's 14th edition, but is now a 13 page extensive monograph Clearer, systematic organization of information for easier reading including case histories to provide perspective on each listing Extensive bibliography with over 40,000 references - Meyler's 15th edition incorporates all relevant citations from Meyler's 14th, but also includes relevant citations from previous editions of Meyler's and Side Effects of Drugs Annuals to give a historical perspective on the use and safety of drugs

Privacy Enhancing Technologies Jul 15 2021 This book constitutes the thoroughly refereed postproceedings of the 5th International Workshop on Privacy Enhancing Technologies, PET 2006, held in Cavtat, Croatia, in May and June 2005. The 17 revised full papers presented were carefully selected from 74 submissions during two rounds of reviewing and improvement. The papers address most current privacy enhancing technologies in various application contexts.

The Future of the US-Republic of Korea Military Relationship Mar 30 2020 As the international security situation has changed after the collapse of the Soviet Union, the book examines the implication of the new security environment to the security of South Korea and how the strategic and military relations with the United States will develop.

Fiscal Austerity and Innovation in Local Governance in Europe Dec 08 2020 Following the financial crisis and subsequent impacts of economic slowdown and austerity, the emergence of new local governance models and innovation is a very timely issue. The same goes for identifying new types of funding schemes and fiscal models prompted by austerity with the reduction in financial resources for local governments. This book offers a broad perspective on some of the organizational and financial problems faced by cities and local governments across

Europe and analyses the reactions and reforms implemented to address current economic and public finance conditions. The geographical coverage of the case studies, multidisciplinary background of the contributing authors and focus on a multiplicity of issues and challenges that confront local governments, not just financial issues as is often the case, means this book is relevant to a wide readership. The book is written for post-graduate students, advanced undergraduates, and researchers in the multidisciplinary field of local government studies (Public Administration, Geography, Political Science, Law, Economy and Sociology), as well as practitioners working in local government institutions.

Index Medicus Apr 23 2022

Automotive FDI in Emerging Europe Dec 28 2019 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

Hydrogeodynamics Oct 18 2021 This text focuses particularly on the growing interest in hydrodynamic principles of the study of underground waters, new methods of eco-based hydrogeodynamic analysis, and the estimation of the quantity of infiltration water transfer. The author also discusses aspects of mass transfer by subsurface water flow in the light of molecular kinetics, and examines a new approach to investigating the slow movements of groundwater at the deep zones of the hydrolithosphere.

*Meyler's Side Effects of Antimicrobial Drugs Apr 11 2021 Elsevier now offers a series of derivative works based on the acclaimed Meyler's Side Effect of Drugs, 15th Edition. These individual volumes are grouped by specialty to benefit the practicing biomedical researcher and/or clinician. This volume is essential for internal medicine physicians and general practitioners who prescribe antibiotic drugs, like penicillin and tetracycline that cure bacterial infections, and antiviral drugs used to treat patients with HIV and herpes viruses. * The only drug guide that includes clinical case studies and expert analysis * UNIQUE! Features not only antimicrobial drugs, but also all other drugs that act in an anti-microbial manner * Most complete cross referencing of drug-drug interactions available * Latest content from the most highly regarded compilation of drug side effects: Side Effects of Drugs Annual serial*

Asian Models Of Entrepreneurship - From The Indian Union And Nepal To The Japanese Archipelago: Context, Policy And Practice (2nd Edition) May 01 2020 In this book, Leo-Paul Dana makes it clear that much can be learnt about the nature of entrepreneurial activity when we delve into the unique characteristics of different nations of South Asia, South-east Asia and East Asia. Through in-depth analyses and comprehensive reviews of many Asian countries, the profound differences both

among and within countries of the region become vividly apparent. Dana juxtaposes the explosion in entrepreneurial growth within China against the struggles to build an entrepreneurial community in Japan, or the enlightened public policy leadership in Singapore against the crisis-driven developments in Korea. The range of factors identified within each of the 15 countries examined by Dana is not an example of random influences on the entrepreneurial process, because they can be construed in more systematic and logical ways. Thus, the book uncovers the Chinese model of gradual transition, the Royal Cambodian model, and the Doi-Moi model, among many others. The reader is challenged to grasp these different models, and identify their commonalities and differences.

Public-Private Partnerships in Transitional Nations Feb 02 2023

This collection examines public-private partnerships (PPPs) in transitional nations from the governance perspective. It explores the structures, legal frameworks and collaborative arrangements that underpin partnerships in Europe, Asia and Africa, and highlights government decisions that facilitate the transformation of societal challenges into developmental opportunities. By sharing the experience of nine nations, including China, Indonesia, Russia and Nigeria, it helps to better understand the commonalities in PPP deployment, avoid mistakes and pitfalls, and learn from other economies. The book raises the critical questions that concern many governments, including: What are the common and frequent mistakes that governments make when they deploy partnerships and deal with governance issues? How can countries increase PPPs' benefits? Can PPPs be instrumental in accomplishing certain less traditional government tasks, such as disaster risk management of built infrastructure and promotion of clean energy? Can PPPs serve as a backbone of entrepreneurial networks and contribute

to sustainable development? The groundwork is laid out for contrasting and comparing successful and unsuccessful government actions, institutional, legal and financing initiatives and procedures, allowing one to make cross-country and cross-sectoral comparisons. Policy-makers, consultants, managers and others working in the PPP field will find this volume useful, as well as academics, as they can learn from the international comparisons and the experience of others.

The Actinide Carbides Oct 06 2020

Dreaming the Dawn Jan 01 2023 A fresh, articulate collection of interviews with twelve of the most influential Native American voices includes the words of writers Sherman Alexie and James Welch, poet Elizabeth Woody, activist Winona LaDuck, and actor Litefoot, among others.

Philips' Atlas for Beginners, Comprising Twenty-four Maps Sep 16 2021

NATO Enlargement: Albania, Croatia, and Possible Future Candidates Sep 28 2022 At the April 2-4, 2008, NATO summit in Bucharest, Romania, a principal issue was consideration of the candidacies for membership of Albania, Croatia, and Macedonia. The allies agreed to extend invitations to Albania and Croatia. Although the alliance determined that Macedonia met the qualifications for NATO membership, Greece blocked the invitation due to an enduring dispute over Macedonia's name. After formal accession talks, on July 9, 2008, the foreign ministers of Albania and Croatia and the permanent representatives of the current 26 NATO allies signed accession protocols amending the North Atlantic Treaty to permit Albania and Croatia's membership in NATO. To take effect, the protocols must now be ratified, first by current NATO members, then by Albania and Croatia. Albania and Croatia are small states with correspondingly small militaries, and their inclusion in NATO

cannot be considered militarily strategic. However, it is possible that their membership could play a political role in stabilizing southeastern Europe.

Virtual Assistant Jun 01 2020 An intelligent virtual assistant (IVA) or intelligent personal assistant (IPA) is a software agent that can perform tasks or services for an individual based on commands or questions. Improving the quality of artificial intelligence (AI) learning algorithms increases the application of IVAs in different areas. The capabilities and usage of IVAs are expanding rapidly. IVAs, such as Siri, Alexa, and chatbots, help individuals and companies to make better decisions. They learn from collected historical data, and the quality of their recommendations depends on the size of the database they are using. Modern technology has provided a huge capacity for data collection and storage. This means that the new generation of IVAs can help people much better than the previous one. This book examines the applications of IVAs in different areas and presents a clear vision of how this new technology can be used in current and future activities. Chapters cover such topics as the scientific development of VA technology, generating voices for IVAs, the ethics of using IVAs, and using IVAs in banking and finance.

Phase Transitions in Ferroelastic and Co-elastic Crystals Aug 04 2020 This textbook describes the fundamental principles of structural phase transitions in materials in an easily understandable form, suitable for both undergraduate and graduate students. Ferroelasticity, twinning and related microstructures are described. Landau-type theories of phase transitions are introduced, together with details of elastic and specific heat anomalies, the formation of spontaneous strain, and the generation of solitary waves at temperatures close to the transition point. Many materials used in industry are crystals. These crystals often show anomalies such as sudden softening or

embrittlement at certain temperatures; if controlled, such behaviour can be extremely useful for manufacturing and high technology applications. This is one of the first books to describe the recently determined physical origins of such behaviour, and provides an insight into the important thermodynamic principles and microstructural properties involved.

My Gun, My Brother Dec 20 2021 Despite the heated competition for colonial possessions in Papua New Guinea during the nineteenth and early twentieth centuries, the personnel required to run an effective administration were scarce. As a result, the Australian colonial regime opted for a quick solution: it engaged Papua New Guineans—often to perform the most hazardous and most unpopular responsibilities. Based on extensive interviews with former policemen, written records of the time, and reminiscences of colonial officials, this book links events involving police, villagers, and government officers (kiaps) over a forty-year period to wider issues in the colonial history of Papua New Guinea and, by extension, of the Pacific Islands and beyond.

Boundaries and Passages Jun 13 2021 Incorporating elders' recollections of the system of ruled boundaries and ritual passages that guided their parents and grandparents a century ago, Ann Fienup-Riordan brings into focus the complex, creative Yupik world view - expressed by ceremonial exchanges and the cycling of names, gifts, and persons - which continues to shape daily life in communities along the Bering Sea coast. Her analysis is illustrated with many contemporary and historical photographs

Agent and Multi-Agent Systems: Technologies and Applications Feb 19 2022 This book constitutes the refereed proceedings of the 6th KES International Conference on Agent and Multi-Agent Systems, KES-AMSTA 2012, held in Dubrovnik, Croatia, in June 2012. The conference attracted a substantial number of

researchers and practitioners from all over the world who submitted their papers for ten main tracks covering the methodology and applications of agent and multi-agent systems, one workshop (TRUMAS 2012) and five special sessions on specific topics within the field. The 66 revised papers presented were carefully reviewed and selected for inclusion in the book. The papers are organized in topical sections on virtual organizations, knowledge and learning agents, intelligent workflow, cloud computing and intelligent systems, self-organization, ICT-based alternative and augmentative communication, multi-agent systems, mental and holonic models, assessment methodologies in multi-agent and other paradigms, business processing agents, Trumas 2012 (first international workshop), conversational agents and agent teams, digital economy, and multi-agent systems in distributed environments.

Statistical Decision Theory with Business and Economic Applications Mar 11 2021

A Comparative Reference Grammar of Bosnian, Croatian, Serbian Oct 30 2022

Minerals Yearbook Mar 03 2023 The region of Europe and Central Eurasia defined in this volume encompasses territory that extends from the Atlantic Coast of Europe to the Pacific Coast of the Russian Federation. It includes the British Isles, Iceland, and Greenland (a self-governing part of the Kingdom of Denmark). Included are mineral commodity outlook tables, plus global overview research for particularly commodities within a specific regions/countries are presented throughout the text. Manufacturers of these metals and commodities, along with trade brokers that may specialize in imports and exports, political scientists, and economists may also be interested in this volume. Students pursuing research on specific metals and

mineral commodities for world economy courses may be interested in this volume.

Global Perspectives on the Biology and Life History of the White Shark Aug 16 2021 Inspired by the International White Shark Symposium in 2010, Global Perspectives on the Biology and Life History of the White Shark incorporates the most important contemporary research findings into a single peer-reviewed book. This beautifully illustrated reference represents a historic change in the context of White Shark (Carcharodon carcharias) research. Once considered one of the most poorly understood and difficult sharks to study, this timely book recognizes a new sophisticated focus on the White Shark, raising its status from obscurity to enlightenment. The Global Perspectives on the Biology and Life History of the White Shark celebrates the White Shark as the most studied shark in the sea. Within the chapters one can find new insights into a vast range of topics, such as behavior, physiology, migration patterns, habitat preferences, daily activity patterns, molecular genetics, reproductive biology and new research methods. The book also delves into population monitoring and policy options for managers and researchers.

E.K. Brown Nov 06 2020 Drawing heavily on interviews with people who knew him, and on correspondence, examines the career of Canadian literary critic Brown (1905-51), who was at the center of the country's intellectual life for two decades, raised the status of North American literature in the international community, and was instrumental in furthering the careers of many contemporary writers. Annotation copyright by Book News, Inc., Portland, OR

examination of how WTO accession negotiations have expanded the reach of the multilateral trading system both geographically and conceptually.

Human Rights in Business Nov 30 2022 The capacity to abuse, or in general affect the enjoyment of human, labour and environmental rights has risen with the increased social and economic power that multinational companies wield in the global economy. At the same time, it appears that it is difficult to regulate the activities of multinational companies in such a way that they conform to international human, labour and environmental rights standards. This has partially to do with the organization of companies into groups of separate legal persons, incorporated in different states, as well as with the complexity of the corporate supply chain. Absent a business and human rights treaty, a more coherent legal and policy approach is required. Faced with the challenge of how to effectively access the right to remedy in the European Union for human rights abuses committed by EU companies in non-EU states, a diverse research consortium of academic and legal institutions was formed. The consortium, coordinated by the Globernance Institute for Democratic Governance, became the recipient of a 2013 Civil Justice Action Grant from the European Commission Directorate General for Justice. A mandate was thus issued for research, training and dissemination so as to bring visibility to the challenge posed and moreover, to provide some solutions for the removal of barriers to judicial and non-judicial remedy for victims of business-related human rights abuses in non-EU states. The project commenced in September 2014 and over the course of two years the consortium conducted research along four specific lines in parallel with various training sessions across EU Member States. The research conducted focused primarily on judicial remedies, both jurisdictional barriers and applicable law barriers;

non-judicial remedies, both to company-based grievance. The results of this research endeavour make up the content of this report whose aim is to provide a scholarly foundation for policy proposals by identifying specific challenges relevant to access to justice in the European Union and to provide recommendations on how to remove legal and practical barriers so as to provide access to remedy for victims of business-related human rights abuses in non-EU states.

Qulirat Qanemcit-llu Kinguvarcimalriit Feb 28 2020 Before it was written, this book was spoken. For ten winter days in 1977, the orator Paul John—widely respected as a dean of Yup'ik elders, and recognized for his tireless advocacy of Yup'ik language and traditions—held an audience of Yup'ik students rapt at Nelson Island High School, in southwest Alaska. Hour after hour he spoke to the young people, sharing life experiences and Yup'ik narratives, never repeating a tale. Now, more than a quarter-century after Paul John's extraordinary performance, Sophie Shield's translations and Ann Fienup-Riordan's editing have brought his words back to life, and to a new audience. This book records one elder's attempt to create a moral universe for future generations through stories about the special knowledge of the Yup'ik people. Tales both authentically Yup'ik and marked by Paul John's own unique innovations are presented in a bilingual edition, with Yup'ik and English text presented in facing pages. As Paul John says, "In this whole world, whoever we are, if people speak using their own language, they will be presenting their identity and it will be their strength."

Transnational Death Apr 04 2023 With so much of the global population living on the move, away from their homelands, and in diasporic communities, death and mourning practices are inevitably impacted. Transnational Death brings together eleven cutting-edge articles from the emerging field of transnational

death studies. By highlighting European, Asian, North American, and Middle Eastern perspectives, the collection provides timely and fresh analysis and reflection on people's changing experiences with death in the context of migration over time. First beginning with a thematic assessment of the field of transnational death studies, readers then have the opportunity to delve into case studies that examine experiences with death and mourning at a distance from the viewpoints of Family, Community, and Commemoration. The chapters highlight complicated issues confronting migrants, their families, and communities, including: negotiations of burial preferences and challenges of corpse repatriation; the financial costs of providing end-of-life care, travel at times of death, and arranging culturally appropriate funerals and religious services; as well as the emotional and sociocultural weight of mourning and commemoration from afar. Overall, Transnational Death provides new insights on identity and belonging, community reciprocity, transnational communication, and spaces of mourning and commemoration.
