Like its predecessors, the new Ninth Edition of Extraordinary Groups introduces students to some of the most fascinating subcultures in U.S. history, vividly portraying the lifestyles of their members and emphasizing the sociological principles they illustrate. By exploring different cultures, this unique, insightful work continues to broaden students' sociological perspective, and allows them to see their own culture in a new light. Whether studying for an Edexcel, OCR or AQA award, these textbooks, supported by a Tutor's Resource File, cover all the material needed for your chosen specification. Consumer satisfaction is a key issue for all those involved in tourism and hospitality services. Through a multitude of case studies this book explores the challenges of managing tourism and hospitality businesses in order to produce maximum customer satisfaction. It outlines the various frameworks available for the study of tourist satisfaction, before examining service delivery systems and definitions of quality. It then discusses the role that marketing can play in tourism and hospitality services, and the ways in which hospitality and tourism services can be improved. The book contains examples of customer dissatisfaction, and examples of organisations that have succeeded in providing profitable services with high levels of customer loyalty. This book constitutes the refereed proceedings of the 4th International Conference on Electronic Government, EGOV 2005, held in Copenhagen, Denmark in August 2005. The 30 revised papers presented were carefully reviewed and selected from numerous submissions and assess the state of the art in e-government/e-governance and provide guidance for research, development and application of this emerging field. The papers are arranged in topical sections on challenges, performance, strategy, knowledge, and technology. This book examines the impact of the 2008 Beijing Olympics and the 2012 London Olympic Games and highlights the latest findings in the areas of sport policy, elite sports system, sport media, sport facility management and

sport social development in the two host countries - China and Britain. It identifies the role of national and local governments, universities and educational institutions in the delivery of elite sport in different cultural and social settings. Aspects of the elite sports system are also analysed, such as elite athletes' training and education, athletes' rights and welfare both during and after an athlete's career. Finally, the book considers the legacy of the Olympic Games in the areas of sport participation, public diplomacy, education and cultural communication in Europe and China. This book was originally published as a special issue of The International Journal of the History of Sport. This timely volume brings together current research on knowledge-intensive business services (KIBS) and innovation from a geographic or territorial perspective. Researchers from across Europe and North America explore areas such as innovation related cooperation between KIBS firms and their industrial partners, how KIBS firms mediate business knowledge and the impact that KIBS make in their local, regional and international contexts. Vols. for 1981-198 include four special directory issues

Colorectal cancer is one of the most common killers of the 21st century. Bowel Cancer will develop the reader's knowledge and skills in both theory and practice and will enable nurses to demonstrate a good understanding of the problems posed by bowel cancer. This increased awareness provides opportunities for nurses to develop strategies that further enhance the quality and effectiveness of patient care. Acknowledging the vital role of a good working relationship for those engaged in the different aspects of care, the book provides a comprehensive introduction to colorectal cancer for all health professionals. From evolution and treatment to patient and family-centred care, including consideration of an individual's social, spiritual and psychological needs, either in the hospital or the community setting, Bowel Cancer is an excellent overall guide for all healthcare professionals.

AN INTRODUCTION TO HUMAN SERVICES, 9th Edition, offers a uniquely practical and comprehensive introduction to the human services profession. Drawing on the authors' extensive experience, the text defines human services, reviews the historical development of advocacy, examines service delivery models and processes, and emphasizes the skills needed to succeed as a practitioner. Students gain a solid grounding in serving the whole person, using an interdisciplinary approach, interacting with helper and client, preparing generalists, and empowering clients. Detailed case studies highlight the practical applications of key concepts and prepare students to address issues they're likely to encounter. This edition reflects the changing world of human services, the clients that human service professionals serve, and the cultural dimensions of human services and clients.

Environmental constraints are becoming increasingly severe, and now more than ever it is time that we confront head-on the change from an "underground resources" type of civilization to one with a new way of life and technology that embraces a sense of nature. To do so, we need to understand the process of the civilization change. We must change our way of thinking to backcasting in order to design future lifestyles and learn from the elderly who lived with nature under severe environmental constraints more than 70 years ago. We must also learn from nature directly, the only sustainable society on earth. This book introduces Bio-TRIZ and ontology engineering to match and find technologies needed for spiritually affluent lifestyles. It provides many examples of Japanese cities that conducted lifestyle design projects based on nature technology. The book is a great reference for graduate-level students of environmental studies and engineering and for researchers in innovation, social science, engineering, and public policy, especially those with an interest in lifestyle change for a sustainable society. In the past two decades, several millions of IT-enabled services jobs have been relocated or 'offshored' from the US and Europe to, in particular, low cost economies around the world. Most of these jobs so far have landed in South and South-East Asia, with India

and the Philippines receiving the bulk of them. This has caused profound changes in the international division of labour, and has had correspondingly wide social and economic effects. This book examines how this 'next wave in globalization' affects people and places in South and South-East Asia. It brings together twelve case studies from India, the Philippines, China, Hong Kong and Thailand, and explores how and for whom services offshoring creates opportunities, triggers local economic transformations and produces challenges. This book in addition compares how different countries take part in this 'second global shift', investigates service-sector driven economic development from a historical perspective, and engages with the question whether and to what extent services offer a new promising avenue of sustained economic growth for developing countries. It argues that service-led development in developing countries is not easy for all the workers involved, or a guaranteed path to sustained economic development and prosperity. This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services have been located. Based on cutting edge empirical research and original data, the volume offers a state-of-the-art contribution to this growing debate. The book provides valuable insights for students, scholars and professionals interested in services offshoring, socio-economic development and contemporary transformations in South and South-East Asia. This new book offers a broad but concise and practical introduction to ethnicity and health care for a wide range of health professionals. It will enable busy practitioners and students to grasp the essentials quickly and easily so they can develop an effective approach to ethnic diversity in health care. Although focusing on primary care, the book's general principles and its clinical coverage mean it will be relevant to other health and social care practitioners, in addition to those developing and commissioning health services. This book is the first comprehensive international overview of maternity services. Drawing on concepts of risk and social citizenship, it explores the relationship between welfare regimes and health policy by comparing and contrasting provision for childbearing women. Each substantive chapter focuses on a different country, presenting detailed contextual information on health care provision, maternity interventions and birth outcomes there. They discuss key issues such as birth rates and fertility patterns, the role of patient choice, attitudes to place of birth and maternity entitlements among others, and the countries covered represent diverse welfare regimes, including Ireland, Scotland, Sweden, the Netherlands, Germany, Italy, Japan, the United States, Canada, Australia and New Zealand. An extended introduction and a conclusion draw the book together and place it in the context of the literature on comparative welfare regimes. It is an important reference for students and academics interested in comparative social policy, health services research, and maternity services and policies. This volume contains the technical papers presented in the workshops associated with the European Conference on Service-Oriented and Cloud Computing, ESOC 2016, held in Vienna, Austria, in September 2016: 4th International Workshop on Cloud for IoT, CLIoT 2016, Second International Workshop on Cloud Adoption and Migration, CloudWays 2016, First International Workshop on Patterns and Pattern Languages for SOCC: Use and Discovery, PATTWORLD 2016, combined with the First International Workshop on Performance and Conformance of Workflow Engines, PEaCE 2016, IFIP WG SOS Workshop 2016 Rethinking Services ResearCH, ReSeRCH 2016. Furthermore, there is a topical section presenting the results of the PhD Symposium. The abstracts of the presentations held at the European Projects Forum, EU Projects 2016, are included in the back-matter of the volume. The 15 full papers included in this volume were carefully reviewed and selected from 49 submissions. They focus on specific topics in service-oriented and cloud computing domains such as limits and/or advantages of existing cloud solutions, future internet technologies, efficient and adaptive deployment and management of service-based applications across multiple

clouds, novel cloud service migration practices and solutions, digitization of enterprises in the cloud computing era, federated cloud networking services. The importance of physical exercise tends to be neglected in today's modern lifestyle. This increased passive way of life conveys a notable increase in the prevalence of lifestyle disorders such as hypertension and vascular pathology which lead to cardiovascular strain. Taking this into account, the aim of this investigation was to explore the empirical association between the heart health status of an active and sedentary South African lifestyle, thus intending to provide insight into impact of the significant changes that are associated with the modernised society. With the aforementioned objective in mind, four separate studies were completed: Study 1 sought to investigate the cardiovascular status of 162 undergraduate university students in order to determine whether, despite their youth, students remained at risk of cardiovascular complications. Astonishingly, results indicate that a number of students between the ages of 18 and 25 in a university setting present with preminent cardiovascular risk. This data highlights some serious concerns regarding the cardiovascular health among the youth. In sequel to study 1, study 2 permitted the comparison of a sedentary and active South African population, however some discrepancies originated due to the notable age difference between the groups. Nevertheless, results gained from this crosssectional comparison between the populations indicate significantly higher cardiac risk amongst the sedentary population. Study 3 was conducted on 202 infantry service recruits between the ages of 18 and 24 years. A pre- post intervention study design was incorporated in pursuit of determining the influence of an intense training programme on cardiovascular variables of a population over a 20 week time-frame. Results yielded from this study indicate a significant decrease in overall cardiovascular risk, as tested over three intervals (week 1, week 12, and week 20) during the 20 week training period. Study 4 was designed as a longitudinal study with self-controls for within group comparisons, as well as a comparative study between the two contrasting populations. Thus, affording the opportunity to determine the impact of physical activity on cardiovascular risk by comparing two divergent South African lifestyles over a 20-week time frame. The 202 infantry service recruits of study 3 served as the intervention group, while the control group comprised of 126 sedentary university students. Findings from this study conveyed strong association between the active population and decreased cardio-stress index and related heart health measurements in comparison to results of the sedentary population. This research validates the positive correlation between a physically active lifestyle and improved heart health, thereby implying reduced cardiovascular risk. In the combat against cardiovascular disease it is clear that focus should be shifted from pharmacological treatment to behavioural prevention. As a principle component of this preventative approach it is vital that individuals are equipped with screening technology that enables early detection and monitoring of probable cardiovascular complications. Several novel ideas were introduced in this research, including the endorsement of the cardio-stress index method as an efficient non-invasive technique to directly observe cardiovascular stress. This book focuses on the competitive situation and policy outlook of China's provincial economy in the 13th five-year period. It begins with a general evaluation report on the country's provincial comprehensive Economic Competitiveness, followed by analyses at the international, national and regional levels, industrial and enterprise levels. On the basis of domestic and international research findings, it further enriches our understanding of provincial competitiveness, analyzes the domestic and international situation, explores new changes, new norms, new situations and new challenges concerning China's provincial economy in the past few years, reveals the characteristics and relative differences of different types, defines their internal competitive strengths and weaknesses, and provides valuable theoretical content to guide decision-making. The purpose of this book is to provide evidence for physicians about the prevalence for a range of medical conditions by disability, from a primary care perspective. Each chapter focuses on a secondary condition for which adults with DD are at increased risk, decreased risk, and the same risk as the general population. The incidence and prevalence of each of the secondary conditions is presented, and contrasted to the general population. The special challenges for diagnosis and treatment of the secondary condition is highlighted. Finally the book describes a case study that includes physical, social and emotional challenges and ways to accommodate these issues in a primary care practice. Becoming a military millionaire doesn't require a big salary, corporate bonus checks or tremendous prowess in the stock market. It does require taking advantage of the generous resources the military offers, using a systemic approach to investing in your future, and avoiding the pitfalls that people routinely fall in because they don't have a plan. I believe that wealth is obtainable to the military professional without sacrificing devotion to duty or family. It's simply a matter of loading up your financial rucksack with the goals, a plan, the right information and applying sound lifestyle habits that take advantage of what's available to you as a service member or family member and avoiding poor financial and lifestyle decisions. I'd like to give you the answers to the test in advance so you can get it right the first time. So come on and follow me!

This edited volume aims to describe the transformation of supply chain management (SCM) and logistics services by merging sustainable logistics, SCM, sustainable consumption and lifestyle research. This assessment of the transformation potential serves the development of sustainable business models and optimized decision-making systems for achieving sustainable economic value creation within a green economy. In 5 sections, the volume takes a unique transdisciplinary approach to assess sustainable business practices within SCM and the logistics sector, and to understand the interactions between logistics services and consumer lifestyles while creating transparency within the decision making process. This book will be of particular interest to academics, policymakers, planners, and politicians. Section 1 introduces readers to the importance of blended research and innovation between sustainable SCM and consumer lifestyles for transformation towards a green economy. Section 2 addresses the question of how trends and developments in consumption behavior and lifestyles influence the development of sustainable logistics. Section 3 discusses the transformation potential towards sustainable logistics using the food sector as an example. Section 4 focuses on strategic decision making in SCM, and how long-term improvements of sustainability performance can be achieved. Section 5 concludes with policy recommendations as well as research and innovation perspectives for future sustainable development with SCM and logistics.

Hotels, attractions, and restaurants in all price categories are listed with evaluations based on reader surveys and critiques--compiled by unbiased inspectors of Orlando's most famed attraction. Service is not something you do; it is something you are. That is the main focus of this book. I wrote this book to give simple guidelines to cultivate a lifestyle of service. Customer service should be, if not number one on your company's priorities list, at least in the top three. It should be walked and talked. It should be part of everyone; from the MD to the cashier to the temporary worker. This book will give you guidelines on how to imprint this into your heart and mind. From there it will be your task to get the message over to your people. I have a wealth of customer service knowledge that I gathered in the more than 20 years that I have been working in the service delivery industry. I believe I have been in one of the most challenging service delivery industries in the world, which is IT. The knowledge I acquired needs to be shared with the

world. Although I gathered most of the knowledge in the IT industry, there are certain generic concepts that are universal and applicable to all industries. The purpose of the book is to help companies grow revenue. I do not see myself as a business expert, but I see myself as an expert in one field of business that has the highest revenue generating potential. The aim is to help you grow your customer base which in turn will grow your revenue. I wrote this book to make the world a better place. Serving customers is not just a money spinner. It has the potential to make a difference in people's lives. Yes you need to get paid for the service you offer to others. That is what business is all about, but the principles in this book have the potential, when applied, to change people's lives. The idea is to cultivate a lifestyle of service. I want you as reader to start making a difference to the sphere of life you service. Whether you are directly delivering a service to a customer or not, we are all in the line of service somewhere. We serve our spouses, children, family, churches, organizations, schools, sport teams etcetera. →A Lifestyle of Service will help you do that with excellence and it will help you enjoy it while you're at it. Customer service has been overcomplicated over the years. I will show you that it's not complicated. There are simplistic tools and methods that can be applied to create excellent results. On the African continent where I have lived all my life, there are challenges unique to Africa, but there are also challenges that are universal. My African perspective will give a new simplistic angle to what service delivery can be. I wrote this book for educational purposes. I wrote it to educate the reader about service delivery, but it does so in a non-academic style. Instead, it uses practical examples and storytelling. There are life lessons in this book that will have a positive impact on your personal life, family, friends and the society around you. I want to motivate the reader to make the world a better place through serving others. "This reference book brings together various perspectives on the usage and application of mobile technologies and networks in global business"--Provided by publisher. Since their emergence in the 1960s, lifestyle sports (also referred to as action sport, extreme sports, adventure sports) have experienced unprecedented growth both in terms of participation and in their increased visibility across public and private space. book seeks to explore the changing representation and consumption of lifestyle sport in the twenty-first century. The essays, which cover a range of sports, and geographical contexts (including Brazil, Europe, North America and Australasia) focus on three themes. First, essays scrutinise aspects of the commercialisation process and impact of the media, reviewing and reconsidering theoretical frameworks to understand these processes. The scholars here emphasise the need to move beyond simplistic understandings of commercialisation as co-option and resistance, to capture the complexity and messiness of the process, and of the relationships between the cultural industries, participants and consumers. The second theme examines gender identity and representations, exploring the potential of lifestyle sport to be a politically transformative space in relation to gender, sexuality and 'race'. The last theme explores new theoretical directions in research on lifestyle sport, including insights from philosophy, sociology and cultural geography. The themes the monograph addresses are wide reaching, and centrally concerned with the changing meaning of sport and sporting identity in the twenty-first century. This book was previously published as a Special Issue of Sport in Society.
