American Constitutional Law, Volume II Jan 04 2021 American Constitutional Law 11e, Volume II provides a comprehensive account of the nation's defining document, examining how its provisions were originally understood by those who drafted and ratified it, and how they have since been interpreted by the Supreme Court, Congress, the President, lower federal courts, and state judiciaries. Clear and accessible chapter introductions and a careful balance between classic and recent cases provide students with a sense of how the law has been understood and construed over the years. The 11th Edition now includes several landmark First Amendment cases, including Janus v. American Federation of State, County, and Municipal Employees (2018), Minnesota Voters Alliance v. Mansky (2018), National Institute of Family and Life Advocates v. Beccera (2018), Trinity Lutheran Church v. Comer (2017) and Masterpiece Cakeshop v. Colorado Civil Rights Commission (2018). It also includes Carpenter v. United States (2018). A revamped and expanded companion website offers access to even more additional cases, an archive of primary documents, and links to online resources, making this text essential for any constitutional law course.

Genetics and the Law II Jan 28 2023 The law is a mandate and a mirror; it both commands and reflects. It should not come as a shock that scientists and physicians often prefer the mirror at times when society seems to be demanding a mandate. This may be especially true in the rapidly advancing field of medical genetics, where recent discoveries leading to potentially startling applications have raised old questions of law in a new light. Nevertheless, we believe that in general the conflict between the law and science, as illustrated in the field of genetics, is embroiled with exaggeration. The Chief Justice of the United States Supreme Court, Warren Burger, has noted that "the prime function of the law is to protect basic human values--individual human values--sometimes even at the expense of scientific progress"; and that "it is not the function of the law to keep pace with science." While both of these statements are true as far as they go, we believe the law must make an affirmative effort to anticipate scientific developments so that those beneficial to society can be nurtured rather than stultified. It was to nurture cooperation and understanding that we brought together a distinguished faculty of internationally known experts on law and genetics to discuss their fields in 1975.
