Turkey stands at the crossroads of the Middle East--caught between the West and ISIS, Syria and Russia, and governed by an increasingly forceful leader. Acclaimed writer Kaya Genc has been covering his country for the past decade. In *Under the Shadow* he meets activists from both sides of Turkey's political divide: Gezi park protestors who fought tear gas and batons to transform their country's future, and supporters of Erdogan's conservative vision who are no less passionate in their activism. He talks to artists and authors to ask whether the New Turkey is a good place to for them to live and work. He interviews censored journalists and conservative writers both angered by what has been

going on in their country. He meets Turkey's Wall Street types who take to the streets despite the enormity of what they can lose as well as the young Islamic entrepreneurs who drive Turkey's economy. While talking to Turkey's angry young people Genc weaves in historical stories, visions and mythologies, showing how Turkey's progressives and conservatives take their ideological roots from two political movements born in the Ottoman Empire: the Young Turks and the Young Ottomans, two groups of intellectuals who were united in their determination to make their country more democratic. He shows a divided society coming to terms with the 21st Century, and in doing so, gets to the heart of the compelling conflicts between history and modernity in the Middle East. Major updates in this new edition provide information on current trends such as the management of osteoporotic and fragility fractures, locked plating technology, post-

The blockbuster best seller *Primal Leadership* introduced us to "resonant" leaders--individuals who manage their own and others' emotions in ways that drive success. Leaders everywhere recognized the validity of resonant leadership, but struggled with how to achieve and sustain resonance amid the relentless demands of work and life. Now, Richard Boyatzis and Annie McKee provide an indispensable guide to overcoming the vicious cycle of stress, sacrifice, and dissonance that afflicts many leaders. Drawing from extensive multidisciplinary research and real-life stories,

Resonant Leadership offers a field-tested framework for creating the resonance that fuels great leadership. Rather than constantly sacrificing themselves to workplace demands, leaders can manage the cycle using specific techniques to combat stress, avoid burnout, and renew themselves physically, mentally, and emotionally. The book reveals that the path to resonance is through mindfulness, hope, and compassion and shows how intentionally employing these qualities creates effective and enduring leadership. Great leaders are resonant leaders. Resonant Leadership offers the inspiration--and tools--to spark and sustain resonance in ourselves and in those we lead. In a straightforward and readable style, it focuses on the changing accounting and auditing standards in national and global economies in the post-Enron/Arthur Andersen era. The authors clarify the reasons behind and consequences of the accounting profession's failure in auditing and self-regulation, as most firms placed consulting profits ahead of public audit duties. The book offers a detailed examination of accounting practitioners' past challenges and future prospects. It provides a realistic analysis of specific issues facing accounting and

auditing firms today, including the growing problem of independence; the need for one set of international accounting standards and one set of auditing standards; adjustments facing the global financial system; and the impact of the Internet and communication systems on accounting firms.
