At the time, in 1978, when *The Cars That Henry Ford Built* was first published, sending a copy for Henry Ford II to review seemed a vain request. Automobile Quarterly founding editor and publisher L. Scott Bailey was told that Mr. Ford (never comments on a book written about Ford. ÷ Two weeks later came an unexpected exhortation from Henry Ford II: (My grandfather would have loved this book. ÷ Ford then specially ordered 20 copies bound in white leather-needed in two weeks. The rush order was necessitated by an upcoming trip to Japan. As is culturally customary to offer a gift that honors one's ancestors, Henry Ford II specifically chose *The Cars That Henry Ford Built* to give to his Japanese hosts. Such high-level praise is derived from the book's fresh approach to the subject of Henry Ford, both in its study of the man and his cars, as well as the exceptional pictorial presentation. Presented for the first time in full color, there is every model Henry Ford produced from the Quadricycle he put together as a young man in 1896 to the famous V8 Ford on the production lines four and a half decades later during his failing years. Probably no other individual in automobile history more accurately mirrored in his cars his view of himself and of America as he saw it. Join award-winning historian and author Beverly Rae Kimes as she presents lively historical text that captures Henry growing and aging as his cars grew and aged, each lock-stepped together through history. Over 100 full-color photographs further bring the man and his creations to life. Discover *The Coolest Vehicle Coloring Book and Story For Kids Today!* Does your kid like coloring books and*

How can such a filtering apparatus shape the content and form of sound production in the city? As a marker of co-presence to the hearing body, sound is always open to (or rather opens up) the politics of shared existence. In the throes of the post-dictatorship period, Brazil's legislative*

*and executive branches implemented a series of sweeping measures to address quality of life concerns, including environmental pollution and urban inequality. In São Paulo, noise control became a recurrent controversy, growing in size and scale between the 1990s and 2010s. Together with the much-debated fear of crime and the socioeconomic and cultural tensions between the rich urban center and the poor peripheries, such ecological agendas against noise as a harmful pollutant have reconfigured the presence of environmental sounds in the city. In this book, Cardoso argues that the framing of specific sounds as unavoidable, unnecessary, or as harmful "noise" has been an effective strategy to organize spaces and administer group behavior in this rapidly expanding city. He focuses on two interrelated processes. First, the series of institutional regulatory mechanisms that turn sounds into the all-embracing "noise" susceptible to state intervention. Second, the constant attempts of interested groups in either attaching or detaching specific sounds (musical events, industrial noise, traffic noise, religious sounds, etc.) from regulatory scrutiny. Sound-politics is the dynamic that emerges from both processes - the channels through which sounds enter (and leave) the sphere of state regulation. Capturing the excitement of a nation as it became a driving force -- in more ways than one -- Driving Around America is the story of how America's romantic, restless spirit*

*found its counterpart in the automobile. With Henry Ford's assembly lines lowering the price of cars, ordinary people began to travel where and when they pleased with a freedom never before known -- and the nation would never be the same. People moved farther from their work, creating suburbs; the demand for gasoline increased, spurring the growth of the petroleum industry; and individual members of families moved far from each other, changing the social fabric of the nation. From the auto's early beginnings to the commonplace use of cars in all aspects of life today, Driving Around America is a fascinating portrait of how America transformed as its citizens were on the move more and more. The 1960s was arguably the most important decade for drag racing. It had exciting cars, thrilling races, and most importantly, factory participation. Among the best high-performance cars and engines were those coming from Dearborn, Michigan. Ford Motor Company's "Total Performance Years" saw a breakthrough as drag racing helped the younger, performance- and style-conscious consumer to begin receiving some recognition. Factory participation in drag racing pushed the envelope for high performance developments. Ford's FE-series engine, Police Interceptor, GT 390, Single Overhead Cam, Cobra Jet, and Boss 429 are all covered in detail. See the cars and the drivers that made them famous - Dick Brannan's Goldfinger, Bill Lawton's Mystery Mustang, "Dyno Don" Nicholson's Eliminator Comet, Gas Ronda's stretched Mustang, Al Joenic's Batcar, and more. Accomplished journalist and life-long Ford aficionado Charles Morris takes you back to the Total Performance Years through first-hand accounts as well as over 400 rare photographs. A drag racer since 1966, Morris has run cars in both Stock and Super Stock classes. He is currently the owner of the original Norristown Ford 1963 lightweight Galaxie and races the car in Nostalgia Super Stock as part of the 422 Motorsports Drag Racing Team. This book is a must read for all drag racing fans, not just Ford enthusiasts. Building Scale Model Police Cars. If you like to build plastic model kits of commercial, Police and Sheriff cars or trucks, this book includes step by step instructions to help make your models their best. Includes painting, detailing, and fabrication help. It has full color pictures and is printed in a large format for easy reading. Some of the model vehicles covered are the MPC/AMT Dodge Monaco, the Lindberg Dodge Charger, and a Lindberg Ford Crown Victoria Police Interceptor. Also included are notes on other Police car models produced over the years. Crime involving cars – whether involving offences by drivers or theft of and from cars – represents a substantial proportion of offences committed, and occupies an enormous amount of police time. But it is not always perceived as the serious crime that it is: many traffic offences cause enormous harm in terms of death and injury, but are often not regarded seriously by drivers, the criminal justice system and the state. Other than theft of and from cars it is arguable that car crime is socially constructed as 'not real crime' or 'not even crime'. This book is the first to survey the whole area of car crime. It considers car crime as a coherent whole, addressing the concept of car culture; considers car crime in its various guises in relation to issues such as masculinity, gender, car usage and the environment; considers the historical roots of legislation concerning crime committed in the car, through to current legislation and its effects and implications. The book also addresses issues of crime prevention, and in particular the role of car manufacturers in making cars more crime proof. The 1960s was arguably the most important decade for drag racing.
