Joss Whedon Dec 15 2021 From the cult favorite Buffy the Vampire Slayer, which netted four million viewers per episode, to the summer blockbuster The Avengers, which amassed a box office of \$1.5 billion, Joss Whedon has made a name for himself in Hollywood for his penchant for telling meaningful, personal tales about love, death, and redemption even against the most dramatic and larger-than-life backdrops. This biography follows his development from a creative child and teenager who spent years away from his family at an elite English public school, through his early successes—which often turned into frustrating heartbreak in both television (Roseanne) and film (Buffy the Vampire Slayer)—to his breakout turn as the creator, writer, and director of the Buffy television series. Extensive, original interviews with Whedon's family, friends, collaborators, and stars—and with the man himself—offer candid, behind-the-scenes accounts of the making of groundbreaking series such as Buffy, Angel, Firefly, and Dollhouse, as well as new stories about his work with Pixar writers and animators during the creation of Toy Story. Most importantly, however, these conversations present an intimate and revealing portrait of a man whose creativity and storytelling ability have manifested themselves in comics, online media, television, and film.

Max Your Memory Apr 30 2023 Boost your memory power with the ultimate brain workout Max Your Memory with this fun programme packed with 200 fun exercises, puzzles, tips and strategies to sharpen your memory skills. Designed to improve all aspects of your memory including long-term, short-term, visual and organisational, you'll also find helpful tricks that can be applied in everyday life helping you remember all those phone numbers, faces and names that seem to slip your mind. Use the helpful "check-in" and "check-out" boxes to record your score and chart your progress as you improve. Max Your Memory is one book you shouldn't forget to buy.

Doctor Pascal Apr 26 2020 In the heat of the glowing July afternoon, the room, with blinds carefully closed, was full of a great calm. From the three windows, through the cracks of the old wooden shutters, came only a few scattered sunbeams which, in the midst of the obscurity, made a soft brightness that bathed surrounding objects in a diffused and tender light. It was cool here in comparison with the overpowering heat that was felt outside, under the fierce rays of the sun that blazed upon the front of the house. Standing before the press which faced the windows, Dr. Pascal was looking for a paper that he had come in search of. With doors wide open, this immense press of carved oak, adorned with strong and

handsome mountings of metal, dating from the last century, displayed within its capacious depths an extraordinary collection of papers and manuscripts of all sorts, piled up in confusion and filling every shelf to overflowing. For more than thirty years the doctor had thrown into it every page he wrote, from brief notes to the complete texts of his great works on heredity. Thus it was that his searches here were not always easy. He rummaged patiently among the papers, and when he at last found the one he was looking for, he smiled.

Theaters of Error Mar 25 2020 This book offers provocative readings of canonical Enlightenment dramas that reflect and shape the period's changing understanding of error. With striking interdisciplinary connections to theater treatises as well as works from the philosophical, legal, and medical discourses, it tracks the relocation of error from the moral to the physical realm, a movement that begins with Lessing and continues through the turn of the nineteenth century. Featuring detailed analyses of Lessing's *Miß Sara Sampson*, Diderot's *Le Fils naturel*, Schiller's *Die Räuber*, and Kleist's *Die Familie Schroffenstein* alongside rich close

readings of diverse primary sources, ranging from previously untranslated acting treatises by Sainte-Albine and Engel to texts from the German Archiv des Criminalrechts, this study introduces the reader to new Enlightenment sources and compellingly concludes that ultimately it is no longer evil, but rather bodily irregularities and mistakes in reading the body that become the driving principle of Enlightenment drama.

Buddhism: All That Matters Mar 06 2021 Most introductions to Buddhism look at the life of the Buddha, and the practice of Buddhism in the West today. But this is rather like publishing a book on Christianity, and only mentioning Jesus and the Church of England. In this wide-ranging new study, Bristol University's Pascale Engelmajer seeks to relocate Buddhism in its historical and global context. This important new thinking is grounded in the stories of four people who are practising Buddhism around the world in very different ways. By celebrating the diversity of Buddhism, Dr Engelmajer tells a story that is often lost beneath Western talk (and confusion) about Feng Shui, yoga, and the Dalai Lama.

***The \$16 Taco* Oct 25 2022** Having “discovered” the

flavors of barbacoa, bibimbap, bánh mi, sambusas, and pupusas, white middle-class eaters are increasingly venturing into historically segregated neighborhoods in search of “authentic” eateries run by—and for—immigrants and people of color. This interest in “ethnic” food and places, fueled by media attention and capitalized on by developers, contributes to gentrification, and the very people who produced these vibrant foodscapes are increasingly excluded from them. Drawing on extensive fieldwork, geographer Pascale Joassart-Marcelli traces the transformation of three urban San Diego neighborhoods whose foodscapes are shifting from serving the needs of longtime minoritized residents who face limited food access to pleasing the tastes of wealthier and whiter newcomers. The \$16 Taco illustrates how food can both emplace and displace immigrants, shedding light on the larger process of gentrification and the emotional, cultural, economic, and physical displacement it produces. It also highlights the contested food geographies of immigrants and people of color by documenting their contributions to the cultural food economy and everyday struggles to reclaim ethnic foodscapes and lead flourishing and hunger-free lives. Joassart-Marcelli offers valuable lessons for cities where food-related development projects transform neighborhoods at the expense of the communities they claim to

celebrate.

Copyright User Rights Nov 13 2021 The author defines what copyright user rights are and should be, and why. Addresses contemporary issues of tangibility and intangibility in copyright law, with reference to new kinds of copyright works such as e-books, iTunes, online software, digital-release films.

***The Retirement Maze* Nov 25 2022** Millions of baby boomers are just beginning to retire, and in doing so many are likely to run into adjustment problems, such as loss of identity, deterioration of marriage and social life, and feelings of disconnectedness to the world. Studies have found that as many as 40% of retirees have difficulty adjusting, and even those who claim to enjoy retirement may experience some uneasiness as they adapt to a life lacking in structure and direction. This book investigates the struggles faced by retirees in building a new life outside of the workforce. It provides an honest assessment of retirement, based on the not-always-acknowledged fact that it is a difficult transition with pitfalls and obstacles to be overcome. But along with uncovering problems, the authors also propose solutions to enable both current and future retirees to be better prepared, allowing them to avoid being blind-sided by unexpected situations. By reading about the experiences of their peers, current and future retirees will come to understand that others share their difficulties adjusting, and

that tactics are available to improve their comfort level in retirement as well as their overall well-being. Retirees and those planning for retirement will find in these pages what they need to make retirement successful and enjoyable.

Doctor Pascal Jan 28 2023 "While *La Débâcle* (1892), the nineteenth novel of the *Les Rougon-Macquart*, brought to a close the history of the Second Empire, *Dr Pascal* (*Le Docteur Pascal*, 1893), the twentieth and final novel of the series, concludes the saga of the *Rougon-Macquart* family. Set in Plassans, the novel begins in 1872, after the fall of the Empire. Pascal Rougon, a doctor, first appears in *The Fortune of the Rougons* (1871) as the second son of Pierre and Félicité Rougon; his elder brother is Eugène Rougon, his younger brother is Aristide (Saccard). He stands apart, to such an extent that he 'did not seem to belong to the family' (*The Fortune of the Rougons*, p. 61). When he reappears twenty-two years later as the central figure of the novel that bears his name, it is as a heroic, almost messianic, old man, a kind of scientist-scholar, prophesying a glorious future. Devoted to medical research, he has spent his life studying genetics, chronicling and classifying the hereditary ills of his own family-the thirty descendants of his grandmother Adélaïde Fouque (Tante Dide). He keeps his files locked in a cupboard, along with a family tree he has

painstakingly compiled. Additionally, he has developed a process of hypodermic injections which, he believes, will cure hereditary and nervous diseases. Pascal's young niece, Clotilde (daughter of Aristide), who lives with him, has acquired strong religious convictions under the influence of Martine, the doctor's pious old servant. Clotilde considers her uncle's work a vain, even sacrilegious, attempt to understand what can be known only by God, and begs him to destroy his manuscripts. The conflict between science and religious faith is the focus of the first half of the novel. Pascal responds to Clotilde's pleas: I believe that the future of humanity lies in the progress of reason through science. I believe that the pursuit of truth through science is the divine ideal that man ought to set himself. I believe that all is illusion and vanity outside the treasure trove of truths slowly acquired and which will never again be lost. I believe that the sum of these truths, which are always growing in number, will end up giving man incalculable power and serenity, if not happiness... Yes, I believe in the ultimate triumph of life. (p. 000) Pascal shows his niece the genealogical tree, and, one by one, reads out his files and comments on them, rehearsing in a single sitting the narratives Zola took twenty years to produce: 'Ah! ... there's a world, a society, a whole civilisation in there, the whole of life is there, in all its manifestations, good and bad, hammered

out in the forge fire that seeps all along' (p. 000). Clotilde is won over, persuaded of the power of medical science and natural evolution. Eventually, the doctor and his pupil begin an intimate and tender relationship, albeit incestuous. Pascal's mother, Félicité, is outraged that they live together out of wedlock. A financial crisis and burgeoning debts induce Pascal to send Clotilde away to Paris. He falls ill and dies before she can return. Félicité, desperate to keep the family skeletons hidden at any cost, burns her son's research papers. Clotilde, on her return, finds fragments of his work, as well as the family tree, and resolves to complete the project. Her and Pascal's child is born several months later, and the novel closes in semi-idyllic fashion-Nicholas White speaks of the 'euphoria' of the final pages(1)-by focusing on the hope for the future, and for the regeneration of the family, which is symbolized by the child. The themes of Dr Pascal, in particular its optimistic vision and the conflict it dramatizes between scientific materialism and religious faith, are best understood by placing the novel in the context not simply of Zola's original intentions for his novel series but also of the climate of ideas in France in the mid- and late-nineteenth century"--

Informal Work in Developed Nations Jul 30 2020
Almost everyone residing in a developed nation knows someone who has engaged in paid work that

is licit but not reported to the government (e.g., babysitting, gardening, construction, financial consulting). But while most acknowledge that such work is helpful to the individuals involved, and that informal work may enhance a sense of community, most scholars view it as a pre-modern form of exchange and something that disappears as capitalist markets expand globally. Both mainstream and heterodox economics typically assume that there is an inevitable shift towards the formalization of goods and services provisioning as societies become more "advanced" or "developed" (the "formalization thesis"). In these views, the existence of informal activities is a manifestation of backwardness and it is assumed that they will disappear as an economy becomes more "modern." This book challenges these conventional theses about the linear trajectory of informal work and economic development by arguing that informal work is not trivial for understanding modern capitalist economies, and that both mainstream and heterodox theories about the economy must be altered to address the role of informal work in relatively developed economies. This edited collection focuses on informal work in various developed nations, including Canada, the United States, and several in Europe. It will therefore be of interest to policymakers, as well as students and researchers in development studies, social policy,

sociology, anthropology, public health, geography, economics and planning. Enrico Marcelli is Assistant Professor of Sociology at San Diego State University, USA. Colin C. Williams is Professor of Public Policy at the University of Sheffield, UK. Pascale Joassart is Assistant Professor of Geography at San Diego State University, USA.

The Power Of Positive Deviance* Feb 02 2021 Think of the toughest problems in your organization or community. What if they'd already been solved and you didn't even know it? In *The Power of Positive Deviance*, the authors present a counterintuitive new approach to problem-solving. Their advice? Leverage positive deviants--the few individuals in a group who find unique ways to look at, and overcome, seemingly insoluble difficulties. By seeing solutions where others don't, positive deviants spread and sustain needed change. With vivid, firsthand stories of how positive deviance has alleviated some of the world's toughest problems (malnutrition in Vietnam, staph infections in hospitals), the authors illuminate its core practices, including: · Mobilizing communities to discover "invisible" solutions in their midst · Using innovative designs to "act" your way into a new way of thinking instead of thinking your way into a new way of acting · Confounding the organizational "immune response" seeking to sustain the status quo Inspiring and insightful, *The Power of Positive

Deviance unveils a potent new way to tackle the thorniest challenges in your own company and community. Richard Pascale is an associate fellow of Templeton College, Oxford University, and author or coauthor of numerous books, including *Managing on the Edge*, *Surfing the Edge of Chaos*, and *The Art of Japanese Management*. Jerry Sternin was the world's leading expert in the application of positive deviance as a tool for addressing social and behavioral change. Monique Sternin has been an equal partner in these efforts and now heads the Positive Deviance Institute at Tufts University

***Surviving the Unimaginable* Jul 10 2021 How do you survive the unimaginable loss of a baby during pregnancy or infancy? From the early days of shock and devastation through the following phases of grief over time, Pascale Vermont, PhD, offers insight and recommendations for bereaved parents, their family and friends, as well as medical providers. Vermont, a clinical psychologist with a specialty in grief counseling, has guided over a hundred couples who have lost a baby during pregnancy by termination or fetal demise, by stillbirth, or by death in the first few weeks or months of life. *Surviving the Unimaginable* is based on a collection of interviews with twenty couples who have made it from sadness and despair to a place of hope. These parents now wish to share what they found most helpful along the way. They**

are survivors who, through counseling, ultimately discovered how now, with the passage of time, they can give back to grieving parents by reflecting on their journeys and lessons learned. Vermont has listened closely to these voices of grief, presenting them alongside her practical expertise. In this book for bereaved parents, family and friends, you will learn: How to navigate the first few weeks or months. How to respect different grieving styles and normalize grief reactions. How to guide family and friends to support the couple. How to honor their baby through various rituals and examples of legacy. How to manage anxiety in a subsequent pregnancy. How to find hope that they can, just like those interviewed, survive. If you're in the midst of trying to survive the unimaginable, this book is a wonderful resource.

Pure & Simple Jun 20 2022 Discover how natural, unprocessed foods can help you live a happier, healthier, and slimmer life with this book featuring over sixty recipes. In Pure and Simple, Pascale Naessens shares her method for staying happy, healthy, and slim, with more than sixty recipes. She recommends a lifestyle that embraces only natural, unprocessed foods, but she is not advocating for a diet dominated by restrictions. Instead she celebrates delicious meals, pleasure, and health. Her approach has only one rule—no carbohydrates with protein. So, you can eat anything you want, but

not together. She works with a basic series of food combinations: meat or fish + vegetables; carbohydrates + vegetables; or dairy + vegetables. And her mouthwatering recipes for appetizers, mains, and desserts make adopting this eating style entirely uncomplicated. You don't need to count calories or restrict portion sizes. If you are overweight, you will lose the extra pounds. You will cook delicious food simply and easily. You can drink wine. You will be satisfied. And you will enjoy your food with relish. "Forget calories, focus on food quality, and let your body do the rest! Pascale Naessens shows how to put this prescription into practice with delicious recipes in her beautiful book *Pure & Simple*," –David S. Ludwig, MD, PhD, author of *Always Hungry?*

Samuel Beckett Aug 23 2022 In this fascinating new exploration of Samuel Beckett's work, Pascale Casanova argues that Beckett's reputation rests on a pervasive misreading of his oeuvre, which neglects entirely the literary revolution he instigated. Reintroducing the historical into the heart of this body of work, Casanova provides an

arresting portrait of Beckett as radically subversive—doing for writing what Kandinsky did for art—and in the process presents the key to some of the most profound enigmas of Beckett’s writing.

Interpretative Qualitative Research: Agency, Subjectivity, and Experience frames the concerns and processes of standard analytic induction, ethnomethodology, and symbolic interaction in terms of cutting-edge issues for contemporary qualitative research. It is the first book to demonstrate how interpretive paradigms for qualitative data analysis produce research findings that are rooted to significantly different understandings of personal agency and social structures; subjectivity and identity; and, the nature of human experience. Specifically, the book explores the analytical process, interpretative power, and political effects of these three styles of interpretative research. The result is a rich,

pedagogical resource that explores not only how data is interpreted but also the kinds of problems, solutions, and questions that can be investigated.

Doctor Pascal Oct 01 2020 Pascal, a physician in Plassans for 30 years, has spent his life cataloging and chronicling the lives of his family based on his theories of heredity. Pascal believes that everyone's physical and mental health and development can be classified based on the interplay between innateness (reproduction of characteristics based in difference) and heredity (reproduction based in similarity). Using his own family as a case study, Pascal classifies the 30 descendants of his grandmother Adelaïde Fouque (Tante Dide) based on this model. Pascal has developed a serum he hopes will cure hereditary and nervous diseases (including consumption) and improve if not prolong life. His niece Clotilde sees Pascal's work as denying the omnipotence of God and as a prideful attempt to comprehend the unknowable. She encourages him to destroy his work, but he refuses. (Like other members of the family, Pascal is somewhat obsessive in the pursuit of his passion.) Pascal's explains his goal as a scientist as laying the groundwork for happiness and peace by seeking and uncovering the truth, which he believes lies in the science of heredity. After he shows her the Rougon-Macquart family tree and demonstrates his refusal to sugarcoat the family's acts, Clotilde begins to

agree with him. Her love for him solidifies her faith in his theories and his lifelong work.

the monthly homeopathic review Feb 14 2022

The Ladder of Monks Mar 30 2023 Guigo II the Chartusian (1114 - c. 1193) was the ninth prior of the Grande Chartreuse. His Ladder of Monks is one of the great spiritual classics that has inspired the method of lectio divina -spiritual reading of the Holy Scriptures- since the early Middle Ages. We find its influence, for example, in the reflection of Saint John of the Cross on lectio divina -see: "When God Speaks: Lectio Divina in Saint John of the Cross," and it provides the key to understanding William of Saint-Thierry's "On Contemplation."

Operation: Monarch Jun 28 2020 As security adviser to the monarch of Carramer, Serena Cordeaux was used to handling high-profile national threats. But after intercepting information that suggested Garth Remy--a sexy man from her past--was the true heir to the throne, she found herself guarding the one man who could rock the country's political foundation--and her own solitary, career-focused life. Former navy diver Garth Remy didn't need a baby-sitter, even if she was the model-stunning woman who'd haunted his dreams. He vowed to uncover the plot against the crown and prove once and for all he was no prince. But would spending so much time with Serena drive Garth toward the truth--or her bed?

Social Inequality & The Politics of Representation
Aug 30 2020 In a global landscape, the representational practices through which inequalities gain meaning are central- both within and across national boundaries. **Social Inequality & The Politics of Representation** takes a fresh look at how inequalities of class, race, sexuality, gender, and nation are constructed in twenty countries on five continents. It offers both rich insight and cultural critique- yet it does not offer a universal paradigm, nor is it concerned with debates about scholarship from "the center" or "the periphery". The collection de-centers North American/European paradigms by placing scholarship from countries around the globe on equal footing. Readers will find a variety of analytical styles including frame analysis, semiotics, poststructural discourse analysis, critical discourse studies, and conversation analysis. Each chapter provides an overview of relevant cultural and historical contexts for an international audience as well as a brief introduction to relevant methodological and theoretical frameworks. Consequently, it is both a richly diverse and easily accessible collection.

Making Marriage Work Sep 23 2022 Staying happily married has become a difficult proposition in recent times. Although the institution is still firmly embedded in our culture, divorce rates have steadily climbed since the 1960s. While some

marriages are truly divorce-worthy, many other broken marriages can be saved. Recent emphasis on personal needs and greater social acceptance of divorce and alternative lifestyles may have weakened the resolve of partners to work through their problems. Furthermore, many couples may not realize that problems in their current marriages are likely to surface in other relationships.

Consequently, while they may consider divorce a solution, it may in fact only be a stepping stone to the next relationship where patterns may repeat. Solving marital differences can be difficult. They tend to be linked to or caused by other problems, and that can make it hard to identify the real reasons for conflicts. Without knowing the true nature of their problems, couples cannot arrive at solutions that actually work. To understand the underlying issues that plague many marriages, the authors look to the research conducted on the subject over the past fifty years and to real life stories of success and failure to outline the major issues that detract from marital stability. Drawing on Louis Primavera's twenty-five years in private practice as a marriage counselor, each chapter is peppered with anecdotes that every married person can relate to, and that help bring issues to life. The authors also propose frank and honest solutions that can help couples have more satisfying relationships. Anyone looking to improve their

marriage will find suggestions for sussing out the underlying problems they may be experiencing and guidance for addressing those problems.

Traditional African Art Nov 01 2020 The art of sub-Saharan Africa reveals the marvelous achievements of unknown artists over thousands of years. Their aesthetic ideal finds form in wood, ivory, fabric, bronze and iron. This illustrated study of traditional African art includes pieces from Western Sudan, the Congolese Basin, the Guinea coast, Gabon, the Democratic Republic of Congo and East and South Africa. Each piece is characterized by its own traditions and artistic forms. The earliest works date from the beginning of the first millennium, the most recent from the early 20th century. Unique and rare examples are documented, many heretofore virtually unknown.
