On October 1922 Mussolini became head of the Italian government, a situation that would last for twenty years. That power was obtained was largely due to the widespread violence perpetrated by blackshirts throughout Italy (squadristi). Violence however did not end. Old and new blackshirts played a major role in making Italy a fascist country. Contrary to the claims of many scholars that have depicted blackshirts after the March on Rome only as troublemakers for Mussolini, the book shows that they played a crucial role in establishing a full and totalitarian dictatorship. Squadristi carried out processes of fascistisation, crushed opponents and convinced bystanders and dubious people, consolidating fascist power in many aspects of social, political and even intimate life. By resorting to new archives, a long chronology and a focus on individual perspectives, this book gives voice to the perpetrators of fascist violence and offers new insights into the lives of squadristi throughout the dictatorship, outlining their beliefs, outlooks and expectations. The book shows that post-1922 squadristo was not a side effect of Fascism's twenty-year history. On the contrary, violence represents one of the essential components of any definition of Italian Fascism. - L'opera raccoglie il codice penale, il codice di procedura penale e le principali leggi complementari utili per il corretto esercizio della pratica giudiziaria. [209] - 229 The Academy is a prestigious international institution for the study and teaching of Public and Private International Law and related subjects. The work of the Hague Academy receives the support and recognition of the UN. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical and practical aspects of the subject, including legislation and case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the "Collected Courses of the Hague Academy of International Law . "In medieval China, every two years on the average, the state flung open its judicial doors. The docket was cleared, the jails were emptied, the open cases were closed - all in a manner without precedent elsewhere in the world. In an age where punishment could at times be quick and strict, the policy of amnesty seems all the more puzzling. why did governments in the early empire let their criminals go? And why did later governments gradually abandon the policy?"--Book jacket. Are more people being imprisoned throughout the world? Why is imprisonment still being used on a wide scale when an increasing number of alternatives are available? What are the major developments in prison law in the last decade? What problems arise in prison systems when states become constitutional democracies for the first time? Should prisons be privatized? How can prison conditions and prisoners' rights be improved? What special measures should there be for women, juveniles, violent offenders or drug addicts in prison? What programmes work effectively under which conditions? The second edition of "Imprisonment Today and Tomorrow" presents much fresh information in its attempts to provide answers to these and other crucial questions. It provides authoritative accounts by leading national experts on the place of imprisonment in 26 penal systems of major countries throughout the world. In addition, through the chapters on the work of the European Committee for the Prevention of Torture and Inhuman and Degrading

Punishment, non-governmental organizations and the United Nations, it sheds new light on international initiatives to promote prison standards. These are complemented by a comparative survey of world prison populations and a final chapter in which the editors evaluate developments described in this volume and elsewhere in order to arrive at conclusions about international trends and to make well-grounded proposals for prison reform. This volume of essays examines how the legal systems of the chief countries of Latin America and Mediterranean Europe—Argentina, Brazil, Chile, Colombia, Mexico, Puerto Rico, Venezuela, France, Italy, and Spain—changed in the last quarter of the 20th century. Through essays that provide a wealth of data on the courts and the legal profession in these countries, the book attempts to relate changes in the operation of the legal systems to changes in the political and social history of the societies in which they are embedded. The details vary, in accordance with the particular history and structure of the countries, but there are also key commonalities that run through all of the stories: democratization, globalization, and changes in the legal order that seem to be worldwide; more power to courts; a growing legal profession; and the entry of women into what was once a masculine club. This present book examines some of the key features of the interplay between legal history, authoritarian rule and political transitions in Brazil and other countries from the end of 20th Century until today. This book casts light on these aspects of the role of law and legal actors/institutions. In the context of transition from authoritarian rule to democratic state, Brazil has produced a significant literature on the challenges and shortcomings of the transition, but little attention has been given to the role of law and legal actors/institutions. Different approaches focus on the legal mechanisms, discourses and practices used by the military regime and by the players involved in the political transition process in Brazil. A comparative perspective that takes into account different political transitions – and their legal consequences – in Europe and Latin America complements the analysis. Part 1 (4 essays) discusses some of the central issues of political transition and legal history in contemporary Brazil, focusing on the time of the transition (and its effects on transitional justice) with different perspectives, from racial and gender issues to constitutional reform and police repression. Part 2 (3 essays) brings the comparative studies on South American experiences. Part 3 (4 essays) analyses different cases of transition to democracy in Chile, Portugal, Spain and Italy. Part 4 (3 essays) proposes a historiographical and methodological approach, considering the politics of time involved in the interplay between political transitions and legal history. This book presents a comprehensive analysis of the Italian experience of transitional justice examining how the crimes of Fascism and World War II have been dealt with from a comparative perspective. Applying an interdisciplinary and comparative methodology, the book offers a detailed reconstruction of the prosecution of the crimes of Fascism and the Italian Social Republic as well as crimes committed by Nazi soldiers against Italian civilians and those of the Italian army against foreign populations. It also explores the legal qualification and prosecution of the actions of the Resistance. Particular focus is given to the Togliatti Amnesty, the major turning point, through comparisons to the wider European post-WWII transitional scenario and other relevant transitional amnesties, allowing consideration of the intense debate on the legitimacy of amnesties under international law. The book evaluates the Italian experience and provides an ideal framework to assess the complexity of the interdependencies between time, historical memory and the use of criminal law. In a historical moment marked by the resurgence of racism, neo-fascism, falsifications of the past, as well as the desire to amend the faults of the past, the Italian unfinished experience of dealing with the Fascist era can help move the discussion forward. The book will be essential reading for students, researchers and academics in International Criminal Law, Transitional Justice, History, Memory Studies and Political Science.
