Teaching Children to Care Nov 30 2022 "Ruth Charney gives teachers help on things that really matter. She wants children to learn how to care for themselves, their fellow students, their environment, and their work. Her book is loaded with practical wisdom. Using Charney's positive approach to classroom management will make the whole school day go better." - Nel Noddings, Professor Emeritus, Stanford University, and author of Caring This definitive work about classroom management will show teachers how to turn their vision of respectful, friendly, academically

rigorous classrooms into reality. The new edition includes: More information on teaching middle-school students Additional strategies for helping children with challenging behavior Updated stories and examples from real classrooms. "Teaching Children to Care offers educators a practical guide to one of the most effective social and emotional learning programs I know of. The Responsive Classroom approach creates an ideal environment for learning—a pioneering program every teacher should know about." - Daniel Goleman, Author of Emotional Intelligence "I spent one whole summer reading Teaching Children to Care. It was like a rebirth for me. This book helped direct my professional development. After reading it, I had a path to follow. I now look forward to rereading this book each August to refresh and reinforce my ability to effectively manage a social curriculum in my classroom." - Gail Zimmerman, second-grade teacher, Jackson Mann Elementary School, Boston, MA

***Geriatric Gastroenterology* Jan 21 2022 As aging trends in the United States and Europe in particular are strongly suggestive of increasingly older society, it would be prudent for health care providers to better prepare for such changes. By including physiology, disease, nutrition, pharmacology, pathology, radiology and other relevant associated topics, *Geriatric Gastroenterology* fills the void in the literature for a volume devoted specifically to gastrointestinal illness in the elderly. This unique volume includes provision of training for current and future generations of physicians to deal with the health problems of older adults. It will also serve as a comprehensive guide to practicing physicians for ease of reference. Relevant to the geriatric age group, the volume covers epidemiology, physiology of aging, gastrointestinal physiology, pharmacology, radiology, pathology, motility disorders, luminal disorders, hepato-biliary disease, systemic manifestations, neoplastic disorders, gastrointestinal bleeding, cancer and medication related interactions and adverse events, all extremely common in older**

adults; these are often hard to evaluate and judge, especially considering the complex aging physiology. All have become important components of modern medicine. Special emphasis is given to nutrition and related disorders. Capsule endoscopy and its utility in the geriatric population is also covered. Presented in simple, easy to read style, the volume includes numerous tables, figures and key points enabling ease of understanding. Chapters on imaging and pathology are profusely illustrated. All chapters are written by specialists and include up to date scientific information. Geriatric Gastroenterology is of great utility to residents in internal medicine, fellows in gastroenterology and geriatric medicine as well as gastroenterologists, geriatricians and practicing physicians including primary care physicians caring for older adults.

Think Like a Monk Jun 25 2022 Jay Shetty, social media superstar and host of the #1 podcast On Purpose, distills the timeless wisdom he learned as a monk into practical steps anyone can take every day to live a less anxious, more meaningful life. When you think like a monk, you'll understand: -How to overcome negativity -How to stop overthinking -Why comparison kills love -How to use your fear -Why you can't find happiness by looking for it -How to learn from everyone you meet -Why you are not your thoughts -How to find your purpose -Why kindness is crucial to success -And much more... Shetty grew up in a family where you could become one of three things—a doctor, a lawyer, or a failure. His family was convinced he had chosen option three: instead of attending his college graduation ceremony, he headed to India to become a monk, to meditate every day for four to eight hours, and devote his life to helping others. After three years, one of his teachers told him that he would have more impact on the world if he left the monk's path to share his experience and wisdom with others. Heavily in debt, and with no recognizable skills on his résumé, he moved back home in north London with his parents. Shetty reconnected with old school

friends—many working for some of the world’s largest corporations—who were experiencing tremendous stress, pressure, and unhappiness, and they invited Shetty to coach them on well-being, purpose, and mindfulness. Since then, Shetty has become one of the world’s most popular influencers. In 2017, he was named in the Forbes magazine 30-under-30 for being a game-changer in the world of media. In 2018, he had the #1 video on Facebook with over 360 million views. His social media following totals over 38 million, he has produced over 400 viral videos which have amassed more than 8 billion views, and his podcast, On Purpose, is consistently ranked the world’s #1 Health and Wellness podcast. In this inspiring, empowering book, Shetty draws on his time as a monk to show us how we can clear the roadblocks to our potential and power. Combining ancient wisdom and his own rich experiences in the ashram, *Think Like a Monk* reveals how to overcome negative thoughts and habits, and access the calm and purpose that lie within all of us. He transforms abstract lessons into advice and exercises we can all apply to reduce stress, improve relationships, and give the gifts we find in ourselves to the world. Shetty proves that everyone can—and should—think like a monk.

Sleepless in America Aug 28 2022 From the author of **Raising Your**

Spirited Child, the award-winning bestseller that has helped millions, a pioneering, research-based guide for parents to help their children get the sleep they need. Does your child refuse to cooperate in the morning? Does he or she get into trouble for not listening? Are you finding that your child resists sleep and "loses it" over seemingly insignificant issues? You are not alone. An estimated 69 percent of American infants, children, and teens are sleep deprived. Studies have shown that sleep deficits can contribute to hyperactivity, distraction, forgetfulness, learning problems, illness, accidents, and disruptive behaviors. Often what our misbehaving kids really need isn't more "consequences" or more medication, but more sleep. Sleepless in America offers weary and frustrated parents a helping hand and an exciting new approach to managing challenging behaviors by integrating research on stress, sleep, and temperament with practical strategies. Dr. Mary has helped millions with her effective parenting tips and insights, and her five-step approach enables parents to help their "tired and wired" children get the sleep they so desperately need.

JESSIE BURTON We've gotten better at talking about mental health, but we still shy away from discussing PERIODS, MISCARRIAGE, ENDOMETRIOSIS and MENOPAUSE. That results in a lack of vital understanding for women, particularly as those processes are inextricably connected to our mental health. Combining her own experiences with extensive research and expert contributions, Eleanor Morgan explores the relationship between the female body, the female mind and the ways in which women's bodies are being medicalised. HORMONAL explores everything from contraception to PMS, in relation to anxiety, depression and taboos about hysteria and the 'hormonal' woman. It is a compelling portrait

of the modern landscape of women and health, showing us how to navigate stigma and misinformation. 'A personal yet scientific, subtle and often lyrical work' THE TIMES 'An essential guide in helping us truly understand our cores' VOGUE 'Both fascinating and a huge relief' GRAZIA

Investigating Classroom Discourse Apr 11 2021 Introducing

language use and interaction as the basis of good teaching and learning, this invaluable book equips teachers and researchers with the tools to analyze classroom discourse and move towards more effective instruction. Presenting an overview of existing approaches to describing and analyzing classroom discourse, Steve Walsh identifies the principal characteristics of classroom language in the contexts of second language classrooms, primary and secondary classrooms, and higher education settings. A distinct feature of the book are the classroom recordings and reflective feedback interviews from a sample group of teachers that Walsh uses to put forward SETT (Self Evaluation of Teacher Talk) as a framework for examining discourse within the classroom. This framework is used to identify different modes of discourse, which are employed by teachers and students, to increase awareness of the importance of interaction, and to maximize learning opportunities. This book will appeal to applied linguists, teachers and researchers of TESOL, as well as practitioners on MEd or taught doctorate programmes.

The Conquest of Gaul Oct 30 2022 The enemy were overpowered and took to flight. The Romans pursued as far as their strength enabled them to run' Between 58 and 50 BC Julius Caesar conquered most of the area now covered by France, Belgium and Switzerland, and invaded Britain twice, and The Conquest of Gaul is his record of these campaigns. Caesar's narrative offers insights into his military strategy and paints a fascinating picture of his encounters with the inhabitants of Gaul and Britain, as well as lively portraits of the rebel leader Vercingetorix and other Gallic chieftains. The Conquest of Gaul can also be read as a piece of political propaganda, as Caesar sets down his version of events for the Roman public, knowing he faces civil war on his return to Rome. Revised and updated by Jane Gardner, S. A. Handford's translation brings Caesar's lucid and exciting account to life for modern readers. This volume includes a glossary of persons and places, maps, appendices and suggestions for

Mental Health in Prisons Jun 01 2020 This book examines how the prison environment, architecture and culture can affect mental health as well as determine both the type and delivery of mental health services. It also discusses how non-medical practices, such as peer support and prison education programs, offer the possibility of transformative practice and support. By drawing on international contributions, it furthermore demonstrates how mental health in prisons is affected by wider socio-economic and cultural factors, and how in recent years neo-liberalism has abandoned, criminalised and contained large numbers of the world's most marginalised and vulnerable populations. Overall, this collection challenges the dominant narrative of individualism by focusing instead on the relationship between structural inequalities, suffering, survival and punishment. Chapter 2 of this book is available open access under a CC BY 4.0 license via link.springer.com.

Written in History Nov 18 2021 Outstanding selection of great letters from ancient times to the 21st century, touching on power, love, art, sex, faith, and war. **Written in History: Letters that Changed the World** celebrates the great letters of world history, and cultural and personal life. Bestselling, prizewinning historian Simon Sebag Montefiore selects letters that have changed the course of global events or touched a timeless emotion—whether passion, rage, humor—from ancient times to the twenty-first century. Some are noble and inspiring, some despicable and unsettling, some are exquisite works of literature, others brutal, coarse, and frankly outrageous, many are erotic, others heartbreaking. It is a surprising and eclectic selection, from the four corners of the world, filled with extraordinary women and men, from ancient times to now. Truly a choice of letters for our own times encompassing love letters to calls for liberation to declarations of war to reflections on life and death. The writers vary from Elizabeth I and Catherine the Great to Mandela, Stalin and Picasso, Fanny Burney and Emily Pankhurst to

Ada Lovelace and Rosa Parks, Oscar Wilde, Chekhov and Pushkin to Balzac, Mozart and Michelangelo, Hitler, Rameses the Great and Alexander Hamilton to Augustus and Churchill, Lincoln, Donald Trump and Suleiman the Magnificent. In a book that is a perfect gift, here is a window on astonishing characters, seminal events, and unforgettable words. In the colorful, accessible style of a master storyteller, Montefiore shows why these letters are essential reading and how they can unveil and enlighten the past—and enrich the way we live now.

The Happiest Baby on the Block Feb 02 2023 Perfect for expecting parents who want to provide a soothing home for the newest member of their family, *The Happiest Baby on the Block*, the national bestseller by respected pediatrician and child development expert Dr. Harvey Karp, is a revolutionary method for calming a crying infant and promoting healthy sleep from day one. In perhaps the most important parenting book of the decade, Dr. Harvey Karp reveals an extraordinary treasure sought by parents for centuries --an automatic "off-switch" for their baby's crying. No wonder pediatricians across the country are praising him and thousands of Los Angeles parents, from working moms to superstars like Madonna and Pierce Brosnan, have turned to him to learn the secrets for making babies happy. Never again will parents have to stand by helpless and frazzled while their poor baby cries and cries. Dr. Karp has found there IS a remedy for colic. "I share with parents techniques known only to the most gifted baby soothers throughout history ...and I explain exactly how they work." In a innovative and thought-provoking reevaluation of early infancy, Dr. Karp blends modern science and ancient wisdom to prove that newborns are not fully ready for the world when they are born. Through his research

and experience, he has developed four basic principles that are crucial for understanding babies as well as improving their sleep and soothing their senses: ·The Missing Fourth Trimester: as odd as it may sound, one of the main reasons babies cry is because they are born three months too soon. ·The Calming Reflex: the automatic reset switch to stop crying of any baby in the first few months of life. ·The 5 “S’s”: the simple steps (swaddling, side/stomach position, shushing, swinging and sucking) that trigger the calming reflex. For centuries, parents have tried these methods only to fail because, as with a knee reflex, the calming reflex only works when it is triggered in precisely the right way. Unlike other books that merely list these techniques Dr. Karp teaches parents exactly how to do them, to guide cranky infants to calm and easy babies to serenity in minutes...and help them sleep longer too. ·The Cuddle Cure: the perfect mix the 5 “S’s” that can soothe even the most colicky of infants. In the book, Dr. Karp also explains: What is colic? Why do most babies get much more upset in the evening? How can a parent calm a baby--in mere minutes? Can babies be spoiled? When should a parent of a crying baby call the doctor? How can a parent get their baby to sleep a few hours longer? Even the most loving moms and dads sometimes feel pushed to the breaking point by their infant’s persistent cries. Coming to the rescue, however, Dr. Karp places in the hands of parents, grandparents, and all childcare givers the tools they need to be able to calm their babies almost as easily as...turning off a light. From the Hardcover edition.

Money-Driven Medicine May 13 2021 Why is medical care in the United States so expensive? For decades, Americans have taken it as a matter of faith that we spend more because we have the best health care system in the world. But as costs levitate, that argument becomes more difficult to make. Today, we spend twice as much as Japan on health care—yet few would argue that our health care system is twice as good. Instead, startling new evidence suggests that

one out of every three of our health care dollars is squandered on unnecessary or redundant tests; unproven, sometimes unwanted procedures; and overpriced drugs and devices that, too often, are no better than the less expensive products they have replaced. How did this happen? In Money-Driven Medicine, Maggie Mahar takes the reader behind the scenes of a \$2 trillion industry to witness how billions of dollars are wasted in a Hobbesian marketplace that pits the industry's players against each other. In remarkably candid interviews, doctors, hospital administrators, patients, health care economists, corporate executives, and Wall Street analysts describe a war of "all against all" that can turn physicians, hospitals, insurers, drugmakers, and device makers into blood rivals. Rather than collaborating, doctors and hospitals compete. Rather than sharing knowledge, drugmakers and device makers divide value. Rather than thinking about long-term collective goals, the imperatives of an impatient marketplace force health care providers to focus on short-term fiscal imperatives. And so investments in untested bleeding-edge medical technologies crowd out investments in information technology that might, in the long run, not only reduce errors but contain costs. In theory, free market competition should tame health care inflation. In fact, Mahar demonstrates, when it comes to medicine, the traditional laws of supply and demand do not apply. Normally, when supply expands, prices fall. But in the health care industry, as the number and variety of drugs, devices, and treatments multiplies, demand rises to absorb the excess, and prices climb. Meanwhile, the perverse incentives of a fee-for-service system reward health care providers for doing more, not less. In this superbly written book, Mahar shows why doctors must take responsibility for the future of our health care industry. Today, she observes, "physicians have been stripped of their standing as professionals: Insurers address them as vendors ('Dear Health Care Provider'), drugmakers and device makers see them as customers

(someone you might take to lunch or a strip club), while . . . consumers (aka patients) are encouraged to see their doctors as overpaid retailers. . . . Before patients can reclaim their rightful place as the center—and indeed as the *raison d'être*—of our health care system," Mahar suggests, "we must once again empower doctors . . . to practice patient-centered medicine—based not on corporate imperatives, doctors' druthers, or even patients' demands," but on the best scientific research available.
