America is the most mobile society in history, but our transportation system is on the verge of collapse. Traffic congestion is today five times greater than it was 25 years ago, yet many transportation plans and projects are making it worse. As Randal O'Toole reveals in *Gridlock*, the prime causes of our ailing system are a government transportation planning philosophy whose primary goal is to diminish auto use—hence, personal mobility—in combination with federal budget incentives that perversely encourage transportation planners to increase congestion. As a result, the automobile which is accessible to almost every family in the nation and provides unparalleled access to better housing, low-cost consumer goods, a choice-driven affordable life, and freedom—is being deliberately forced off the transportation grid by the expensive “solution” of little-used high-speed trains and urban transit lines. *Gridlock* presents a wide range of innovative ideas and policy recommendations for creating an effective transportation system—improvements that will increase our mobility and pay for themselves, whether it's cars, buses, planes, or trains. At the center of O'Toole's solutions are three core principles: those who use transportation

facilities should pay for them; negative effects should be dealt with in a cost-efficient manner; and new technologies that will increase mobility at a low cost must be embraced. In *Gridlock*, Randal O'Toole brings energetic and unconventional thinking to transportation strategies that have, until now, only driven us into the breakdown lane.

*Fault-Tolerant Attitude Control of Spacecraft* presents the fundamentals of spacecraft fault-tolerant attitude control systems, along with the most recent research and advanced, nonlinear control techniques. This book gives researchers a self-contained guide to the complex tasks of envisaging, designing, implementing and experimenting by presenting designs for integrated modeling, dynamics, fault-tolerant attitude control, and fault reconstruction for spacecraft. Specifically, the book gives a full literature review and presents preliminaries and mathematical models, robust fault-tolerant attitude control, fault-tolerant attitude control with actuator saturation, velocity-free fault tolerant attitude control, finite-time fault-tolerant attitude tracking control, and active fault-tolerant attitude control. Finally, the book looks at the future of this interesting topic, offering readers a one-stop solution for those working on fault-tolerant attitude control for spacecraft. Presents the fundamentals of fault-tolerant attitude control systems for spacecraft in one practical solution Gives the latest research and thinking on nonlinear attitude control, fault tolerant control, and reliable attitude control Brings

together concepts in fault control theory, fault diagnosis, and attitude control for spacecraft Covers advances in theory, technological aspects, and applications in spacecraft Presents detailed numerical and simulation results to assist engineers Offers a clear, systematic reference on fault-tolerant control and attitude control for spacecraft My Truck Is Stuck. Rotten luck. Can't go! My truck is stuck. Tug and tow. Two engines roar. But the truck won't go. Not one inch more. Does anyone know how to make my stuck truck go? In this lyrical read-aloud, young drivers are introduced to the ins and outs of hauling, beeping, and repairing -- get ready for a fun ride! Resource added for the Automotive Technology program 106023. 54 De'Shane Hartford thought that life was finally pulling together. He has the girl, the family, the money, and the power. However, there are always many bumps in the road before reaching the destination that every person strives to get to. Gearing up to take on his father's hustle, things couldn't happen at a worse time. Shane has always tried his best to stay away from darkness that is depression and failure, and constantly reached for happiness. Every time it seems as though he has finally made it to a great place, it's snatched away. Shane is faced with two options now. He can either be the monster everyone expects him to be, or he could fight for what it is that he desires most in the midst of bodies dropping like flies around him. With Cherie away in California, it's hard for Shane to cope, yet he tries to

by replacing her with Jessica— the curvy diva who knows him inside and out. But is it a mistake? Cherie, herself, comes face to face with heartbreaking news about Shane and Jessica that no one bothered to tell her. She just so happened to stumble upon it. She's forced to stay away from him, even when her heart is crying out for him to choose her all over again. Because of this decision, she's lost. She doesn't know if she wants to be the villain who will tear apart a happy home and claim who is hers, or if she wants to accept defeat and let Shane live somewhat of a happy life as he's putting on. That will be hard to do with her ex-fiancé on her trail. He sternly warned her to stay away from Richmond, Virginia, and that's exactly what he meant. Not a man who is accustomed to losing, he sets out to make her pay for disobeying in the first place, and will set a string of events in motion to prove to Shane that he— Terry— is the alpha and the omega. Will love conquer all? Or is it too late for Shane and Cherie to finally wise up and reconcile like reasonable adults, even if it means saving both their lives

During the first half of 1969, Bravo Troop, 3rd Squadron, 4th Cavalry, 25th Infantry Division operated northwest of Saigon in the vicinity of Go Dau Ha, fighting in 15 actions on the Cambodian border, in the Boi Loi Woods, the Hobo Woods and Michelin Rubber Plantation and on the outskirts of Tay Ninh City. In that time, Bravo Troop saw 10 percent of its average field strength killed while inflicting much heavier losses on the enemy. This memoir vividly recounts those six months of intense armored cavalry combat in Vietnam through the eyes of an artillery forward observer, highlighting his fire direction techniques and the routines and frustrations of searching for the enemy and chaos of finding him. For anyone who repairs PCs or would just like to know how they work. No background in hardware is assumed or necessary. Eps De'Shane started off as a lanky and intelligent kid in the slums of Richmond, Virginia. With the help of his three friends— Rich, Mandy and Cherie— he didn't need to resort to drastic measures like some kids his age. However, a twist in fate had a lot to deal with the man he grew to become. After being legally adopted to become the only son of a

kingpin named Apollo, Shane had to let go of almost everything he knew. He was reconstructed to be just as ruthless and as coldhearted as his father. Although succeeding and being renamed by foot-soldiers alike as “Shane tha God”, his heart wasn’t as icy as he put on, because the enchantress Cherie stayed on his mind through the torture, the abuse, and the process to rebuild him. What he giveth, he could take away, but he would never take anything away from Cherie. He would only give. Cherie, before Shane’s adoption, was forced to move clear across the country and to leave her friends behind. Though separated, she never forgot about Shane or the love he had for her. Just like Shane, Cherie has changed in many ways. She’s just more tight-lipped about it. Cherie breaks free of an abusive engagement and heads back to Virginia, disobeying her fiancé to never return there, but what she stumbles upon when getting there is no fairytale. Her Shane is no longer the lanky little fellow who will trip over his own feet to please her. Neither is he the little boy who will grab the moon and stars for her, to give them to her. She finds him as a wealthy, blood-thirsty, full grown man with a closet full of skeletons, ready to fall out at the slightest touch of the doorknob. Can she tame this beast and find the friend in him that she had long ago? Was her trip back to the past well worth losing her fiancé? Is it possibly to rekindle what they once had? Or is it all one foolish childhood fantasy that should be and could be left behind? Hopefully their

own secrets and the events that they've gone through without one another doesn't tear them apart. A research-based tool kit for moving past what's holding you back—in life, in love, and in work. We all experience stuckness in our lives. We feel stuck in our relationships, career paths, body struggles, addiction issues, and more. Many of us know what we need to do to move forward—but find ourselves unable to take the leap to make it happen. And then we blame and shame ourselves, and stay in a loop of self-doubt that goes nowhere. The good news is you're not lazy, crazy, or unmotivated. In this empowering and action-oriented guide, you'll discover why we can't think our way forward—and how to break through what's holding us back. Using an eclectic approach and a customizable plan that's as direct or as deep as you want, this life-changing guide empowers you to: break old habits and patterns gain perspective on pain and trauma from the past free yourself from the torturous "why" questions take control of your choices to create the life you want Bringing together research-backed solutions that range from shadow work to reparenting, embodied healing, and other clinical practices, along with empowering personal stories, this book is a hands-on road map for moving forward with purpose, confidence, and the freedom to become who you're truly meant to be. "The brilliant mind behind Party of One examines the striking social trend: people are stuck and they want to change, but..." (San Francisco Chronicle) In this book, Anneli

Rufus identifies an intriguing aspect of our culture: Many of us are stuck. Be it in the wrong relationship, career, or town, or just with bad habits we can't seem to quit, we even say we want to make a change, but . . .

Merging interviews, personal anecdotes, and cultural criticism, *Stuck* is a wise and passionate exploration of the dreams we hold dearest for ourselves-and the road to actually achieving them. When faced with the possibility of change, our minds can play tricks on us. We tell ourselves: I can't make it. Or, It's not worth the effort. How is it that in a time of unprecedented freedom and opportunity, so many of us feel utterly powerless and unsure? In this book, Rufus exposes a complex network of causes for our immobilization- from fear and denial to powerful messages in popular culture or mass media that conspire to convince us that we're helpless in the face of our cravings. But there can be a light at the end of the tunnel: Rufus also tells the stories of people who have managed to become unstuck and of others who, after much reflection, have decided that where they are is best. After all, she writes, "what looks to you like a rut, others might say is true absorption in a topic, a relationship, a career, a pursuit, a place. What looks to you like boredom, others call commitment. And even contentment." A brilliant glimpse into what truly motivates-or doesn't motivate-us, *Stuck* will inspire you to take a look at yourself in an entirely new light. I wake up to the smell of blood with tears running down my face. This feeling is something I will never forget. I can

still feel it sometimes when it's quiet and I'm thinking about the crash. It's haunting, but there is a reason I remember. I remember to keep my Aunt's spirit alive. I remember because I survived for a reason. I survived to tell my story, to help others, and to be a powerful force in this world. Brittany Lamb was only 12 years old when a man decided to change her life forever by drinking and driving. In this book, Brittany talks openly about the struggles she faces as a victim of a drinking and driving accident. She discusses her road to recovery, the obstacles she faced, and how she learned to overcome her past. Through raw, open dialogue, Brittany speaks of the car crash, bullying she faced as a child, an unwanted pregnancy, and how a traumatic brain injury shaped who she is today. Brittany also discusses the importance of mental health, and how therapy changed her life. Her passion for being a speaker and writer was sparked when she started processing the crash and other related traumas. She realized that her story could help others recognize and face their traumas, in order to live a more fulfilled, peaceful life. There are reflection questions at the end of each chapter that allow the reader to get a deeper insight into their own past. The questions also ask the reader to reflect on trauma and self care. The reader will come away with a deeper understanding of therapy, mental health, and the importance of seeking help. DAVID GREENBERG has directed Grammy-nominated music videos, scripted the platinum selling KISS

EXPOSED for Paul & Gene, product managed Yoko, Ringo, Devo and more. He's now a Marketing Director for jazz's crème de la crème. Still the bulk of his lyrics lay unsung; deadbeats who should be out making the big bucks, or more importantly, changing millions of lives the world over. These days he'd be grateful for pennies on the dollar and a few listeners given a good chuckle. Only three lyricals have music. Why? As Cary Baker, of conqueroo noted, "David never found his Elton John to his Bernie Taupin." That's not to puff up the quality of the collection to the size of an alarmed blowfish, insinuating Greenberg is a Bernie Taupin, a Hal David, a Captain Beefheart--but even they weren't icons when they first started. BTW, which three lyrics? Buy the MUD FOLIO and find out. Get your copy today and start the rest of your music career on a straight path to hitdom. Or at least jump start Greenberg's. This is book 1 of Stuck With Mr Arrogant. Bad girl Olivia Henderson is stuck living with her worst nightmare Alexander Williams who happens to be the son of her parents' good friends and business partners. Their parents go on a one-month business trip leaving Olivia in the care of her worst nightmare, but what happens when what was supposed to be one horrible month of living with her worst nightmare turns out to be a turnaround in Olivia's life as they slowly become attracted to one another? In this story, we're talking about two crazy people who despise each other, crazy girlfriends, drama, and a whole lot of craziness.

Vaccine reluctance and refusal are no longer limited to the margins of society. Debates around vaccines' necessity -- along with questions around their side effects -- have gone mainstream, blending with geopolitical conflicts, political campaigns, celebrity causes, and "natural" lifestyles to win a growing number of hearts and minds. Today's anti-vaccine positions find audiences where they've never existed previously. Stuck examines how the issues surrounding vaccine hesitancy are, more than anything, about people feeling left out of the conversation. A new dialogue is long overdue, one that addresses the many types of vaccine hesitancy and the social factors that perpetuate them. To do this, Stuck provides a clear-eyed examination of the social vectors that transmit vaccine rumors, their manifestations around the globe, and how these individual threads are all connected.

"AUTHOR'S NOTE: This book is unconventional. A self-conscious experiment in form that draws together two vernaculars: anthropological thought and the pop culture of my youth. It is a fraught exercise. I write as a White guy about angst and alienation in the privileged spaces of anthropology and higher education. I appreciate the irony. I hope nonetheless that my experiences with and critical perspectives on social conventions, the culture of liberalism, and ableism in academia might be useful. I seek to expand possibilities of anthropological representation while challenging epistemological, aesthetic, and

professional norms in my discipline. It bothers me that anthropology can be so sanctimonious. I take aim at the ableist conceit that anthropologists are non-characters studying a messy world. Much of my life has been a mess. My work has been undertaken amid struggles with pregnancy loss, bipolar disorder, and drug addiction. I have deep regrets about my participation in an exploitative field. I have deep regrets about many things. I have hurt people and been hurt by people. I hope my stories and reflections add to what others have already written about a more open, honest, and self-deprecating anthropology"--

Having poor success as son or student, a young guy gets evicted by his parents. He leaves Lake Michigans shore for the west coast, finding adventure on the streets of Hollywood. Events force him to mature, evolving from a dirty, hairy primate into an upright member of civilization. Stuck on Earth shares the nostalgic journey of one persons dream and search for identity, learning that change may be the only constant. Nothing in life is guaranteed, so being stuck might be the beginning of maturing and growing beyond any static human condition. Written by experienced technicians,
