This book argues that there is no way to make progress in building a sustainable future without extensive participation of non-state actors. The volume explores the contribution of non-state actors to a

sustainable transition, starting with citizens and communities of different kinds and ending with cities and city-networks. The authors analyse social, cultural, political and economic drivers and barriers for this transition, from individual behaviour to structural restraints, and investigate interplay between the two. Through a series of wide-ranging case studies from the UK, Australia, Germany, Italy and Denmark, and a number of comparative case studies, the volume provides an empirically and theoretically robust argument that highlights the need to develop, widen and scale up collective action and community-based engagement if the transition to sustainability is to be successful. This book will be of great interest to students and scholars of climate change, sustainability and environmental policy.

This book is about the renaissance of cities in the twenty first century and their increasing role as centers of creative economic activity. Allen Scott is one of the world's foremost thinkers on globalization and the

economies of modern cities, and in this book presents a concise introduction to his innovative and insightful perspective. Until the 1940s, social life in Taiwan was generally organized through the family—marriages were arranged by parents, for example, and senior males held authority. In the following years, as Taiwan evolved rapidly from an agrarian to an industrialized society, individual decisions became less dependent on the family and more influenced by outside forces.

*Social Change and the Family in Taiwan* provides an in-depth analysis of the complex changes in family relations in a society undergoing revolutionary social and economic transformation. This interdisciplinary study explores the patterns and causes of change in education, work, income, leisure time, marriage, living arrangements, and interactions among extended kin. Theoretical chapters enunciate a theory of family and social change centered on the life course and modes of social organization. Other chapters look at the shift from arranged marriages toward love matches, as well as changes in dating practices, premarital sex, fertility, and divorce. Contributions to the book are made by Jui-Shan Chang, Ming-Cheng Chang, Deborah S.

Over the past thirty years, and particularly within the last ten years, researchers in the areas of social psychology, cognitive psychology, clinical psychology, and neuroscience have been examining fascinating questions regarding the nature of imagination and mental simulation – the imagination and generation of alternative realities. Some of these researchers have focused on the specific processes that occur in the brain when an individual is mentally simulating an action or forming a mental image, whereas others have focused on the consequences of mental simulation processes for affect, cognition, motivation, and behavior. This Handbook provides a novel and stimulating integration of work on imagination and mental simulation from a

variety of perspectives. It is the first broad-based volume to integrate specific sub-areas such as mental imagery, imagination, thought flow, narrative transportation, fantasizing, and counterfactual thinking, which have, until now, been treated by researchers as disparate and orthogonal lines of inquiry. As such, the volume enlightens psychologists to the notion that a wide-range of mental simulation phenomena may actually share a commonality of underlying processes. *Digital Technologies and the Museum Experience* explores the potential of mobile technologies (cell phones, digital cameras, MP3 players, PDAs) for visitor interaction and learning in museums. This book is designed to introduce doctoral and graduate students to the process of conducting scientific research in the social sciences, business, education, public health, and related disciplines. It is a one-stop, comprehensive, and compact source for foundational concepts in behavioral research, and can serve as a stand-alone text or as a supplement to research readings in any doctoral seminar or research methods class. This book is currently used as a research text at universities on six continents and will shortly be available in nine different languages. Thomas Carlyle (1795-1881), Scottish essayist, historian, cultural critic, and leading man of English letters during the Victorian era, published *Past and Present*, one of his most

influential works, in 1843. Written as a response to the economic crisis of the 1840s—closure of factories, loss of jobs, the growth of slums in industrial centers, the starving poor—*Past and Present* aimed to lead readers toward a "conversion experience" in order to stimulate social reform. In this work, Carlyle provides a trenchant articulation of the political, social, religious, and economic climate of the mid-nineteenth century and a prophetic vision of the future. This volume, the fourth of the eight-volume Strouse Edition, includes an informative historical introduction and illustrations, along with complete notes and scholarly apparatus, and is the definitive modern scholarly edition. "Based on an extraordinarily rich and varied collection of diaries, letters, and autobiographies of European Americans and African Americans, this book presents the voices and views of unpropertied, unprivileged people and sensitively probes the commonalities and differences in their experiences and perspectives. Hansen persuasively argues that recognizing the 'social' domain illuminates the agency of working people and dissolves the stereotypically gendered public/private dichotomy." --Nancy Grey Osterud, author of *Bonds of Community* "It is a pleasure to welcome Karen Hansen into the first rank of historical sociologists. In this superb model of scholarship, she leads us on an illuminating tour of the social life of literate working

people in antebellum New England. Her arena is 'the social'--the territory that overlaps with private and public, where the dynamics of friendship, visiting, gossip, and collective worship combine to fashion many of life's great joys and sorrows. Best of all, she tells her story through the experiences of the people themselves. In a clear and honest way, Hansen manages to raise fundamental questions about perceived conceptions of gender, class, and the public-private dichotomy."--Neil J. Smelser, University of California, Berkeley "This wonderful book makes a real contribution to our understanding of the lives of women and men in antebellum New England. With its focus on people of modest means and its meticulous and insightful exploration of friendship, visiting, gossip, and church-going, Hansen's work refines and concretizes how we conceive the 'social.'"--Mary Ann Clawson, Wesleyan University "How refreshing it is to see someone address the big issues in sociology based on the experience of real people. Karen Hansen has valuable things to say about the limits of the public/private distinction and the importance of the social. Her book moves the discussion of these issues to a new level."--Alan Wolfe, author of *The Human Difference* Medium: English Pages: 750+ (Year 2008 to year 2022) E-BOOK NAME : UPSC MAINS GENERAL STUDIES SOLVED PAPERS PDF File Type: PDF File

This book makes available Tarde ' s most important work and demonstrates his continuing relevance to a new generation of students and thinkers. Tarde ' s landmark research and empirical analysis drew upon collective behavior, mass communications, and civic opinion as elements to be explained within the context of broader social patterns. Unlike the mass society theorists that followed in his wake, Tarde integrated his

discussions of societal change at the macrosocietal and individual levels, anticipating later twentieth-century thinkers who fused the studies of mass communications and public opinion research. Terry N. Clark ' s introduction, considered the premier guide to Tarde ' s opus, accompanies this important work, reprinted here for the first time in forty years. The only attempt to document rumor and legends relating to complexion in black communities, The Paper Bag Principle looks at the divide that has existed between the black elite and the black "folk." The Paper Bag Principle focuses on three objectives: to record lore related to the "paper bag principle" (the set of attitudes that granted blacks with light skin higher status in black communities); to investigate the impact that this "principle" has had on the development of black community consciousness; and to link this material to power that results from proximity to whiteness. The Paper Bag Principle is sure to appeal to scholars and historians interested in African American studies, cultural studies, oral history, folklore, and ethnic and urban studies. ' Passing ' is a common euphemism for the death of a person, as he or she is said to ' pass away ' or ' pass on ' . This open-ended saying has at its heart a notion of transformation from one state to another, which in turn grants the possibility of grasping or approximating the passage of time and the materiality of death and decay. This book begins with the idea that since all material things - whether animals, human beings, objects or buildings - undergo some form of passing, then the specific transformation in these passages and the materiality actively given to it can offer us a grasp of otherwise precarious temporalities. It examines how human beings strive to relate to the temporal dimension of death and decay, by giving new shape and direction to being and by examining its natural transformations. Focusing on the materiality of passing, and thereby the relationship between embodiment, temporality and death, Materialities of Passing offers rich case studies from Europe, Papua New Guinea, South Africa and the Russian Far East for exploring the material, spatial and directional aspects of the very interface between life and death. As such, it will appeal to scholars of anthropology, death studies, archaeology, philosophy

and cultural studies. "Starting from this consideration, Camaiti Hostert's book turns the meaning of the social practice of passing upside down and makes it become a universal tool to redefine any social, ethnic, gender, and religious identity. Based on the Foucauldian consideration that total visibility is a "trap," the author focuses her attention on the interstices, on the spaces off and on the narratives between the lines. The emphasis is on the transitional moment, in a Gramscian sense: the fluid state flowing between the starting and ending points becomes the place of a counter-hegemony, which helps not only to rewrite history but also to change the political status quo." "Camaiti Hostert's book emphasizes hybridity and displacement; passing is a tool to redefine in our contemporary times the role of social practices as well as the personal self."--BOOK JACKET. Constitutes the refereed post-workshop proceedings of 9 international workshops held in Milano, Italy, in conjunction with the 6th International Conference on Business Process Management, BPM 2008, in September 2008. Less than a decade after the advent of democracy in South Africa, tabloid newspapers have taken the country by storm. One of these papers -- the Daily Sun -- is now the largest in the country, but it has generated controversy for its perceived lack of respect for privacy, brazen sexual content, and unrestrained truth-stretching. Herman Wasserman examines the success of tabloid journalism in South Africa at a time when global print media are in decline. He considers the social significance of the tabloids and how they play a role in integrating readers and their daily struggles with the political and social sphere of the new democracy. Wasserman shows how these papers have found an important niche in popular and civic culture largely ignored by the mainstream media and formal political channels. Marine environmental history analyses the changing relationships between human

societies and marine natural resources over time. This is the first book which deals in a systematic way with the theoretical backgrounds of this discipline. Major theories and methods are introduced by leading scholars of the field. The book seeks to encapsulate some of the major novelties of this fascinating new discipline and its contribution to the management, conservation and restoration of marine and coastal ecosystems as well as the cultural heritages of coastal communities in different parts of the world.
