Introduction to Chemistry, 4e by Bauer/Birk/Marks offers today's student a fresh perspective to the introduction of chemistry. This textbook offers a conceptual approach to chemistry by starting first with macroscopic phenomena, and then presenting the underlying microscopic detail. Each chapter opens with a real-life scenario that helps students connect abstract chemical concepts to their own lives. The math found in Introduction to Chemistry, 5e is introduced on a need-to-know basis, with "Math Toolboxes" in select chapters to help support the math skills required in that chapter. "Conceptual Chemistry," Third Edition features more applied material and an expanded quantitative approach to help readers understand how chemistry is related to their everyday lives. Building on the clear, friendly writing style and superior art program that has made "Conceptual Chemistry" a market-leading text, the Third Edition links chemistry to the real world and ensures that readers master the problem-solving skills they need to solve chemical equations. Chemistry Is A Science, Elements of Chemistry, Discovering the Atom and Subatomic Particles, The Atomic Nucleus, Atomic Models, Chemical Bonding and Molecular Shapes, Molecular Mixing, Those Incredible Water Molecules, An Overview of Chemical Reactions, Acids and Bases, Oxidations and Reductions, Organic Chemistry, Chemicals of Life, The Chemistry of Drugs, Optimizing Food Production, Fresh Water Resources, Air Resources, Material Resources, Energy Resources For readers interested in how chemistry is related to their everyday lives. Provides comprehensive coverage of the chemical interactions among organic and inorganic solids, air, water, microorganisms, and the plant roots in soil This book focuses on the species and reaction processes of chemicals in soils, with applications to environmental and agricultural issues. Topics range from discussion of fundamental chemical processes to review of properties and reactions of chemicals in the environment. This new edition contains more examples, more illustrations, more details of calculations, and reorganized material within the chapters, including nearly 100 new equations and 51 new figures. Each section also ends with an important concepts overview as well as new questions for readers to answer. Starting with an introduction to the subject, Soil Chemistry, 5th Edition offers in-depth coverage of properties of elements and molecules; characteristics of chemicals in soils; soil water chemistry; redox reactions in soils; mineralogy and weathering processes in soils; and chemistry of soil clays. The book also provides chapters that examine production and chemistry of soil organic matter; surface properties of soil colloids; adsorption processes in soils; measuring and predicting sorption processes in soils; soil acidity; and salt-affected soils. Provides a basic description of important research and fundamental knowledge in the field of soil chemistry Contains more than 200 references provided in figure and table captions and at the end of the chapters Extensively revised with updated figures and tables Soil Chemistry, 5th Edition is an excellent text for senior-level soil chemistry students. Blackman's market-leading Chemistry is back in a new fifth edition. Known for making chemistry digestible, this text shows students how the science they are learning interacts with everyday life. The new edition has been refreshed to include timely, local ANZ examples on topics like Indigenous chemistry and green chemistry. From Lightboard videos of local academics that show students how to approach and solve problems, to questions with immediate feedback, the digital resources are designed to support students of all knowledge levels, regardless of background, and guide them through the real-life application of what they are learning. Market_Desc: · Students and professors of chemistry· Scientists Special Features: · Flow charts, such as Problem Analysis at a Glance, create a visual overview of key concepts.· Each chapter opens with a This Chapter in Context feature that creates a framework for understanding how everything fits together.· New chapter on materials and a new Web site with enhanced learning aids that can be customized according to background. About The Book: Written by Jim Brady, an author well known for his ability to communicate chemistry, and Fred Senese, the architect of the most visited general chemistry web site, this book and its media are designed to support a variety of backgrounds. It maintains its hallmark feature of accurate, lucid, and interesting explanations of the basic concepts of chemistry as well as its comprehensive coverage and aid to readers in developing problem solving skills. A long-established leader in liberal arts chemistry, John Suchocki's Conceptual Chemistry continues to take a student-centered approach in the new Fifth Edition. This robust program uses a conversational writing style to engage and involve non-science majors, helping them visualize the behavior of atoms and molecules to understand our macroscopic environment. With a focus on fundamental concepts -- not mathematical models -- and supported by a dynamic media program, Conceptual Chemistry, Fifth Edition helps build a base from which non-science majors can view the world around them more perceptively. KEY TOPICS: About Science, Particles of Matter, Elements of Chemistry, Subatomic Particles, The Atomic Nucleus, How Atoms Bond, How Molecules Mix, How Water Behaves, How Chemicals React, Acids and Bases in Our Environment, Oxidations and Reductions Charge the World, Organic Compounds, The Nutrients of Life, Medicinal Chemistry, Optimizing Food Production, Protecting Water and Air Resources, Capturing Energy MARKET: For all readers interested in visualizing the behavior of atoms and molecules to understand our macroscopic environment. Organic Chemistry helps students understand the structure of organic molecules by helping them understand the how and why of organic chemistry. Maintaining the clear, approachable writing style characteristic of author Karen Timberlake, Basic Chemistry, Fourth Edition, adds to its suite of problem-solving tools and techniques necessary for success in chemistry. Engaging new features such as end-of-section Math Practice problems, video tutorials and Math Review Modules allow readers to practice and master quantitative skills. Popular features, including "Combining Ideas" sections and end-of-chapter questions, have also been strengthened and expanded. Modern real-world applications help students connect chemical principles to events in their world, while stories involving careers illustrate the importance of chemistry in future careers. All general chemistry students face similar challenges but they use their textbook to meet those challenges in different ways. Some read chapters from beginning to end, some consult the book as a reference, and some look to the book for problem-solving help. Chemistry: The Science in Context, Third Edition was written and designed to help every kind of student, regardless of how they use the book. Introductory chemistry students need to develop problem-solving skills, and they also must see why these skills are important to them and to their world. I ntroductory Chemistry, Fourth Edition extends chemistry from the laboratory to the student's world, motivating students to learn chemistry by demonstrating how it is manifested in their daily lives. Throughout, the Fourth Edition presents a new student-friendly, step-by-step problem-solving approach that adds four steps to each worked example (Sort, Strategize, Solve, and Check). Tro's acclaimed pedagogical features include Solution Maps, Two-Column Examples, Three-Column Problem-Solving Procedures, and Conceptual Checkpoints. This proven text continues to foster student success beyond the classroom with MasteringChemistry®, the most advanced online tutorial and assessment program available. This package contains: Tro, Introductory Chemistry with MasteringChemistry® Long, Introductory Chemistry Math Review Toolkit This internationally respected textbook stresses the foundation of physical chemistry, emphasizing the logical bases of all important ideas, which are outline against the background of their historical development. This fifth edition uses SI units and is the most up-to-date one-volume text available to undergraduate students of chemistry. This Study Guide and Solutions Manual contains complete and detailed explanations of the solutions to the problems in the text. In addition, you'll find a section on advanced acid/base chemistry with an additional set of problems, an 18-page tutorial on "pushing electrons," exercises on building molecular models and calculating kinetic parameters, as well as 23 practice tests. The fifth edition of this engaging and established textbook provides students with a complete course in chemical literacy and assumes minimal prior experience of science and maths. Written in an accessible and succinct style, this book offers comprehensive coverage of all the core topics in organic, inorganic and physical chemistry. Topics covered include bonding, moles, solutions and solubility, energy changes, equilibrium, organic compounds and spectroscopy. Each unit contains in-text exercises and revision questions to consolidate learning at every step, and is richly illustrated with diagrams and images to aid understanding. This popular text is an essential resource for students who are looking for an accessible introductory textbook. It is also ideal for non-specialists on courses such as general science, engineering, environmental, health or life sciences. New to this Edition: - A foreword by Professor Sir John Meurig Thomas FRS, former Director of the Royal Institution - Three additional units on Gibbs Energy Changes, Organic Mechanisms and Fire and Flame Provides answers and explanations to all in-text and end-of-chapter exercises. Also includes summaries of name reactions, functional-group synthesis and reactions, lists of reagents and abbreviations, and articles on topics ranging from infrared absorption frequencies to the Nobel Prize winners in Chemistry. This edition now includes all new artwork, expanded in-text problems, summary quizzes approximately every three chapters, more detailed explanations in solutions, and chapter outlines. Spencer's Chemistry: Structure and Dynamics is the most successful reform project published for the General Chemistry course. The authors have built the text on the recommendations of the ACS's Task Force on the General Chemistry Curriculum and suggestions from the adopters of previous editions. This innovative text provides a sixteen-chapter introduction to the fundamental concepts of chemistry. The material is supplemented by special topics at the end of each chapter. There are three major themes that link the content of the book: the process of science, the relationship between molecular structure and physical/chemical properties, and the relationship between the microscopic and macroscopic levels. Spencer's Chemistry can work successfully in both small and large lecture courses. Get a Better Grade in Organic Chemistry Organic Chemistry may be challenging, but that doesn't mean you can't get the grade you want. With David Klein's Organic Chemistry as a Second Language: Translating the Basic Concepts, you'll be able to better understand fundamental principles, solve problems, and focus on what you need to know to succeed. Here's how you can get a better grade in Organic Chemistry: Understand the Big Picture. Organic Chemistry as a Second Language points out the major principles in Organic Chemistry and explains why they are relevant to the rest of the course. By putting these principles together, you'll have a coherent framework that will help you better understand your textbook. Study More Efficiently and Effectively Organic Chemistry as a Second Language provides time-saving study tips and a clear roadmap for your studies that will help you to focus your efforts. Improve Your Problem-Solving Skills Organic Chemistry as a Second Language will help you develop the skills you need to solve a variety of problem types-even unfamiliar ones! Need Help in Your Second Semester? Get Klein's Organic Chemistry II as a Second Language! 978-0-471-73808-5 Helping you focus on mastering the quantitative skills and conceptual knowledge you need to get a true understanding of chemistry, this text continues the tradition of relevance that makes it so effective. Now including MasteringChemistry, the online homework, tutorial, and assessment product with a demonstrated record of helping students quickly master concepts, this edition includes new opportunities for you to practice key concepts. MasteringChemistry provides seamless synergy with the text to create a dynamic learning program that enables you to learn both in and out of the classroom. This latest edition of the most internationally respected reference in food chemistry for more than 30

years, Fennema's Food Chemistry, 5th Edition once again meets and surpasses the standards of quality and comprehensive information set by its predecessors. All chapters reflect recent scientific advances and, where appropriate, have expanded and evolved their focus to provide readers with the current state-of-the-science of chemistry for the food industry. This edition introduces new editors and contributors who are recognized experts in their fields. The fifth edition presents a completely rewritten chapter on Water and Ice, written in an easy-to-understand manner suitable for professionals as well as undergraduates. In addition, ten former chapters have been completely revised and updated, two of which receive extensive attention in the new edition including Carbohydrates (Chapter 3), which has been expanded to include a section on Maillard reaction; and Dispersed Systems: Basic considerations (Chapter 7), which includes thermodynamic incompatibility/phase separation concepts. Retaining the straightforward organization and accessibility of the original, this edition begins with an examination of major food components such as water, carbohydrates, lipids, proteins, and enzymes. The second section looks at minor food components including vitamins and minerals, colorants, flavors, and additives. The final section considers food systems by reviewing basic considerations as well as specific information on the characteristics of milk, the postmortem physiology of edible muscle, and postharvest physiology of plant tissues. Assuming only a minimal experience of mathematics and science, this textbook provides complete coverage of core chemistry topics with questions at the end of chapters to extend and reinforce learning. This guide provides students with fully worked solutions to all unworked problems that appear in the text. In addition to the solutions presented for each specific problem, the authors present problem-solving strategies for solving organic chemistry problems in general. Smith and Vollmer-Snarr's Organic Chemistry with Biological Topics continues to breathe new life into the organic chemistry world. This new fifth edition retains its popular delivery of organic chemistry content in a student-friendly format. Janice Smith and Heidi Vollmer-Snarr draw on their extensive teaching background to deliver organic chemistry in a way in which students learn: with limited use of text paragraphs, and through concisely written bulleted lists and highly detailed, well-labeled "teaching" illustrations. The fifth edition features a modernized look with updated chemical structures throughout. Because of the close relationship between chemistry and many biological phenomena, Organic Chemistry with Biological Topics presents an approach to traditional organic chemistry that incorporates the discussion of biological applications that are understood using the fundamentals of organic chemistry. See the New to Organic Chemistry with Biological Topics section for detailed content changes. Don't make your text decision without seeing Organic Chemistry, 5th edition by Janice Gorzynski Smith and Heidi Vollmer-Snarr! NOTE: You are purchasing a standalone product; MasteringChemistry does not come packaged with this content If you would like to purchase MasteringChemistry search for ISBN-10:03219669291/ISBN-13: 9780321966926. That package includes ISBN-10: 0133858413/ISBN-13: 9780133858419 and ISBN-10: 0321967461/ISBN-13: 9780321967466. General, Organic, and Biological chemistry (2-semester). Give allied health students the chemistry they need...how and when they need it! Designed to prepare students for health-related careers, General, Organic, and Biological Chemistry: Structures of Life breaks chemical concepts and problem solving into clear, manageable pieces, ensuring students follow along and stay motivated throughout their first, and often only, chemistry course. Karen Timberlake's friendly writing style, student focus, vetted and refined clinical chemistry problems, and engaging health-related applications help today's students make connections between chemistry and their intended careers as they develop the problem-solving skills they'll need beyond the classroom. The Fifth Edition fully integrates the text with MasteringChemistry to provide an interactive and engaging experience. New Construct a Concept Map activities help students connect ideas through video solutions and live demonstrations, while the text and media establish a clinical focus that ties chemistry directly to allied health. Instructors can also assign MasteringChemistry's new Dynamic Study Modules, which enable students to remediate core math and chemistry skills outside of class, freeing professors to focus on GOB Chemistry concepts and problem solving during class. Also available with MasteringChemistry MasteringChemistry from Pearson is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students before, during, and after class with powerful content. Instructors ensure students arrive ready to learn by assigning educationally effective content before class, and encourage critical thinking and retention with in-class resources such as Learning Catalytics. Students can further master concepts after class through traditional and adaptive homework assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions. Mastering brings learning full circle by continuously adapting to each student and making learning more personal than ever-before, during, and after class. Chemistry, science, stoichiometry, thermodynamics, organic chemistry. Chemistry, Fifth Edition, by Julia Burdge offers a clear writing style written with the students in mind. Julia uses her experience of teaching hundreds of general chemistry students per year and creates content to offer more in-depth explanation in areas where she knows they have problems. Continuing in the Burdge tradition, the fifth edition balances the necessary fundamental concepts with engaging real-life examples and applications, while utilizing a consistent, step-by-step problem-solving approach and an innovative art and media program. Introduction to Chemistry, 3e by Bauer/Birk/Marks offers today's student a fresh perspective to the introduction of chemistry. This new textbook offers a conceptual approach to chemistry by starting first with macroscopic phenomena, and then presenting the underlying microscopic detail. Each chapter opens with a real-life scenario that helps students connect abstract chemical concepts to their own lives. The math found in Introduction to Chemistry, 3e is introduced on a need-to-know basis, with "Math Toolboxes" in select chapters to help support the math skills required in that chapter. NOTE: This loose-leaf, three-hole punched version of the textbook gives you the flexibility to take only what you need to class and add your own notes -- all at an affordable price. For loose-leaf editions that include MyLab(tm) or Mastering(tm), several versions may exist for each title and registrations are not transferable. You may need a Course ID, provided by your instructor, to register for and use MyLab or Mastering products. For courses in chemistry. Actively engage students to become expert problem solvers and critical thinkers Nivaldo Tro's Chemistry: A Molecular Approach presents chemistry visually through multi-level images--macroscopic, molecular, and symbolic representations--to help students see the connections between the world they see around them, the atoms and molecules that compose the world, and the formulas they write down on paper. Interactive, digital versions of select worked examples instruct students how to break down problems using Tro's unique "Sort, Strategize, Solve, and Check" technique and then complete a step in the example. To build conceptual understanding, Dr. Tro employs an active learning approach through interactive media that requires students to pause during videos to ensure they understand before continuing. The 5th Edition pairs digital, pedagogical innovation with insights from learning design and educational research to create an active, integrated, and easy-to-use framework. The new edition introduces a fully integrated book and media package that streamlines course set up, actively engages students in becoming expert problem solvers, and makes it possible for professors to teach the general chemistry course easily and effectively. Also available with Mastering Chemistry By combining trusted author content with digital tools and a flexible platform, MyLab [or Mastering] personalizes the learning experience and improves results for each student. The fully integrated and complete media package allows instructors to engage students before they come to class, hold them accountable for learning during class, and then confirm that learning after class. NOTE: You are purchasing a standalone product; Mastering(tm) Chemistry does not come packaged with this content. Students, if interested in purchasing this title with Mastering Chemistry, ask your instructor to confirm the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the loose-leaf version of the text and Mastering Chemistry, search for: 0134990617 / 9780134990613 Chemistry: A Molecular Approach, Loose-Leaf Plus Mastering Chemistry with Pearson eText -- Access Card Package, 5/e Package consists of: 0134989694 / 9780134874371 Chemistry: A Molecular Approach 013498854X / 9780134989693 Mastering Chemistry with Pearson eText -- ValuePack Access Card -- for Chemistry: A Molecular Approach, Loose-Leaf Edition Smith's Organic Chemistry continues to breathe new life into the organic chemistry world. This new fifth edition retains its popular delivery of organic chemistry content in a student-friendly format. Janice Smith draws on her extensive teaching background to deliver organic chemistry in a way in which students learn: with limited use of text paragraphs, and through concisely written bulleted lists and highly detailed, well-labeled "teaching" illustrations. The fifth edition features a modernized look with updated chemical structures throughout. Don't make your text decision without seeing Organic Chemistry, 5th edition by Janice Gorzynski Smith!
