**A Quick Guide to Gender Mainstreaming in Education** Jun 26 2022 Gender mainstreaming is the current international approach to promoting equality between women and men. It is based on the recognition that gender inequality operates at all levels and in all sectors of society, and thus needs to be addressed in the mainstream. It aims to ensure that women and men benefit equitably from all that society has to offer, and are equally empowered to affect its governance and decisions. The Gender Management System (GMS) is a holistic and system-wide approach to gender mainstreaming developed by the Commonwealth, for the use of governments in partnership with other stakeholders including civil society and the private sector. The GMS is a comprehensive network of structures, mechanisms and processes to enable governments and other organisations to contribute to gender equality through all policy-making, planning and activities. This Quick Guide has been produced to assist governments and other stakeholders using gender-sensitive indicators in the context of gender mainstreaming. It is an abridged version of the GMS publication Using Gender-Sensitive Indicators: A Reference Manual for Governments and Other Stakeholders.

**Sex and Gender Differences in Personal Relationships** Dec 29 2019 Challenging a commonly held assumption that men and women hail from different psychological and social "planets," this illuminating work reexamines what the empirical research really shows about how the sexes communicate in close relationships. The volume demonstrates that stereotypical beliefs about men and women fail to predict their actual interaction behavior, and highlights evidence of similarities - as well as differences - between the two groups. Setting forth an integrative theory of gender differences, the authors propose that communication behavior in different activities is the means by which sex and gender role expectations are created and sustained. This volume is suitable for students, scholars, and researchers in communication, social psychology, marriage and family studies, and gender studies as well as clinicians working with individuals, couples, and families.

**Gender: Your Guide** Feb 29 2020 "An invaluable resource for both new and veteran allies...obvious and necessary" (Library Journal, starred review) information for everyone who wants to learn more about how to navigate gender diversity in today's families, communities, and workplaces. The days of two genders--male, female; boy, girl; blue, pink--are over, if they ever existed at all. Gender is now a global conversation, and one that is constantly evolving. More people than ever before are openly living their lives as transgender men or women, and many transgender people are coming out as neither men nor women, instead living outside of the binary. Gender is changing, and this change is gaining momentum. We all want to do and say the right things in relation to gender diversity--whether at a job interview, at parent/teacher night, and around the table at family dinners. But where do we begin? From the differences among gender identity, gender expression, and sex, to the use of gender-neutral pronouns like singular they/them, to thinking about your own participation in gender, Gender: Your Guide serves as "a warm, inviting guide to a complicated area" (The Globe and Mail, Toronto). Professor and gender diversity advocate Lee Airton, PhD, explains how gender works in everyday life; how to use accurate terminology to refer to transgender, non-binary, and/or gender non-conforming individuals; and how to ask when you aren't sure what to do or say. It provides the information you need to talk confidently and compassionately about gender diversity, whether simply having a conversation or going to bat as an advocate. Just like gender itself, being gender-friendly is a process for all of us. As revolutionary a resource as Our Bodies, Ourselves, Gender: Your Guide is "greatly needed...an impactful tool for creating a world more supportive of people of all genders" (INTO! Magazine).

**Gender in the Fiction of George Sand** Aug 17 2021 In Gender in the Fiction of George Sand, Francoise Massardier-Kenney argues that the major nineteenth-century French writer George Sand articulates in her novels a complex and extremely modern conception of gender, questioning prevalent patriarchal modes of discourse and redefining masculinity and femininity. Through the analysis of a representative sample of Sand's works (Indiana, Jacques, La dernière Aldini, Jeanne, Horace, Valvedre, Melle la Quintinie, Gabriel, Lucrezia Floriana, and Nanon), Massardier-Kenney uncovers the themes and strategies used by Sand to challenge essentializing and negative representations of women. **The Gender Knot** Jun 02 2020 We are all living deep inside an oppressive gender legacy called patriarchy. On some level, most people know that gender is tied to a great deal of suffering an injustice, from inequality in the workplace to violence and sexual harassment to the conflict between work and family roles. Millions of women are weary from the struggle simply to hang on to what's been gained, and many well-intentioned men do nothing because they can't see how to acknowledge what's going on without inviting guilt and blame simply for being men. The result is a knotted tangle to fear, anger, blame, defensiveness, guilt, pain, denial, ambivalence, and confusion. The more we pull at it, the tighter it gets. Unraveling the knot begins with getting clear about what patriarchy really is, about what it's got to do with each of us, and about how both men and women can see themselves as part of the process of change toward something better. Based on more than twenty years of work on gender issues, The Gender Knot charts a course organized around three questions: What are we participating in and how are we choosing to participate in it? How do typical ways of thinking about gender blind us to what's going on? What can men and women do to make a difference? Johnson writes as a man passionately committed to the belief that oppression is not an inevitable feature of human life, and that each of us makes it matter more than we can ever know. He offers a practical, compassionate, and readable guide to understanding what we're stuck in and how to search for a way out.

**Gender Inequality** Jan 28 2020 Gender Inequality offers a comparative international analysis of an issue which has been the subject of vigorous political and scholarly debate in recent decades. To what extent have social differences by gender, including differences in salary, status, and social and political participation, changed in this period? What barriers exist to the equal participation of women in all aspects of social, political and organizational life? Using original survey research drawn from countries of very different cultural and political structures, the authors are able to analyze not only the extent of women's and men's participation in public life, but also the major influences on progress towards gender equality. Has there been greater progress in western or communist nations? What is the role of the religion and culture? How important has an active women's movement been in the development of gender equality? Gender Inequality draws together an enormously rich and complex body of comparative data, interwoven with theoretical insights, and presented in an accessible manner. This book will be helpful to sociologists, historians and political scientists interested in the continuing saga of gender and social and political life. - Jean Bethke Elshtain, Centennial Professor of Political Science, Vanderbilt University

**Gender and the Musical Canon** Sep 17 2021 Why is music composed by women so marginal to the standard 'classical' repertoire? In attempting to answer this fundamental question, this book examines the practices and attitudes that have led to the exclusion of women composers from the received 'canon' of performed musical works. Focusing on the tradition since 1800, Marcia J. Citron makes substantial use of feminist and interdisciplinary theory. After introducing the notion of canon and its role in cultural discourse, she explores important elements of canon formation: creativity, professionalism, music as gendered discourse, and reception. A final chapter provides a critique of many of these ideas with respect to the canon of the university music history curriculum. Professor Citron shows how an understanding of canon formation illuminates some of the basic issues that affect the discipline as a whole.
