Manual of the Vascular Flora of the Carolinas Apr 07 2023 This illustrated manual describes and discusses the unusually rich and varied flora of the Carolinas, from the semi-tropical coast of South Carolina to the northern forests of the high North Carolina mountains. The manual treats in detail and in a concise format more than 3, 200 species of trees, shrubs, vines, herbs and ferns that grow without cultivation in this two-state area. Special features include diagnostic illustrations, keys for identification, detailed descriptions, flowering and fruiting dates, habitat data, distribution data, and pertinent synonymy for each species. County dot maps show the distribution of each species if found in more than five counties throughout the two-state area, and general ranges beyond our borders are given in the text. First published in 1968, Manual of the Vascular Flora of the Carolinas is an established reference for professionals, students, and plant enthusiasts throughout the Southeastern United States. It is based on the collection and examination of more than 200,000 live specimens. Many of these specimens are now housed in the herbarium at the University of North Carolina at Chapel Hill

Endothelin Receptors and Signaling Mechanisms Jun 04 2020 This book focuses on the wide variety of intracellular events that occur as a result of endothelin receptor activation. This includes a discussion of the various pathways by which endothelin activates Ca²⁺ signals from several intra- and extracellular sources and the effects of endothelin on ion channels and membrane function. In addition, the mechanisms by which endothelin influences the ion transport within the renal epithelium are covered, as well as the signal transduction pathways activated by endothelin in both cardiac tissue and vascular smooth muscle.
