Relying on decades of experience and research, the authors reveal key insights and successful strategies, including practical how-to advice, to enable women to hone and enhance their inherent leadership strengths. The book provides women with a compelling and straightforward blueprint for accelerated business success! This is a must-read for women and for all mentors and coaches of women!” —Richard Falcone, Chairman, Xperior-Consulting, Inc; former Chairman/CEO of Securix Technologies, Inc; and former AT&T Senior Vice President “Sharon Hadary and Laura Henderson have written a book that will be a blueprint for success that will inspire women in business for years to come—and not a moment too soon, given women’s steadily expanding influence in business. The authors have combined personal insight, research-based knowledge, and real-life lessons in a thought-provoking guide that will benefit women just beginning their leadership journey and women at the pinnacle of their professions. How Women Lead is a celebration of the perspective and power of successful women. This book belongs in every leader’s personal library.” —Maria Coyne, Executive Vice President, Consumer and Small Business Segment Head, KeyBank; member Executive Council, KeyCorp IT’S A NEW WORLD FOR WOMEN IN BUSINESS LEADERSHIP. Did you know that: . . . companies with more women in high-level positions report better financial performance than those with fewer women at these levels? . . . 40% of all privately held businesses are owned by women? . . . more than half of all professional and managerial positions are held by women? . . . the number of women earning \$100,000 or more has grown at a faster pace than it has for men in the United States? . . . 6.3% of the top earners in the For-tune 500 companies are women? Women are moving into leadership roles in business, government, and the military, and they’re gaining positions of increasing stature and higher salaries. BUT . . . women’s upward movement is not matching the rate of their movement into professional and managerial positions. It is time to own your destiny. Gain the confidence and know-how you need to navigate it all. Your roadmap to achieving your aspirations, How Women Lead provides hard-won wisdom from women who have reached truly impressive heights in their careers. Written by two women’s leadership experts who are themselves successful leaders, How Women Lead gives women the information they need to become high-potential leaders but don’t get in business school: how to build a career on their own terms, gain the critical business management skills needed to advance, and advocate successfully for themselves. Whether you’re

already in the leadership pipeline, contemplating your next career move, or are working to empower women in business, the lessons of How Women Lead will show you the sky's the limit when you combine women's leadership strengths with sound business acumen. From the author of Serial Killers: The Method and Madness of Monsters comes an in-depth examination of sexual serial killers throughout human history, how they evolved, and why we are drawn to their horrifying crimes. Before the term was coined in 1981, there were no "serial killers." There were only "monsters"--killers society first understood as werewolves, vampires, ghouls and witches or, later, Hitchcockian psychos. In Sons of Cain--a book that fills the gap between dry academic studies and sensationalized true crime--investigative historian Peter Vronsky examines our understanding of serial killing from its prehistoric anthropological evolutionary dimensions in the pre-civilization era (c. 15,000 BC) to today. Delving further back into human history and deeper into the human psyche than Serial Killers--Vronsky's 2004 book, which has been called the definitive history of serial murder--he focuses strictly on sexual serial killers: thrill killers who engage in murder, rape, torture, cannibalism and necrophilia, as opposed to for-profit serial killers, including hit men, or "political" serial killers, like terrorists or genocidal murderers. These sexual serial killers differ from all other serial killers in their motives and their foundations. They are uniquely human and--as popular culture has demonstrated--uniquely fascinating. NK Cells in Cancer Immunotherapy: Successes and Challenges explains the latest immunotherapeutic strategies, focusing on NK cells to allow the best and precise combination treatments to cancer patients. The book provides existing background knowledge in the field of immunotherapy and discusses future areas of research required to carry out cutting-edge, validated therapies. Chapters cover advances in immunotherapeutic strategies, in particular, the use of NK cells with and without T-cell therapy in the treatment of cancer. The book is a valuable resource for cancer researchers, oncologists, graduate students and those interested in learning more about novel strategies to treat cancer patients. Immunotherapy is fast becoming the method of choice for cancer therapy. Although remarkable advances have been made in the field of immunotherapy, there are significant challenges and difficulties ahead since many of the current immunotherapeutic strategies do not provide long-lasting treatment strategies, and therefore are not very effective. Covers CAR/T and CAR/NK and adoptive NK cell therapy with and without T cell therapies Discusses basic biology of NK cells and mouse models of human cancers and the role of NK cells in metastatic cancer and in cancer stem cells Encompasses information on combination therapies using check point inhibition, adoptive transfer of cytotoxic effector cells, chemotherapeutic drugs and activating and inhibitory antibodies This timely book, published just as cancer immunotherapy comes of age, summarizes the rationale, present status, and future perspective for cancer immunotherapy. Included are explanations of the constitution of the immune system and immun checkpoints, the mechanism of antigen presentation and recognition, valuable modalities, clinical trials and guidance, personalization, and biomarkers, all of which are essential for understanding the success of cancer immunotherapy. This innovative therapy has been investigated worldwide as the fourth line of cancer treatment after the standard treatments of surgery, chemotherapy, and radiotherapy. The progress in fundamental understanding of tumor immunology and the recent advances in clinical trials have opened new avenues with a cancer vaccine in 2010 and immun checkpoint modulation in 2011, with their approval already granted in the United States. Today, there are no doubts, even among experts in cancer chemotherapy and radiotherapy, that the immune system plays a vital role in tumor eradication. Following American approval, many clinical trials of cancer immunotherapy are being conducted. With this book the reader will readily understand the paradigm shift in cancer treatment and will realize the importance of cancer immunotherapy. The great value of immunotherapy will be obvious, not only for tumor shrinkage but for prolonging patient survival. Arthropod Vector: Controller of Disease Transmission, Volume 2: Vector Saliva-Host Pathogen Interactions is built on topics initially raised at a related Keystone Symposium on Arthropod Vectors. Together with the separate, related Volume 1: Controller of Disease Transmission, this work presents a logical sequence of topic development that leads to regulatory considerations for advancing these and related concepts for developing novel control measures. The three themes of symbionts, vector immune defenses and arthropod saliva modulation of the host environment are central to the concept of determinants of vector competence that involves all aspects of vector-borne pathogen development within the arthropod that culminates in the successful transmission to the vertebrate host. These three areas are characterized at the present time by rapid achievement of significant, incremental insights, which advances our understanding for a wide variety of arthropod vector species, and this work is the first to extensively integrate these themes. Provides overviews of host defenses encountered by the blood feeding arthropod vector at the cutaneous interface Addresses how these defenses are modulated by the vector, specific functions of vector saliva components, host response to vector-borne infectious agents and how vector-borne pathogens themselves modulate host defenses Features expertly curated topics to ensure appropriate scope of coverage and aid integration of concepts and content across chapters Samson/Daft/Donnet's Management is a robust foundation text providing a balance of broad, theoretical content with an engaging, easy-to-understand writing style. It covers the four key management functions - planning, organizing, leading and controlling - conveying to students the elements of a manager's working day. Along with current management theory and practice, the authors integrate coverage of innovation, entrepreneurship, agile workplaces, social media and new technology throughout. This sixth edition features a new author on the team and contains updates to content based on recent research. Real-life local and international examples showcase the ongoing changes in the management world. Focusing on a 'skills approach', they bring concepts to life for students, supporting motivation, confidence and mastery. Each part concludes with a contemporary continuing case study, focusing on car company Toyota as it faces managerial challenges and opportunities in the region. This translational, clinically oriented book describes in detail novel approaches to cancer immunotherapy, current strategies to target tumor immunosuppression, and prognostic biomarkers for personalized cancer treatments. Since the first, very successful edition of the book was published in 2015, the original chapters have been significantly updated and entirely new chapters are included on, for example, cancer immunoprevention, aptamer-mediated cancer gene therapy, haploidentical bone marrow transplantation for pediatric malignancies, and nanoimmunotherapy. The book is published as part of the three-volume Springer series Cancer Immunology, which aims to provide an up-to-date, clinically relevant review of cancer immunology and immunotherapy. Other volumes in the series address the translational medicine context and cancer immunotherapy for organ-specific tumors. Cancer Immunology: Bench to Bedside Immunotherapy of Cancers will be of special value to clinical immunologists, hematologists, and oncologists. This book looks at the failure of educational reform efforts to impact on the learning and performance of students due to misguided action based on a number of myths associated with school reform which remain prevalent in education. Essays on how organizations effectively communicate strategy to optimize performance. Integrating new and traditional management ideas, this undergraduate textbook describes strategies for planning, organizing, leading, and controlling a department or an entire business. The sixth edition updates the case examples and reflects the atmosphere of the new workplace. Annotation (c) Book This eBook is a collection of articles from a Frontiers Research Topic. Immuno-oncology (IO) is a growing field of medicine at the interface of immunology and cancer biology leading to development of novel therapeutic approaches, such as chimeric antigen receptor T-cell (CAR-T) and immune checkpoint blockade antibodies, that are clinically approved approaches for cancer therapy. Although currently approved IO approaches have shown tremendous promise for select types of cancers, broad application of IO strategies could even further improve the clinical success, especially for diseases such as pancreatic cancer, brain tumors where the success of IO so far has been limited. This volume of Delivery Strategies and Engineering Technologies in Cancer Immunotherapy discusses methods of targeting tumors, CRISPR technology, and vaccine delivery among many other delivery strategies. Systemic Drug Delivery Strategies: Delivery Strategies and Engineering Technologies in Cancer Immunotherapy, Volume 2 creates a comprehensive treaty that engages the scientific and medical community who are involved in the challenges of immunology, cancer biology, and therapeutics with possible solutions from the nanotechnology and drug delivery side. Comprehensive treaty covering all aspects of immuno-oncology (IO) Novel strategies for delivery of IO therapeutics and vaccines Forecasting on the future of nanotechnology and drug delivery for IO Visionary companies build markets today to be market leaders tomorrow. You're About To Discover The #1 Secret To Making Money From Home And Escape The 9-5 Rat Race If I only had one thing to tell anyone out there who is either new to the job market or is graduating, that would thing would be: "Jobs suck! Well, at least the old-fashioned version of a job where you have to do something you don't really like from 9-5 and are simply paid for your time to only slave yourself on the job." I like calling this the 'sell your time' personal business model where you literally exchange your time for money. In other words, you sell your time to someone and they pay you for it. That's not right. If you've been there, and actually experienced what I'm talking about, you'll know that this personal business model actually sucks. I'd say you need to do things differently; work in your PJs or underwear, avoid the commute, respond to emails from a hammock as you sip coffee, and so on. I'm sure you've heard the benefits of working from home-and yes, they are all true. As you read this book, you will discover some things that will surprise you about what it's truly like when you don't have to wake up early to beat the traffic snarl up. Besides that, and primarily, this book will teach you the many different ways of making money from home to escape the 9-5 rat race, and be able to do many more things you love. The reason why we wrote this book is because we want to help people who aspire to become Internet Marketers and have decent writing skills to break into the Internet Marketing market faster without going through the hard knocks that we have gone through. The first in a series of gambling books that will give readers a warrior approach to poker, leading journalist and poker columnist John Vorhaus begins by changing a player's state of mind, from a passive reactive player to a strong, proactive player, and then shows him or her how to dominate the game and crush opponents. Giving players the psychic edge and practical tools to play like an expert, as well as teaching them how to spot the weaknesses and strengths of other players, and how to use them to their own advantage, this book offers the attitude needed to win the game. While growth is a top priority for companies of all sizes, it can be extremely difficult to create and maintain—especially in today's competitive business environment. The Granularity of Growth will put you in a better position to succeed as it reveals why growth is so important, what enables certain companies to grow so spectacularly, and how to ensure that growth comes from multiple sources as you take both a broad and a granular view of your markets. Chapters address the scientific rationale for laboratory ecology, its historical role within the broader discipline, and recent advances in research. The book presents results from a wide range of laboratory systems including insects, mites, plankton, protists, and microbes. A common theme throughout the book is the value of microcosm studies in advancing our knowledge of ecological and evolutionary principles. Each chapter is authored by scientists who are leading experts in their fields. The book addresses fundamental questions that are of interest to biologists whether they work in the laboratory or field or whether they are primarily empiricists or theorists. Details a scientific rationale for laboratory systems in ecological and evolutionary studies Offers a view on historical role of laboratory studies Includes examples of recent research advances in ecology and evolution using laboratory systems, ranging from insects to microbes Integrates mathematics, statistics and experimental studies The Leadership Experience in Asia is the Asian adaptation of The Leadership Experience, 2/e by Daft. It integrates both micro and macro approaches to leadership and brings advanced concepts and practices of the leadership experience, most of which originated in the West, to within reach of anyone who wants to lead effectively in Asia. By plugging into models of effective leadership, it demonstrates how the numerous leadership concepts and international practices can be applied in Asia. Innovate or die For thirty years, Gary Shapiro has observed the world's most innovative businesses from his front-row seat as leader of the Consumer Electronics Association. Now he reveals the ten secrets of "ninja innovators" like Apple, Amazon, Google, Microsoft, and many others. What does it take to succeed? Discipline. Mission-oriented strategy. Adaptability. Decisiveness. And a will for victory. In short, today's most successful businesses are "ninja innovators." Drawn from Gary Shapiro's three decades of experience leading the consumer electronics industry, Ninja Innovation takes readers behind the scenes of today's top enterprises, uncovering their ten essential strategies for success. As head of the Consumer Electronics Association and its influential annual trade show, the International CES, Shapiro has worked with the most innovative companies in history—Intel, IBM, and Samsung, to name a few—focusing on creating policies and events that produce revolutionary products year after year. He has learned the key strategies that have guided these businesses to record-breaking profits, as well as the traps that have led so many others to crushing failure. In order to stay in front of the pace of innovation, Shapiro observes, top companies must operate as an elite strike force—just like the legendary medieval warriors known as ninjas. Ninjas weren't called upon to do the ordinary; they had to perform truly extraordinary tasks, while risking everything. As a highly trained martial-arts black belt himself, Shapiro mines the valuable insights of these centuries-old warriors to spotlight the secrets of agility, creativity, decisiveness, and reinvention that are essential for twenty-first-century leaders seeking breakthrough success. Taking readers inside the most cutting-edge businesses, Ninja Innovation is the ultimate guide to achieving victory in today's innovate-or-die economy. It isn't easy to come up with new hot-selling products every now and then. It's as hard as creating a new and foreign color! At the same time, you just can't be selling the same old products in the Internet market for a long run and the reason is because the market is always looking for something big and new. If you persist, the value of your out-dated products will decrease and eventually, they won't sell for you anymore. Otherwise, you will be cracking your head for new ideas to create a product because without a product --- You will have nothing else to sell and your income stops there. You don't want that to happen, do you? A resource for industry professionals and consultants, this book on corporate strategy lays down the theories and models for revitalizing companies in the face of global recession. It discusses cutting-edge concepts, constructs, paradigms, theories, models, and cases of corporate strategic leadership for bringing about transformation and innovation in companies. Each chapter in the book is appended with transformation exercises that further explicate the concepts. Discover the foundation, power, and necessity of visual communication with this essential guide Visual communication has changed. It's gone from being an optional medium for relaying information to an important method for building connections and increasing understanding. We now use visual storytelling to help us establish and strengthen relationships, engage distracted audiences, and bring clarity to complexity. Killer Visual Strategies examines how visual communication has transformed how brands connect with their customers and colleagues alike. It looks at the growing audience demand for quality visual content and how organizations must meet this demand or risk being left behind. Killer Visual Strategies traces the history of visual communication and explores why it now plays an integral role in our daily lives. As Amy Balliett tells the story of this evolving medium, she naturally incorporates visuals, such as timelines and data visualizations throughout. In addition to providing actionable rules to follow for creating high-impact visual content, Balliett also explores the latest trends, including visual search, augmented reality (AR), and virtual reality (VR). Then, she looks forward to what lies ahead in this dynamic field. The book's topics can benefit readers in a range of professions where visual content is now vital to sharing a message. Learn best practices for visual communication Gain inspiration from countless visual examples Stay on top of the latest trends in visual communication Understand visual communication for marketing, sales, design, HR, and more Killer Visual Strategies provides a clearer picture of the evolution of visual communication as a fundamental part of how a story is told. Francesca Biagi-Chai's book - a translation from the French of Le Cas Landru - tackles the issue of criminal responsibility in the case of serial killers, and other 'mad' people who are nonetheless deemed to be answerable before the law. The author, a Lacanian psychoanalyst and senior psychiatrist in France, with extensive experience working in institutional settings, analyses the logic informing the crimes of famous serial killers. Addressing the Landru case (which was the inspiration for Chaplin's Monsieur Verdoux), as well as those of Pierre Rivière and Donato Bilancia, Biagi-Chai casts light on the confusion that pervades forensic psychiatry and criminal law as to the distinction between mental illness and 'madness'. She then elaborates the consequences of her argument in a sustained critique of the insanity defence. The book includes a Foreword by the renowned psychoanalyst, Jacques-Alain Miller, and an introduction by the translators on the question of insanity before the law in the US and in the UK, which considers the pertinence of Biagi-Chai's argument for forensic psychiatry, for

criminal law, and for the increasing contemporary focus on the assessment of dangerousness and risk-management strategies in crime control practices. In practice, many different people with backgrounds in many different disciplines contribute to the design of an enterprise. Anyone who makes decisions to change the current enterprise to achieve some preferred structure is considered a designer. What is problematic is how to use the knowledge of separate aspects of the enterprise to achieve a goal. The book is intended to the students involved in the study of microbiology, immunology, and animal reproduction as an introduction to more extensive studies. An overview of immunology is provided in the book to refer immediately any basic information needed, for further understanding of the subject dealt in this book. The chapters covered may provide the structural component for the basic understanding of the reproductive immunology in animals. It is designed to complement, but not to compete with the few books available with regard to reproduction. The book is profusely illustrated with figures and tables. The concise nature of the book and the simple and clear treatment of the topics, it is hopefully will prove to be useful to all. CD1 and MR1 are major histocompatibility complex (MHC) class I-related proteins that bind and present non-peptide antigens to subsets of T cells with specialized functions. CD1 proteins typically present lipid antigens to CD1-restricted T cells, whereas MR1 presents vitamin B₆-based ligands and a variety of drugs and drug-like molecules to MR1-restricted T cells. The CD1 family of antigen presenting molecules has been divided into two groups: Group 1 contains CD1a, CD1b and CD1c, and Group 2 contains CD1d. Additionally, CD1e is expressed intracellularly and is involved in the loading of lipid antigens onto Group 1 CD1 proteins. Humans express both Groups 1 and 2 CD1 proteins, whereas mice only express CD1d. Group 1 CD1 proteins present lipid antigens to T cells that generally express diverse T cell receptors (TCRs) and exhibit adaptive-like functions, whereas CD1d presents lipid antigens to subsets of T cells that express either diverse or highly restricted TCRs and exhibit innate-like functions. CD1d-restricted T cells are called natural killer T (NKT) cells, which includes Type I or invariant NKT (iNKT) cells expressing semi-invariant TCRs, and Type II NKT cells expressing more diverse TCRs. CD1-restricted T cells have been implicated in a wide variety of diseases, including cancer, infections, and autoimmune, inflammatory and metabolic diseases. Additionally, NKT cells have been targeted for immunotherapy of disease with ligands such as α -galactosylceramide for iNKT cells, or sulfatide for Type II NKT cells. Like iNKT cells, MR1-restricted T cells express semi-invariant TCRs and display innate-like functions. MR1-restricted T cells, also called mucosal-associated invariant T (MAIT) cells, have been implicated in immune responses against a variety of pathogens such as *Mycobacterium tuberculosis*, *Pseudomonas aeruginosa*, *Helicobacter pylori*, hepatitis C virus and influenza virus. Moreover, these cells contribute to autoimmune and inflammatory diseases, including colitis, rheumatoid arthritis, psoriasis, lupus, and diabetes.
