Excerpt from *The Blue Andalusian: Its Breeding, Management, and Exhibition* I hardly think that any apology is necessary for the introduction of another monograph upon that handsome variety of domestic poultry the Blue Andalusian, for although the breed is now one of our old-established ones, the strict demands of the fancier upon the delicate ground colour and lacing have become so very much more pronounced in recent years, and so great an improvement is required upon what satisfied the most critical judges of even a dozen years ago, that the necessity for some work upon the subject, written up as near as may be to the requirements of the times, will, I trust, justify the publication of these pages. Being fully aware that the value of a work of this kind would be considerably enhanced as a book of reference if it contained more than the simple experience of one individual, I have been only too pleased to avail myself of the kind assistance of several of the principal breeders of the variety, and must take this opportunity of thanking them for the information that they have so ungrudgingly afforded me. Excerpt from British Dogs: Their Varieties, History, Characteristics, Breeding, Management and Exhibition, Illustrated With Portraits of Dogs of the Day When reminded by the Publisher that a dozen or so lines of Preface were needful in introducing "British Dogs" to the public, the following questions were forcibly presented to my mind: First, whether the book should have been written; and, secondly (given the necessity for it) whether I should have undertaken the work. Both these questions I propose handing over to the reader for solution, as I fear I might not be altogether an unprejudiced judge; and in doing so I trust to his good nature to treat leniently all faults, and to his good sense to assimilate whatever may be found worthy. The object aimed at has been to give, as far as obtainable, a sketch of the origin of each breed, and an accurate description of the points of excellence of each variety as demanded by modern taste. Only the initiated know the minute distinctions between breeds and individual dogs, patent to the subtle discrimination of the present-day philo-kuon.
