Nowhere is the nature-nuture controversy being more arduously tested than in the labs of world-renowned molecular scientist Dean Hamer, whose cutting-edge research has indisputably linked specific genes to behavioral traits,

such as anxiety, thrill-seeking, and homosexuality. The culmination of that research is this provocative book, **Living with Our Genes**. In it, Dr. Hamer reveals that much of our behavior-how much we eat and weigh, whether we drink or use drugs, how often we have sex-is heavily influenced by genes. His findings help explain why one brother becomes a Wall Street trader, while his sibling remains content as a librarian, or why some people like to bungee-jump, while others prefer Scrabble. Dr. Hamer also sheds light on some of the most compelling and vexing aspects of personality, such as shyness, aggression, depression, and intelligence. You are what you eat. Food and diet have an enormous influence on your health and well-being, but eating the right amount of the right things - and not too much of the wrong things - isn't easy. But, as in most walks of life, knowledge is power. This book will empower you to eat healthily, lose weight, and sort the fads from the science facts. This is the New Scientist take on a "New Year, New You" book: an eye-opening and myth-busting guide to everything from sugar to superfoods, from fasting to eating like a caveman and from veganism to your gut microbiome. Forget faddy diet books or gimmicky exercise programs, this is what is scientifically proven to make you live longer and to be healthier and happier. ____

*****SHORTLISTED FOR THE ROYAL SOCIETY SCIENCE BOOK PRIZE 2022***** Did you know that we can lead longer and healthier lives by making simple changes right now? Professor Rose Anne Kenny has 35 years of experience at the forefront of ageing medicine. In **Age Proof**, she draws on her own pioneering research and the latest

evidence to demystify why we age and shows us that 80% of our ageing biology is within our control: we can not only live longer lives but become happier and healthier deep into our later years. Effortlessly distilling scientific theory into practical advice that we can apply to our everyday lives, Professor Kenny examines the impact that food, genetics, friendships, purpose, sex, exercise and laughter have on how our cells age. This illuminating book will show you the steps you can take to stay younger for longer - and will prove that you really are just as young as you feel. A New York Times Bestseller! An illuminating perspective on the science of meditation—and a handbook for transforming our minds, bodies, and lives In *The Joy of Living*, world-renowned Buddhist teacher Yongey Mingyur Rinpoche—the “happiest man in the world”—invites us to join him in unlocking the secrets to finding joy and contentment in the everyday. Using the basic meditation practices he provides, we can discover paths through our problems, transforming obstacles into opportunities to recognize the unlimited potential of our own minds. Introduces plant life, specific types such as carnivorous and parasitic plants, and concepts such as single cells, germination, and photosynthesis. Learn How to Harness the power of YOUR OWN MIND to achieve good health, happiness, success, and prosperity! In 52 easy-to-read life-changing chapters, Rev. Ike introduces you to his Science Of Living philosophy and turns you on to a whole new way of thinking! You have the God-given power to change your thoughts and change your life! And this book shows you HOW TO DO IT! You'll find 'Practical How-to' advice on

living, visualization exercises and consciousness-raising affirmations that you can put to work right away to change your conditions! You learn the 'shocking' truth about who God is in you, and discover the 'real' Jesus. After reading this book the Bible will never be the same -- you will understand it, in a beautiful new way! Are you ready to 'wash out' doubt, fear and worry -- and IMPLANT selfesteem, success and love into your subconscious? Then fasten your seat belt, open your mind, hold on to your hat -- get this book now -- and 'get right with yourself'! And when you are right with yourself, everything in life will be right for you. The book Living Deeply is the product of the Institute of Noetic Sciences' decade-long investigation into transformations in human consciousness. It transcends any one approach by focusing on common elements of transformation across a variety of traditions, affirming and supporting the diversity of approaches across religious, spiritual, scientific, academic, or cultural backgrounds. Living Deeply makes these teachings accessible without diminishing their complexity, empowering readers to become their own scientists, develop and test their own hypotheses, and reach their own conclusions. Let Light Guide Your Life The most important things in life are our health and happiness. Yet most of us are neither healthy nor happy. We have been led to believe that if we think ahead and make the right choices, we can manifest our dreams. Yet despite our best efforts, we still have more disease and discontent than ever before. Is it possible that our essential ideas about life are flawed? We are all aware of the impact of sunlight on a plant's growth and development. But few of us

realize that a plant actually “sees” where light is emanating from and positions itself to be in optimal alignment with it. This phenomenon, however, is not just occurring in the plant kingdom — humans are also fundamentally directed by light. In Luminous Life, Dr. Jacob Israel Liberman integrates scientific research, clinical practice, and direct experience to demonstrate how the luminous intelligence we call light effortlessly guides us toward health, contentment, and a life filled with purpose. Living Shorelines: The Science and Management of Nature-based Coastal Protection compiles, synthesizes and interprets the current state of the knowledge on the science and practice of nature-based shoreline protection. This book will serve as a valuable reference to guide scientists, students, managers, planners, regulators, environmental and engineering consultants, and others engaged in the design and implementation of living shorelines. This volume provides a background and history of living shorelines, understandings on management, policy, and project designs, technical synthesis of the science related to living shorelines including insights from new studies, and the identification of research needs, lessons learned, and perspectives on future guidance. Makes recommendations on the correct usage of the term living shorelines Offers guidance for shoreline management in the future Includes lessons learned from the practice of shoreline restoration/conservation Synthesizes regional perspectives to identify strategies for the successful design and implementation of living shorelines Reviews specific design criteria for successful implementation of living shorelines

Provides detailed discussions of social, regulatory, scientific and technical considerations to justify and design living shoreline projects International perspectives are presented from leading researchers and managers in the East, West and Gulf coasts of the United States, Europe, Canada, and Australia that are working on natural approaches to shoreline management. The broad geographic scope and interdisciplinary nature of contributing authors will help to facilitate dialogue and transfer knowledge among different disciplines and across different regions. This book provides coastal communities with the scientific foundation and practical guidance necessary to implement effective shoreline management that enhances ecosystem services and coastal resilience now and into the future. Vaastu Shaastra is the art and science of living a happy and contented long life. In the modern-day world of high-speed technology, many diseases are arising out of faulty lifestyles. Classical principles of Vaastu Shaastra describe the ancient way of living which need modifications in the present-day context. This book is an intelligent amalgamation of the ancient practice of Vaastu living and modern technologies of house building and architecture. It offers an introduction to Vaastu Shaastra, systematising and standardising its techniques and methodologies. The book has been divided into three sections. The first section has been devoted to the understanding of the key concepts, principles and forces of Vaastu that exert an influence on any given space. The second section of the book reveals how to create heaven on earth; right in your home. It shows how we can achieve internal peace by first achieving

external peace in the house. The third section is related to the day-to-day use of Vaastu. One chapter has been devoted to Vaastu of workplace which, in many aspects, is different from residential Vaastu. This book has been written according to the established principles of Vedic Astrology; an inevitable part of Vaastu Shaastra. The effect of the nine planets is considered in Astrology while mainly the effect of planet earth is taken in Vaastu. Astrology depends on dashas (Planetary Periods) while Vaastu depends on dishas (Directions), Jyotish assumes the existence of Kaal Purush (Time Personified) while Vaastu assumes the existence of Vaastu Purush (Space Personified). The book incorporates current knowledge of building science to explain the ancient wisdom of Vaastu Shaastra only to bridge the gap between ancient traditions and modern way of thinking. No attempt has been made to transgress into the other parallel systems known as Feng Shui and Pyramidology, which require totally separate study. The work is meant primarily for those who want to learn Vaastu from the very beginning and pursue it seriously in a scientific manner. The book will also serve as a stepping-stone for those who intend to indulge in hitherto unexplored areas of Vaastu Shaastra like suitability of certain directions for certain activities, hidden meanings of Vaastu Purush; forty-five demi gods; ten dikpalas; three energies and Panchmahabhootas, predicting the fate of a house and its inhabitants through Vaastu kala, etc. We all want to be happier, more successful and less stressed, but what really works? From improving creativity to building confidence, self-care to self-esteem, forming better habits and feeling happier, Fix Your Life

debunks the fads and explores the real science of self-help. Can you learn to make better decisions? Or break bad habits and form new ones? What should you eat to feel happier? How do you learn a skill faster? Does mindfulness really work? Dispelling mental health myths and self-help fads, here is the truth about meditation, making smarter choices, addiction, CBT, Tai Chi, success, diet, healthy relationships, anxiety, antidepressants, intelligence, willpower and much more. Full of the latest research and ground-breaking evidence, packed with useful advice, this book really could fix your life. Defines the characteristics and needs of living things, such as plants and animals. Hibernation is one of nature's greatest miracles, allowing animals to sleep through periods of extreme cold and heat. Interesting information describes how different animals use body fat to survive, how they can wake themselves up, and how some give birth during hibernation. Harness the principles of synchronicity and flow to live better, work smarter, and find purpose in your life. When we align with circumstance, circumstance aligns with us. Using a cutting-edge scientific theory of synchronicity, Sky Nelson-Isaacs presents a model for living "in the flow"--a state of optimal functioning, creative thinking, and seemingly effortless productivity. Nelson-Isaacs explains how our choices create meaning, translating current and original ideas from theoretical physics and quantum mechanics into accessible, actionable steps that we can all take to live lives in better alignment with who we are and who we want to be. By turns encouraging and empowering, Living in Flow helps us develop an informed relationship to meaning-making and

purposefulness in our lives. From this we can align ourselves more effectively within our personal, professional, and community relationships to live more in flow. Read and find out about what makes something alive, and what all living things need to stay healthy, in this colorfully illustrated nonfiction picture book. A person and a cat have something in common: You are both alive. People and plants and animals are all alive, but is a doll alive? Or your bike? How can you tell? This is a clear and appealing science book for early elementary age kids, both at home and in the classroom. It's a Level 1 Let's-Read-and-Find-Out, which means the book explores introductory concepts perfect for children in the primary grades. Science/Subaru Science Books & Films Prize for Outstanding Science Series. Although some people age faster than others, we cannot turn back time and curb our chronological age. As a research scientist, doctor, and physician-in-chief at Mount Sinai Hospital with four decades of experience, I know that what we can do is change our biological age This is Holmes' own "commentary" on his masterpiece, The Science of Mind. As such, it may be his most important book besides the textbook. These short pieces abound in counsel and guidance in metaphysics, spirituality, and healing. Here too is the history of New Thought and Religious Science; insights into the mystics; pointers on treatment; and analysis of our fears and insecurities. Founder of the worldwide Religious Science movement, formulator of the Science of Mind philosophy, and author of metaphysical bestsellers, Dr. Holmes continually sought to simplify his teaching and get people to "use" it. In these pages he speaks directly to you in a one-on-one tutorial. Originally published in 1930 The Science of Living looks at Individual Psychology as a science. Adler discusses the various elements of Individual Psychology and its application to everyday life: including the inferiority complex, the superiority complex and other social aspects, such as, love and marriage, sex and sexuality, children and their education. This is an important book in the history of psychoanalysis and Adlerian therapy. Explore the science behind your daily living habits and make your day healthier, happier, and more productive. Best-selling author Stuart Farrimond brings you a ground-breaking health book that will revitalize your daily routine and bring to light the latest research in psychology,

wellness and healing yourself! Science shamelessly steals from God's creation, yet refuses to give God the glory! How the glow of a cat's eyes innovates road reflectors The naturally sticky inspirations for Velcro and barbed wire A fly's ear, the lizard's foot, the moth's eye, and other natural examples are inspiring improvements and new technologies in our lives Engineers and inventors have long examined God's creation to understand and copy complex, proven mechanics of design in the science known as biomimicry. Much of this inspiration is increasingly drawn from amazing aspects of nature, including insects to plants to man in search of wisdom and insight. We are surrounded daily by scientific advancements that have become everyday items, simply because man is copying from God's incredible creation, without acknowledging the Creator. Experts of every kind are queueing up to warn us that lack of sleep, or the wrong kind, will bring down a bewildering array of dire consequences. Heather Darwall-Smith's message in this ebook is simple: don't panic! Humans are biologically programmed to sleep, and by interrogating all the factors - sociological, physiological, neurological, and psychological - that might be impeding this innate instinct, each of us can work out the changes we can make in our own lifestyles to allow ourselves to sleep naturally again. Understand and transform your sleep habits, one night at a time. In this groundbreaking book, Nigel Hoffmann shows that understanding the dynamic, living qualities of nature requires artistic capacities. He distinguishes four stages of scientific inquiry that correspond to the four classical elements of Earth, Water, Air, and Fire.

Modern analytical science with its causal thinking can be characterized as an Earth mode of cognition. A dynamic approach that follows transformation over time requires a sculptural sense of form and corresponds to the element of Water. The stages of Air and Fire engage yet more vital aspects of nature through musical and poetic capacities. Combining scholarly-scientific acuity with artistic insight, Hoffmann first characterizes these four different ways of knowing. He then applies them, leading us ever more deeply into the dynamic qualities of specific plants, animals, and the landscape they live in. In doing so, he demonstrates how this four-step methodology provides a comprehensive framework for the life sciences. This beautifully illustrated book will appeal to all who are interested in gaining deeper insights into nature. "I put my hopes for the future in such practice because it plants seeds of a life-attuned thinking into the world that can help us to act in more life-engendering ways."

Get answers to all your cooking science questions, and cook tastier, more nutritious food using fundamental

principles, practical advice, and step-by-step techniques. Where does the heat come from in a chili pepper? Why is wild salmon darker than farmed? Does searing meat really "seal in" the juices? A good recipe goes a long way, but if you can master the science behind it, you'll be one step ahead. Using full-color images, stats and facts through infographics, and an engaging Q&A format to show you how to perfect your cooking, *The Science of Cooking* brings food science out of the lab and into your kitchen. Topics include meat and poultry, seafood, dairy, pulses and grains, fruits, vegetables, spices, herbs, baked goods, and more, making it perfect for perfecting everyday cooking as well as for special meals. You are what you eat. Food and diet have an enormous influence on your health and well-being, but eating the right amount of the right things - and not too much of the wrong things - isn't easy. But, as in most walks of life, knowledge is power. This book will empower you to eat healthily, lose weight, and sort the fads from the science facts. Forget faddy diet books or gimmicky exercise programs, this is what is scientifically proven to make you live longer and to be healthier and happier. A groundbreaking new synthesis and theory of social institutions *Understanding Institutions* proposes a new unified theory of social institutions that combines the best insights of philosophers and social scientists who have written on this topic. Francesco Guala presents a theory that combines the

features of three influential views of institutions: as equilibria of strategic games, as regulative rules, and as constitutive rules. Guala explains key institutions like money, private property, and marriage, and develops a much-needed unification of equilibrium- and rules-based approaches. Although he uses game theory concepts, the theory is presented in a simple, clear style that is accessible to a wide audience of scholars working in different fields. Outlining and discussing various implications of the unified theory, Guala addresses venerable issues such as reflexivity, realism, Verstehen, and fallibilism in the social sciences. He also critically analyses the theory of "looping effects" and "interactive kinds" defended by Ian Hacking, and asks whether it is possible to draw a demarcation between social and natural science using the criteria of causal and ontological dependence. Focusing on current debates about the definition of marriage, Guala shows how these abstract philosophical issues have important practical and political consequences. Moving beyond specific cases to general models and principles, *Understanding Institutions* offers new perspectives on what institutions are, how they work, and what they can do for us. "(A) lively book . . . on how biologists study living things. . . . Its range is enormous. . . . This is an old-fashioned book, to be read slowly, more than once, and to be thought about afterward".--Ann Finkbeiner, "The New York Times Book Review". Chart. An exploration of one of the most universal human obsessions charts the rise of longevity science from its alchemical beginnings to modern-day genetic interventions and enters the world of those whose

lives are shaped by a belief in immortality. A book about metals, plants, animals, and planets. A chemistry student falls for his teacher and uncovers a centuries-old quest for the elixir of life. The morning after the death of his first love, Conrad Aybinder receives a bequest. Sammy Tampari was Conrad's lover. He was his teacher. And, it turns out, he was not just a chemist, but an alchemist, searching for a mythic elixir of life. Sammy's death was sudden, yet he somehow managed to leave twenty years' worth of his notebooks and a storage locker full of expensive, sometimes baffling equipment in the hands of his star student. The notebooks contain cryptic "recipes," but no instructions; they tell his life story, but only hint at what might have caused his death. And Sammy's research is littered with his favorite teaching question: What's missing? As Conrad pieces together the solution, he finds he is not the only one to suspect that Sammy succeeded in his quest. And if he wants to save his father from a mysterious illness, Conrad will have to make some very difficult choices. A globe-trotting, century-spanning adventure story, Jake Wolff's *The History of Living Forever* takes us from Maine to Romania to Easter Island and introduces a cast of unforgettable characters—drug kingpins, Big Pharma flunkies, centenarians, boy geniuses, and even a group of immortalists masquerading as coin collectors. It takes us deep into the mysteries of life—from first love to first heartbreak, from the long pall of grief to the irreconcilable loneliness of depression to the possibility of medical miracles, from coming of age to coming out. Hilarious, haunting, heart-busting, life-affirming, it asks each of us one of life's essential

questions: How far would you go for someone you love? For every person who draws strength and direction from the Bible, there are many more who struggle with it. Some call it a long book with fine print and obscure meaning. Some call it a mystery, a chore to read, or an undecipherable puzzle. The good news is you can easily solve this problem. With over 300,000 sold, this revised and expanded edition of Living by the Book will remove the barriers that keep Scripture from transforming your life. In a simple, step-by-step fashion, the authors explain how to glean truth from Scripture. It is practical, readable, and applicable. By following its easy-to-apply principles, you'll soon find yourself drawing great nourishment from the Word—and enjoying the process! The Living by the Book Workbook is the perfect compliment to provide practical application of lessons. Problems of Living: Perspectives from Philosophy, Psychiatry, and Cognitive-Affective Science addresses philosophical questions related to problems of living, including questions about the nature of the brain-mind, reason and emotion, happiness and suffering, goodness and truth, and the meaning of life. It draws on critical, pragmatic, and embodied realism as well as moral naturalism, and brings arguments from metaphysics, epistemology, and ethics together with data from cognitive-affective science. This multidisciplinary integrated approach provides a novel framework for considering not only the nature of mental disorders, but also broader issues in mental health, such as finding pleasure and purpose in life. Draws on the strongest aspects of polar positions in philosophy and psychiatry to help resolve important perennial debates in

these fields Explores continuities between early philosophical work and current cognitive-affective sciences, including neuroscience and psychology Employs findings from modern cognitive-affective science to rethink key long-standing debates in philosophy and psychiatry Builds on work showing how mind is embodied in the brain, and embedded in society, to provide an integrated conceptual framework Assesses both the insights and the limitations of cognitive-affective science for addressing the big questions and hard problems of living

In this classic book, Maharishi unfolds his vision for "a new humanity developed in all life's values - physical, mental, material, spiritual." Not long after Maharishi began his world tours, his students urged him to commit this great teaching to paper. In 1963 Maharishi offered to the world the Science of Being and Art of Living, which systematically unfolds for our scientific age the wisdom of the Veda and Vedic Literature taught to Maharishi by Guru Dev. In this volume Maharishi presents the Science of Being as the systematic investigation into the ultimate reality of the universe. Like other sciences it begins its investigation from the gross, obvious level of life, and delves more deeply into the subtle levels of the experience of Nature. The Science of Being, however, eventually transcends these subtle regions, and reaches the transcendental field of eternal Being. At the time this volume was written, modern science had not yet glimpsed the existence of a single universal field at the basis of all natural phenomena, even though the discovery of this Unified Field of Natural Law had been Einstein's final scientific quest some decades before. By the 1990s, however, the Unified Field of

Natural Law had become the greatest focus of theoretical physics, and modern science may now be said to have glimpsed the field of transcendental pure Being. But this book is still far ahead of the objective traditions of modern scientific inquiry in one crucial sense: to modern science, the theory of the Unified Field of Natural Law is a mathematical abstraction--beautiful and profound, but irrelevant to practical life. To Maharishi and the Vedic Tradition, the experience of Being, Pure Consciousness--the Unified Field of Natural Law--is the most practical and useful experience in daily life that one can have. It is relevant to practical life because it is completely easy for any human being anywhere in the world to have access to pure Being, and utilize the unlimited potential of Being to make daily life joyful and successful. This is achieved effortlessly through the twice-daily practice of Maharishi's Transcendental Meditation technique. The Only Writings by the Founder of SCIENCE OF MIND to Help You Understand His Classic Textbook. This is Holmes' own commentary on his masterpiece, The Science of Mind. As such, it may be his most important book besides the textbook. These short pieces “FEW PEOPLE think of life as a creative experiment. Most of us are so busy with routines that we take life for granted. We expect an endless routine of work, a hectic social life each weekend and two weeks' vacation each year. I trust that the readers of this book will derive from it a new interest in life, a zest for doing what needs to be done, and a technique to live with joyous enthusiasm. “Looking at life from an inspired viewpoint you can see those things which are on the side of greatness and

cease resisting the petty and the unimportant. Life is a process of intelligence. It always acts intelligently. Problems are the result of living life unintelligently. “The universe is actually a mental system. Its primary nature is the process of ideas becoming form. Every fact in your world is also an idea in your mind. To get new things in your world you must have new ideas in your consciousness. Few people do enough abstract thinking to create new ideas in their minds. They continually think about what they already know and have known for years. This explains the monotony of their lives. “Select the idea of some new experience you want and then think it without ceasing. Mind will deliver to you everything you need in order to accomplish your demonstration. This is far from being impossible. The great, the wise, and the true have proven this to be so. You have done it and so have your friends. You may not have thought of the process as being either spiritual or psychological. You intuitively knew a new idea. Your thinking in terms of this idea caused something to happen in your experience. “This book has been written for that large section of today’s population which is spiritually liberal and psychologically aware. Those bound by traditional beliefs will cast it aside. It is my desire that thousands will be helped and healed by reading these pages.”—Raymond Charles Barker
