Nelson Mathematics 7 is designed to support success and growth for all. Research-based and classroom-tested, Nelson Mathematics 7 is the practical solution to save planning and preparation time. Key Features: 100% Curriculum Match • Nelson Mathematics 7 provides a 100% match to the new Ontario curriculum, ensuring all students are fully prepared for high school math • Assessment tools reflect newly revised achievement chart categories for easy reporting • More homework support than any other resource! • More questions and worked examples than any other resource • Worked examples modelling key concepts help students homework independently • Clear language and visuals make concepts easier to understand • Developed to support and implement TIPS (Targeted Implementation and Planning Support) • Helps students make connections between mathematical concepts • Encourages a variety of solutions that incorporate different representations, models, and tools • Incorporates a variety of teaching strategies that allow students to explore and communicate mathematically with ample opportunities to practise skills • Lessons are directly related to the scientific objectives of space flight experiments already flown on board the space shuttle. An anthology of poems, short stories, plays, and novels. Written to address the core modules of the NSW Stage 6 Biology syllabus. Offers students clear and concise coverage of all course requirements. Covering each syllabus dot point sequentially, the textbook also integrates first-hand and secondary source investigations in context. The textbook emphasises the Prescribed Focus Areas and Biology Skills and is supported by a comprehensive Student CD-ROM. Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well. An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students. Help your students learn the language they need to communicate in their personal, academic, and work lives in the 21st century, while building their collaborative and critical thinking skills. Personalise the class, focus on different strands and skills, flip the learning or teach traditionally as you see fit. Extend and differentiate instruction to meet your students' needs. Access StartUp anytime, anywhere with vocabulary, grammar, listening and conversation activities on the go with the Pearson Practice English App. Listen to or watch all the audio and video whenever and wherever you want. StartUp is a video-rich course, with all videos integrated into the units to model language, present information and help make your classes more engaging for both your students and you: humorous and interesting character-driven conversation videos throughout each unit presentation skills videos in Levels 5-8 TED-Talk style videos in Levels 5-8 This In-Class Activity Book provides practice questions for all of the lessons, with plenty of room to write the answers. Available in consumable workbook or Blackline Masters format. Written for the Stage 5 NSW Food Technology Syllabus, the second edition of Food Tech Focus has been updated with new activities, case studies and on-trend recipes. It has an increased focus on developing literacy and numeracy skills and includes even more content around nutrition and ensuring students make responsible food choices. It also looks at changes to the wider context of the education landscape and attitudes towards food and nutrition. The slick and engaging new text design has been created to ensure the content is presented in a format that is visually appealing and engaging for students. All the graphs, tables and statistics have been thoroughly checked and updated, so teachers can be confident in the relevance and accuracy of the information being taught. \*Complimentary access to NelsonNet is available to teachers who use the accompanying student book as a core resource in their classroom. Contact your education consultant for access codes and conditions. Reviews and expands students' knowledge of English grammar through listening, speaking, reading, and writing activities. Focus is a rich, varied, carefully levelled course for upper secondary students. Specially designed to motivate older teens, it helps them to track their level and achieve the exam results they need. With its unique blended learning package, Focus is the flexible course that gets results. The Nelson Math Focus Student Success Adapted Program provides lesson-by-lesson support for struggling students. ? All lessons meet the same goals as lessons in the Student Book ? Clear instructions provided for all lessons with exercises scaffolded into manageable steps ? Written at an accessible reading level for struggling readers ? Available in consumable workbook or Blackline Master format ? Answer book sold separately for use with workbook or Blackline Master Features & Benefits: • Clear, student-friendly design • Chapter Opener and Getting Started to activate prior learning • Consistent lesson format: a central task or question followed by Reflecting, Checking, and Practising • Multiple sample solutions with student think-aloud to support understanding • Lots of questions for practice, review, and consolidation • Frequently Asked Questions in every chapter help students and parents • Mid-Chapter Review, Chapter Review, and Cumulative Review • Chapter Self-Test, Chapter Test • Rich performance task at the end of every chapter • Two glossaries: instructional words and mathematical words • Available in hardcover text or eBook How do you know if students are with you at the beginning, middle, and end of a lesson? Can formative assessment offer a key to better teaching and learning during instruction? What if you could blend different formative assessment moves in your classroom, with intention and care for all students, to help make better instructional decisions on the fly and enjoy more teachable moments? Educators Brent Duckor and Carrie Holmberg invite you on the journey to becoming a formative assessor. They encourage you to focus on these seven research-based, high-leverage formative assessment moves: ■ Priming--building on background knowledge and creating a formative assessment-rich, equitable classroom culture ■ Posing--asking questions in relation to learning targets across the curriculum that elicit Habits of Mind ■ Pausing--waiting after powerful questions and rich tasks to encourage more student responses by supporting them to think aloud and use speaking and listening skills related to academic language ■ Probing--deepening discussions, asking for elaborations, and making connections using sentence frames and starters ■ Bouncing--sampling student responses systematically to broaden participation, manage flow of conversation, and gather more "soft data" for instructional use ■ Tagging--describing and recording student responses without judgment and making public how students with different styles and needs approach learning in real-time ■ Binning--interpreting student responses with a wide range of tools, categorizing misconceptions and "p-prims," and using classroom generated data to make more valid and reliable instructional decisions on next steps in the lesson and unit Each chapter explores a classroom-tested move, including foundational research, explaining how and when to best use it, and describing what it looks like in practice. Highlights include case studies, try-now tasks and tips, and advice from beginning and seasoned teachers who use these formative assessment moves in their classrooms. Looking to

jumpstart your GPA? Most college students believe that straight A's can be achieved only through cramming and painful all-nighters at the library. But Cal Newport knows that real straight-A students don't study harder—they study smarter. A breakthrough approach to acing academic assignments, from quizzes and exams to essays and papers, *How to Become a Straight-A Student* reveals for the first time the proven study secrets of real straight-A students across the country and weaves them into a simple, practical system that anyone can master. You will learn how to:

- Streamline and maximize your study time
- Conquer procrastination
- Absorb the material quickly and effectively
- Know which reading assignments are critical—and which are not
- Target the paper topics that wow professors
- Provide A+ answers on exams
- Write stellar prose without the agony

A strategic blueprint for success that promises more free time, more fun, and top-tier results, *How to Become a Straight-A Student* is the only study guide written by students for students—with the insider knowledge and real-world methods to help you master the college system and rise to the top of the class. In this 2nd edition of *Focus: Elevating the Essentials to Radically Improve Student Learning*, Mike Schmoker extends and updates the case that our schools could be on the cusp of swift, unparalleled improvements. But we are stymied by a systemwide failure to simplify and prioritize; we have yet to focus our limited time and energy on the most essential, widely acknowledged, evidence-based practices that could have more impact than all other initiatives combined. They are: simple, coherent curricula; straightforward, traditional literacy practices; and lessons built around just a few hugely effective elements of good teaching. As Schmoker demonstrates, the case for these practices—and the need for them—has grown prodigiously. In every chapter, you'll find late-breaking discoveries and practical advice on how to simplify the implementation of new state standards in the subject areas; on the hidden pitfalls of our most popular, but unproven instructional fads and programs; and on simple, versatile strategies for building curriculum, planning lessons, and integrating literacy into every discipline. All of these strategies and findings are supported with exciting new evidence from actual schools. Their success confirms, as Michael Fullan writes, that a focus on the best "high-leverage practices" won't only improve student performance; they will produce "stunningly powerful consequences" in our schools.
