This book is for kids or adults who are absolute beginners in music. We tried to write it as simply as possible. We use an “easy-to-play” visual aid so any beginner can play music quickly. No previous knowledge is necessary. Every song has a large and simple letter-coded visual, along with traditional sheet music. The instruction is designed so that children begin with simple circles and gradually advance to reading notes using sheet music. We try to make this transition as easy as a game, where children advance to higher levels themselves. There are 22 songs and 2 options to help children begin to play right away. PLAYING BY

LETTER CIRCLE PLAY WITH THE MUSICAL STAFF The player can first follow the circles and then repeat with the classic note symbols and staff. The helpful letters are always above the notes. There are 3 parts in this book. They are equal to 3 levels. Level 1. Songs that are played in one octave. All songs here appear twice: once written with circles and the next time with classic music notes. This will help kids remember the staff notes. Level 2 In this part, you will find one version with both circles and notes and a more advanced version of the song with notes and musical notation. For example: Hot Cross Buns - Version 1 - CIRCLES Hot Cross

Buns - Version 1 - NOTES Hot Cross Buns - Version 2 - NOTES (Here, the player will play songs in a different key and learn how to transpose.) Generally, the version of the song written with sheet music is a little bit more complex than a letter-coded version. Such versions already have music notations such as rests or beams, etc. You can find an illustrated explanation of the notation at the beginning of this book. Level 3 Here, the first two songs are versions of the same melody (different combinations of notes) written with circles and notes. This is important so that the beginner can see how the same melody can be played in different keys.

This book has the objective to open a window on how to understand the concepts of jazz arrangement, its vocabulary, colours, and function in today's modern guitar playing. In my mind, it was idealized initially for those who play the guitar by sight reading, with a deep guitar knowledge. Although after some consideration, I decided to open the opportunity to everyone who loves this magnificent and difficult instrument we tenderly call the

guitar. With this in mind, I have included a set of tablature as well as the chord charts on top of the music stave for those with a reasonable musical knowledge to more fully enjoy this book. Finally, I welcome guitarists from all styles and backgrounds, from classical to jazz, from blues to rock, from metal to flamenco so that everyone can join together in this amazing adventure of sounds. (Guitar Method). Hal Leonard Pop Melody Supplements are the unique books that supplement any guitar method books 1, 2 or 3.
