"Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.

Controlling Capital examines three pressing issues in financial market regulation: the contested status of public regulation, the emergence of 'culture' as a proposed modality of market governance, and the renewed ascendancy of private regulation. In the years immediately following the outbreak of crisis in financial markets, public regulation seemed almost to be attaining a position of command - the robustness and durability of which is explored here in respect of market conduct, European Union capital markets union, and US and EU competition policies. Subsequently there has been a softening of command and a return to public-private co-regulation, positioned within a narrative on culture. The potential and limits of culture as a regulatory resource are unpacked here in respect of occupational and organisational aspects, stakeholder connivance and wider political embeddedness. Lastly the book looks from both appreciative and critical perspectives at private regulation, through financial market associations, arbitration of disputes and, most controversially, market 'policing' by hedge funds. Bringing together a distinguished group of international experts, this book will be a key text for all those concerned with issues arising at the intersection of financial markets, law, culture and governance. International anti-terrorism measures existed long before 11 September 2001 but have increased markedly since. A myriad of norms in different branches of law are now deployed to confront transnational and domestic terrorism. There is also a proliferating body of 'soft law' addressing terrorism, stemming from United Nations organs, specialised international bodies and regional organisations. It is timely to draw together these diverse legal developments over time into a single reference work. Bringing the

original documents together provides for ease of reference and enables scholars, practitioners and students to more easily compare and contrast various sources. The book's coverage is comprehensive (thematically, organisationally, geographically and temporally) and open to a balance of sources (hard and soft), but is judicious in its selection and prioritisation of the most significant and representative documents - in a field where there are many repetitive or insubstantial documents. Importantly, the book looks beyond the traditional trans-Atlantic bias towards European, British and American sources in this area to include materials from Asia, Africa, Latin America and the Middle East. Taken as a whole, the book aids in evidencing the emerging field of international anti-terrorism law.

Spin Control, originally published in 1992, chronicles the development of the powerful White House Office of Communications and its pivotal role in molding our perception of the modern presidency. In this new edition, John Maltese brings his analysis up to date with a chapter detailing the media techniques of the Bush administration, the 1992 presidential campaign (including the use of talk shows like 'Larry King Live'), and the early Clinton administration. The end of World War II marked the beginning of a

new golden era in international law. Treaties and international organisations proliferated at an unprecedented rate, and many courts and tribunals were established with a view to ensuring the smooth operation of this new universe of international relations. The network of courts and tribunals that exists today is an important feature of our global society. It serves as an alternative to other, sometimes more violent, forms of dispute settlement. The process of international adjudication is constantly evolving, sometimes in unexpected ways. Through contributions from world-renowned experts and emerging voices, this book considers the future of international courts from a diverse range of perspectives. It examines some of the regional, institutional and procedural challenges that international courts face: the rising influence of powerful states, the turn to populism, the interplay between courts, the involvement of non-state actors and third parties in international proceedings, and more. The book offers a timely discussion of these challenges, with the future of several international courts hanging in the balance and the legitimacy of international adjudication being called constantly into question. It should also serve as a reminder of the importance of international courts for the functioning of a rules-based international order. 'The Future of International Courts' is essential reading for academics, practitioners and students who are interested in international law, including those who are interested in the role international courts play in international relations. Since the publication of the first edition of this book in 2005, the world of financial investment has experienced an unprecedented boom followed by a spectacular bust. Significant changes have been proposed and in some cases implemented in areas such as the structure of regulation, the organisation of markets, supervision of market participants and the protection of consumers. The second edition takes account of these developments, integrating them into an analytical framework that enables the reader to develop a critical overview of the role of general legal rules and specialised systems of regulation in financial investment. The framework focuses on the

role of contract, trusts and regulation as the primary legal influences for financial investment. The first part explores the relationship between investment, law and regulation. The second part examines the nature of investments and investors, both professional and private. The third part discusses the central role of corporate finance and corporate governance in linking investors with enterprises that require external capital. The fourth part examines the nature, operation and regulation of markets and the participants that support the functioning of the markets. The objective remains to provide a broadly-based and critical account of the role of law in financial investment. "MacNeil's eloquent and informative distillation of the regulatory fundamentals of investment law gives his book much international relevance...a timely contribution to help readers decipher the seemingly inextricable maze of financial regulation...Practitioners and legal policy advisers will..welcome it. They should find enlightening the book's careful scrutiny of the trust and contractual foundations of investment law and practice." Benjamin J Richardson *Journal of International Banking Law and Regulation*, Vol 22 Issue 1, 2007 ...a fascinating and informative book...thoroughly recommended as a learned but at the same time very readable introduction to the law of financial investment Gerard McCormack *Banking and Finance Law Review*, Volume 21 No 2, June 2006 ...very informative tool that introduces in a very friendly and accessible manner the nearly inextricable world of financial investment laws. Fadi Moghaizel *International Company and Commercial Law Review*, Vol. 17 No 2, February 2006 This is a biographical study which surveys the life and career of Boston Baptist Adoniram Judson Gordon (1836-1895) and examines pre-millennialism as his motivation and source of his theological understanding. The study examines a moderate Calvinistic Baptist, tracing his theological development and analyzing his embrace of pre-millennialism and its substantial impact on his pastorate, denominational work, relationships, and enterprises. Gordon's significant role in the shaping of late nineteenth-century North

American Evangelical Protestant Christianity is demonstrated in this biography. Italian Americans made a significant contribution to Franklin D. Roosevelt's election to the White House in 1932 and to the victory of the Democratic Party in the four subsequent presidential contests. This volume offers a case study of their electoral behavior. Through a quantitative analysis of the Italian-American vote between 1916 and 1948, this study demonstrates that, contrary to conventional wisdom, the creation of a Democratic majority in the Little Italy of Providence foreran both Alfred Smith's 1928 candidacy for the presidency and the Depression of the 1930s. War II and underwent a revitalization in the postwar years. Political recognition and patronage were so central to Italian Americans' party choice that their support for the Democratic Party reached a climax when a member of the community, John Pastore, ran for governor on the Democratic ticket in the mid 1940s. Comprehensive second editions of History for the IB Diploma Paper 1, revised for first teaching in 2015. This volume of The Frederick

Douglass Papers represents the first of a four-volume series of the selected correspondence of the great American abolitionist and reformer. Douglass's correspondence was richly varied, from relatively obscure slaveholders and fugitive slaves to poets and politicians, including Horace Greeley, William H. Seward, Susan B. Anthony, and Henry Wadsworth Longfellow. The letters acquaint us with Douglass's many roles—politician, abolitionist, diplomat, runaway slave, women's rights advocate, and family man—and include many previously unpublished letters between Douglass and members of his family. Douglass stood at the epicenter of the political, social, intellectual, and cultural issues of antebellum America. This collection of Douglass's early correspondence illuminates not only his growth as an activist and writer, but the larger world of the times and the abolition movement as well. The story of the blending of diverse cultures in a land rich in resources and beauty is an extraordinary one. In this account, the pioneer hunters, trappers, and traders who roamed the Ozark hills and the boatmen who traded on the Missouri and Mississippi Rivers take their place beside the small coterie of St. Louisans whose wealth and influence enabled them to dominate the region politically and economically. Especially appealing for many readers will be the attention Foley gives to common Missourians, to the status of women and blacks, and to Indian-white relations.

Privacy, Due process and the Computational Turn: The Philosophy of Law Meets the Philosophy of Technology engages with the rapidly developing computational aspects of our world including data mining, behavioural advertising, iGovernment, profiling for intelligence, customer relationship management, smart search engines, personalized news feeds, and so on in order to consider their implications for the assumptions on which our legal framework has been built. The contributions to this volume focus on the issue of privacy, which is often equated with data privacy and data security, location privacy, anonymity, pseudonymity, unobservability, and unlinkability. Here, however, the extent to which predictive and

other types of data analytics operate in ways that may or may not violate privacy is rigorously taken up, both technologically and legally, in order to open up new possibilities for considering, and contesting, how we are increasingly being correlated and categorized in relationship with due process – the right to contest how the profiling systems are categorizing and deciding about us. The first two decades of the twenty-first century witnessed a series of large-scale sovereign defaults and debt restructurings, in which sovereigns struggled to negotiate with recalcitrant bondholders, particularly hedge funds. Also, the outbreak of the COVID-19 pandemic in 2020 heralded a bleak financial outlook for many developing and emerging market countries, requiring sovereign debt restructuring in times of great macroeconomic uncertainty. Given the absence of a multilateral mechanism for sovereign debt restructuring equivalent to domestic corporate bankruptcy system, however, defaulted sovereigns often suffer from holdout litigation wrought by bondholders. This book proposes ways in which such legal actions could be regulated without the undue expense of bondholders' remedies by exploring the mechanism of balancing bondholder protection and respect for sovereign debt restructuring at various stages of litigation and arbitration proceedings.

Comprehensive second editions of History for the IB Diploma Paper 1, revised for first teaching in 2015.
