are ONLY TWO WAYS to maintain Top Rankings on Google; 1. Outspend your competition.2.Read This Book!?! Nothing else works and why should it? Why does my website need SEO? The majority of web traffic is driven by the major commercial search engines, Google, Bing, and Yahoo!. Although social media and other types of traffic can generate visits to your website, search engines are the primary method of navigation for most Internet users. This is true whether your site provides content, services, products, information, or just about anything else. Search engines are unique in that they provide targeted traffic-people looking for what you offer. Search engines are the roadways that make this happen. If search engines cannot find your site, or add your content to their databases, you miss out on incredible opportunities to drive traffic to your site. Search queries-the words that users type into the search box-carry extraordinary value. Experience has shown that search engine traffic can make (or break) an organization's success. Targeted traffic to a website can provide publicity, revenue, and exposure like no other channel of marketing. Investing in SEO can have an exceptional rate of return compared to other types of marketing and promotion. Why can't the search engines figure out my site without SEO? Search engines are smart, but they still need help. The major engines are always working to improve their technology to crawl the web more deeply and return better results to users. However, there is a limit to how search engines can operate. Whereas the right SEO can net you thousands of visitors and increased attention, the wrong moves can hide or bury your site deep in the search results where visibility is minimal. In addition to making content available to search engines, SEO also helps boost rankings so that content will be placed where searchers will more readily find it. The Internet is becoming increasingly competitive, and those companies who perform SEO will have a decided advantage in visitors and customers. SEARCH ENGINE OPTIMIZATION refers to the position at which a particular site appears in the results of a search engine query. A site is said to have a high ranking ... I'm going to go against all of the recent marketing trends with this Book. If you are searching Google for things like:1. I need top search engine rankings.2. How can I get my website ranked at the top of Google?3. I want my website to get top ranking. How do I do that?AND you want to achieve that ranking in a "cheap" or "affordable" way... IT ISN'T GOING TO HAPPEN. Want to know the truth that most SEO scammers and spammers COUNT ON to be able to deceive you and take your money? At the same time, do you want to know the truth that most people with top ranked websites DON'T WANT YOU TO KNOW? SEO - Search Engine Optimization is the term given to obtaining traffic for your website from "organic" free listings in search engine result pages (SERPS). Google, Yahoo and Bing all show these pages when a user enters a search term or phrase into a search box located on one of these search engines. The key to search optimization, and tapping into this free traffic, is to get your website listed as high as possible in these search pages for keyword(s) related to your company or business. Internet Marketing Cheat Sheets is a series of Internet & Website Marketing books written by Adrian Andrews, aimed at the novice webmaster or entrepreneur seeking to earn an income from the internet. Readers will get a deeper level of knowledge on how to make their website rank better and attract more visitors. Recent OCLC surveys show that less than 2 percent of library users begin their search on a library website, which is why search engine optimization (SEO) is so crucial. And though a survey of faculty researchers at four major universities showed that most consider Google and Google Scholar amazingly effective for their research,

low Google Scholar indexing ratios for library institutional repositories is widespread because it ignores common library metadata. Arlitsch and OBrien, who have presented and published widely on the topic, show how to ensure that high-value content is visible to researchers. Maybe you're a great programmer or IT professional, but marketing isn't your thing. Or perhaps you're a tech-savvy search engine marketer who wants a peek under the hood of a search engine optimized web site. Search engine marketing is a field where technology and marketing are both critical and interdependent, because small changes in the implementation of a web site can make you or break you in search engine rankings. Furthermore, the fusion of technology and marketing know-how can create web site features that attract more visitors. The mission of this book is to help web developers create web sites that rank well with the major search engines, and to teach search engine marketers how to use technology to their advantage. We assert that neither marketing nor IT can exist in a vacuum, and it is essential that they not see themselves as opposing forces in an organization. They must work together. This book aims to educate both sides in that regard.
