A beloved classic—written by a beloved Caldecott winner—is lovelier than ever! Barbara Cooney's story of Alice Rumphius, who longed to travel the world, live in a house by the sea, and do something to make the world more beautiful, has a timeless quality that resonates with each new generation. The countless lupines that bloom along the coast of Maine are the legacy of the real Miss Rumphius, the Lupine Lady, who scattered lupine seeds everywhere she went. Miss Rumphius received the American Book Award in the year of publication. To celebrate the thirtieth anniversary of two-time Caldecott winner Barbara Cooney's best-loved book, the illustrations have been reoriginated, going back to the original art to ensure state-of-the-art reproduction of Cooney's exquisite artwork. The art for Miss Rumphius has a permanent home in the Bowdoin College Museum of Art. Now reissued – William March's 1954 classic thriller that's as chilling, intelligent and timely as ever before. This paperback reissue includes a new P.S. section with author interviews, insights, features, suggested reading and more. What happens to ordinary families into whose midst a child serial killer is born? This is the question at the center of William march's classic thriller. After its initial publication in 1954, the book went on to become a million-copy

bestseller, a wildly successful Broadway show, and a Warner Brothers film. The spine-tingling tale of little Rhoda Penmark had a tremendous impact on the thriller genre and generated a whole perdurable crop of creepy kids. Today, *The Bad Seed* remains a masterpiece of suspense that's as chilling, intelligent, and timely as ever before. Now a major Lifetime movie event—Book Three of the Dollanganger series that began with *Flowers in the Attic*—the novel of forbidden love that captured the world's imagination and earned V.C. Andrews a fiercely devoted fanbase. They hide the shocking truth to protect their children. But someone who knows their dark secret is watching. Christopher and Cathy have made a loving home for their handsome and talented teenager Jory, their imaginative nine-year-old Bart, and a sweet baby daughter. Then an elderly woman and her strange butler move in next door. The Old Woman in Black watches from her window, lures lonely Bart inside with cookies and ice cream, and asks him to call her “grandmother.” Slowly Bart transforms, each visit pushing him closer to the edge of madness and violence, while his anguished parents can only watch. For Cathy and Chris, the horrors of the past have come home...and everything they love may soon be torn from them. The extraordinary, prescient NEW YORK TIMES-bestselling novel. 'If there is one thing scarier than a dystopian novel about the future, it's one written in the past that has already begun to come true. This is what makes *Parable of the Sower* even more impressive than it was when first published' GLORIA STEINEM 'Unnervingly prescient and wise' YAA GYASI -- We are coming apart. We're a rope, breaking, a single strand at a time. America is a place of chaos, where violence rules and only the rich and powerful are safe. Lauren Olamina, a young woman with the extraordinary power to feel the pain of others as her own, records everything she sees of this broken world in her journal. Then, one terrible night, everything alters beyond recognition, and Lauren must make her voice heard for the sake of those she loves. Soon, her vision becomes reality and her dreams of a better way to live gain the power to change humanity forever. PRAISE FOR OCTAVIA E. BUTLER, THE NEW YORK TIMES BESTSELLING AUTHOR 'In the ongoing contest over which dystopian classic is most applicable to our time... for sheer peculiar prescience, Butler's novel may be unmatched' NEW YORKER 'Butler's prose, always pared back to the bone, delineates the painful paradoxes of metamorphosis with compelling precision' GUARDIAN 'Octavia Butler was a visionary' VIOLA DAVIS 'One of the most significant literary artists of the twentieth century. One cannot exaggerate the impact she has had' JUNOT DIAZ 'An icon of the Afrofuturism world, envisioning literary realms that placed black characters front and center' VANITY FAIR 'Butler writes with such a familiarity that the alien is welcome and intriguing. She really artfully exposes our human impulse to self-destruct' LUPITA NYONG'O When most people think of wikis, the first---and usually the only---thing that comes to mind is Wikipedia. The editors of *Wiki Writing: Collaborative Learning in the College Classroom*, Robert E. Cummings and Matt Barton, have assembled a collection of essays that challenges this common misconception, providing an engaging and helpful array of perspectives on the many pressing theoretical and practical issues that wikis raise. Written in an engaging and accessible manner that will appeal to specialists and novices alike, *Wiki Writing* draws on a wealth of practical classroom experiences with wikis to offer a series of richly detailed and concrete suggestions to help educators realize the potential of these new writing environments. Robert E. Cummings began work at Columbus State University in August 2006 as Assistant Professor of English and Director of First-Year Composition. Currently he also serves as the Writing Specialist for CSU's Quality Enhancement Plan, assisting teachers across campus in their efforts to maximize student writing in their curriculum. He recently concluded a three-year research study with the Inter/National Coalition for Electronic Portfolio Research and continues to research in the fields of computers and writing, writing across the curriculum, writing in the disciplines, and curricular reform in higher education. Matt Barton is Assistant Professor, St. Cloud State University, Department of English-Rhetoric and Applied Writing Program. His research interests are rhetoric, new media, and computers and writing. He is the author of *Dungeons and Desktops: A History of Computer Role-Playing Games* and has published in the journals *Text and Technology*, *Computers and Composition*, *Game Studies*, and *Kairos*. He is currently serving as Associate Editor of *Kairosnews* and Managing Editor of *Armchair Arcade*. "Wiki Writing will quickly become the standard resource for using wikis in the classroom." ---Jim Kalmbach, Illinois State University [digitalculturebooks.com](http://www.digitalculturebooks.com) is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. First of a Series of Six Stories; When a seed-merchant of cautious disposition and an eye to the main chance receives from an eminent firm of jam-manufacturers an extremely large order for clover-seed; his emotions are mixed. Joy may be said to predominate; but with the joy comes also uncertainty. Are these people; he asks himself; proposing to set up as farmers of a large scale; or do they merely want the seed to give verisimilitude to their otherwise bald and unconvincing raspberry jam? On the solution of this problem depends the important matter of price; for; obviously; you can charge a fraudulent jam disseminator in a manner which an honest farmer would resent. When a little boy plants a carrot seed, everyone tells him it won't grow. But when you are very young, there are some things that you just know, and the little boy knows that one day a carrot will come up. So he waters his seed, and pulls the weeds, and he waits ... First published in 1945 and never out of print, this timeless combination of Ruth Krauss's simple text and Crockett Johnson's eloquent illustrations creates a triumphant and deeply satisfying story for readers of all ages. After *The Knights of the Limits*, here is a second collection of endlessly inventive stories by Barrington J. Bayley; dark fables resounding with sombre undertones - love used as a weapon, God assassinated by the ingenuity of man, the secret of death revealed, the inexplicable explained! Tales which

will be pondered on, and remembered. Contains the following: Sporting with the Chid The God-Gun The Ship that Sailed the Ocean of Space The Radius Riders Man in Transit Wizard Wazo's Revenge The Infinite Searchlight Integrity Perfect Love The Countenance Life Trap Farewell Dear Brother The Seed of Evil Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page. Matt is six years old when he discovers that he is different from other children and other people. To most, Matt isn't considered a boy at all, but a beast, dirty and disgusting. But to El Patron, lord of a country called Opium, Matt is the guarantee of eternal life. El Patron loves Matt as he loves himself - for Matt is himself. They share the exact same DNA. As Matt struggles to understand his existence and what that existence truly means, he is threatened by a host of sinister and manipulating characters, from El Patron's power-hungry family to the brain-deadened eejits and mindless slaves that toil Opium's poppy fields. Surrounded by a dangerous army of bodyguards, escape is the only chance Matt has to survive. But even escape is no guarantee of freedom... because Matt is marked by his difference in ways that he doesn't even suspect. John Taine (Eric Temple Bell, 1883-1960) was an accomplished mathematician and, as John Taine, a science fiction author. *Seeds of Life* is the 1931 tale of the creation of a superman through radiation. 1930's *White Lily* (later rewritten as *The Crystal Horde*) is an adventure involving crystalline lifeforms. What's better than a lost treasure? Seven lost treasures! These rarely seen Dr. Seuss stories were published in magazines in the early 1950s and are finally available in book form. They include "The Bippolo Seed" (in which a scheming feline leads a duck toward a bad decision), "The Rabbit, the Bear, and the Zinniga-Zanniga" (about a rabbit who is saved from a bear by a single eyelash), "Gustav, the Goldfish" (an early rhymed version of the *Beginner Book A Fish Out of Water*), "Tadd and Todd" (about a twin who is striving to be an individual), "Steak for Supper" (in which fantastic creatures follow a boy home in anticipation of a steak dinner), "The Strange Shirt Spot" (the inspiration for the bathtub-ring scene in *The Cat in the Hat Comes Back*), and "The Great Henry McBride" (about a boy whose far-flung career fantasies are bested only by those of Dr. Seuss himself). An introduction by Seuss scholar Charles D. Cohen traces the history of the stories, which demonstrate an intentional move toward the writing style we now associate with Dr. Seuss. Cohen also explores the themes that recur in well-known Seuss stories (like the importance of the imagination or the perils of greed). With a color palette enhanced beyond the limitations of the original magazines, this is a collection that no Seuss fan (whether scholar or second grader) will want to miss. "Described by José Garcia Villa as America's 'greatest short story writer,' by Alistair Cooke as the 'the unrecognized genius of our time,' and by his biographer as 'one of the most remarkable, talented, and shamefully neglected writers that America has produced,' William March (1893-1954) is remembered, if at all, for *The Bad Seed*, which March ironically regarded as his worst work. The emphasis in *The Two Worlds of William March* is on the literary career, and we get a fairly full picture of a hardworking, oversensitive, compassionate bachelor, who suffered a tragic breakdown late in life . . . [and] whose best long works, *Company K* and *The Looking-Glass*, as well as March himself are almost forgotten. . . . Simmonds's comprehensive, scholarly, and sympathetic study may redress this unwarranted neglect." —CHOICE Opbygget efter princippet om Open Source. "Pollan shines a light on our own nature as well as on our implication in the natural world." —The New York Times "A wry, informed pastoral." —The New Yorker The book that helped make Michael Pollan, the New York Times bestselling author of *How to Change Your Mind*, *Cooked* and *The Omnivore's Dilemma*, one of the most trusted food experts in America Every schoolchild learns about the mutually beneficial dance of honeybees and flowers: The bee collects nectar and pollen to make honey and, in the process, spreads the flowers' genes far and wide. In *The Botany of Desire*, Michael Pollan ingeniously demonstrates how people and domesticated plants have formed a similarly reciprocal relationship. He masterfully links four fundamental human desires—sweetness, beauty, intoxication, and control—with the plants that satisfy them: the apple, the tulip, marijuana, and the potato. In telling the stories of four familiar species, Pollan illustrates how the plants have evolved to satisfy humankind's most basic yearnings. And just as we've benefited from these plants, we have also done well by them. So who is really domesticating whom? What

follows is the story of two British officers whose spirit the Japanese try to break. Yet out of all the violence and misery strange bonds are forged between prisoners - and their gaolers. In a battle for survival that becomes a battle of contrasting wills and philosophies as the intensity of the men's relationships develop. This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations. In a future where most people have computer implants in their heads to control their environment, a boy meets an unusual girl who is in serious trouble. Long before *A Game of Thrones* became an international phenomenon, #1 New York Times bestselling author George R. R. Martin had taken his loyal readers across the cosmos. Now back in print after almost ten years, *Tuf Voyaging* is the story of quirky and endearing Haviland Tuf, an unlikely hero just trying to do right by the galaxy, one planet at a time. Haviland Tuf is an honest space-trader who likes cats. So how is it that, in competition with the worst villains the universe has to offer, he's become the proud owner of a seedship, the last remnant of Earth's legendary Ecological Engineering Corps? Never mind; just be thankful that the most powerful weapon in human space is in good hands—hands which now have the godlike ability to control the genetic material of thousands of outlandish creatures. Armed with this unique equipment, Tuf is set to tackle the problems that human settlers have created in colonizing far-flung worlds: hosts of hostile monsters, a population hooked on procreation, a dictator who unleashes plagues to get his own way . . . and in every case, the only thing that stands between the colonists and disaster is Tuf's ingenuity—and his reputation as a man of integrity in a universe of rogues. "A rich blend of adventure, humor, compassion and all the other things that make being human worthwhile."—Analog "A new facet of Martin's manysided talent."—Asimov's Now a major Lifetime movie event—Book Four of the Dollanganger series that began with *Flowers in the Attic*—the novel of forbidden love that captured the world's imagination and earned V.C. Andrews a fiercely devoted fanbase. They escaped their mother's hellish trap years ago, but a cruel history of lies and deceit has come full circle. . . . The forbidden love that blossomed when Cathy and Christopher were held captive in Foxworth Hall is one the Dollanganger family's darkest secrets. Now, with three grown children and even a new last name, the pair seem to have outlived a twisted legacy. But on their son Bart's twenty-fifth birthday, when the spiteful and disturbed young man claims his rightful inheritance, the full, shattering truth of their tainted past will be revealed at Foxworth Hall—the place where the nightmare began, and where Christopher and Cathy were once just innocent flowers in the attic. . . . An account of the historical influences of six commercial plants, including sugar, tea, cotton, potatoes, quinine, and coca, evaluates their role in the Atlantic slave trade, opening up of China, and establishment of multiple colonial empires. Reprint. This book constitutes the refereed proceedings of the 10th International Conference on Asian Digital Libraries, ICADL 2007, held in Hanoi, Vietnam, in December 2007. The 41 revised full papers, 15 revised short papers, and extended abstracts of 10 poster papers presented together with three keynote and three invited papers were carefully reviewed and selected from a total of 154 submissions. The papers are organized in topical sections. A computer with human-like qualities of artificial intelligence develops criminal obsessions and takes over the completely automated home of Susan Harris From the author of *The Ice Palace*, winner of BooksLut's Daphne Award for fiction, comes a new addition to the Peter Owen Modern Classics series *The Themes of 1940's The Seed* are violence and guilt. A maniac visiting an island murders a girl. He is pursued by the islanders and killed by the victim's brother. Too late, the avengers become aware of their own guilt, with its attendant mutual mistrust, and they attempt to expiate their crime. Vesaas's graphic evocation of nature and his parallel between the violence of savage animals and humanity make this a book of unusual literary distinction. *The Book of Lies* was written by English occultist and teacher Aleister Crowley under the pen name of Frater Perdurabo. As Crowley describes it: "This book deals with many matters on all planes of the very highest importance. It is an official publication for Babes of the Abyss, but is recommended even to beginners as highly suggestive." The book consists of 91 chapters, each of which consists of one page of text. The chapters include a question mark, poems, rituals, instructions, and obscure allusions and cryptograms. The subject of each chapter is generally determined by its number and its corresponding Qabalistic meaning. "[...] Mr. Fineberg saw light. He was a married man himself. "My boy," he said genially, "I quite understand. But I can do you better than that. It's no use doing this sort of thing in a small way. From now on your salary is a hundred and ten. No, no, don't thank me. You're an excellent clerk, and it's a pleasure to me to reward merit when I find it. Close the door after you." And Mr. Fineberg returned with a lighter heart to the great clover-seed problem. The circumstances which had led Roland to approach his employer may be briefly recounted. Since joining the staff of Mr. Fineberg, he had lodged at the house of a Mr. Coppin, in honorable employment as porter at the local railway-station. The Coppin family, excluding domestic pets, consisted of Mr. Coppin, a kindly and garrulous gentleman of sixty, Mrs. Coppin, a somewhat negative personality, most of whose life [...]" *"Seeds of Life"* is a gripping story of a man raised from being a silly average man to superman overnight. Initially, he plans to help humanity, but when he realizes that transformation is temporary, he wonders if he should save or destroy humanity. "In science fiction there is only a handful of books that stretch the mind—and this is one of them."—Arthur C. Clarke In a moving story of sacrifice and triumph, human scientists establish a relationship with intelligent lifeforms—the cheela—living on Dragon's Egg, a neutron star where one Earth hour is equivalent to hundreds of their years. The cheela culturally evolve from savagery to the discovery of science, and for a brief time, men are their diligent teachers. Praise for

Dragon's Egg "Bob Forward writes in the tradition of Hal Clement's Mission of Gravity and carries it a giant step (how else?) forward."—Isaac Asimov "Dragon's Egg is superb. I couldn't have written it; it required too much real physics."—Larry Niven "This is one for the real science-fiction fan."—Frank Herbert "Robert L. Forward tells a good story and asks a profound question. If we run into a race of creatures who live a hundred years while we live an hour, what can they say to us or we to them?"—Freeman J. Dyson "Forward has impeccable scientific credentials, and . . . big, original, speculative ideas."—The Washington Post DigiCat Publishing presents to you this special edition of "Seeds of Life" by Eric Temple Bell. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature. In Eve's Seed, McElvaine bridges the gap between evolutionary biology and history to create a new approach he terms biohistory."--BOOK JACKET. "A superb tale that every lover of science fiction will want to have around. Completely off-trail science fiction—and highly recommended therefore." -Galaxy Science Fiction This amazingly prophetic 1931 novel, which some say inspired Flowers for Algernon (on which the film Charlie was based), is easily the best novel Hugo Gernsback ever published in Amazing Stories. It features characters so mature their like would not be seen again until the post-war sf of the 1950s, and a theme that, in its rise and fall, prefigures that of "Flowers for Algernon" and carries it to a level of operatic tragedy not to be equaled until Bester's The Demolished Man. Seeds of Life, in short, is the story of Neils Bork, an alcoholic and failure raised to supernal heights of scientific genius and altruism by a scientific accident. And it is the story of what became of his golden dream of free, limitless energy for all, and of the marriage he thought would be crowned with glorious offspring. "In the unbelievably short period of six years, from 1924 to 1930, John Taine (Professor Eric Temple Bell of California Institute of Technology) drove himself to a unique position in the science fiction world through the outrageously daring flights of the imagination which are the Taine trademark. Seeds of Life is top-notch Taine. The theme is biological—the sources of life, and of the forces which mold life. An accident remakes the blundering technician, Neils Bork, into the mutant superman, Miguel De Soto, and at the same time sets in motion other processes which attract the attention of Bork's employer, Andrew Crane, and the very competent Dr. Brown. The author keeps several mysteries at the boiling point—what has happened to Bork, to the black widow spider, to Bertha the hen; what is "De Soto's" plot against the mankind he considers degraded and degrading; what, above all, is the theory of evolution and devolution around which the whole book is built?" - Analog Science Fiction Amazing Stories Classics is proud to bring this landmark work from the pages of the Amazing Stories Quarterly Oct 1931—with all of its original Frank R. Paul magazine illustrations—back before the reading public. Set in the near future, The Wanting Seed is a Malthusian comedy about the strange world overpopulation will produce. Tristram Foxe and his wife, Beatrice-Joanna, live in their skyscraper world where official family limitation glorifies homosexuality. Eventually, their world is transformed into a chaos of cannibalistic dining-clubs, fantastic fertility rituals, and wars without anger. It is a novel both extravagantly funny and grimly serious. WIKI: Grow Your Own for Fun and Profit introduces the concept of wikis, and shows why they are becoming the must-have communications and collaboration technology for businesses of any size. Using a garden as a metaphor, Alan J. Porter shows you step-by-step how to select wiki software, get started, overcome resistance to wikis, maintain your wiki, and use your wiki for internal collaboration, project planning, communication with your customers, and more. Includes five case studies that highlight the ways companies are using wikis to solve business and communication problems, increase efficiency, and improve customer satisfaction. Inside the Book A Brief History of Collaboration Defining the Wiki Planting the Seed First Growth Maintaining the Garden Landscaping Harvesting the Information A Wiki Checklist Notes on Popular Wiki Software Resources and Index With its fiery crosses and nightriders in pointed hoods and flowing robes, the Ku Klux Klan remains a recurring nightmare in American life. What began in the earliest post-Civil War days as a social group engaging in drunken hijinks at the expense of perceived inferiors soon turned into a murderous paramilitary organization determined to resist the "evils" of radical Reconstruction. For six generations and counting, the Klan has inflicted misery and death on countless victims nationwide and since the early 1920s, has expanded into distant corners of the globe. From the Klan's post-Civil War lynchings in support of Jim Crow laws, to its bloody stand against desegregation during the 1960s, to its continued violence in the militia movement at the turn of the 21st century, this revealing volume chronicles the complete history of the world's oldest surviving terrorist organization from 1866 to the present. The story is told without embellishment because, as this work demonstrates, the truth about the Ku Klux Klan is grim enough. ALA Best Book for Young Adults ? School Library Journal Best Book ? This skillfully researched book focuses on how a small socio-political American elite seeks to establish control over the very basis of human survival: the provision of our daily bread. "Control the

food and you control the people." This is no ordinary book about the perils of GMO. Engdahl takes the reader inside the corridors of power, into the backrooms of the science labs, behind closed doors in the corporate boardrooms. The author cogently reveals a diabolical World of profit-driven political intrigue, government corruption and coercion, where genetic manipulation and the patenting of life forms are used to gain worldwide control over food production. Engdahl's carefully argued critique goes far beyond the familiar controversies surrounding the practice of genetic modification as a scientific technique. The book is an eye-opener, a must-read for all those committed to the causes of social justice and World peace.
