Serve ancora la geografia? Quale senso pu ò avere, oggi, la pretesa di fissare un territorio in una rappresentazione, di « cartografarlo » ? E a cosa serve la geografia? A descrivere i luoghi su cui gli uomini « appoggiano » il loro agire, o a raccontarne le interazioni, e indagarne la storia? A fissare e legittimare lo status di quei luoghi, o a contribuire al loro cambiamento? In questo aureo libretto, che raccoglie in alcuni brevi e folgoranti saggi il percorso esemplare di quello che a buon diritto pu ò essere considerato il pi ù autorevole rappresentante italiano della geografia attiva, emerge una concezione della Terra in cui biosfera e sfera socio-culturale interagiscono all ' interno di un medesimo sistema complesso, operando ciascuna secondo le proprie modalit à . Ci ò significa che, a tutti i livelli territoriali, possiamo fare scelte sbagliate, che alterano le condizioni biologiche e sociali del pianeta e che presto o tardi finiranno per ritorcersi sulle condizioni di vita dei sistemi locali. Per questo i geografi non possono limitarsi a descrivere i territori, ma devono assumersi la responsabilit à di individuare e descrivere le condizioni favorevoli per instaurare rapporti virtuosi con la biosfera e, attraverso questi, rapporti sociali che riducano le diseguaglianze e gli sprechi di risorse naturali e umane a cui oggi assistiamo. Per farlo la geografia deve riaccendere quella « poetica della scoperta » che ha accompagnato le grandi esplorazioni: « la vera scoperta di Colombo – scrive Giuseppe Dematteis – non è stata l ' America, ma l ' idea che si potesse arrivare in India navigando verso occidente » . I geografi, continua Dematteis, da sempre « fanno un pezzo di storia con i poeti: forse è per

questo che gli antichi ritenevano Omero il massimo dei geografi ». La geografia deve riprendere il suo cammino a fianco della poesia, recuperando così anche quella carica emotiva e affettiva che è necessaria per stabilire un corretto rapporto con i luoghi e con chi ci vive. Solo « un'immaginazione poetica che attinga al fondo oscuro e brulicante della vita potrà veramente suggerire la molteplicità dei bisogni e dei desideri che possono concorrere alla costruzione del territorio come bene comune », scovare, nascoste sotto le false necessità, « le condizioni di un divenire possibile » . "The 'Arabick' Interest of the Natural Philosophers in Seventeenth-Century England" deals with the remarkably widespread interest in Arabic in seventeenth-century England among Biblical scholars and theologians, natural philosophers and Fellows of the Royal Society, and others. It led to the institutionalisation of Arabic studies at Oxford and Cambridge Universities where Arabic chairs were set up, and immense manuscript collections were established and utilised. Fourteen historians examine the extent and sources of this Arabic interest in areas ranging from religion, astronomy, mathematics, medicine, philosophy, philology, and alchemy to botany. Arabic is shown to have been a significant component of the rise of Protestant intellectual tradition and the evolution of secular scholarship at universities. This book consists of 22 papers originally presented during the conference on ancient historical writing held in May 2007 in Wrocław, Poland. The authors are classical historians and philologists from academic institutions in Austria, Finland, France, Germany, Israel, Poland, the United Kingdom and the United States. The collection responds to a growing interest among classical scholars in historiography and such related genres as ethnography and biography. The focus of the volume is, on the one hand, on the ancient historians' methods of approaching the external world, especially a non-Greek (or non-Roman) world, and, on the other, on the political dimension of historical writing, especially of Roman imperial historiography. There are also papers devoted to pointing and defining links between historiography and other literary genres such as epic or novel. Much attention is given to classical Greek historiography (Herodotus, Thucydides, Xenophon), but other authors and periods are also discussed. The book is addressed to classical scholars, historians of historiography and anyone interested in ancient world. With a view to a non-specialist reader, all Greek and most Latin quotations are translated. In Making Mesopotamia Hamish Cameron examines the representation of the Mesopotamian Borderland as an inter-imperial borderland in Roman geographical writings of the first four centuries CE. The Fascist regime under Mussolini regarded its youth as its best hope for the future. Young people were courted more assiduously than any other group in the society and their political socialization became a central concern of the government. Believe, Obey, Fight discusses the various tools used by the Fascist regime from 1922 to 1943 to shape the political values and environment of the young. Tracy Koon focuses on the secondary agents of socialization, including the party, the educational establishment, youth groups, and the media of political communication. She shows that the response to this socialization ranged from apparent consent to dissent and finally to open opposition. The regime employed several methods to produce consensus among the young. Koon's analysis begins with a discussion of the rhetorical style of Mussolini's message and the key political myths manipulated by his propaganda machine: fascism as continuing revolution and social justice, the glories of ancient Rome, the hygienic function of war and violence, the religious spirit of the new

creed, and the omniscience of the leader. She then describes the pre-Fascist educational system, the "most Fascist" Gentile reforms of 1923, and the later revision of those reforms by zealous party men engaged in the Fascist regimentation of teachers and students and the militarization and politicization of curricula and textbooks. Equally important agents of socialization were the Fascist groups organized for young people from their earliest years through the university level, including the annual national competitions and forums in which members could express their ideas on a range of issues. The regime provided physical, military, sports, and political training to strengthen the new Fascist society. Fascist socialization did for a time create a superficial consensus by appealing to both the love of conformity that marks the very young and the economic fears that caused students to conform in the hope of jobs. But Koon argues that the regime's attempt to exert totalitarian control over the young deprived them of personal identity. As time passed, the contradictions of the regime became clearer, the chasm between Fascist rhetoric and reality more obvious. In the end, the majority of young people came to believe that the regime had given them nothing to believe in, no one to obey, and nothing for which to fight. Originally published in 1985. These editions are published unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value. A wide-ranging edited collection that interrogates colonial expansion, and the mismatch between intention, perception and hype, and the actual realities. This book focuses on how inexpensive maps, produced for the masses, accrued cultural value for everyday consumers in Renaissance Italy, who wanted to own and display maps in their homes as works of art not for practical use, but for their cultural capital as commodities. Genevieve Carlton considers how and why maps took on this new identity, as coveted and revered material objects and symbols of status and power, which in turn elevated or reinforced the public personae of their owners. She reconstructs the market for maps by examining household inventories as well as the ways in which maps were displayed in the interiors of Renaissance homes. Her survey shows that consumers from every level of society owned and displayed maps and used them for personal gain, to reinforce a particular identity." Social and cultural geography is practised by geographers from around the world. However, for various reasons including language and publishing traditions, knowledge of the research being undertaken can often remain confined to those working within those countries. This book draws together, for the first time into one volume, reports of social and cultural geography undertaken in several countries from around the world. It provides an important overview of geographic ideas and traditions, and the history of human geography more generally, allowing comparison between countries and details of key studies and references. As such, the book will be of interest to geographers schooled in different national traditions, and those interested in the production and history of geographic knowledge. Entries are written in both English and the country 's own national language.
