Models and Mirrors Aug 25 2022 Ritual is one of the most discussed cultural practices, yet its treatment in anthropological terms has been seriously limited, characterized by a host of narrow conceptual distinctions. One major reason for this situation has been the prevalence of positivist anthropologies that have viewed and summarized ritual occasions first and foremost in terms of their declared and assumed functions. By contrast, this book, which has become a classic, investigates them as epistemological phenomena in their own right. Comparing public events - a domain which includes ritual and related occasions - the author argues that any public event must first be comprehended through the logic of its design. It is the logic of organization of an occasion which establishes in

*large measure what that occasion is able to do in relation to the world within which it is created and practiced.*

*2022 In 1993, M. Kontsevich proposed a conceptual framework for explaining the phenomenon of mirror symmetry. Mirror symmetry had been discovered by physicists in string theory as a duality between families of three-dimensional Calabi-Yau manifolds. Kontsevich's proposal uses Fukaya's construction of the  $A^\infty$ -category of Lagrangian submanifolds on the symplectic side and the derived category of coherent sheaves on the complex side. The theory of mirror symmetry was further enhanced by physicists in the language of D-branes and also by Strominger-Yau-Zaslow in the geometric set-up of (special) Lagrangian torus fibrations. It rapidly expanded its scope across from geometry, topology, algebra to physics. In this volume, leading experts in the field explore recent developments in relation to homological mirror symmetry, Floer theory, D-branes and Gromov-Witten invariants. Kontsevich-Soibelman describe their solution to the mirror conjecture on the abelian variety based on the deformation theory of  $A^\infty$ -categories, and Ohta describes recent work on the Lagrangian intersection Floer theory by Fukaya-Oh-Ohta-Ono*

*which takes an important step towards a rigorous construction of the  $A^\infty$ -category. There follow a number of contributions on the homological mirror symmetry, D-branes and the Gromov–Witten invariants, e.g. Getzler shows how the Toda conjecture follows from recent work of Givental, Okounkov and Pandharipande. This volume provides a timely presentation of the important developments of recent years in this rapidly growing field.*

*The Human Experience of Space and Place Jun 30 2020 Humanistic geography is one of the major emerging themes which has recently dominated geographic writing. Anne Buttner has been one of*

*the leading figures in the rise of humanistic geography, and the research students she collected round her at Clark University in the 1970s constituted something of a 'school' of humanistic geographers. This school developed a significantly new style of geographical inquiry, giving special emphasis to people's experience of place, space and environment and often using philosophical and subjective methodology. This collection of essays, first published in 1980, brings together this school and offers insight into philosophical and practical issues concerning the human experience of environments. An extensive range of topics are discussed, and the aim throughout is to weave analytical and critical thought into a more comprehensive understanding of lived experience. This book will be of interest to students of human geography.*

*Lady of the Glen Mar 20 2022 Enemies become lovers in a divided Scotland in this "marvelous tale" of history and passion (Diana Gabaldon). From birth, Catriona Campbell and Alasdair Og MacDonald are enemies—for he is the second son of her clan's most powerful foe. Yet from the moment they meet, they know they will lie in each other's arms someday.*

*Their love, though centuries forbidden, comes at the most dangerous of times, as they become pawns of war . . . and of history. For rebellion has been stirring, and under the orders of King William III, a bloody price will be paid at Glencoe . . . This “stirring” love story set against the backdrop of a notorious massacre is “well worth a Highland journey” (Kirkus Reviews). “Roberson’s world of 17th-century Scotland is atmospherically real.”*

*Mental Health, Social Mirror* Apr 08 2021

Sociologists often view research on mental health as peripheral to the real work of the discipline. This volume contains essays that reassert the importance of mental health research in sociology. Experts in the field articulate the contributions that

*mental health research has made, and can make, in resolving key theoretical and empirical debates. The contributions provide answers to critical questions regarding the social origins of--and social responses to--mental illness.*
