Automotive Ethernet Sep 20 2021 Do you need to get up to
date with the world's most popular networking technology?
With this resource you will discover everything you need to
know about Ethernet and its implementation in the auto
industry. Enhance your technical understanding and better
inform your decision-making process so that you can
experience the benefits of Ethernet implementation. From
market opportunities, to lower costs, and less complex
processes; this is the first book to provide a comprehensive
overview of automotive Ethernet. Covering electromagnetic
requirements and physical layer technologies, Quality of
Service, the use of VLANs, IP, and Service Discovery, as well
as network architecture and testing, this unique and
comprehensive resource is a must have, whether you are

professional in the automotive industry, or an academic needs a detailed overview of this revolutionary technology and its historical background.

Cooperative Design, Visualization, and Engineering
2020 This book constitutes the refereed proceedings of the 10th International Conference on Cooperative Design, Visualization, and Engineering, CDVE 2013, held in Palma de Mallorca, Spain, in September 2013. The 34 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers cover all the topics of cooperative engineering, basic theories, methods and technologies that support CDVE, cooperative design, visualization and applications. There are special contributions dealing with the cooperative issues brought by the Internet - such as the situation in the ambient assisted living systems. Other papers in the volume cover a wide range of cooperative application topics such as cooperative e-learning, cooperative decision making and cooperative simulation.

Smart Women: The Search for America's Historic All - Women Study Clubs
Mar 15 2021 Hiding in plain sight throughout America are historic, highly private women's education groups. These clubs are fascinating survivors

an era following the Civil War when women couldn't attend most colleges and were told they shouldn't leave the home. From their earliest days, the study groups also contributed to the welfare of their towns - often by helping to found their first library-and served to get women out of the house and into the world. Today's all-women study clubs have no civic component but still fashion their meetings as their four great-grandmothers did, with members taking turns giving original papers. In *Smart Women*, author Ann Dodds Costello discusses her four-year quest to locate, often visit, and describe today's 100-year-old, all-women study clubs, all over America, even though they do not publicize and have no central organization or knowledge of each other. Includes an invaluable, first-ever directory of most of the book's ninety plus clubs.

Research and Advanced Technology for Digital Libraries April 08 2023 This book constitutes the refereed proceeding of the International Conference on Theory and Practice of Digital Libraries, TPDL 2013 (formerly European Conference on Research and Advanced Technology for Digital Libraries, ECDL) held in Valletta, Malta, in September 2013. The 24 papers, 13 short papers, 22 posters and 8 demonstrations presented in this volume were carefully reviewed and selected from 158 submissions. The papers cover a wide range of research topics, clustered in four broader areas: foundations, infrastructures, content, and services. They have been organized in topical sections on conceptual models and t

issues, aggregation and archiving, user behavior, digital curation, mining and extraction, architectures and interoperability, interfaces to digital libraries, semantic v information retrieval and browsing, and preservation. Also included are 6 tutorials and 2 panels.

Aquafeed Formulation Oct 10 2020 **Aquafeed Formulation** is the only resource that provides summaries with example formulation techniques specifically to meet the needs of anyone in the aquaculture industry. As feed is the largest single cost item in aquaculture production, and formulating aquaculture feed requires many combinations of several ingredients and nutrient requirements, this book takes a concise approach, providing essential information on formulation and covering relevant available software, feed nutrients, and additives such as enzymes and phytase and conjugated fatty acids, as well as best industry practices to improve aquafeed production. Users will find this to be a go-to resource for anyone interested or involved in, the aquaculture industry. Includes the latest software evaluation for calculating protein and amino acid sources, trace minerals, and vitamins for aquaculture diets Provides essential information on formulation, covering feed nutrients and additives such as enzymes and phytase and conjugated fatty acids Presents factors affecting nutrient recommendations for aquaculture diets and nutritional effects on aquaculture nutrient excretion and water quality Covers a broad range of techniques to understand the nutrient

recommendations in the NRC guide

Foundations and Practice of Security Dec 04 2022 This book constitutes the carefully refereed post-proceedings of the Symposium on Foundations and Practice of Security, FPS 2013, held in La Rochelle, France, in October 2013. The revised full papers presented together with a keynote address were carefully reviewed and selected from 65 submissions. The papers are organized in topical sections on security protocols, formal methods, physical security, attack classification and assessment, access control, cipher attack ad-hoc and sensor networks, resilience and intrusion detection.

Industrial Sensors and Controls in Communication Networks Apr 03 2020 This informative text/reference presents a detailed review of the state of the art in industrial sensor control networks. The book examines a broad range of applications, along with their design objectives and technical challenges. The coverage includes fieldbus technologies, wireless communication technologies, network architecture and resource management and optimization for industrial networks. Discussions are also provided on industrial communication standards for both wired and wireless technologies, as well as for the Industrial Internet of Things (IIoT). Topics and features: describes the FlexRay, CAN, and Modbus fieldbus protocols for industrial control networks, as well as the MIL-STD-1553 standard; proposes a dual fieldbus approach, incorporating both CAN and ModBus fieldbus

technologies, for a ship engine distributed control system; reviews a range of industrial wireless sensor network (IWSN) applications, from environmental sensing and condition monitoring, to process automation; examines the wireless networking performance, design requirements, and technical limitations of IWSN applications; presents a survey of IWSN commercial solutions and service providers, and summarizes the emerging trends in this area; discusses the latest technologies and open challenges in realizing the vision of IIoT, highlighting various applications of the IIoT in industrial domains; introduces a logistics paradigm for adopting IIoT technology on the Physical Internet. This unique work will be of great value to all researchers involved in industrial sensing and control networks, wireless networking, and the Internet of Things.

The Social Sciences in the Asian Century May 05 2020 In this collection of essays, we reflect on what it means to practice social sciences in the twenty-first century. The book brings together leading social scientists from the Asia-Pacific region. We argue for the benefit of dialogue between the diverse theories and methods of social sciences in the region, the role of the social sciences in addressing real-world problems, the need to transcend national boundaries in addressing regional problems, and the challenges for an increasingly globalized higher education sector in the twenty-first century. The chapters are a combination of theoretical reflections and locally focused case studies of processes that are embedded

global dynamics and the changing geopolitics of knowledge. In an increasingly connected world, these reflections will have global relevance.

Theory and Practice of Digital Libraries -- TPDL 2013 Selected Workshops April 07 2023 This book constitutes the refereed proceedings of the selected workshops co-located with the 17th International Conference on Theory and Practice of Digital Libraries, TPDL 2013, held in Valletta, Malta, in September 2013. The volume is organized in three parts, containing the 26 revised full papers of the three workshops: Linking and Contextualizing Publications and Datasets (LCPD 2013); Supporting Users Exploration of Digital Libraries (SUEDL 2013); Moving beyond technology: iSchools and education in data curation. Is Data Curator a new role? (DataCur 2013).

Database Systems for Advanced Applications April 27 2022 This two volume set LNCS 7825 and LNCS 7826 constitute the refereed proceedings of the 18th International Conference on Database Systems for Advanced Applications, DASFAA 2013, held in Wuhan, China, in April 2013. The 51 revised papers and 10 short papers presented together with 2 keynote talks, 1 invited paper, 3 industrial papers, 9 demonstrations, 4 tutorials and 1 panel paper were carefully reviewed and selected from a total of 227 submissions. Topics covered in part 1 are social networks; query processing; nearest neighbor search; index; query analysis; XML data management; privacy protection; and uncertainty.

data management; and in part 2: graph data management; physical design; knowledge management; temporal data management; social networks; query processing; data management applications; and database applications.

Theory and Applications of Models of Computation
2021 This book constitutes the refereed proceedings of the 10th International Conference on Theory and Applications of Models of Computation, TAMC 2013, held in Hong Kong, China, in May 2013. The 31 revised full papers presented were carefully reviewed and selected from 70 submissions. Bringing together a wide range of researchers with interests in computational theory and applications, the papers address the three main themes of the conference which were computability, complexity, and algorithms and present current research in these fields with aspects to theoretical computer science, algorithmic mathematics, and applications to the physical sciences.

The Proceedings of the 22nd Annual History of Medicine Days Conference 2018
2020 The Proceedings of the Calgary History of Medicine Days represent a series of volumes in the history of medicine and healthcare that publishes the work of young and emerging researchers in the field, hence providing a unique publishing format. The annual Calgary History of Medicine Days Conference, established in 1991, brings together undergraduate and early graduate students from across Canada, the USA, the UK, and Europe to give paper and poster presentations on a wide variety of

from the history of medicine and healthcare from an interdisciplinary perspective. The History of Medicine Day offers an annual platform for discussions and exchanges between participants over recent research findings, methodological perspectives, or work-in-progress descriptions of ongoing historiographical projects. This book brings together a number of reviewed and edited conference papers comprising topics from historical medical classics, physicianship and the doctor's role, military medicine, and disfigured bodies in anatomical and media perspectives. In addition, it includes the papers given by the conference's internationally renowned keynote speaker, Dr Guel Russel. The book further comprises all of the abstracts of the conference for documentation purposes and is well illustrated with diagrams and images pertaining to the history of medicine.

Austerity as Public Mobilisation Feb 06 2023 Explores how UK politicians and the press mobilise support for 'austerity' through appealing to socially conservative conceptions of work and community. It examines the techniques of anti-austerity social movements in challenging the prevailing sense of guilt, nostalgia and resentment and how these may offer radical alternatives for social change.

How To Write a Paper May 09 2023 This concise paperback is one of the best known guides to writing a paper for publication in biomedical journals. Its straightforward format – a chapter covering each of part of the structured abstract – makes it relevant and easy to use for any novice paper writer.

How to Write a Paper addresses the mechanics of submitting papers, including electronic submission, and how publishers handle papers, writing letters to journals, abstracts for scientific meetings, and assessing papers. This new edition covers how to write a book review and updated chapters on ethics, electronic publication and submission, and the movement for open access.

Communication in Critical Embedded Systems August 2020
This book constitutes the best paper selection from the Workshop, WoCCES 2013, held in Brasília, Brazil, in May 2013, the Second Workshop, WoCCES 2014, held in Florianópolis, Brazil, in May 2014, the Third Workshop, WoCCES 2015, held in Vitória, Brazil, in May 2015, and the 4th Workshop, WoCCES 2016, held in Salvador, Brazil, in June 2016. The 7 revised full papers were carefully reviewed and selected from 41 submissions. The papers focus on important innovations and recent advances in the specification, design, construction and use of communication in critical embedded systems.

Reconceptualising the Rule of Law in Global Governance Resources, Investment and Trade April 2021
The relevance and importance of the rule of law to the international legal order cannot be doubted and was recently reaffirmed by the Declaration of the High-level Meeting of the General Assembly on the Rule of Law at the National and International Level's solemn commitment to it on behalf of states and international organizations. In this edited collection, lead

scholars and practitioners from the fields of global governance, resources, investment and trade examine how commitment to the rule of law manifests itself in the real world fields. The book looks at cutting-edge issues within each field and examines the questions arising from the interplay between them. With a clear three-part structure, it explores each field in detail and addresses contemporary challenges while striving to assure a commitment to the rule of law. The contributors also consider how the rule of law has been or should be reconceptualised. Taking a multi-disciplinary approach, the book will appeal to international lawyers from across the spectrum, including practitioners in the field of international investment and trade law.

Database Systems for Advanced Applications 27 2022
This two volume set LNCS 7825 and LNCS 7826 constitute the refereed proceedings of the 18th International Conference on Database Systems for Advanced Applications, DASFAA 2013, held in Wuhan, China, in April 2013. The 51 revised papers and 10 short papers presented together with 2 keynote talks, 1 invited paper, 3 industrial papers, 9 demonstrations, 4 tutorials and 1 panel paper were carefully reviewed and selected from a total of 227 submissions. The topics covered in part 1 are social networks; query processing; nearest neighbor search; index; query analysis; XML data management; privacy protection; and uncertain data management; and in part 2: graph data management; physical design; knowledge management; temporal data

management; social networks; query processing; data management applications; and database applications.

Computational Intelligence 05 2023 The present book includes a set of selected extended papers from the fifth International Joint Conference on Computational Intelligence (IJCCI 2013), held in Vilamoura, Algarve, Portugal, from 20 to 22 September 2013. The conference was composed of three co-located conferences: The International Conference on Evolutionary Computation Theory and Applications (ECTA), the International Conference on Fuzzy Computation Theory and Applications (FCTA), and the International Conference on Neural Computation Theory and Applications (NCTA). Recent progresses in scientific developments and applications in these three areas are reported in this book. IJCCI received 111 submissions, from 30 countries, in all continents. After a double blind paper review performed by the Program Committee, only 24 submissions were accepted as full papers and thus selected for oral presentation, leading to a full paper acceptance ratio of 22%. Additional papers were accepted as short papers and posters. A further selection was made for the Conference, based also on the assessment of presentation quality and audience interest, so that this book includes extended and revised versions of the very best papers of IJCCI 2013. Commitment to high quality standards is a major concern of IJCCI that will be maintained in the next edition, considering not only the stringent paper acceptance ratio but also the quality of the program committee, keynote lecturers,

participation level and logistics.

Behaviour of Steel Structures in Seismic Areas May 29 2022
9th STESSA 2018 Selected, peer reviewed papers from the
International Conference on the Behaviour of Steel Structures
in Seismic Areas (STESSA 2018), February 14-17, 2018,
Christchurch, New Zealand

Product-Focused Software Process Improvement Aug 20
2021 This book constitutes the refereed proceedings of the
14th International Conference on Product-Focused Software
Process Improvement, PROFES 2013, held in Paphos,
Cyprus, in June 2013. The 22 revised full papers presented
together with 10 short papers and 2 tutorial papers were
carefully reviewed and selected from 41 submissions. The
papers are organized in topical sections on empirical software
engineering, software process improvement, managing
software processes, software measurement, decision support
in software engineering, safety-critical software engineering
and software maintenance.

Conceptual Structures for Discovering Knowledge June 31
2020 This book constitutes the proceedings of the 20th
International Conference on Conceptual Structures, ICCS
2013, held in Mumbai, India, in January 2013. The 22 full
papers presented were carefully reviewed and selected from
43 submissions for inclusion in the book. The volume also
contains 3 invited talks. ICCS focuses on the useful
representation and analysis of conceptual knowledge with
research and business applications. It advances the theoretical

practice in connecting the user's conceptual approach to problem solving with the formal structures that computer applications need to bring their productivity to bear. Conceptual structures (CS) represent a family of approaches that builds on the successes of artificial intelligence, business intelligence, computational linguistics, conceptual modeling, information and Web technologies, user modeling, and knowledge management.

Sean Scully Oct 02 2022 Sean Scully, one of the most important abstract artists of our time, allows conflict to be carried out in his works?conflict between structure and emotion, body and spirit, impulsivity and reflection. The American painter has been reinterpreting abstract art since the 1960s, not as a purely formal exploration of color, form, planes, structure, body, and light, but as a medium whose means of expression is tied to external and internal models, literary influences, and physical experiences. Scully has articulated this attitude in many lectures, interviews, and writings which comprise the starting point for the exhibition 'Vital Duplex'. With more than one hundred illustrations, the eponymous catalogue provides a comprehensive look at the artist's visual oeuvre, as well as his world of ideas, and defines its place in the history of abstract painting.00Exhibition: Staatliche Kunsthalle Karlsruhe, Germany (24.03- 05.08.2018) / LWL-Museum für Kunst und Kultur, Münster, Germany (Spring 2019).

Worldwide Commonalities and Challenges in Information

Literacy Research and Practice 29 2022 This book constitutes the refereed proceedings of the European Conference on Information Literacy, ECIL 2013, held in Istanbul Turkey, in October 2013. The 73 revised full papers presented together with two keynotes, 9 invited papers, four doctoral papers were carefully reviewed and selected from 236 submissions. The papers are organized in topic sections on overview and research; policies and strategies; theoretical framework; related concepts; citizenship and digital divide; disadvantaged groups; information literacy in the workplace and daily life; information literacy in Europe; different approaches to information literacy; teaching and learning information literacy; information literacy instruction; assessment of information literacy; information literacy K-12; information literacy and higher education; information literacy skills of LIS students; librarians, libraries and ethics.

Parallaxic Praxis: Multimodal Interdisciplinary Pedagogical Research Design Jun 05 2020 Parallaxic Praxis is a research framework utilized by interdisciplinary teams to collect, interpret, transmediate, analyze, and mobilize data generatively. The methodology leverages the researchers' personal strengths and the collective expertise of the team, including the participants and community when possible. Benefits include the use of multi-perspective analyses, multimodal investigations, informal and directed dialogic conversations, innovative knowledge creation, and mode residual and reparative research. Relying on difference,

dialogue, and creativity propulsion processes; and drawing post-qualitative, new materiality, multiliteracies, and combinatorial, even juxtaposing theoretical frames; this offers extensive research possibilities across disciplines content areas to mobilize knowledge to broad audiences book explains methods, theories, and perspectives, and provides examples for developing creative research design order to innovate new understandings. This model is especially useful for interdisciplinary partnerships or cross sector collaborations. This book specifically addresses is of research design, methodology, knowledge generation, knowledge mobilization, and dissemination for academics students, and community partners. Examples include possibilities for scholars interested in doing projects in social justice, community engagement, teacher education, Indigenous research, and health and wellness.

Concepts of Biology Sep 08 2020 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better

they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded in an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book by adapting it to the approach that works best in their class. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Modeling Decisions for Artificial Intelligence Feb 11 2021
This book constitutes the proceedings of the 10th International Conference on Modeling Decisions for Artificial Intelligence, MDAI 2013, held in Barcelona, Spain, in November 2013. 24 papers presented in this volume were carefully reviewed and selected from 40 submissions. They deal with the theory and tools for modeling decisions, as well as applications that encompass decision making processes and information fusion techniques.

Design Science: Perspectives from Europe Sep 01 2022
This book constitutes the refereed proceedings of the European Design Science Symposium, EDSS 2013 held in Dublin, Ireland, in November 2013. The 9 papers presented together

with two invited papers were carefully reviewed and selected from 18 submissions. The papers deal with various topics in the design science research.

Enterprise and Organizational Modeling and Simulation Dec 24 2021 This book constitutes the proceedings of the 9th International Workshop on Enterprise and Organizational Modeling and Simulation, EOMAS 2013, held in conjunction with CAiSE 2013 in Valencia, Spain, in June 2013. Tools and methods for modeling and simulation are widely used in enterprise engineering, organizational studies and business process management. In monitoring and evaluating business processes and the interactions of actors in a realistic environment, modeling and simulation have proven to be powerful, efficient and economic, especially if complemented by animation and gaming elements. The ten contributions in this volume were carefully reviewed and selected from 24 submissions. They explore the above topics, address the underlying challenges find and improve solutions, and show the application of modeling and simulation in the domain of enterprises, their organizations and underlying business processes.

Advances in Swarm Intelligence Mar 03 2020 This book and its companion volume, LNCS vols. 7928 and 7929 constitute the proceedings of the 4th International Conference on Intelligent Systems, ICSI 2013, held in Harbin, China in June 2013. The 129 revised full papers presented were carefully reviewed and selected from 268 submissions. The papers are organized

in 22 cohesive sections covering all major topics of swarm intelligence research and developments. The topics covered in this volume are: hybrid algorithms, swarm-robot and multi-agent systems, support vector machines, data mining machine learning system and information security, intelligent control, wireless sensor network, scheduling and path planning, image and video processing, and other applications.

Brazil Dec 12 2020 Examines the South American country that is destined to be one of the world's premier economic powers by the year 2030, and considers some of the acute problems the nation faces.

Distinctive Styles and Authorship in Alternative Comics
22 2021 Distinctive Styles and Authorship in Alternative Comics addresses the benefits and limits of analyses of alternative comics. It offers three close readings of works serially published between 1980 and 2018 – Art Spiegelman's Maus, Alison Bechdel's Dykes to Watch Out For, and Jas Gawronski's Berlin – and discusses how artistic style may influence the ways in which readers construct authorship.

Public Documents of the State of Wisconsin
Racialized Bordering Discourses on European Roma
2021 Using detailed examples from Finland, Hungary, Canada and the UK, this book explores relationships between the racialization and discrimination experienced by heterogeneous European Roma populations, and the production of everyday bordering embedded in state policies and media discourses. In the context of the long histories of discrimination experienced by Roma people across Europe

the chapters engage with changing EU policies, including recent tensions between inter-European de-bordering and selective immigration policies introduced as different states react to EU free movement. Employing an intersectional analysis, the authors capture the perspectives of differently situated people and associated discourses to examine the continuing racism experienced by European Roma citizens and their interaction with bordering technologies. They examine the homogenizing 'racial othering' and construction of Roma as a 'criminal category' that co-exists with the differentiations made between 'indigenous' and 'migrant' Roma central to dominant bordering discourses and the contestations of different Roma populations. Chapters focus on Roma activism and the media, the exclusion of Roma residents via urban regeneration and welfare provision, and powerful media and political discourses about Roma populations in different national and transnational contexts. This book was originally published as a special issue of *European and Racial Studies*.

Inclusive Society: Health and Wellbeing in the Community and Care at Home 31 2022 This book constitutes the refereed proceedings of the 11th International Conference on Smart Homes and Health Telematics, ICOST 2013, held in Singapore, in June 2013. The 22 revised full papers presented together with one invited paper and 19 short papers were carefully reviewed and selected from 53 submissions. The papers are organized in topical sections on Supportive

Technology for Ageing and People with Cognitive Impairment; Activity Recognition and Algorithmic Techniques; Trust, Security and Social Issues; Assistive Robotics and HCI Issues; Supporting Safety and Pervasive Healthcare; Home Energy Usage, Reasoning Framework, Services; Algorithms for Smart Homes; Eldercare – Activity Recognition and Fall Detection; Healthcare and Rehabilitation; Robotics and Assistive Living.
