Nuclear Cardiology Review Dec 17 2021 Nuclear Cardiology Self-Assessment is a Q&A-style review book that helps prepare the trainee for the certification exam from the American Board of Nuclear Cardiology (ABNC). It contains over 200 questions. The largest segment covers coronary disease examples with correct diagnostic implementation (procedural planning). Other sections on physics, artifacts, prognostic data, anomalies, and noncoronary testing are also included. And with increasing focus on guidelines, questions regarding the ACC-ASNC "appropriateness criteria" have been included.

Cardiology Intensive Board Review Apr 20 2022 Every year, more than 1800 residents and fellows and more than 2000 clinicians must take the CV board exam. This cardiovascular board (and MOC) review text consists of hundreds of questions created by the experts at the Cleveland Clinic that mimic the ABIM CV boards. The 3rd edition features new questions relating to cardiac cath and to electrophysiology, and several sections, including the congenital heart and hypertension section, are expanded. This edition also presents more case-based questions and has a full-color design.

SCAI Interventional Cardiology Board Review Book Aug 13 2021 Written by members of the Society for Cardiovascular Angiography and Interventions (SCAI), this book is a comprehensive yet concise review for board certification and recertification exams in interventional cardiology. It covers all the topics that are on the interventional cardiology board examination, including important clinical trials likely to be tested on the exam. More than 180 illustrations and numerous tables for easy study are included.

Cardiology Board Review Nov 27 2022 An accessible and engaging review of board exam essentials Cardiology Board Review lays the groundwork for board exam success with its instructive and easy-to-read explanations of the pathophysiology, diagnosis, and treatment of patients with cardiovascular disease. Breaking topics down into case unknowns, this innovative revision aid provides examples of everyday cardiological issues and then explains how best to address the problem at hand. All content is complemented by clinical images and illustrations, as well as helpful summaries and key points. Featuring 56 different cases, this essential text: Places learning in a practical context. Information about disease states is presented in case-based format which leads to better retention. Covers topics including congenital heart disease, coronary artery disease, cardiomyopathies, valvular heart disease, arrhythmias, heart failure, peripheral vascular disease, and more Designed to present important concepts and information in a unique way to complement textbook learning Features electrocardiograms, angiograms, and pressure tracings Is applicable to those working towards certification in Cardiovascular Disease from the American Board of Internal Medicine or preparing for board examinations in other countries Is also suitable for those requiring MOC recertification Features cases on aortic insufficiency, atrial fibrillation, Brugada syndrome, carotid artery disease, myocardial bridging, congenital heart disease, electrolyte abnormalities, apical HCM, mitral regurgitation, RV outflow tract tachycardia, pulmonary hypertension, arrhythmogenic right ventricular dysplasia, aortic stenosis, atrial myxoma, atrial tachycardia, pulmonic insufficiency, Takotsubo, tricuspid regurgitation, Wolfe-Parkinson-White syndrome, pulmonic stenosis, coronary anomalies, ECG changes of hypothermia, endocarditis, pulmonary embolus, ventricular septal defect, hemodynamics of hypertrophic cardiomyopathy, complete heart block, heart failure, coronary artery disease, atrial septal defect, constrictive pericarditis, fractional flow reserve, dextrocardia, STEMI, early repolarization, giant cell myocarditis, peripheral arterial disease, pericardial tamponade, peripheral arterial disease, pericarditis, myocarditis, long QT syndrome, mitral stenosis, tetralogy of Fallot, and supraventricular tachycardia among others. Cardiology Board Review offers fellows a fresh and engaging approach to the information required to achieve success in board examinations.

Cardiology Board Review May 22 2022 Multiple choice question-and-answer book for cardiologists at all levels, now updated to include 100 new questions covering additional topics Cardiology Board Review, Second Edition is a multiple-choice question-and-answer study aid that is written for the primary purpose of helping candidates prepare for the American Board of Internal Medicine (ABIM) subspecialty certification. The questions address all areas of cardiology, some of which include: physical examination, ECG section with high resolution images, non-invasive and invasive imaging, myocardial diseases, and more. Each of the 1,400 questions is followed by four answers to choose from and the discussions address not only the rationale behind picking the right choice, but also fills in information around the topic so that important key concepts are clearly laid out. This helps candidates to prepare for the test, while also developing a clear understanding of various aspects of cardiology, including diagnosis and management. Written by two highly experienced authors in the field of healthcare, Cardiology Board Review, Second Edition covers topics such as: History and physical examinations, electrocardiography, chest x-rays in cardiology, stress testing and risk stratification of asymptomatic subjects, and echocardiography Cardiac magnetic resonance imaging, cardiac computed tomography, cardiac catheterization, acute coronary syndromes, and chronic coronary artery disease Heart failure, transplant, left ventricular assist devices, pulmonary hypertension, cardiomyopathies, hypertension, and diabetes mellitus Lipids, valvular heart disease, adult congenital heart disease, pericardial diseases, aortic diseases, and cardiac arrhythmias Pacemakers and defibrillators, cardiac masses, systemic disorders affecting the heart, and heart disease and pregnancy Providing comprehensive coverage of all relevant subjects and offering the easy-to-understand "why" behind the answer to each question, this second edition of Cardiology Board Review is an essential study resource for fellows in training, practicing cardiologists, and those preparing for ABIM subspecialty board in cardiology.

Cardiology Board Review Jan 06 2021

Pediatric Cardiology Board Review Apr 08 2021 More than 900 board-style questions prepare you for certification and recertification! Based on the popular Mayo Clinic Pediatric Cardiology Review course, this highly regarded testing resource provides easy access to more than 900 questions and answers on every aspect of pediatric cardiology. Full explanations are provided for every question, helping you focus your areas for review and make the most of your study time. Revised and updated from cover to cover, keeping you up to date with current information in the field. Newly expanded, detailed answers in every chapter, plus an added emphasis on adult congenital heart disease, prepare you for today's exams, including the new ACHD exam. More than 900 multiple-choice questions related to the diagnosis and treatment of the fetus, infant, child, and adult with congenital heart disease ensure a thorough review of exam material. Test yourself using the book or with the interactive online question bank, for convenient study anytime, anywhere. Complete coverage of all areas of pediatric cardiology, including anatomy and physiology, congenital malformations, cardiac catheterization and angiography, outpatient cardiology, cardiac intensive care, pharmacology, surgical palliation and repair of CHD, and much more. Now with the print edition, enjoy the bundled interactive eBook edition, which can be downloaded to your tablet and smartphone or accessed online and includes features like: Complete content with enhanced navigation Powerful search tools and smart navigation cross-links that pull results from content in the book, your notes, and even the web Cross-linked pages, references, and more for easy navigation Highlighting tool for easier reference of key content throughout the text Ability to take and share notes with friends and colleagues Quick reference tabbing to save your favorite content for future use

900 Questions Aug 01 2020 This user-friendly review question book is geared to interventional cardiology board candidates either for initial certification or

recertification. It contains 900 questions in the same proportion as the actual exam to ensure highly targeted, high-yield preparation. Answers with brief explanations and references are included. Indications for particular procedures—a major focus of the board exam—are integrated throughout the text, particularly in the context of ACC/AHA guidelines. More than 250 angiograms and other illustrations reinforce key concepts. Separate chapters cover ACC/AHA guidelines for percutaneous coronary intervention, chronic stable angina, acute coronary syndromes, and ST-elevation myocardial infarction. A chapter on test-taking is also included.
