The Research Probe Sep 16 2021 The Research Probe (TRP) is a proceedings publication of institutional conferences and research competitions. It focuses on four broad themes: education and development studies; humanities and social sciences; science, technology, engineering and mathematics; and business, management and accounting. This publication provides a platform for experts and practitioners from various fields in the dissemination of their research works that address industry trends and needs, scientific findings and international concerns. Both the institutional conferences and proceedings publication promote a wider horizon for researchers through open-access paradigm. TRP publishes articles employing any of the various research methods and strategies. It accepts any specific topic within these broad subjects. It also encourages interdisciplinary articles that broadly discuss key topics relevant to the core scope of the journal.

Shadow Education as Worldwide Curriculum Studies Oct 06 2020 This book theorizes shadow education as a new component of curriculum, expanding the concept of curriculum to include this type of learning. Curriculum scholars and theorists have largely disregarded shadow education as a valid topic of scholarly attention despite its massive growth worldwide. But shadow education has become a global phenomenon with ever-increasing numbers of student participants; it complements school-based curricula, in many cases going beyond. Thus, Jung and Kim argue that shadow education requires rigorous analysis by curriculum studies scholars. This volume analyzes the state and importance of shadow education in countries around the world: its representative forms and industries (private tutoring institutes, home-visit private tutoring, Internet-based private tutoring, subscribed learning programs, after-school programs), its characteristic forms in terms of curriculum, and its roles in student learning. It also explores various features of shadow education based on an eight-year ethnographic study in South Korea.

History BA (Programme) Semester II: Questions and Answers , University of Delhi Feb 07 2021 History BA (Programme) Semester II: Questions and Answers, University of Delhi is based on the syllabus provided by the Delhi University for its students of B.A. Programme Semester II for the paper called History of India C.300 B.C. to Eighth Century A.D. It covers the

topics prescribed for semester II. The book attempts to give a wholesome view of the themes along with the kind of questions which can be asked and answers to them are provided accordingly based on research work. This student friendly volume includes all possible questions which can be asked in exam. In this book, students should have helpful features like a glossary, list of maps, illustrations and a bibliography.

Arun Deep's 10 Years Solved Papers For ICSE Class 10 Exam 2023 - Comprehensive Handbook Of 15 Subjects - Year-Wise Board Solved Question Papers, Revised Syllabus 2023 Jul 03 2020 Easy, Quick, and Concise Revision with Arun Deep's 10 Years Solved Papers for ICSE Class 10 Board Examinations 2023. Our Handbook consists of Solved Papers for total 15 Subjects including English I, English II, Physics, Chemistry, Biology, History & Civics, Geography, Mathematics, Hindi, Computer Application, Economics, Economic Applications, Commercial Studies, Commercial Applications, and Physical Education.

Oswal - Gurukul Biology Most Likely Question Bank : ICSE Class 9 Sem II Exam 2022 Jan 27 2020

Botany for Degree Students (For B.Sc. 2nd Semester, As per CBCS) May 01 2020 This textbook has been designed to meet the needs of BSc Second Semester students of Botany as per the UGC Choice Based Credit System (CBCS). It acquaints students with abiotic and biotic components of the ecosystem and their interactions at different levels. It also covers origin of angiosperms, their phylogeny and classification using various methods. While it provides strong conceptual understanding of the subject, it also helps in developing scientific outlook of the student.

Research on Course Management Systems in Higher Education Apr 11 2021 The e-learning research literature is characterized by studies that investigate the practice of teaching and learning online (pedagogy) and those that investigate the planning and administrative functions associated with e-learning delivery (management). This edited volume directs attention to pedagogy and management as it relates to the primary e-learning delivery mechanism, the course management system (CMS). Specifically, the research presented in this collection deals with a range of themes relevant to the selection, implementation, use and evaluation of course management systems in higher education. The primary audience for this book includes instructors and students in instructional and educational technology programs. The book could easily be used as a text in a distance or online learning course. The secondary audience includes instructors and students in higher education programs and e-learning practitioners and administrators. The book is timely because of the growing presence and influence of course management systems on teaching and learning in higher education.

Keeping the Essence in Sight Jun 13 2021 Keeping the Essence in Sight is an invitation to become a better teacher. To remember the essence of teaching, why we go into the classroom in the first place: To teach our students to communicate in the English language. We don't become teachers so that we can grade tests, or fulfill national educational plans, or deal with difficult students, although teachers do all those things and more. We become teachers because we love teaching and we love our students. The book is based on Sharon Hartle's renowned blog comprised of reflections on her teaching experience, and organized into four sections: Learning, Teaching, Testing, and Professional Development. Within each section she addresses key questions in ELT, such as: How can we motivate learners to want to learn and

develop learner autonomy? What are the best ways to integrate technology into my lessons? Should we think about blended teaching instead of blended learning? Can we improve our teaching and our assessment if we change our model of English? What are some easy and accessible ways to do professional development? And most importantly, how can we be better teachers.

Price Expectations in Rising Inflation Aug 28 2022 It is claimed in this book that expectations should not necessarily be treated as unobservable variables and that there is much to be learned from survey data. A unique data set is examined, the output of surveys conducted twice a year since 1952, among informed Italian businessmen and economic experts. The predictive accuracy, rationality and determinants of inflation expectations are investigated, following an extensive analysis of measurement issues. The estimate of inflation expectations are evaluated for both wholesale and consumer price changes, comparing them with those held by respondents to other surveys for different countries and with the forecasts generated by alternative predictors of the inflation process. The expectations considered in the study are shown to be remarkably accurate, anticipating all major price changes, even if during the years of high and rising inflation which have followed the first oil crisis they appear to underestimate on a number of occasions the inflation rates actually experienced, as the alternative predictors also do. An accurate testing of the rational expectations hypothesis is conducted, rejecting it over the entire sample period but not for the period of mild, but variable inflation which preceded the first oil crises. It is shown that a mixed adaptive-regressive model, with both error-learning and return-to-normality components adapts very well to the data considered in this study and that inflation expectations are also influenced by an uncertainty component which affects the adaptive coefficient. Furthermore, regression towards normality is slowed down when industrial capacity is utilized above normal, and vice-versa. Many other issues such as the dispersion of individual answers, the problems of aggregation and measurement error are also considered and an extensive bibliography of other works where use is made of direct information on expectations, is included.

Populism and Higher Education Curriculum Development: Problem Based Learning as a Mitigating Response Aug 04 2020 Against a background of increasing inequality and a rising tide of nationalism and populism, this book raises concerns that curriculum is being shaped by powerful non-academic, non-accountable forces and that populism – and its manifestations – represent a grave challenge to learning. It explores the extent to which curriculum and learning methods in higher education should respond to this challenge. Using problem based learning as a case study it draws on crossdisciplinary studies to examine how regional, national and organizational perspectives emphasize different aspects of PBL. It questions whether PBL provides an effective response to external influences and a ‘populist’ highereducation agenda. In conclusion the book poses an uncomfortable question whether graduates reflect the external forces shaping curriculum and hence may be as vulnerable to populist rhetoric as non-graduates precisely because the curriculum and learning methods do not engage with the challenges. This book will appeal to scholars of problem based learning, as well as populism and therole of higher education in society.

Engineering Chemistry-I (For 2nd Semester of Anna University) Nov 30 2022 Dr. Arun Luiz T is currently working as Assistant Professor at SSN College of Engineering, Kalavakkam. He completed his Master in science from St. Mary's College (University of Calicut), Sulthan Bathery, Kerala in 2002. He Stood First in his College for B.sc and M.sc. (Chemistry). He received his Ph. D. in Inorganic Chemistry from IIT Madras in the year 2010. His research

interest includes phosphorus- based ligands in synthetic inorganic chemistry and organometallic chemistry. He has Published four research papers in reputed national and international journals. He has more than four years of teaching experience in various engineering colleges.

Encyclopedia of Multimedia Technology and Networking, Second Edition Apr 23 2022

Advances in hardware, software, and audiovisual rendering technologies of recent years have unleashed a wealth of new capabilities and possibilities for multimedia applications, creating a need for a comprehensive, up-to-date reference. The Encyclopedia of Multimedia Technology and Networking provides hundreds of contributions from over 200 distinguished international experts, covering the most important issues, concepts, trends, and technologies in multimedia technology. This must-have reference contains over 1,300 terms, definitions, and concepts, providing the deepest level of understanding of the field of multimedia technology and networking for academicians, researchers, and professionals worldwide.

Zoology for Degree Students (For B.Sc. Hons. 2nd Semester, As per CBCS) May 05 2023

This textbook has been designed to meet the needs of B.Sc. (Hons.) Second Semester students of Zoology as per the UGC Choice Based Credit System (CBCS). Comprehensively written, it explains the essential principles, processes and methodology of Coelomate Non-Chordates and Cell Biology. This textbook is profusely illustrated with well-drawn labelled diagrams, flow charts and tables, not only to supplement the descriptions, but also for sound understanding of the concepts.

Principle of Engineering Physics II Sem May 25 2022 The book in present form is due to the outcome of excellent received for the Author's Book "Modern Engineering Physics" which is prescribed in M.D. University, Rohtak and Kurushetra university and other universities of Haryana. In order to make the book more useful and strictly as per the syllabi of Haryana Universities, most of the topics have been revised

The Roskilde Model: Problem-Oriented Learning and Project Work Sep 04 2020 This book describes the pedagogical foundations of the Roskilde Model of education and educational design. It presents knowledge about how principles of problem-oriented, interdisciplinary and participant-directed project work may serve as a basis for planning and applying educational activities at institutions of higher learning. It discusses the dilemmas, problems, and diverging views that have challenged the model, provoking experiments and reforms that have helped develop practice without compromising the key principles. The Roskilde Model combines various student-centered learning concepts into a nexus, providing the foundation for a consistent pedagogical practice that is strongly supported by the educational structure and the academic profile of the university. A complex concept, the Roskilde Model refers to three different aspects: The first one is problem-oriented interdisciplinary and participant-directed project work (PPL). At Roskilde University, half of all study activities are organized in line with this particular pedagogical approach. The second aspect the model refers to is the organizing of university education on the basis of four interdisciplinary bachelor programmes. These programmes are part of the humanities, social sciences, natural sciences, and humanistic-technological sciences and give admission to two-year master programmes in a broad range of disciplines. The third aspect the model refers to is the interdisciplinary academic and educational profile of the university.

Engineering Mathematics Volume - III (Statistical and Numerical Methods) (For 1st Year - 2nd Semester of JNTU, Hyderabad) Jun 01 2020 Engineering Mathematics

ICEL 2019 Feb 19 2022 We are delighted to introduce the proceedings of the first edition of the 2019 International Conference on Advances in Education, Humanities, and Language (ICEL). The aim of ICEL (International Conference on Advances in Humanities, Education and Language) is to provide a platform for researchers, professionals, academicians as well as industrial professionals from all over the world to present their research results and development activities in Education, humanities, and Language. The theme of ICEL 2019 was "Mainstreaming the Influences on Higher Order of Thinking Skills in Humanities, Education, and Language in Industrial Revolution 4.0". The technical program of ICEL 2019 consisted of 77 full papers, including invited papers in oral presentation sessions at the main conference tracks. Aside from the high quality technical paper presentations, the technical program also featured six keynote speeches, Hamamah, Ph.D (Univeritas Brawijaya, Indonesia), Prof. Dr. Nuraihan binti Mat Daud (UIIM, Malaysia), Dr. Edith Dunn (Conservator/Cultural Specialist, USA), Prof. Yoshihiko -Sugimura (university of Mizaki, Japan), Prof. Park Yoonho (Sunchon National University, Korea) and Prof. Su Keh Bow (Soochow University, Taiwan). We strongly believe that ICEL conference provides a good forum for all researchers, developers and

practitioners to discuss various advances that are relevant to education, humanities, and language. We also expect that the future ICEL conference will be as successful and stimulating, as indicated by the contributions presented in this volume

S. Chand's Applied Chemistry Volume - 2 (For 2nd Semester of Mumbai University) Jan 01 2023 Applied Chemistry Vol-2

Conceptual Profiles Feb 28 2020 The language of science has many words and phrases whose meaning either changes in differing contexts or alters to reflect developments in a given discipline. This book presents the authors' theories on using 'conceptual profiles' to make the teaching of context-dependent meanings more effective. Developed over two decades, their theory begins with a recognition of the coexistence in the students' discourse of those alternative meanings, even in the case of scientific concepts such as molecule, where the dissonance between the classical and modern views of the same phenomenon is an accepted norm. What began as an alternative model of conceptual change has evolved to incorporate a sociocultural approach, by drawing on ideas such as situated cognition and Vygotsky's influential concept of culturally located learning. Also informed by pragmatist philosophy, the approach has grown into a well-rounded theory of teaching and learning scientific concepts. The authors have taken the opportunity in this book to develop their ideas further, anticipate and respond to criticisms—that of relativism, for example—and explain how their theory can be applied to analyze the teaching of core concepts in science such as heat and temperature, life and biological adaptation. They also report on the implementation of a research program that correlates the responsiveness of their methodology to all the main developments in the field of science education. This additional material will inform academic discussion, review, and further enhancement of their theory and research model.

Student Assessment in Higher Education Mar 23 2022 This text provides higher education teachers with an overview of the many approaches to setting, marking and reviewing coursework, assignments, tests and examinations used in programmes for certificates, diplomas, first degrees or higher degrees. It discusses the influence of each on students.

The Pilani Pilgrims Dec 20 2021 Some journeys take you back to where you began... Nine guys – the Pilani Pilgrims - take off on their first reunion trip to BITS Pilani, 18 years after they have passed out. However, only one of them knows that there's a hidden agenda in this desert safari... Hours before Maitreyee starts off on her 32-hour train journey to become a BITSian, she discovers a secret that has remained hidden in her family for the past two decades - a book with letters written to her Mom by a man named Joe. Who was Joe? Where did he vanish all of a sudden? Why do the nine guys choose hot, hot July to have a reunion on campus? What is the hidden motive behind their meeting? How does Maitreyee come to terms with her unexpected discovery? A treasure chest of memories is opened as a series of mails sweeps everyone off their feet and takes them on an unforgettable journey to the land where the past is going to come face to face with the future. As for the answers to the questions above, they can be found at the place where it all began - BITS Pilani.
