Verification, Model Checking, and Abstract Interpretation May 01 2020 This book constitutes the proceedings of the 21st International Conference on Verification, Model Checking, and Abstract Interpretation, VMCAI 2020. The 21 papers presented in this volume were carefully reviewed from 44 submissions. VMCAI provides a forum for researchers from the communities of verification, model checking, and abstract interpretation, facilitating interaction, cross-fertilization, and advancement of hybrid methods that combine these and related areas.

Semantic Processing of Legal Texts May 05 2023 Recent years have seen much new research on the interface between artificial intelligence and law, looking at issues such as automated legal reasoning. This collection of papers represents the state of the art in this fascinating and highly topical field.

Dal problema al programma. Introduzione al problem-solving in linguaggio C Jun 25 2022

Verification, Model Checking, and Abstract Interpretation Jul 03 2020 This book contains the proceedings of VMCAI 2007. It features current research from the communities of verification, program certification, model checking, debugging techniques, abstract interpretation, abstract domains, and advancement of hybrid methods.

Scientific and Technical Aerospace Reports Jan 21 2022

Trissel's Stability of Compounded Formulations Aug 04 2020 "Helps readers determine whether formulated compounds will be stable for the anticipated duration of use; properly store and repackage compounded formulations; formulate in accordance with documented standards; and, counsel patients on the use and storage of compounded medications." -- Back cover.

Leveraging Applications of Formal Methods, Verification and Validation Nov 30 2022 The two-volume set LNCS 7609 and 7610 constitutes the thoroughly refereed proceedings of the 5th International Symposium on Leveraging Applications of Formal Methods, Verification and Validation, held in Heraklion, Crete, Greece, in October 2012. The two volumes contain papers presented in the topical sections on adaptable and evolving software for eternal systems, approaches for mastering change, runtime verification: the application perspective, model-based testing and model inference, learning techniques for software verification and validation, LearnLib tutorial: from finite automata to register interface programs, RERS grey-box challenge 2012, Linux driver verification, bioscientific data processing and modeling, process and data integration in the networked healthcare, timing constraints: theory meets practice, formal methods for the development and certification of X-by-wire control systems, quantitative modelling and analysis, software aspects of robotic systems, process-oriented geoinformation systems and applications, handling heterogeneity in formal development of HW and SW Systems.

Interactive Systems. Design, Specification, and Verification Feb 07 2021 The wait for the year 2000 was marked by the fear of possible bugs that might have arisen at its beginning. One additional fear we had during this wait was whether - ganising this event would have generated a boon or another bug. The reasons for this fear originated in the awareness that the design of interactive systems is a fast moving area. The type of research work presented at this unique event has received limited support from funding agencies and industries making it more difficult to keep up with the rapid technological changes occurring in interaction technology. However, despite our fear, the workshop was successful because of the high-quality level of participation and discussion. Before discussing such results, let us step back and look at the evolution of DSV-IS (Design, Specification and Verification of Interactive Systems), an international workshop that has been organised every year since 1994. The first books that addressed this issue in a complete and thorough manner were the collection of contributions edited by Harrison and Thimbleby and the book written by Alan Dix, which focused on abstractions useful to highlight important concepts in the design of interactive systems. Since then, this area has attracted the interest of a wider number of research groups, and some workshops on related topics started to be organised. DSV-IS had its origins in this spreading and growing interest. The first workshop was held in a monastery located in the hills above Bocca di Magra (Italy).

Computer Aided Verification Apr 04 2023 The open access two-volume set LNCS 12224 and 12225 constitutes the refereed proceedings of the 32st International Conference on Computer Aided Verification, CAV 2020, held in Los Angeles, CA, USA, in July 2020.* The 43 full papers presented together with 18 tool papers and 4 case studies, were carefully reviewed and selected from 240 submissions. The papers were organized in the following topical sections: Part I: AI verification; blockchain and Security; Concurrency; hardware verification and decision procedures; and hybrid and dynamic systems. Part II: model checking; software verification; stochastic systems; and synthesis. *The conference was held virtually due to the COVID-19 pandemic.

Electromagnetic Compatibility May 13 2021 This totally revised and expanded reference/text provides comprehensive, single-source coverage of the design, problem solving, and specifications of electromagnetic compatibility (EMC) into electrical equipment/systems-including new information on basic theories, applications, evaluations, prediction techniques, and practical diagnostic options for preventing EMI through cost-effective solutions. Offers the most recent guidelines, safety limits, and standards for human exposure to electromagnetic fields! Containing updated data on EMI diagnostic verification measurements, as well as over 900 drawings, photographs, tables, and equations-500 more than the previous edition-*Electromagnetic Compatibility: Principles and Applications, Second Edition:*

Current List of Medical Literature Mar 23 2022 Includes section, "Recent book acquisitions" (varies: Recent United States publications) formerly published separately by the U.S. Army Medical Library.

Euratom Information Feb 28 2020

Computer Aided Verification Nov 18 2021 The refereed proceedings of the 15th International Conference on Computer Aided Verification, CAV 2003, held in Boulder, CO, USA in July 2003. The 32 revised full papers and 9 tool papers presented were carefully reviewed and selected from a total of 102 submissions. The papers are organized in topical sections on bounded model checking; symbolic model checking; games, trees, and counters;

tools; abstraction; dense time; infinite state systems; applications; theorem proving; automata-based verification; invariants; and explicit model checking.

Les cartes à puce Mar 11 2021 Devenue un objet usuel du quotidien, la carte à puce fait intervenir de très nombreuses technologies informatiques. Cet ouvrage présente les concepts fondamentaux de la carte à puce et ses domaines d'applications. Il nous révèle les caractéristiques des systèmes d'exploitation embarqués, la manière de programmer les cartes dans le langage Java Card, les techniques mises en œuvre pour garantir leur sécurité face aux attaques physiques et logiques, ainsi que les méthodes formelles pour faire de la carte un objet de confiance. Le fonctionnement interne de la carte SIM dans les téléphones mobiles est décrit en détail. Le passeport biométrique et le paiement mobile sont traités à travers la technologie RFID/NFC qui ouvre la voie à de nouvelles applications du sans contact.

Structural Deterministic Safety Factors Selection Criteria and Verification Oct 06 2020

OOIS 2000 Sep 16 2021 New object-oriented technologies have been conceived and implemented over the past decade in order to manage complexity inherent in information systems development. Research has spanned from information systems modelling languages (UML and OML) to databases (ODMG), from programming languages (Java) to middleware technology (CORBA). A more widespread use of the Internet has led to the emergence and integration of various other technologies, such as XML and database connectivity tools, allowing businesses to access and exchange information over the Internet. The main theme of OOIS 2000 was "Object-Technology and New Business Opportunities" and focused on research conducted in the area of effective information systems development for the promotion of e-commerce. Papers were invited from academics and practitioners. The thirty-nine papers accepted for OIS 2000 are included in these proceedings. It is nice to see this year that the shift from centralised to distributed systems and the widespread access and use of the Internet has allowed the advent of new opportunities for businesses to exploit, in the form of e-commerce.

Compatibility of Low-cloud Vectors and Rawins for Synoptic Scale Analysis Sep 04 2020

Handbook of Electromagnetic Compatibility Jul 27 2022 This "know-how" book gives readers a concise understanding of the fundamentals of EMC, from basic mathematical and physical concepts through present, computer-age methods used in analysis, design, and tests. With contributions from leading experts in their fields, the text provides a comprehensive overview. Fortified with information on how to solve potential electromagnetic interference (EMI) problems that may arise in electronic design, practitioners will be better able to grasp the latest techniques, trends, and applications of this increasingly important engineering discipline. Handbook of Electromagnetic Compatibility contains extensive treatment of EMC applications to radio and wireless communications, fiber optics communications, and plasma effects. Coverage of EMC-related issues includes lightning, electromagnetic pulse, biological effects, and electrostatic discharge. Practical examples are used to illustrate the material, and all information is presented in an accessible and organized format. The text is intended primarily for those practicing engineers who need a good foundation in EMC, but it will also interest faculty and students, since a good portion of the material covered can find use in the classroom or as a springboard for further research. The chapters are written by experts in the field Details the fundamental principles, then moves to more advanced topics Covers computational electromagnetics applied to EMC problems Presents an extensive treatment of EMC applications to: Radio and wireless communications, Fiber optic communications, Plasma effects, Wired circuits, Microchips, Includes practical examples, Fiber optic, Communications, Plasma effects, Wired circuits, Microchips, Includes practical examples

Energy Research Abstracts Jan 09 2021

Empires of Antiquities Oct 30 2022 Empires of Antiquities is a history of the rediscovery of civilizations of the ancient Near East in the imperial order that evolved between the outbreak of the First World War and the 1950s. It explores the ways in which Near Eastern antiquity was redefined It explores the ways in which Near Eastern antiquity was redefined and experienced, becoming the subject of new regulation, new modes of knowledge, and international and local politics. A series of globally publicized spectacular archaeological discoveries in Iraq, Egypt, and Palestine, which the book follows, made antiquity visible, palpable and accessible as never before. The new uses of antiquity and its relations to modernity were inseparable from the emergence of the post-war world order, imperial collaboration and collisions, and national aspirations. Empires of Antiquities uniquely combines a history of the internationalization of a new "regime of archaeology" under the oversight of the League of Nations and its web of institutions, a history of British passions for Near Eastern antiquity, on-the-ground colonial mechanisms and nationalist claims on the past. It points to the centrality of the mandate system, particularly mandates classified A, in Mesopotamia/Iraq, Palestine and Transjordan, formerly governed by the Ottoman Empire, and of Egypt, in a new culture of antiquity. Drawing on an unusually wide range of archives in several countries, as well as on visual and material evidence, the book weaves together imperial, international, and local histories of institutions, people, ideas and objects and offers an entirely new interpretation of the history of archaeological discovery and its connections to empires and modernity.

Computer Aided Verification Jan 27 2020 This open access two-volume set LNCS 11561 and 11562 constitutes the refereed proceedings of the 31st International Conference on Computer Aided Verification, CAV 2019, held in New York City, USA, in July 2019. The 52 full papers presented together with 13 tool papers and 2 case studies, were carefully reviewed and selected from 258 submissions. The papers were organized in the following topical sections: Part I: automata and timed systems; security and hyperproperties; synthesis; model checking; cyber-physical systems and machine learning; probabilistic systems, runtime techniques; dynamical, hybrid, and reactive systems; Part II: logics, decision procedures; and solvers; numerical programs; verification; distributed systems and networks; verification and invariants; and concurrency.

Probabilità Statistica e Simulazione Jan 01 2023 Il volume contiene in forma compatta il programma svolto negli insegnamenti introduttivi di statistica e tratta alcuni argomenti indispensabili per l'attività di ricerca, come ad esempio i metodi di simulazione Monte Carlo, le procedure di minimizzazione e le tecniche di analisi dei dati di laboratorio. Gli argomenti vengono sviluppati partendo dai fondamenti, evidenziandone gli aspetti applicativi, fino alla descrizione dettagliata di molti casi di particolare rilevanza in ambito scientifico e tecnico. Numerosi esempi ed esercizi risolti valorizzano l'opera ed aiutano il lettore nella comprensione dei punti più difficili ed importanti. Come ulteriore supporto, questa terza edizione contiene molti programmi applicativi scritti col software libero Scilab, scaricabili dal sito web creato dagli autori. Il testo è rivolto agli studenti universitari dei corsi ad indirizzo scientifico e a tutti quei ricercatori che devono risolvere problemi concreti che coinvolgono aspetti statistici e di simulazione .

Scienza delle Costruzioni Apr 11 2021 Il testo fornisce i fondamenti della meccanica dei continui tridimensionali, in particolare dell'elasticità lineare e del problema di de Saint-Venant. I temi affrontati includono l'analisi della deformazione, l'analisi della tensione, le equazioni dei lavori virtuali, le equazioni costitutive, il problema elastico, i criteri di resistenza e il problema di de Saint-Venant in tutti i suoi casi particolari. Sono anche esposti alcuni argomenti che difficilmente trovano spazio in un corso di Scienza delle Costruzioni. Il testo è strutturato in maniera tale che il lettore possa seguire un percorso in cui le sezioni dedicate ad argomenti complementari possano essere omesse senza pregiudicare la comprensione. Il materiale è presentato, per quanto possibile, in maniera rigorosa e deduttiva: alla brevità delle spiegazioni viene preferito lo studio dei particolari. L'esposizione è accompagnata da numerose figure ed esempi e da un cospicuo numero di esercizi svolti che aiutano nella comprensione della teoria.

Handbook of Aerospace Electromagnetic Compatibility Nov 06 2020 A comprehensive resource that explores electromagnetic compatibility (EMC) for aerospace systems Handbook of Aerospace Electromagnetic Compatibility is a groundbreaking book on EMC for aerospace systems that addresses both aircraft and space vehicles. With contributions from an international panel of aerospace EMC experts, this important text deals with the testing of spacecraft components and subsystems, analysis of crosstalk and field coupling, aircraft communication systems, and much more. The text also includes information on lightning effects and testing, as well as guidance on design principles and techniques for lightning protection. The book offers an introduction to E3 models and techniques in aerospace systems and explores EMP effects on and technology for aerospace systems. Filled with the most up-to-date information, illustrative examples, descriptive figures, and helpful scenarios, Handbook of Aerospace Electromagnetic Compatibility is designed to be a practical information source. This vital guide to electromagnetic compatibility: • Provides information on a range of topics including grounding, coupling, test procedures, standards, and requirements • Offers discussions on standards for aerospace applications • Addresses aerospace EMC through the use of testing and theoretical approaches Written for EMC engineers and practitioners, Handbook of Aerospace Electromagnetic Compatibility is a critical text for understanding EMC for aerospace systems.

Valorizzazione degli edifici dimenticati. Lo stabilimento enologico Rudini di Pachino Mar 03 2023 1330.73

Runtime Verification Sep 28 2022 This book constitutes the refereed proceedings of the 20th International Conference on Runtime Verification, RV 2020, held in Los Angeles, CA, USA, in October 2020. The conference was held virtually due to the COVID-19 pandemic. The 14 regular papers and 2 short papers presented in this book were carefully reviewed and selected from 43 submissions. Also included are an invited paper, 5 tutorial papers, 6 tool papers, and a benchmark paper. The RV conference is concerned with all aspects of monitoring and analysis of hardware, software and more general system executions. The papers are organized in the following topical sections: runtime verification for autonomy; runtime verification for software; runtime verification with temporal logic specifications; stream-based monitoring; and runtime verification for cyber-physical systems.

La Convention sur l'interdiction et l'élimination des armes chimiques Jul 15 2021 After twenty years of negotiation within the framework of the Disarmament Conference, the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction was signed in Paris between 13 and 15 January 1993. At the same time, the signatory States adopted a resolution instituting a Preparatory Commission, established in The Hague, with the aim of 'the prompt and effective establishment of the future Organization for the Prohibition of Chemical Weapons'. A variety of converging considerations led the Curatorium of the Academy of International Law to organize a workshop on this subject: first the very interesting nature of the highly sensitive problems raised by the destruction of chemical weapons, both on the strategic and political planes, as well as on technical, financial and ecological grounds; but also the originality and difficulty, from the legal standpoint, of the numerous questions which will inevitably arise in connection with the application of the Paris Convention. Finally, the Paris Convention, which is innovative in many respects, particularly in that it institutes international control over the whole of an industrial activity, may be used as a model in other areas of disarmament, in particular the area of nuclear weapons.

Model and Data Engineering Jun 13 2021 This book constitutes the refereed proceedings of the 7th International Conference on Model and Data Engineering, MEDI 2017, held in Barcelona, Spain, in October 2017. The 20 full papers and 7 short papers presented together with 2 invited talks were carefully reviewed and selected from 69 submissions. The papers are organized in topical sections on domain specific languages; systems and software assessments; modeling and formal methods; data engineering; data exploration and exploitation; modeling heterogeneity and behavior; model-based applications; and ontology-based applications.

Runtime Verification Mar 30 2020 This book constitutes the refereed proceedings of the 16th International Conference on Runtime Verification, RV 2016, held in Madrid, Spain, in September 2016. The 18 revised full papers presented together with 4 short papers, 3 tool papers, 2 tool demonstration papers, and 5 tutorials, were carefully reviewed and selected from 72 submissions. The RV conference is concerned with all aspects of monitoring and analysis of hardware, software and more general system executions. Runtime verification techniques are lightweight techniques to assess correctness, reliability, and robustness; these techniques are significantly more powerful and versatile than conventional testing, and more practical than exhaustive formal verification.

Equazioni alle derivate parziali. Teoria elementare e applicazioni Dec 20 2021 Questo testo è destinato agli studenti dei corsi di laurea in ingegneria e di altri ltri corsi di laurea affini nei quali viene svolta una trattazione elementare delle equazioni differenziali alle derivate parziali. Dopo un capitolo introduttivo e un secondo capitolo dedicato alle serie di Fourier, strumento indispensabile, si passa alle equazioni classiche che intervengono nella Fisica Matematica. Nel terzo capitolo vengono affrontate le equazioni del primo ordine con particolare riguardo a quelle lineari e a quelle non lineari che intervengono nel modello del traffico. Nel quarto capitolo viene affrontata l'equazione delle onde sia attraverso i metodi di rappresentazione integrale delle soluzioni attraverso il metodo di separazione delle variabili. Nel quinto capitolo viene affrontata l'equazione del calore, in questo caso esaminando anche il principio del massimo. Nel sesto capitolo vengono affrontate l'equazione di Laplace e di Poisson, dando anche le nozioni di base sulle funzioni armoniche e sulle funzioni di Green. Il libro si distingue per la trattazione molto elementare, per la ricchezza di esempi e di grafici e per numerosi esercizi, tutti con soluzioni

Electromagnetic Compatibility May 25 2022 This totally revised and expanded reference/text provides comprehensive, single-source coverage of the design, problem solving, and specifications of electromagnetic compatibility (EMC) into electrical equipment/systems-including new information on basic theories, applications, evaluations, prediction techniques, and practical diagnostic options for preventing EMI through cost-effective solutions. Offers the most recent guidelines, safety limits, and standards for human exposure to electromagnetic fields! Software Verification Feb 19 2022 This book constitutes the refereed proceedings of the 12th International Conference on Verified Software, VSTTE 2020, and the 13th International Workshop on Numerical Software Verification, NSV 2020, held in Los Angeles, CA, USA, in July 2020. Due to COVID-19 pandemic the conference was held virtually. The 13 papers presented in this volume were carefully reviewed and selected from 21 submissions. The papers describe large-scale verification efforts that involve collaboration, theory unification, tool integration, and formalized domain knowledge as well as novel experiments and case studies evaluating verification techniques and technologies. The conference was co-located with the 32nd International Conference on Computer-Aided Verification (CAV 2020).

Logic Synthesis and Verification Algorithms Dec 28 2019 Logic Synthesis and Verification Algorithms is a textbook designed for courses on VLSI Logic Synthesis and Verification, Design Automation, CAD and advanced level discrete mathematics. It also serves as a basic reference work in design automation for both professionals and students. Logic Synthesis and Verification Algorithms is about the theoretical underpinnings of VLSI (Very Large Scale Integrated Circuits). It combines and integrates modern developments in logic synthesis and formal verification with the more traditional matter of Switching and Finite Automata Theory. The book also provides background material on Boolean algebra and discrete mathematics. A unique feature of this text is the large collection of solved problems. Throughout the text the algorithms covered are the subject of one or more problems based on the use of available synthesis programs.

Metodi per le decisioni statistiche Apr 23 2022 Il volume espone, nella prima parte, la teoria delle decisioni in condizioni di incertezza nelle sue linee generali, senza fare riferimento a contesti applicativi specifici. Nella seconda parte vengono presentati i concetti principali della teoria dell'inferenza statistica, inclusa una panoramica delle principali 'logiche' dell'inferenza statistica. L'orientamento dell'autore è esplicitamente di tipo bayesiano, ma vengono analizzate con attenzione anche le principali impostazioni alternative. La terza ed ultima parte è dedicata ai problemi di decisione statistica: oltre ai classici problemi di inferenza post-sperimentale, viene affrontata anche la tematica del disegno ottimale dell'esperimento
