Sacred History and National Identity Nov 30 2022 The late sixteenth century saw a redrawing of the borders of north-west Europe. Wales and Brittany entered into unions with neighboring countries England and France. This book uses Brittany and Wales' responses to unification to describe a comparative history of national identity during the early modern period.

Handbook of Multiple Comparisons Mar 03 2023 Written by experts that include originators of some key ideas, chapters in the Handbook of Multiple Testing cover multiple comparison problems big and small, with guidance toward error rate control and insights on how principles developed earlier can be applied to current and emerging problems. Some highlights of the coverages are as follows. Error rate control is useful for controlling the incorrect decision rate. Chapter 1 introduces Tukey's original multiple comparison error rates and point to how they have been applied and adapted to modern multiple comparison problems as discussed in the later chapters. Principles endure. While the closed testing principle is more familiar, Chapter 4 shows the partitioning principle can derive confidence sets for multiple tests, which may become important as the profession goes beyond making decisions based on p-values. Multiple comparisons of treatment efficacy often involve multiple doses and endpoints. Chapter 12 on multiple endpoints explains how different choices of endpoint types lead to different multiplicity adjustment strategies, while Chapter 11 on the MCP-Mod approach is particularly useful for dose-finding. To assess efficacy in clinical trials with multiple doses and multiple endpoints, the reader can see the traditional approach in Chapter 2, the Graphical approach in Chapter 5, and the multivariate approach in Chapter 3. Personalized/precision medicine based on targeted therapies, already a reality, naturally leads to analysis of efficacy in subgroups. Chapter 13 draws attention to subtle logical issues in inferences on subgroups and their mixtures, with a principled solution that resolves these issues. This chapter has implication toward meeting the ICH E9 R1 Estimands requirement. Besides the mere multiple testing methodology itself, the handbook also covers related topics like the statistical task of model selection in Chapter 7 or the estimation of the proportion of true null hypotheses (or, in other words, the signal prevalence) in Chapter 8. It also contains decision-theoretic considerations regarding the admissibility of multiple tests in Chapter 6. The issue of selected inference is addressed in Chapter 9. Comparison of responses can involve millions of voxels in medical imaging or SNPs in genome-wide association studies (GWAS). Chapter 14 and Chapter 15 provide state of the art methods for large scale simultaneous inference in these settings.

A cannon. A strap. A piece. A biscuit. A burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That's what fifteen-year-old Will has shoved in the back waistband of his jeans. See, his brother Shawn was just murdered. And Will knows the rules. No crying. No snitching. Revenge. That's where Will's now heading, with that gun shoved in the back waistband of his jeans, the gun that was his brother's gun. He gets on the elevator, seventh floor, stoked. He knows who he's after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that's when Will sees that one bullet is missing. And the only one who could have fired Shawn's gun was Shawn. Huh. Will didn't know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck's in the elevator? Just as Will's trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck's cigarette. Will doesn't know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, Long Way Down is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.

Multiple Comparisons May 05 2023 Multiple Comparisons introduces simultaneous statistical inference and covers the theory and techniques for all-pairwise comparisons, multiple comparisons with the best, and multiple comparisons with a control. The author describes confidence intervals methods and stepwise exposes abuses and misconceptions, and guides readers to the correct method for each problem. Discussions also include the connections with bioequivalence, drug stability, and toxicity studies Real data sets analyzed by computer software packages illustrate the applications presented.

Zero World Sep 28 2022 Published in rapid succession, Jason M. Hough's first three novels, The Darwin Elevator, The Exodus Towers, and The Plague Forge, earned mountains of praise and comparisons to such authors as James S. A. Corey and John Scalzi. Now Hough returns with a riveting near-future spy thriller that combines the adrenaline of a high-octane James Bond adventure with mind-blowing sci-fi speculations worthy of Christopher Nolan's Inception. Technologically enhanced superspy Peter Caswell has been dispatched on a top-secret assignment unlike any he's ever faced. A spaceship that vanished years ago has been found, along with the bodies of its murdered crew—save one. Peter's mission is to find the missing crew member, who fled through what appears to be a tear in the fabric of space. Beyond this mysterious doorway lies an even more confounding reality: a world that seems to be Earth's twin. Peter discovers that this mirrored world is indeed different from his home, and far more dangerous. Cut off from all support, and with only days to complete his operation, Peter must track his quarry alone on an alien world. But he's

unprepared for what awaits on the planet's surface, where his skills will be put to the ultimate test—and everything he knows about the universe will be challenged in ways he never could have imagined. Includes the complete bonus novella *The Dire Earth*, a prequel to the bestselling sci-fi adventure *The Darwin Elevator*. Praise for *Zero World* "This is sci-fi writing at its best. I couldn't put the book down."—Felicia Day, author of *You're Never Weird on the Internet (Almost)* "An enjoyable read . . . Expect minor whiplash from the frenetic pace."—*Entertainment Weekly* "[A] science fiction [novel that] smashes *The Bourne Identity* together with *The End of Eternity* to create a thrilling action rampage that confirms Hough as an important new voice in genre fiction."—*Publishers Weekly* (starred review) "No one has created a multiverse like Jason Hough does in *Zero World*. Imagine *Eternal Sunshine of the Spotless Mind* meets James Bond."—*New York Journal of Books* "A fast-paced cinematic novel full of action . . . Story, character, world building, action—all points are firing on all cylinders here."—*Bookreporter* "Hough has combined all the ingredients of a first-rate sci-fi thriller."—*Kirkus Reviews* "One hell of an entertaining read. Hough continues to deliver white-knuckle books anchored by unusual and fascinating characters. *Zero World* is a giant cup of pure badassery that secures his place among the finest sci-fi action writers today."—Kevin Hearne, *New York Times* bestselling author of the *Iron Druid Chronicles* "A high-octane blend of science fiction and mystery, *Zero World* is a thrill ride that shoots you out of a cannon and doesn't let up until the very last page."—Wesley Chu, author of *Time Salvager* "Warning: Do not pick up this book if there is anything else you need to do."—Brian Staveley, author of the *Emperor's Blades* series "I just finished *Zero World* and there's only one thing I need to know: How long must I wait for the sequel!?"—Raymond Benson, former James Bond novelist and author of the *Black Stiletto* series

The Snake Stone Jul 03 2020 Lefèvre, a French archaeologist, has arrived in Istanbul determined to uncover a lost Byzantine treasure. Yashim is commissioned to find out more about him. But when Lefèvre's mutilated body is discovered outside the French embassy, it turns out that there is only one suspect: Yashim himself. Once again, Yashim finds himself in a race against time to find the startling truth behind a shadowy secret society dedicated to the revival of the Byzantine Empire, caught in a deadly game deep beneath the city streets, a place where the stakes are high - and betrayal is death.

Werewolves of Montpellier Feb 07 2021 Sven, a semi-aimless Scandinavian artist who has ended up in Montpellier, France on a futile romantic pursuit, enjoys nocturnal raids into other people's homes, disguised as a werewolf. The way he figures it, the disguise will give him an extra few moments' advantage vis-à-vis any startled home owner if things get ugly... but he hasn't taken into account the existence of a society of real Montpellier-based werewolves who do not take kindly to this new pretender. So while Sven spends his days playing chess and poker with his friends, sketching his way through his picturesque chosen hometown, and coping with romantic dilemmas -- both his and those of his best friend, the Breakfast-at-Tiffany's-obsessed Audrey, who has girl troubles of her own -- little does he realize that a genuine threat to his life, and for that matter his humanity, is closing in on him. *Werewolves of Montpellier* is a lycanthropic thriller, a romantic comedy, and an existential drama -- beware the full moon!

Quicklet on Jim Collins' Great By Choice Oct 18 2021 ABOUT THE BOOK I just finished reading Jim Collins' new book. "Great by Choice: Uncertainty Chaos and Luck -- Why Some Thrive Despite Them All" (often GBC from here on out) describes the results of a deep investigation into how young companies can survive and thrive in chaotic, turbulent environments to achieve spectacular results. The book is of great value to startups and entrepreneurs seeking to build enduringly great companies. In this ebook, I look at how his concepts of fanatical discipline, productive paranoia, and empirical creativity apply to building a startup that succeeds over the long-term. To Note: I think that if you're trying to found-n-flip a business, most of these lessons do not apply. Rather, they're specifically for founders/leaders who want to be a long-lasting business success. Additionally, I don't want readers to come away with the idea that these are the only ways to become an enduring success. However, we have more evidence to suggest that these ways will work compared to many other approaches. MEET THE AUTHOR Jason Shen is the co-founder of Ridejoy - a Y Combinator-funded community marketplace for ridesharing. His blog, "The Art of Ass-Kicking," has been featured by Lifehacker and ReadWriteWeb. Jason studied Biology and Philosophy at Stanford where he led the men's gymnastics team to an NCAA national championship. Ridejoy is a company where friendly and talented people can do their best work and make the world a better place. EXCERPT FROM THE BOOK Luck: the dirty word in all success, business, and self-improvement literature. Perhaps some people and companies just get lucky, and our ability to draw useful lessons and conclusions from their success is just not possible. But Collins and his team anticipated the curiosity, at any rate, and devoted an entire chapter to luck. GBC applied a consistent methodology to both pairs of companies to analyze how luck played a role in their outcomes. About 230 luck events were categorized and studied, each meeting all three criteria of being unpredictable, independent of the actions of key players, and having significant good or bad implications for the business. Examples of luck events include Amgen isolating the gene for EPO, which it likened to finding a sugar cube in a lake a mile wide/long/deep, or the *New England Journal of Medicine* publishing a paper that challenged the effectiveness of one of Genentech's major drug products. What they found: Neither 10x-ers or comparison companies had substantially more good luck or bad luck events, nor did one giant piece of good luck carry a 10x company through all its success. Luck exists, but it tends to even out the playing field. What matters is Return on Luck, or how you take advantage of good luck and avoid choking. Buy a copy to keep reading! Lost Cat Apr 23 2022 A detective is walking down the street. It is raining. He sees a "Lost Cat" poster. A minute later he sees the cat from the photo.

He picks it up and goes back to the poster. He calls the number. A woman answers. He turns up at her place and gives her the cat. She invites him in from the rain for a cup of coffee. They talk and find out they have a lot in common: both are divorced and living alone. Some days later he invites her out for a dinner. She accepts. He shows up at the agreed time. She doesn't. He calls her home and knocks on her door. No answer. He asks the neighbors. They haven't seen her. She has disappeared. He makes some phone calls and investigates, but can't find her. He gets a new client and has to start working on a new case. In his head he continues their conversation. Lost Cat, the new graphic novel by Jason (after years of "graphic novellas" of less than 50 pages, arguably his first genuine graphic NOVEL) is both a playful take on the classic detective story, and a story about how difficult it is to find a sister spirit, someone you feel a real connection to—and what do you do if you lose that person?

Sunny Jul 27 2022 Sunny tries to shine despite his troubled past in this third novel in the critically acclaimed Track series from National Book Award finalist Jason Reynolds. Ghost. Patina. Sunny. Lu. Four kids from wildly different backgrounds, with personalities that are explosive when they clash. But they are also four kids chosen for an elite middle school track team—a team that could take them to the state championships. They all have a lot to lose, but they all have a lot to prove, not only to each other, but to themselves. Sunny is the main character in this novel, the third of four books in Jason Reynold's electrifying middle grade series. Sunny is just that—sunny. Always ready with a goofy smile and something nice to say, Sunny is the chilliest dude on the Defenders team. But his life hasn't always been sun beamy-bright. You see, Sunny is a murderer. Or at least he thinks of himself that way. His mother died giving birth to him, and based on how Sunny's dad treats him—ignoring him, making Sunny call him Darryl, never "Dad"—it's no wonder Sunny thinks he's to blame. It seems the only thing Sunny can do right in his dad's eyes is win first place ribbons running the mile, just like his mom did. But Sunny doesn't like running, never has. So he stops. Right in the middle of a race. With his relationship with his dad now worse than ever, the last thing Sunny wants to do is leave the other newbies—his only friends—behind. But you can't be on a track team and not run. So Coach asks Sunny what he wants to do. Sunny's answer? Dance. Yes, dance. But you also can't be on a track team and dance. Then, in a stroke of genius only Jason Reynolds can conceive, Sunny discovers a track event that encompasses the hard beats of hip-hop, the precision of ballet, and the showmanship of dance as a whole: the discus throw. But as he practices for this new event, can he let go of everything that's been eating him up inside?

Gravity Jun 01 2020 What keeps objects from floating out of your hand? What if your feet drifted away from the ground? What stops everything from floating into space? Gravity. As in his previous books, Redwoods, Coral Reefs, and Island, Jason Chin has taken a complex subject and made it brilliantly accessible to young readers in this unusual, innovative, and very beautiful book. Chin's approach makes this book a must-have common core tool for teachers and librarians introducing scientific principals to young students. A Neal Porter Book

All American Boys May 01 2020 A 2016 Coretta Scott King Author Honor book, and recipient of the Walter Dean Myers Award for Outstanding Children's Literature. In this New York Times bestselling novel, two teens—one black, one white—grapple with the repercussions of a single violent act that leaves their school, their community, and, ultimately, the country bitterly divided by racial tension. A bag of chips. That's all sixteen-year-old Rashad is looking for at the corner bodega. What he finds instead is a fist-happy cop, Paul Galluzzo, who mistakes Rashad for a shoplifter, mistakes Rashad's pleadings that he's stolen nothing for belligerence, mistakes Rashad's resistance to leave the bodega as resisting arrest, mistakes Rashad's every flinch at every punch the cop throws as further resistance and refusal to STAY STILL as ordered. But how can you stay still when someone is pounding your face into the concrete pavement? There were witnesses: Quinn Collins—a varsity basketball player and Rashad's classmate who has been raised by Paul since his own father died in Afghanistan—and a video camera. Soon the beating is all over the news and Paul is getting threatened with accusations of prejudice and racial brutality. Quinn refuses to believe that the man who has basically been his savior could possibly be guilty. But then Rashad is absent. And absent again. And again. And the basketball team—half of whom are Rashad's best friends—start to take sides. As does the school. And the town. Simmering tensions threaten to explode as Rashad and Quinn are forced to face decisions and consequences they had never considered before. Written in tandem by two award-winning authors, this four-starred reviewed tour de force shares the alternating perspectives of Rashad and Quinn as the complications from that single violent moment, the type taken directly from today's headlines, unfold and reverberate to highlight an unwelcome truth.

The Land of Open Graves Jan 27 2020 In his gripping and provocative debut, anthropologist Jason De León sheds light on one of the most pressing political issues of our time—the human consequences of US immigration policy. The Land of Open Graves reveals the suffering and deaths that occur

daily in the Sonoran Desert of Arizona as thousands of undocumented migrants attempt to cross the border from Mexico into the United States. Drawing on the four major fields of anthropology, De León uses an innovative combination of ethnography, archaeology, linguistics, and forensic science to produce a scathing critique of "Prevention through Deterrence," the federal border enforcement policy that encourages migrants to cross in areas characterized by extreme environmental conditions and high risk of death. For two decades, this policy has failed to deter border crossers while successfully turning the rugged terrain of southern Arizona into a killing field. In harrowing detail, De León chronicles the journeys of people who have made dozens of attempts to cross the border and uncovers the stories of the objects and bodies left behind in the desert. *The Land of Open Graves* will spark debate and controversy.

Elementary Gifted Education Quality Aug 04 2020 The purpose of this qualitative study was to explore discrepancies between teacher and parent perceptions of the effectiveness of the ways schools are addressing the academic and social-emotional needs of gifted elementary students. Eighteen teachers and 21 parents of gifted elementary students from 8 schools in 3 districts in eastern Pennsylvania completed surveys that included 18 Likert scale items and 2 open-ended questions. Additionally, 5 teachers and 5 parents of gifted elementary students participated in interviews. All of the interviews consisted of 12 questions, and the interviews were conducted individually. The survey items and interview questions for the teachers and parents were aligned; this enabled the researcher to compare the responses between the groups. Teachers and parents reported that their schools are meeting the academic needs of gifted elementary students in fairly effective ways. Both groups produced responses that indicated moderate levels of agreement with the Likert scale items about acceleration and enrichment. The responses to the open-ended and interview questions about academic needs were also positive. However, the 2 groups produced contrasting responses about the students' social-emotional needs. The teachers who participated in this study responded that schools are adequately addressing the social-emotional needs of gifted elementary students. Conversely, parents stated that their children do not receive services that effectively meet their social-emotional needs. The level of agreement on the Likert scale items about social-emotional services was much lower for parents than it was for teachers. Furthermore, parents shared strongly negative opinions about social-emotional services in the open-ended and interview questions.

Side by Side Comparison of the Book of Jasher and the Early Books of the Bible May 25 2022 The Book of Jasher and the Holy Bible - A Parallel Reading. While reading through The Book of Jasher I found myself often flipping through the Pentateuch for cross referencing. Hence the idea for this book. You will find an amazing amount of almost word-for-word parallels which lead one to wonder if perhaps one was a source for the other, or at the very least Moses and the author(s) of this book drew from the same oral traditions. To me this speaks well of the historical accuracy of this text and that it isn't some authors imaginative "filling in" details in the Biblical record.

A Private Little War Sep 04 2020 "The pilots of Flyboy, Inc., landed on the alien planet of Iaxo with a mission: In one year, quash an insurrection; exploit the ancient enmities of an indigenous, tribal society and kill the hell out of one group of natives to facilitate negotiations with the surviving group—all over 110 million acres of mixed terrain. At first, the double-hush, back-burner project went well. With a ten-century technological lead on the locals, the logistical support of a powerful private military company, and aid from other outfits on the ground, it was supposed to be an easy-in, easy-out mission that would make the pilots of Flyboy, Inc., very, very rich. But the natives of Iaxo had another plan—and what was once a strategic slam-dunk has become a quagmire, leaving the pilots of Flyboy, Inc., on an embattled distant planet, waiting for support and a ride home that may never come...This dark debut novel tells the tale of a secret war—and the struggle to stay sane in a world that makes no sense. A Catch-22 for a new generation, *A Private Little War* is sure to become a science fiction classic—cover verso."

Constellation Analysis Mar 30 2020 From a deeply philosophical perspective (drawing in particular on the work of Hegel, Gadamer, and Foucault), the author explores the ways in which topics in history education may be analysed and compared across international contexts.

Primary Science Education in East Asia Feb 19 2022 This edited volume is a state-of-the-art comparison of primary science education across six East-Asian regions; namely, the People's Republic of China, Republic of Korea, Republic of China, Hong Kong SAR, Japan, and Singapore. While news of educational policies, classroom teaching, assessment, and other educational innovations here often surface in the international media, this book brings together for the first time relevant information regarding educational systems and strategies in primary science in East Asia. Above all, it is a readable yet comprehensive survey—readers would have an accurate sense of what has been accomplished, what has not worked so well, and what remains to be done. Invited experts in comparative education research and/or science education also provide commentary by discussing common themes across the six regions. These types of critical synoptic reviews add much value by enabling readers to understand broad commonalities and help synthesize what must surely be a bewildering amount of very interesting albeit confusing body of facts, issues, and policies. Education in East Asia holds many lessons (both positive and negative) to offer to the rest of the world to which this volume is a timely contribution to the literature.
