Scientific English is possibly the most rewarding area of EFL teaching. It differs from English for Academic Purposes (EAP) as it is directed to a much smaller audience: PhD and postdoc students. Courses on Scientific English are held in universities throughout the world, yet there is very little support for teachers in understanding what to teach and how to teach it. This guide is part of the English for Academic Research series. Part 1 of the book sheds light on the world of academia, the writing of research papers, and the role of journal editors and reviewers. Part 2 gives practical suggestions on how to help your students improve their presentation skills. In Part 3 you will learn how to teach academic skills using nonacademic examples. Parts 1-3 are thus useful for anyone involved in teaching academic English, whether they have used the other books in the series or not. Part 4 suggests two syllabuses for teaching writing and presenting skills, based on the two core books: English for Writing Research Papers English for Presentations at International Conferences This book will help you i) understand the world of your students (i.e. academic research), ii) plan courses, and iii) exploit the What's the Buzz? sections in the books on Writing, Presentations, Correspondence and Interacting on Campus. Adrian Wallwork has written over 30 books covering General English (Cambridge University Press, Scholastic), Business English (Oxford University Press), and Scientific English (Springer). He has trained several thousand PhD students from all over the world to write and present their

research. Adrian also runs a scientific editing service: English for Academics (E4AC). This ambitious undertaking is designed to acquaint students, teachers, and researchers with reference sources in any branch of English studies, which Marcuse defines as "all those subjects and lines of critical and scholarly inquiry presently pursued by members of university departments of English language and literature." Within each of 24 major sections, Marcuse lists and annotates bibliographies, guides, reviews of research, encyclopedias, dictionaries, journals, and reference histories. The annotations and various indexes are models of clarity and usefulness, and cross references are liberally supplied where appropriate. Although cost-conscious librarians will probably consider the several other excellent literary bibliographies in print, such as James L. Harner's *Literary Research Guide* (Modern Language Assn. of America, 1989), larger academic libraries will want Marcuse's volume.-- Jack Bales, Mary Washington Coll. This volume explores both historical and current issues in English usage guides or style manuals. Guides of this sort have a long history: while Fowler's *Modern English Usage* (1926) is one of the best known, the first English usage guide was published in the UK in 1770, and the first in the US in 1847. Today, new titles come out nearly every year, while older works are revised and reissued. Remarkably, however, the kind of usage problems that have been addressed over the years are very much the same, and attitudes towards them are slow to change - but they do change. The chapters in this book look at how and why these guides are compiled, and by whom; what sort of advice they contain; how they differ from grammars and dictionaries; how attitudes to usage change; and why institutions such as the BBC need their own style guide. The volume will appeal not only to researchers and students in sociolinguistics, but also to general readers with an interest in questions of usage and prescriptivism, language professionals such as teachers and editors, and language policy makers.
