This innovative and interdisciplinary book makes a major contribution to common pool resource studies. It offers a new perspective on the sustainable governance of common resources, grounded in contemporary and archival research on the common lands of England and Wales - an important common resource with multiple, and often conflicting, uses. It encompasses ecologically sensitive environments and

landscapes, is an important agricultural resource and provides public access to the countryside for recreation. Contested Common Land brings together historical and contemporary legal scholarship to examine the environmental governance of common land from c.1600 to the present day. It uses four case studies to illustrate the challenges presented by the sustainable management of common property from an interdisciplinary perspective - from the Lake District, Yorkshire Dales, North Norfolk coast and the Cambrian Mountains. These demonstrate that cultural assumptions concerning the value of common land have changed across the centuries, with profound consequences for the law, land management, the legal expression of concepts of common 'property' rights and their exercise. The 'stakeholders' of today are the inheritors of this complex cultural legacy, and must negotiate diverse and sometimes conflicting objectives in their pursuit of a potentially unifying goal: a secure and sustainable future for the commons. The book also has considerable contemporary relevance, providing a timely contribution to discussion of strategies for the implementation of the Commons Act of 2006. The case studies position the new legislation in England and Wales within the wider context of institutional scholarship on the governance principles for successful common pool resource management, and the rejection of the 'tragedy of the commons'. There's a wonderful gift to show your appreciation! As the obituary writer in a spectacularly beautiful but often dangerous spit of land in Alaska, Heather Lende knows something about last words and lives well lived. Now she's distilled what she's learned about how to live a more exhilarating and meaningful life into three words: find the good. It's that simple--and that hard. Quirky and profound, individual and universal, Find the Good offers up short chapters that help us unlearn the habit--and it is a habit--of seeing only the negatives. Lende reminds us that we can choose to see any event--starting a new job or being laid off from an old one, getting married or getting divorced--as an opportunity to find the good. As she says, "We are all writing our own obituary every day by how we live. The best news is that there's still time for additions and revisions before it goes to press." Ever since Algonquin published her first book, the New York Times bestseller *If You Lived Here, I'd Know Your Name*, Heather Lende has been praised for her storytelling talent and her plainspoken wisdom. The Los Angeles Times called her "part Annie Dillard, part Anne Lamott," and that comparison has never been more apt as she gives us a fresh, positive perspective from which to view our relationships, our obligations, our priorities, our community, and our world. An antidote to the cynicism and self-centeredness that we are bombarded with every day in the news, in our politics, and even at times in ourselves, Find the Good helps us rediscover what's right with the world. "Heather Lende's small town is populated with big hearts--she finds them on the beach, walking her granddaughters, in the stories of ordinary peoples' lives, and knits them into unforgettable tales. Find the Good is a treasure." —Jo-Ann Mapson, author of *Owen's Daughter* "Find the Good is

excellent company in unsteady times . . . Heather Lende is the kind of person you want to sit across the kitchen table from on a rainy afternoon with a bottomless cup of tea. When things go wrong, when things go right, her quiet, commonsense wisdom, self-examining frankness, and good-natured humor offer a chance to reset, renew, rebalance.” —Pam Houston, author of *Contents May Have Shifted* “With gentle humor and empathy [Lende] introduces a number of people who provide examples of how to live well . . . [Find the Good] is simple yet profound.” —Booklist “In this cynical world, *Find the Good* is a tonic, a literary wellspring, which will continue to run, and nurture, even in times of drought. What a brave and beautiful thing Heather Lende has made with this book.” —John Straley, Shamus Award winner and former writer laureate of Alaska “Heather Lende is a terrific writer and terrific company: intimate, authentic, and as quirky as any of her subjects.” —Marilyn Johnson, author of *The Dead Beat*

The rise of manufacturing could not have happened without an attention to precision. At the dawn of the Industrial Revolution in eighteenth-century England, standards of measurement were established, giving way to the development of machine tools—machines that make machines. Eventually, the application of precision tools and methods resulted in the creation and mass production of items from guns and glass to mirrors, lenses, and cameras—and eventually gave way to further breakthroughs, including gene splicing, microchips, and the Hadron Collider. Simon Winchester takes us back to origins of the Industrial Age, to England where he introduces the scientific minds that helped usher in modern production: John Wilkinson, Henry Maudslay, Joseph Bramah, Jesse Ramsden, and Joseph Whitworth. It was Thomas Jefferson who later exported their discoveries to the fledgling United States, setting the nation on its course to become a manufacturing titan. Winchester moves forward through time, to today’s cutting-edge developments occurring around the world, from America to Western Europe to Asia. As he introduces the minds and methods that

have changed the modern world, Winchester explores fundamental questions. Why is precision important? What are the different tools we use to measure it? Who has invented and perfected it? Has the pursuit of the ultra-precise in so many facets of human life blinded us to other things of equal value, such as an appreciation for the age-old traditions of craftsmanship, art, and high culture? Are we missing something that reflects the world as it is, rather than the world as we think we would wish it to be? And can the precise and the natural co-exist in society?
