With over 20 million people on its payroll, the government continues to be the largest employer in the country. Managing people who do the nation's work is of critical importance to politicians and government leaders as well as citizens. The great recession of 2008 put enormous strains on governments, highlighting the key role personnel play in managing under times of austerity as well as prosperity. A thorough examination of political and historical aspects, *Personnel Management in Government: Politics and Process*, Seventh Edition provides students with a comprehensive understanding of human resource management within its historical and political context in the public sector. It discusses the development of public sector human resource management, the present status of best practices, and important insights from current scholarship on all three levels of government: federal, state, and local. See What's New in the Seventh Edition: Personnel reforms under the Obama administration Pension developments at state and local levels of government Labor relations reforms at state and local levels, e.g. recent experiences in Michigan, Ohio, and other states making big changes to labor laws and policies Changes to diversity and affirmative action initiatives across the nation Developments in performance outcome initiatives at all levels of government During the 36 years since the publication of the first edition, the authors have addressed issues that were not yet considered mainstream, yet have become so over time. The seventh edition is no different. It examines progress that public personnel professionals are making to address changes in the political, legal, and managerial environment of the current decade. Exploring developments and innovations in the management of people who carry out the government's work, the book introduces students to public sector personnel management. "Managers of recreation, sport, and leisure services perform a variety of activities. Perhaps the most essential of these activities is the management of human resources. Every person associated with an organization, directly or indirectly, is a resource. These people might be recreation directors, event planners, sport managers, park supervisors, therapeutic recreation specialists, or outdoor leaders. They might have full-time, part-time, seasonal, or voluntary status. It is a mistake to assume that these individuals will automatically fit together into a cohesive, coordinated team. Furthermore, it is an error to assume that people will automatically perform the appropriate tasks and perform those tasks in the most desirable manner. An effective team effort is essential to the operation of any organization, and it is the responsibility of the manager to make this happen. In summary, this textbook prepares students--whether they intend to work in commercial recreation, therapeutic recreation, outdoor recreation, governmental recreation, youth services, sports management, or event planning--with a solid foundation for human resource management. Theory and practice are combined to assist students in gaining a greater understanding of the many complexities they will encounter in the workplace."--Publisher's website.
