Framing a Lost City Aug 21 2022 When Hiram Bingham, a historian from Yale University, first saw Machu Picchu in 1911, it was a ruin obscured by overgrowth whose terraces were farmed by a few families. A century later, Machu Picchu is a UNESCO world heritage site visited by more than a million tourists annually. This remarkable transformation began with the photographs that accompanied Bingham's article published in *National Geographic* magazine, which depicted Machu Picchu as a lost city discovered. Focusing on the practices, technologies, and materializations of Bingham's three expeditions to Peru (1911, 1912, 1914–1915), this book makes a convincing case that visualization, particularly through the camera, played a decisive role in positioning Machu Picchu as both a scientific discovery and a Peruvian heritage site. Amy Cox Hall argues that while Bingham's expeditions relied on the labor, knowledge, and support of Peruvian elites, intellectuals, and peasants, the practice of scientific witnessing, and photography specifically, converted Machu Picchu into a cultural artifact fashioned from a distinct way of seeing. Drawing on science and technology studies, she situates letter writing, artifact collecting, and photography as important expeditionary practices that helped shape the way we understand Machu Picchu today. Cox Hall also demonstrates that the photographic evidence was unstable, and, as images circulated worldwide, the "lost city" took on different meanings, especially in Peru, which came to view the site as one of national patrimony in need of protection from expeditions such as Bingham's.

Shark Girl Feb 15 2022 A teenager struggles through physical loss to the start of acceptance in an absorbing, artful novel at once honest and insightful, wrenching and redemptive. (Age 12 and up) On a sunny day in June, at the beach with her mom and brother, fifteen-year-old Jane Arrowood went for a swim. And then everything -- absolutely everything -- changed. Now she's counting down the days until she returns to school with her fake arm, where she knows kids will whisper, "That's her -- that's Shark Girl," as she passes. In the meantime there are only questions: Why did this happen? Why her? What about her art? What about her life? In this striking first novel, Kelly Bingham uses poems, letters, telephone conversations, and newspaper clippings to look unflinchingly at what it's like to lose part of yourself - and to summon the courage it takes to find yourself again.

Anahulu Jul 28 2020 From the late 1700s, Hawaiian society began to change rapidly as it responded to the growing world system of capital whose

trade routes and markets crisscrossed the islands. Reflecting many years of collaboration between Marshall Sahlins, a prominent social anthropologist, and Patrick V. Kirch, a leading archaeologist of Oceania, Anahulu seeks out the traces of this transformation in a typical local center of the kingdom founded by Kamehameha: the Anahulu river valley of northwestern Oahu. Volume I shows the surprising effects of the encounter with the imperial forces of commerce and Christianity—the distinctive ways the Hawaiian people culturally organized the experience, from the structure of the kingdom to the daily life of ordinary people. Volume II examines the material record of changes in local social organization, economy and production, population, and domestic settlement arrangements.

Ships, Furs, and Sandalwood Aug 29 2020 Charles H. Hammatt arrived in Honolulu in 1823 anxious to do business, not to save souls. Young, confident, and ambitious, Hammatt had been entrusted by a mercantile firm in Boston with the delicate task of negotiating trade agreements with Hawaiian royalty to secure sandalwood for the China Trade. "We have no fears of your falling into any of the vices you will find at the Islands," his employers wrote in their detailed instructions, "but it may be well to reflect on them, to be better prepared to reside in a Society where indolence, intemperance, debauchery, and gambling are so fashionable." Hammatt remained in Hawai'i long enough to form his own opinions about native society and the odd mix of miscreants and missionaries that populated the largest port in the Pacific. His personal and business dealings brought him into close contact with a wide range of people, from the king, Liholiho (Kamehameha II), and his wary ministers to unscrupulous harbor merchants and sea captains and other "Yankee rogues." From time to time Hammatt also found himself among polite missionary society. He diligently recorded his encounters and observations in his journal, which, published here for the first time, provides an unexpected and intimate glimpse of life in frontier Hawai'i less than half a century after Cook's arrival. Ultimately, Hammatt proved unsuccessful in his business dealings, and in 1825 his employers ordered him home to Boston. But the account he left of his failed mission is an exciting and colorful addition to previous descriptions from the period. Hammatt learned the hard way that the Hawaiians were shrewd negotiators and in firm control of all aspects of trade with foreigners. Readers will delight in this unique view of a Yankee trader and his merchant rivals competing to do business with Hawaiian royalty.

Assembled for Use Mar 04 2021 A wide-ranging, multidisciplinary look at Native American literature through non-narrative texts like lists, albums, recipes, and scrapbooks Kelly Wisecup offers a sweeping account of early Native American literatures by examining Indigenous compilations: intentionally assembled texts that Native people made by juxtaposing and recontextualizing textual excerpts into new relations and meanings. Experiments in reading and recirculation, Indigenous compilations include Mohegan minister Samson Occom's medicinal recipes, the Ojibwe woman Charlotte Johnston's poetry scrapbooks, and Abenaki leader Joseph Laurent's vocabulary lists. Indigenous compilations proliferated in a period of colonial archive making, and Native writers used compilations to remake the very forms that defined their bodies, belongings, and words as ethnographic evidence. This study enables new understandings of canonical Native writers like William Apess, prominent settler collectors like Thomas Jefferson and Henry Rowe Schoolcraft, and Native people who contributed to compilations but remain absent from literary histories. Long before current conversations about decolonizing archives and museums, Native writers made and circulated compilations to critique colonial archives and foster relations within Indigenous communities.

Titus Coan Jun 19 2022 In this book Phil Corr provides a tour de force by writing for both the biography reader and the scholar. In this hybrid work he vividly portrays the life of Titus Coan, "the pen painter," while also filling gaps in the scholarship. These gaps include: the volume itself (no full-length published book has previously been written on Titus Coan) and the following chapters--"Patagonia," "Peace," and "Other Religions." Using the unpublished thesis by Margaret Ehlke and many other primary and secondary sources, he significantly deepens the understanding of Coan in many areas. This book is presented to the future reader for the purposes of edification and increasing the scholarship of this man who lived an incredible life during incredible times.

The Victorian Girl and the Feminine Ideal Jul 20 2022 In Victorian England, the perception of girlhood arose not in isolation, but as one manifestation of the prevailing conception of femininity. Examining the assumptions that underlay the education and upbringing of middle-class girls, this book is also a study of the learning of gender roles in theory and reality. It was originally published in 1982. The first two sections examine the image of women in the Victorian family, and the advice offered in printed sources on the rearing of daughters during the Victorian period. To illustrate the effect and evolution of feminine ideals over the Victorian period, the book's final section presents the actual experiences of several middle-class Victorian women who represent three generations and range, socioeconomically, from lower-middle class through upper-middle class.

Queen Ka'ahumanu of Hawaii Dec 25 2022 King Kamehameha the Great had 30 wives. Ka'ahumanu (c.1768-1832) was his favorite. Descended from Oceanian voyagers, she grew up in a society completely isolated from the rest of the world, her life enmeshed in dynastic wars and constrained by an elaborate system of taboos. In 1778, she was shocked by the arrival of alien ships, followed by an influx of foreigners. In their wake came devastating epidemics. Seizing power after the King's death, Ka'ahumanu overturned those taboos and guided her nation through revolutionary change, crucial to the Hawaiian Islands' unification. Through sicknesses, romances, infidelities, murders, rebellions, pardons, travels, missionary work, and more, her story challenges many beliefs about American history, Christianity, and gender. Further, it has implications for current debates about immigration, sexuality, and religious diversity. Drawing on seldom-analyzed French and Russian sources, this biography covers neglected aspects of Ka'ahumanu's life. The many spouses and lovers she and Kamehameha had, the roles played by Central Europeans, African-Americans, Catholics and Unitarians in her realm, and struggles with religious pluralism are all included.

Beyond Imported Magic Sep 22 2022 Studies challenging the idea that technology and science flow only from global North to South. The essays in this volume study the creation, adaptation, and use of science and technology in Latin America. They challenge the view that scientific ideas and technology travel unchanged from the global North to the global South—the view of technology as “imported magic.” They describe not only alternate pathways for innovation, invention, and discovery but also how ideas and technologies circulate in Latin American contexts and transnationally. The contributors' explorations of these issues, and their examination of specific Latin American experiences with science and technology, offer a broader, more nuanced understanding of how science, technology, politics, and power interact in the past and present. The essays in this book use methods from history and the social sciences to investigate forms of local creation and use of technologies; the circulation of ideas, people, and artifacts in local and global networks; and hybrid technologies and forms of knowledge production. They address such topics as the work of female forensic geneticists in Colombia; the pioneering Argentinean use of fingerprinting technology in the late nineteenth century; the design, use, and meaning of the XO Laptops created and distributed by the One Laptop per Child Program; and the development of nuclear energy in Argentina, Mexico, and Chile. Lost City of the Incas Oct 23 2022 First published in the 1950s, this is a classic account of the discovery in 1911 of the lost city of Machu Picchu. In 1911 Hiram Bingham, a pre-historian with a love of exotic destinations, set out to Peru in search of the legendary city of Vilcabamba, capital city of the last Inca ruler, Manco Inca. With a combination of doggedness and good fortune he stumbled on the perfectly preserved ruins of Machu Picchu perched on a cloud-capped ledge 2000 feet above the torrent of the Urubamba River. The buildings were of white granite, exquisitely carved blocks each higher than a man. Bingham had not, as it turned out, found Vilcabamba, but he had nevertheless made an astonishing and memorable discovery, which he describes in his bestselling book LOST CITY OF THE INCAS.
