The inside story of the laptop that exposed the

president's dirtiest secret. When a drug-addled Hunter Biden abandoned his waterlogged computer at a Mac repair shop in Delaware in the spring of 2019, just six days before his father announced his candidacy for the United States presidency, it became the ticking time bomb in the shadows of Joe Biden's campaign. The dirty secrets contained in Hunter's laptop almost derailed his father's presidential campaign and ignited one of the greatest media coverups in American history. This is the unvarnished story of what's really inside the laptop and what China knows about the Bidens, by the New York Post journalist who brought it into the open. It exposes the coordinated censorship operation by Big Tech, the media establishment, and former intelligence operatives to stifle the New York Post's coverage, in a chilling exercise of raw political power three weeks before the 2020 election. A treasure trove of corporate documents, emails, text messages, photographs, and voice recordings, spanning a decade, the laptop provided the first evidence that President Joe Biden was involved in his son's ventures in China, Ukraine, and beyond, despite his repeated denials. This intimate insight into Hunter's dissolute lifestyle shows he was incapable of holding down a job, let alone being paid tens of millions of dollars in high-powered international business deals by foreign interests, unless he had something else of value to sell—which of course he did. He was the son of the vice president who would go on to become the leader of the free world.

This book assesses Chinese acquisitions in developed countries, evaluates the drivers and opportunities and, above all, explores the major operational challenges. It discusses topics such as cross-cultural issues, integration strategies, risk and resilience, the influence of emerging technologies, servitization, impacts on reshoring, corporate social responsibility, branding strategies, knowledge management, and transfer of best practices. While emerging market multinational corporations' (EMNCs) use of mergers and acquisitions as a strategic vehicle has received considerable attention, much less is known about their post-entry activities, such as the implementation of post-acquisition and integration strategies. It can be expected that, compared with their Western counterparts, EMNCs will face radically different challenges that may undermine the success of their products, brands and marketing. Addressing these issues by means of a case study approach, this book is an ideal teaching resource for a variety of courses at both undergraduate and postgraduate level. It also appeals to academics, researchers, and practitioners with a keen interest in manufacturing industry.
