State Governments and Research Universities Jul 28 2021 Originally published in 2002, *State Governments and Research Universities* focuses on differences in unrestricted state appropriations for Carnegie Public Research I Universities during the 1990s. Through statistical analyses and case studies, a framework is developed that illuminates the impact of higher education governance, institutional characteristics, and economic, demographic, political, and cultural factors as critical elements determining levels of state appropriations for public research universities. The framework is strengthened through an application of organization theories from rational, political, and cultural perspectives. Among its most valuable contributions, the study places empirical evidence behind the assertion that future state support for research universities will be contingent on an institution's ability to demonstrate its service to the state.

Measuring History May 14 2020 *Measuring History* complements the cases presented in *Wise Social Studies Practices* (Yeager & Davis, 2005). Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state-level testing. In this book, the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them. At the heart of *Measuring History* are cases of classroom teachers in seven states (Florida, Kentucky, Michigan, New York, Texas, Mississippi, and Virginia) where new social studies standards and new, and generally high-stakes, state-level history tests are prominent. In these chapters, the authors describe and analyze the state's testing efforts and how those efforts are being interpreted in the context of classroom practice. The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform. Catherine Horn (University of Houston) and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment, the research literature, and the technical qualities of history tests.

**Bringing the State Back In** Mar 16 2023 Until recently, dominant theoretical paradigms in the comparative social sciences did not highlight states as organizational structures or as potentially autonomous actors. Indeed, the term 'state' was rarely used. Current work, however, increasingly views the state as an agent which, although influenced by the society that surrounds it, also shapes social and political processes. The contributors to this volume, which includes some of the best recent interdisciplinary scholarship on states in relation to social structures, make use of theoretically engaged comparative and historical investigations to provide improved conceptualizations of states and how they operate. Each of the book's major parts presents a related set of analytical issues about modern states, which are explored in the context of a wide range of

times and places, both contemporary and historical, and in developing and advanced-industrial nations. The first part examines state strategies in newly developing countries. The second part analyzes war making and state making in early modern Europe, and discusses states in relation to the post-World War II international economy. The third part pursues new insights into how states influence political cleavages and collective action. In the final chapter, the editors bring together the questions raised by the contributors and suggest tentative conclusions that emerge from an overview of all the articles. As a programmatic work that proposes new directions for the analysis of modern states, the volume will appeal to a wide range of teachers and students of political science, political economy, sociology, history, and anthropology.

**The Health Effects of Cannabis and Cannabinoids** Sep 29 2021 Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. *The Health Effects of Cannabis and Cannabinoids* provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agenda—outlining gaps in current knowledge and opportunities for providing additional insight into these issues—that summarizes and prioritizes pressing research needs.

**State Postsecondary Education Research** Feb 20 2021 This is an opportune time for researchers in higher education to examine policy via cross-state comparative analyses. Momentous court, legislative and policy developments that impact state-level higher education policy are emerging at a rapid rate. The states have emerged as postsecondary policy innovators in the areas of student financing, institutional accountability, and student access. Following political scientists' "rediscovery" of states as units of analysis--because they constitute unique "natural laboratories" for testing theory and hypotheses about political behavior and policy adoption dynamics--this book introduces this perspective as an increasingly important tool for researchers in higher education. *State Postsecondary Education Research* provides an in-depth examination of the challenges and opportunities inherent in conducting cross-state higher education policy research.

The authors of each chapter use their individual research projects to demonstrate the array of methodological, theoretical, analytical, and political challenges inherent in conducting comparative state-level policy research. Among the innovative methods described is the use of pooled cross-sectional time-series analytic techniques and event history analysis--now widespread within the disciplines of economics and political science--to shift the unit of analysis from the state to the state-year, thus expanding greatly both the statistical power of the models being tested and the data-demands of those models. The goal is to introduce comparative state-level postsecondary policy research to a broader audience, and to contribute to discussions of both the challenges and the importance of this approach to higher education policy research. The book is intended as a resource for researchers in higher education policy and as a text for higher education policy courses. It may also appeal to scholars of educational policy as well as higher education policymakers.

The State of Education Policy Research Mar 24 2021 The State of Education Policy Research is a comprehensive, insightful evaluation of the strengths and weaknesses of education policy research in the U.S. today. Editors Susan Fuhrman, David Cohen, and Fritz Mosher examine key issues facing policymakers and researchers including race, education equity, teacher quality, early education, privatization, and the politics of education policy. Collectively, the chapters present a complex mosaic of education policy research that integrates the views of policy experts from education, economics, and related disciplines. Important topics discussed in this influential new text include: Politics of education—Covers research on key political groups including teachers' unions, business roundtables, parent and/or religious advocates, as well as state and federal lawmakers.

Race—Discusses race as an issue as well as a non-issue and includes a discussion of the testing gap. State policies— Provides an overview of state policies directed at improving teacher quality and discusses the reality of a teacher shortage. National Trends—Analyzes current trends toward centralization and standardization and the growing influence of federal and state mandates. This book is appropriate for advanced courses in education administration, politics, and policy. It will also appeal to policy researchers in education, economics, and political science, to policy makers at the federal, state, and local levels and to the academic libraries serving them.

**State of the Research** Dec 21 2020 The Naval Hospital Cemetery in Brooklyn was established in 1831 and was closed in 1910. In 1926, the Navy disinterred burials from the cemetery and subsequently reinterred them at Cypress Hills National Cemetery, also in Brooklyn. This research effort was conducted by the Navy to address the issue of military burials that are not documented as having been removed from the Naval Hospital Cemetery during the 1926 disinterment action.

During the Navy's research on the cemetery, discrepancies regarding the number of burials and disinterments at the cemetery, as well as missing, incomplete, and contradictory information, were frequently encountered. These research obstacles have made it impossible for the Navy to provide definitive answers to the stated research goals. However, despite these challenges, a great deal of information was collected, including data on those Sailors, Marines, and members of their families who may not have been disinterred.

**The State of Open Data** Sep 10 2022 It's been ten years since open data first broke onto the global stage. Over the past decade, thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges. Meanwhile, issues related to data rights and privacy have moved to the centre of public and political discourse. As the open data movement enters a new phase in its evolution, shifting to target real-world problems and embed open data thinking into other existing or emerging communities of practice, big questions still remain. How will open data initiatives respond to new concerns about privacy, inclusion, and artificial intelligence? And what can we learn from the last decade in order to deliver impact where it is most needed? The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world, uncovering the issues that will shape the future of open data in the years to come.

**Research Handbook on European State Aid Law** Apr 12 2020 Erika Szyszczak and the team have come up trumps with a modern comment on state aid and policy. Thank you! Phillip Taylor MBE and Elizabeth Taylor, The Barrister Magazine This fine collection of essays demonstrates in a very articulate way why EU State aid law has taken the centre stage of EU law. In eighteen chapters the reader is provided with a fascinating snapshot of the main issues and developments of the law. The key elements of the EU policy are analysed in a critical way often leading to new insights. In addition the book contains a wealth of material greatly facilitating further research. Piet Jan Slot, University of Leiden, The Netherlands European state aid law needs more self-questioning and more intellectual debate. In my view, this Research Handbook is a very valuable contribution to this necessary process. It correctly identifies the most intellectually problematic issues within state aid law and asks the right questions. This may be due to the balance in the excellent selection of contributors, coming both from the academia and from practice. This guarantees, on the one hand, that the questions are relevant in practice and not purely theoretical but also provides, on the other hand, for a rigorous analytical approach when confronting the issues. The result is a fresh and interesting new look to many of the basic issues of state aid law. JosŽ Luis Buendia Sierra, Garrigues, Brussels, Belgium, and King's College London, UK This Research Handbook provides an in-depth exploration of some of the most difficult and controversial issues in current State aid law and policy. It is unusual in providing not only a legal but also an economic and political science perspective on this rapidly developing area of EU law. The Handbook will be a welcome addition to

the shelves of State aid practitioners and academics alike. Æ Æ Kelyn Bacon, Brick Court Chambers, London, UK This timely new Handbook reflects on current issues that confront State aid law and policy in the EU. State aid was a neglected area of competition law until attempts to modernise it became central to the Lisbon process 2000 where the aim was to encourage ÆintelligentÆ State aid by reducing aid to specific sectors and by making better use of aid for horizontal projects central to EU integration concerns. This policy framework has underpinned the new approach to State aid policy in the EU in recent years and informs many of the chapters in this book. Contributions from leading academics, regulators and practising lawyers, discuss topics devoted to modernisation, problems faced by recent enlargements of the EU, the role of State aid in the fiscal crisis and recession, the role of the private market investor test, regional aid, environmental aid and the review of the Altmark ruling. Perspectives on State aid law and policy from the disciplines of economics and political science are also explored in detail. Research Handbook on European State Aid Law will appeal to academics, regulators, national and EU government officials, practitioners and postgraduate students who are involved in State aid law.

**The State of Patenting at Research Institutions in Developing Countries: Policy Approaches and Practices** Jun 14 2020 This study discusses the opportunities and challenges offered by patents to foster technology transfer from government funded research institutions in developing countries. It presents a review of policy frameworks and recent policy changes aimed to foster academic patenting and technology transfer in low- and middle-income countries. It then analyzes patenting activities by universities and public research organizations and compares these trends with respect to high-income countries. This analysis is complemented with an assessment of the current state of patenting and technology commercialization practices in a selected group of technology transfer offices.
