Selected Speeches and Writings of Theodore Roosevelt Oct 11 2022 Theodore Roosevelt (1858-1919) was America's most published president with an incredible output of writing including forty books, over a thousand articles, and countless speeches and letters. Collected here in one volume are examples of Roosevelt's voluminous writings over a dazzling array of topics. Organized by general categories, readers can sample writings on subjects as varied as the environment, the danger of professional sports; the famous charge of San Juan Hill, and Roosevelt's passion for literary criticism. From addresses and presidential messages on public policy and national ideals, to biography, to travel writing, to ecological concerns, to writings on hunting, to international politics and history, Roosevelt's talents and achievements as a writer went far beyond what we now expect of our public leaders. Roosevelt's legacy as one of the first progressive American politicians, his concerns about environmentalism, his internationalism, and his unflinching belief in the American character and destiny uncannily speak to the issues of our own day and can be found in the pages of this representative and judicious anthology of his work.

A Time to Speak Jan 02 2022 For more than fifty years, Jack Reed, Sr. (1924-2016) was a voice of reason in Mississippi—speaking from his platform as a prominent businessman and taking leadership roles in education, race relations, economic and community development, and even church governance. Hardly one to follow the status quo, Reed always delivered his speeches with a large dose of good cheer. His audiences, though, did not always reciprocate, especially in his early years when he spoke out on behalf of public education and racial equality. His willingness to participate in civic affairs and his oratorical skills led him to leadership roles at state, regional, and national levels—including the presidency of the Mississippi Economic Council, chairmanship of President George H. W. Bush's National Advisory Council on Education, and charter membership on the United Methodist Church Commission on Religion and Race. A Time to Speak brings together more than a dozen of Reed's speeches over a fifty-year period (1956-2007). The Tupelo businessman discusses the events surrounding his talks about race relations within his church, his deep involvement in education with his close friend, Governor William Winter, and with President George H. W. Bush, and his own campaign for governor as a Republican in 1987. Danny McKenzie places this original material in historical context. A Time to Speak illustrates how a private citizen with courage can effect positive change.

Staging Words, Performing Worlds Jan 14 2023 *Staging Words* presents new perspectives on Argentina, Cuba, Mexico, and Venezuela and their theater, by postulating that nation can be imagined and reconstructed through the deliberate performance of intertexts. The book shows how past artistic texts - other plays, stories, newspaper articles, songs, or paintings - can be manipulated and translated to create a new theatrical script, and that this new script can expose an innovative space for interpreting the nation. The introduction reviews theories of intertextuality, nation, and nationalism and applies them to Latin America. Each chapter studies two to three plays and shows how the intertexts open up hidden connections and border spaces within texts and between texts that the new writer and reader fill with significance, replacing the meaning of the pretext with their own. This new textual voice permits texts to be restaged, reconfigured, and imagined in a way that is purely Latin American.

Renewing Meaning Jun 07 2022 At the birth of analytic philosophy Frege created a paradigm that is centrally important to how meaning has been understood in the twentieth century. Frege invented the now familiar distinctions of sense and force, of sense and reference, of concept and object. He introduced the conception of sentence meaning as residing in truth-conditions and argued that semantics is a normative enterprise distinct from psychology. Most importantly, he created modern quantification theory, engendering the idea that the syntactic and semantic forms of modern logic underpin the meanings of natural-language sentences. Stephen Barker undertakes to overthrow Frege's paradigm, rejecting all the above-mentioned features. The framework he offers is a speech-act-based approach to meaning in which semantics is entirely subsumed by pragmatics. In this framework: meaning resides in syntax and pragmatics; sentence-meanings are not propositions but speech-act types; word-meanings are not objects, functions, or properties, but again speech-act types; pragmatic phenomena one would expect not to figure in semantics, such as pretence, enter into the logical form of sentences; a compositional semantics is provided by showing how speech-act types combine together to form complex speech-act types; the syntactic structures invoked are not those of quantifiers, open sentences, variables, variable-binding, etc., rather they are structures specific to speech-act forms, which link logical form and surface grammar very closely. According to Barker, a natural language - a system of thought - is an emergent entity that arises from the combination of simple intentional structures, and certain non-representational cognitive states. It is embedded in, and part of, a world devoid of normative facts *qua* extra-linguistic entities. The world, in which the system is embedded, is a totality of particular states of affairs. There is no logical complexity in *re*; it contains mereological complexity only. Some truths have truth-makers, but others, logically complex truths, lack them. Nevertheless, the truth-predicate is univocal in meaning. *Renewing Meaning* is a radical, ambitious work which offers to transform the semantics of natural language.

The Strenuous Life Feb 20 2021 First published in 1900, "The Strenuous Life" is a collection of essays and speeches by American President Theodore Roosevelt. The title comes from his famous 1899 speech, also called "The Strenuous Life", which is included in this collection. In this well-known address, Roosevelt argues that the application of great effort in all our work and the striving to overcome hardship were ideal characteristics to be embraced by Americans for the betterment of the nation. The remaining essays and speeches continue in this theme and also explore the factors necessary for one to have a healthy social and individual life and how one can apply these traits to help form a healthy political life for the nation. Roosevelt valued hard work and manual labor as essential to a robust nation and implored those who do not engage in such labor to devote themselves to science and art for the benefit of the country as a whole. Roosevelt railed against laziness and idleness as the antithesis of success and health. All together this collection includes nineteen essays and speeches by one of America's most renowned Presidents. This edition is printed on premium acid-free paper.

Talk Talk Talk Sep 29 2021 With a mixture of erudition and humor, Canadian radio personality Jay Ingram discusses the sociology of talking: the dynamics of conversation, men and women's different propensities for interrupting, and even the proper use of "you know." But he also delves into the mystery-riddled physiology of talking. While we now know that certain areas of the brain seem to control specific aspects of speech—from articulating words to creating meaningful sentences—how do scientists explain the extraordinary case of the young stroke victim who lost only the words for fruits and vegetables? Is it possible that the ability to talk is actually encoded in our genes, as some scientists believe? From the language roots of North America to the speech differences between Neanderthals and Cro-Magnons, from modern children creating whole new languages in one generation to Freudian slips, from talking to yourself to speaking in tongues, Talk, Talk, Talk covers the gamut of humankind's most enigmatic and intriguing skill. Impeccably researched, lively and accessible, Talk, Talk, Talk is a book you won't be able to keep quiet about.

Proto-Phenomenology, Language Acquisition, Orality and Literacy Feb 15 2023 Through his innovative study of language, noted Heidegger scholar Lawrence Hatab offers a proto-phenomenological account of the lived world, the "first" world of factual life, where pre-reflective, immediate disclosiveness precedes and makes possible representational models of language. Common distinctions between mind and world, fact and value, cognition and affect miss the meaning-laden dimension of embodied, practical existence, where language and life are a matter of "dwelling in speech." In this second volume, Hatab supplements and fortifies his initial analysis by offering a detailed treatment of child development and language acquisition, which exhibit a proto-phenomenological world in the making. He then takes up an in-depth study of the differences between oral and written language (particularly in the ancient Greek world) and how the history of alphabetic literacy shows why Western philosophy came to emphasize objective, representational models of cognition and language, which conceal and pass over the presentational domain of dwelling in speech. Such a study offers significant new angles on the nature of philosophy and language.
