Beginning with the Cold War and concluding with the 2003 invasion of Iraq, Hannah Gurman explores the overlooked opposition of U.S. diplomats to American foreign policy in the latter half of the twentieth century. During America's reign as a dominant world power, U.S. presidents and senior foreign policy officials largely ignored or rejected their diplomats' reports, memos, and telegrams, especially when they challenged key policies relating to the Cold War, China, and the wars in Vietnam and Iraq. *The Dissent Papers* recovers these diplomats' invaluable perspective and their commitment to the transformative power of diplomatic writing. Gurman showcases the work of diplomats whose opposition enjoyed some success. George Kennan, John Stewart Service, John Paton Davies, George Ball, and John Brady Kiesling all caught the attention of sitting presidents and policymakers, achieving temporary triumphs yet ultimately failing to change the status quo. Gurman follows the circulation of documents within the State Department, the National Security Council, the C.I.A., and the military, and she details the rationale behind "The Dissent Channel," instituted by the State Department in the 1970s, to both encourage and contain dissent. Advancing an alternative narrative of modern U.S. history, she connects the erosion of the diplomatic establishment and the weakening of the diplomatic writing tradition to larger political and ideological trends while, at the same time, foreshadowing the resurgent significance of diplomatic writing in the age of Wikileaks. In 1974 the Greek colonels ousted the Greek-Cypriot leader of Cyprus, Archbishop Makarios, and Turkey retaliated by invading and seizing a third of the island. Cyprus remains split in two, like Berlin before the wall came down, bristling with troops and spying bases, and permanently policed by the United Nations. Henry Kissinger claimed he could do nothing to stop the coup because of the Watergate crisis, but this book presents evidence to support the view that it was no failure of

American foreign policy, but the realization of a long-term plot. The authors describe the strategic reasons for Washington's need to divide the island. Their account encompasses an international cast of characters that includes Eden, Eisenhower, Nixon, Kissinger, Wilson, Callaghan, Grivas, and the leaders of the two halves of the divided island, Clerides and Denktas. In a scholarly career, much time and effort will be spent on business correspondence. This brief practical guide shows how to effectively write daily letters, memos, letters of recommendation, tenure letters, and grant proposals for better communication. -- Publisher description The chairman of the board of Bear Stearns investment bank shares his innovative approach to business in a collection of witty, trenchant, and inspirational thoughts on success, bureaucracy, arrogance, telephone manners, and other topics. Provides an insider's view of Hollywood's most glamorous era and the elements of film production The selection of federal judges constitutes one of the more significant legacies of any president; the choices of Lyndon Baines Johnson affected important social policies for decades. This book explores the process of making judicial appointments, examining how judges were selected during Johnson's administration and the president's own participation in the process. Appointment of Judges: The Johnson Presidency is the first in-depth study of the judicial selection process in the Johnson years and is one of the few books that has analyzed any individual president's process. Based on sources in the archives of the Lyndon Baines Johnson Library and correspondence from senators, party officials, Justice Department officers, the American Bar Association, Supreme Court justices, and the candidates themselves, the book is an important exploration of a significant aspect of presidential power. The author shows that Johnson recognized the great impact for social and economic policy the judiciary could have in America and sought out judges who shared his vision of the Great Society. More than any previous president since William Howard Taft, Johnson took an active personal role in setting up the criteria for choosing judges and in many cases participated in decisions on individual nominees. The president utilized the resources of the White House, the Department of Justice, other agencies, and private individuals to identify judicial candidates who met criteria of compatible policy perspective, excellent legal qualifications, political or judicial experience, youth, and ethnic diversity. The book notes how the criteria and judicial selection process evolved over time and how it operated during the transitions between Kennedy and Johnson and between Johnson and Nixon. Chapters five and six offer the views of political scientists on the topic, one in light of the

global systems theory, the other from the perspective of domestic opinion and governance. The concluding essay is written by historians Fred Anderson and Andrew Cayton, whose co-authored book *The Dominion of War: Empire and Liberty in North America, 1500-2000* provided the common reading for the symposium which produced these essays. *America, War and Power* will be of much interest to students and scholars of US military history, US politics and military history and strategy in general.
