A good quality book, tightly bound, and well illustrated.' – Colin, Amazon reviewer 'The Short Story of Art is an attractive volume that serves as a convenient introduction to major movements, works, themes, and techniques of Western art. The works within are featured more for their seminal or illustrative nature than their fame per se, so the "story" part of the title is apt. **The Whole Picture** Jun 04 2020 "Probing, jargon-free and written with the pace of a detective story... [Procter] dissects western museum culture with such forensic fury that it might be difficult for the reader ever to view those institutions in the same way again." Financial Times 'A smart, accessible and brilliantly structured work that encourages readers to go beyond the grand architecture of cultural institutions and see the problematic colonial histories behind them.' - Sumaya Kassim Should museums be made to give back their marbles? Is it even possible to 'decolonize' our galleries? Must Rhodes fall? How to deal with the colonial history of art in museums and monuments in the public realm is a thorny issue that we are only just beginning to address. Alice Procter, creator of the Uncomfortable Art Tours, provides a manual for deconstructing everything you thought you knew about art history and tells the stories that have been left out of the canon. The book is divided into four chronological sections, named after four different kinds of art space: The Palace, The Classroom, The Memorial and The Playground. Each section tackles the fascinating, enlightening and often shocking stories of a selection of art pieces, including the propaganda painting the East India Company used to justify its rule in India; the tattooed Maori skulls collected as 'art objects' by Europeans; and works by contemporary artists who are taking on colonial history in their work and activism today. The Whole Picture is a much-needed provocation to look more critically at the accepted narratives about art, and rethink and disrupt the way we interact with the museums and galleries that display it.

Gombrich set out to answer in his magisterial The Story of Art. Contemporary art seems totally unlike what came before it, departing from the road map supplied by Raphael, Dürer, Rembrandt, and other European masters. In The Story of Contemporary Art, Tony Godfrey picks up where Gombrich left off, offering a lively introduction to contemporary art that stretches from Andy Warhol's Brillo boxes to Marina Abramovič's performance art to today's biennale circuit and million-dollar auctions. **Learning to Look** Oct 09 2020 Sometimes seeing is more difficult for the student of art than believing. Taylor, in a book that has sold more than 300,000 copies since its original publication in 1957, has helped two generations of art students "learn to look." This handy guide to the visual arts is designed to provide a comprehensive view of art, moving from the analytic study of specific works to a consideration of broad principles and technical matters. Forty-four carefully selected illustrations afford an excellent sampling of the wide range of experience awaiting the explorer. The second edition of Learning to Look includes a new chapter on twentieth-century art. Taylor's thoughtful discussion of pure forms and our responses to them gives the reader a few useful starting points for looking at art that does not reproduce nature and for understanding the distance between contemporary figurative art and reality.

**A History of Art History** Jul 06 2020 "In this authoritative book, the first of its kind in English, Christopher Wood tracks the evolution of the historical study of art from the late middle ages through the rise of the modern scholarly discipline of art history. Synthesizing and assessing a vast array of writings, episodes, and personalities, this original and accessible account of the development of art-historical thinking will appeal to readers both inside and outside the discipline. The book shows that the pioneering chroniclers of the Italian Renaissance--Lorenzo Ghiberti and Giorgio Vasari--measured every epoch against fixed standards of quality. Only in the Romantic era did art historians discover the virtues of medieval art, anticipating the relativism of the later nineteenth century, when art history learned to admire the art of all societies and to value every work as an index of its times. The major art historians of the modern era, however--Jacob Burckhardt, Aby Warburg, Heinrich Wölfflin, Erwin Panofsky, Meyer Schapiro, and Ernst Gombrich--struggled to adapt their work to the rupture of artistic modernism, leading to the current predicaments of the discipline. Combining erudition with clarity, this book makes a landmark contribution to the understanding of art history."--from book jacket

**The Brilliant History of Color in Art** Aug 19 2021 The history of art is inseparable from the history of color. And what a fascinating story they tell together: one that brims with an all-star cast of characters, eye-opening details, and unexpected detours through the annals of human civilization and scientific discovery. Enter critically acclaimed writer and popular journalist Victoria Finlay, who here takes readers across the globe and over the centuries on an unforgettable tour through the brilliant history of color in art. Written for newcomers to the subject and aspiring young artists alike, Finlay's quest to uncover the origins and science of color will beguile readers of all ages with its warm and conversational style. Her rich narrative is illustrated in full color throughout with 166 major works of art—most from the collections of the J. Paul Getty Museum. Readers of this book will revel in a treasure trove of fun-filled facts and anecdotes. Were it not for Cleopatra, for instance, purple might not have become the royal color of the Western world. Without Napoleon, the black graphite pencil might never have found its way into the hands of Cézanne. Without mango-eating cows, the sunsets of Turner might have lost their shimmering glow. And were it not for the pigment cobalt blue, the halls of museums worldwide might still be filled with forged Vermeers. Red ocher, green earth, Indian yellow, lead white—no pigment from the artist's broad and diverse palette escapes Finlay's shrewd eye in this breathtaking exploration.

*The Books that Shaped Art History: From Gombrich and Greenberg to Alpers and Krauss* Jun 16 2021 An exemplary survey that reassesses the impact of the most important books to have shaped art history through the twentieth century Written by some of today's leading art historians and curators, this new collection provides an invaluable road map of the field by comparing and reexamining canonical works of art history. From Émile Mâle's magisterial study of thirteenth-century French art, first published in 1898, to Hans Belting's provocative Likeness and Presence: A History of the Image before the Era of Art, the book provides a concise and insightful overview of the history of art, told through its most enduring literature. Each of the essays looks at the impact of a single major book of art history, mapping the intellectual development of the writer under review, setting out the premises and argument of the book, considering its position within the broader field of art history, and analyzing its significance in the context of both its initial reception and its afterlife. An introduction by John-Paul Stonard explores how art history has been forged by outstanding contributions to scholarship, and by the dialogues and ruptures between them.

*Social Forms: A Short History of Political Art* Oct 21 2021 In an increasingly polarized world, with shifting and extreme politics, Social Forms illustrates artists at the forefront of political and social resistance. Highlighting different moments of crisis and how these are reflected and preserved through crucial artworks, it also asks how to make art in the age of Brexit, Trump, and the refugee and climate crises. In Social Forms: A Short History of Political Art, renowned critic, curator, and writer Christian Viveros-Fauné has picked fifty representative artworks—from Francisco de Goya's The Disasters of War (1810–1820) to David Hammons's In the Hood (1993)—that give voice to some of modern art's strongest calls to political action. In accessible and witty entries on each piece, Viveros-Fauné paints a picture of the context in which each work was created, the artist's background, and the historical impact of each contribution. At times artists create projects that subvert existing power structures; at other moments they make artwork so powerful it challenges the very fabric of society. Whether it is Picasso's Guernica and its place at the 1937 Worlds Fair, or Jenny Holzer's Truisms (1977–1979), which still stop us in our tracks, this book tells the story behind some of the most important and unexpected encounters between artworks and the real worlds they engage with. Never professing to be a definitive history of political art, Social Forms delivers a unique and compelling portrait of how artists during the last 150 years have dealt with changing political systems, the violence of modern warfare, the rise of consumer culture worldwide, the prevalence of inequality and racism, and the challenges of technology.

**The King in Yellow** Apr 02 2020 Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893. Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began to draw warring sects together, many thought the millennium had arrived, at least in the new world which after all is a world by itself.

**The Art of Reading** Apr 26 2022 "Why do artists love books?" This volume takes this tantalizingly simple question as a starting point to reveal centuries of symbiosis between the visual and literary arts. First looking at the development of printed books and the simultaneous emergence of the modern figure of the artist, The Art of Reading appraises works by the many great masters who took inspiration from the printed word. Authors Jamie Camplin and Maria Ranauro weave together an engaging cultural history that probes the ways in which books and paintings represent a key to understanding ourselves and the past. Paintings contain a world of information about religion, class, gender, and power, but they also reveal details of everyday life often lost in history texts. Such artworks show us not only how books have been valued over time but also how the practice of reading has evolved in Western society. Featuring over one hundred works by artists from across Europe and the United States and all painting genres, The Art of Reading explores the two-thousand-year story of the great painters and the preeminent information-providing, knowledge-endowing, solace-giving, belief-supporting, leisure-enriching, pleasure-delivering medium of all time: the book.
